-----Arches----- NATIONAL MONUMENT

-----Moab, Utah-----

January 24, 1945

MEMORANDUM for the Regional Director, Region Three:

The following is a narrative report for Arches National Monument for the month of January, 1945:

GENERAL: Relief Ranger Harry Reed finally departed for his new assignment at Tumacacori National Monument, after having to postpone his leaving due to snow storms. He left on December 29th.

TRAVEL: Travel was just about nil for the month due to stormy weather, with only 10 people signing the register. The only travellers who received any benefit from the road improvement work performed last month on the Windows road, were the sheep men who range their herds in this section.

WEATHER: It has been considerably warmer during most of this month. We have had rain and light snow falls regularly since the 15th of January and snow is falling at this writing. It does not last long on the ground due to the warm weather.

N. P. S. VISITORS: Superintendent Nusbaum, Mesa Verde National Park, paid us a visit on January 9th, enroute to Mesa Verde from Colorado National Monument, where he had been on the business of the reduction of the buffalo herd which ranges on the monument.

MAINTENANCE: The floors of the quarters were worked over during the month. Finished removing the varnish from the living room floor and went over all the hardwood floors with a heavy coat of wax.

Finished filling the water storage tanks on January 20th and we now have a 20,000 gallon supply. Samples of water submitted to the Utah State Board of Health, for analysis, have been satisfactory.

Most of the work for the month has been concentrated ^{on cleanup} of utility building and adjoining area. Have most of the supplies and materials under cover, or behind the fence of the old corral, which will be used as a storage yard.

SALT VALLEY NATIONAL MONUMENT
ALBUQUERQUE, NEW MEXICO

January 24, 1916.

GRAZING: A trip was made into the Windows section with Harley M. Handy, District Grazier, who was making his first trip into this area. We dropped down to the Salt Wash directly behind the Windows where we received a good view of the Cache Valley and Dry Mesa sections of the monument.

All sheep men, who use the Grazing Service land adjoining the monument as winter range, have their herds in the vicinity. I have checked the Salt Valley and Balanced Rock areas for evidence of trespass and found evidence of grazing near the Dark Angel in the Devils Garden section but none in the Balanced Rock Area. Herds have crossed the monument in the Salt Valley and near Balanced Rock, under permit. The Turnbow property, within the monument, has been leased by one of the sheep men for access to water in the Salt Wash.

AZTEC, NEW MEXICO

January 24, 1945.

MEMORANDUM for the Regional Director,
Region Three, National Park Service.

There follows the report of activities for Aztec Ruins
National Monument for January 1945.

GENERAL

Cloudy, cold weather has predominated with a low of 6 and a high temperature of 57 degrees. Snow falls have been recorded upon 7 days for a total of 9.50 inches, and a total precipitation of 0.72 inches.

Considerable time has been spent in location of sources for gravel and in the procurement of laborers for the drainage ditch project.

SPECIAL ACTIVITIES

1/2, to Farmington, New Mexico, to confer with Soil Conservation representatives and to obtain the services of a plumber.

1/4, with Mr. Hugie, SCS, to locate a gravel site for use in the drainage ditch project.

1/16, to Farmington to see the OPA and to straighten out old accounts with the Wallace Furniture Co.

MAINTENANCE

The toilet tank float and shut-off mechanism was replaced in the residence bathroom.

Large portions of the ceiling plaster within both public restrooms fell due to the settling of the structure as a result of frost. Prefabricated wallboard was used in repair.

All lumber and working equipment in the area of the wells was removed to the utility area, preparatory to the construction of the drainage ditch.

Considerable effort has been made to operate the water softener. Portions of the piping have been replaced and a great amount of washing with salt brine has been accomplished without

any efficient increase in its operation.

Removed the limestone discs in the Grand Kiva and placed them upon 2 x 4 supports so to prevent them from absorbing moisture from the damp floor.

Placed felt weather strips upon the front and rear doorways of the residence.

Refilled all soda-acid fire extinguishers.

INTERPRETATIVE SERVICES

There were 105 visitors conducted on 27 trips thru the Ruins and 126 visitors in 31 parties shown thru the museum.

INCREASE OR DECREASE IN TRAVEL

There were 126 visitors in 35 cars from 11 states. This is 55 1/2% of the travel for January 1944, a decrease of 44 1/2%.

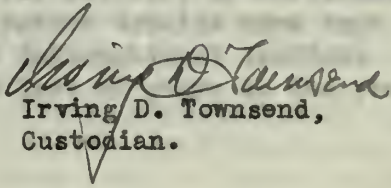

Of the 126 visitors, 72 purchased tickets to the ruins, amounting to \$21.60, and with tax on 8 children the total collections amounted to \$22.00.

There were 6 members of the armed forces for whom admission was waived.

As during past recent months local residents with visiting friends and relatives made up the greatest percentage of travel, while members of the armed forces and transient war workers and salesmen completed the total.

Building Fire Protection

All fire extinguishers were inspected and the soda acid type refilled.

Irving D. Townsend,
Custodian.

any additional increase in its operations.

BANDELIER NATIONAL MONUMENT

SANTA FE, NEW MEXICO

January 27, 1945

MEMORANDUM for the Regional Director, Region Three.

There follows a report of activities at Bandelier National Monument for the month of January, 1945.

General The weather has been stormy, roads bad and public use at Bandelier has been low for the period. The scarcity of visitors has released personnel to accomplish several maintenance projects. The Army seems to be headed off for the time being, but we are constantly on guard to see where the next out-break will come. Probably the first visitors in history to arrive by boat came to us during the month.

Weather and Roads. Early January was fair and cold. Later in the month the weather was stormy and cold. Greatest snowfall of 8 inches occurred on the 23rd. Roads have been icy in cold weather and very muddy when the weather moderated.

Administrative. The Custodian met with Army Engineers on January 2nd to locate a truck trail in Sandia Canyon which they need to get poles and materials for the power line being built in Upper Sandia above the monument boundaries. Latest inspections reveal that they are building far more than a power line in Sandia and will probably want to pave the truck trail. Close watch is being kept on developments.

Several trips to Santa Fe were necessary to return equipment loaned to the Post Office Department for delivery of Christmas mail. The usual reports and administrative details were kept current. Our consignment of two-fold informational leaflets printed in Spanish arrived (enough to last 20 years at the present rate of consumption).

Maintenance and Improvements.

The large dead pine by the corner of the campground comfort station was removed and the logs hewn into timbers for rebuilding the campground vehicle bridge. The bridge was overhauled and rebuilt. This log bridge had rotted until it was unsightly and unsafe. The job assumed the proportions of a major project before we got it finished. The hot water line to the bathroom of Residence #2 burst and caused damage. The pipes are encased

1. The first step is to identify the problem. This involves understanding the situation and the needs of the people involved. It is important to gather information and listen to the concerns of all parties.

1. The first step in the process of identifying a problem is to define the problem. This involves identifying the symptoms of the problem and determining the scope of the problem. Once the problem has been defined, the next step is to identify the causes of the problem. This involves identifying the factors that are contributing to the problem and determining the underlying causes. Once the causes have been identified, the next step is to develop a plan of action. This involves identifying the steps that need to be taken to solve the problem and determining the resources that will be needed to implement the plan. Finally, the last step in the process is to implement the plan and monitor the results. This involves putting the plan into action and tracking the progress of the solution. Once the problem has been solved, the final step is to evaluate the results and determine if the solution was effective. This involves comparing the results of the solution to the original problem and determining if the problem has been resolved.

in stone masonry and concrete so a difficult job had to be performed to find and repair the break. The project of constructing doors to close the large opening between the Museum Lobby and the Office was started. Dutch doors will be installed and the publications sales display case enlarged in accordance with approved plans. The Operator's Apartment in the Lodge was re-decorated and the interior re-painted.

Travel. 98 people came to the monument in 22 cars and 3 arrived by boat. Most of the travel came in on Sundays.

Interpretation. Our visitors were conducted to the ruins and museum in 11 parties. Inclement weather caused many to forego the ruins trips until conditions were more pleasant. All the people were contacted at the Lobby and many spent time going over the museum and thru our study collections rather than make the ruins trip.

Visitors. Park Naturalist Schellbach of Grand Canyon National Park and Louis Caywood, Assistant Naturalist from Santa Fe spent the day January 18th inspecting our interpretive program. Mr. Schellbach furnished many valuable suggestions regarding our museum and interpretive program in general.

Ranger Service. Three men from Los Alamos left Otowi the morning of January 20 in a boat intending to run the White Rock Canyon of the Rio Grande and float on to Albuquerque. Their expedition came to grief just above Pijoles Sunday evening in a blinding snow storm. The boat turned over in the rapids and the three were pitched into the water and floating ice. Fortunately all managed to swim ashore and even to pull the boat ashore below the rapids and salvage some of their equipment. They made their way in zeor weather up the canyon to Headquarters where they arrived more dead than alive about 10:00 P. M. Sunday night. They were thawed out, dried out and fed; made comfortable for the night. By Monday morning they were able to be transported to Los Alamos in an ambulance. Last reports say all will be none the worse for their experiences. They donated their boat in disgust to the Park Service and have sworn off river exploration. So far as I know, they have the distinction of being the first visitors to Bandelier to arrive by boat.

Chester A. Thomas,
Custodian.

Public Hall

The West of the Collection was last well shown with the last part north, probably caused by the influence of the Texas River in the morning.

In some cases, the evidence is so strong that it is not necessary to call the witnesses. The evidence of the witnesses is so strong that it is not necessary to call the witnesses. The evidence of the witnesses is so strong that it is not necessary to call the witnesses.

There is no doubt that the evidence is so strong that it is not necessary to call the witnesses. The evidence of the witnesses is so strong that it is not necessary to call the witnesses.

Canyon de Chelly-----NATIONAL MONUMENT

Chino, Arizona-----

January 25-----

1945

MEMORANDUM for the Regional Director, Region three.

The following is a report on the activities at Canyon de Chelly National Monument during the month of January, 1945.

Weather

Although surrounding areas received considerable snow, Canyon de Chelly was skipped. We have received less than half the amount which was registered in 1944. To date we have had 30 inches. The Rio de Chelly is now running a considerable stream of water, much more than at this time last year. For the greater part of the month we had a January thaw with very little mud. The maximum temperature was 57 degrees. Minimum temperatures have ranged above those of last year. The lowest was 10 degrees with others ranging mostly between 15 and 30 degrees. We have had very little fog.

Administration

The Custodian returned from annual leave on January 3, and since that time has been taking care of the work that piled up during his absence. Horseback patrols have been made in both Canyons.

Maintenance

A celotex ceiling was placed in the Service Porch, The Kitchen and service porch floors refinished, and other small repair jobs completed around headquarters. Hay and oats for the horse were purchased at Aztec, New Mexico and hauled in by Gene Stonehocker on his return from Chaco Canyon. A general cleanup of grounds was made during the spell of nice weather. Spare time was spent constructing a filing cabinet, and repairing and repainting the signs.

Travel

After last months blank, my eight visitors looked pretty good. We still show an increase for both travel and Fiscal years. Travel year to date - 61, This Month - 8, this month 1944 - 0.

Public Health

The back of the Custodians neck has been well adorned with boils the past month, probably caused by the infection of his little finger in November.

..... NATIONAL MONUMENT

Complete National Comment.

The Custodian has received visitors in the old
through this country.

There was wonderful spirit; the hope of the
land when we received one of the best. The national
spirit was very strong. The old for the young should
behold. The entire country is still very much
happy.

There have been wonderful visitors during
the month. And now we are in a position
the old road has been turned in and the country
is now in a position to be able to handle the
entirely new road.

The country has been very good. The road has been
closed during the month.

I have been a student of the old road. I have
the volume I got the old road. I have been
very real. I have been very much. I have been
the old road. I have been very much. I have been
all and after many of these things. I have been.

The whole country of the old road is still
going on.

Very respectfully,

Meredith M. Guillet

ADDRESS REPLY TO
THE SUPERINTENDENT

January 25, 1945

There follows a report of the activities of Capulin Mountain National Monument.

We estimate One hundred visitors to the old Volcano this month.

Weather was wonderful up until the 20th of the month when we received one of the most beautiful snow storms this country has had for many years about seven inches. The entire country is still very white and lovely.

Roads have had considerable attention during the month, and are now in splendid condition.

The old road drag was brought to town and completely overhauled with new blades the entire cutting edge approximately 25 feet.

The Grader has been run over the road about six or eight times during the month.

I see where a couple of elk has also visited the volcano (not the BPOE variety) but the kind that have real horns and are really wild. We are only about ten to fifteen miles from the big herd of several hundred elk and often some of them stray over this way.

The usual amount of Deer and other wild life are doing fine.

Very Respectfully,

Wm. T. ...
Custodian.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
CASA GRANDE NATIONAL MONUMENT
COOLIDGE, ARIZONA

January 25, 1945

MONTHLY REPORT

JANUARY, 1945

A.T. Bicknell, Custodian

Visitors: The daily number of visitors continues to increase. This month, 707 people came to see the Casa Grande and an additional 293 were unattended, making a total of 1000. This is an increase of 181 over December and of 171 over January, 1944. There were 310 cars, an increase of 43 over December and of 40 over January of last year. There were 38 who used the picnic grounds, most of them as a prelude to seeing the Ruins.

Interpretive Services: There were 134 conducted tours for the 707 Ruins visitors, totalling 5455 minutes, an average of 40.7 minutes for each group. In the Museum, 576 people listened to 125 talks (we hope!) which averaged 23.8 minutes per group, a total of 2985 minutes.

Weather: The weather has been cold at night with bright sunny days for the greater part of the month. Dec. 31 and Jan. 2 both hit the low of 21 and on January 20 there were small hail stones which some alleged were snow. During the day of January 9 the thermometer registered a high of 78 degrees - there were 13 days when the noon hour saw 70 or better..

Maintenance: In addition to the regular maintenance, the road patching was finished; the porch roof on Quarters No. 5 completed; the sewer field cleaned of weeds; the sewer in the utility area completely plugged, a section was dug out, breaking a hole in one of the tiles, we were able to clean it. Some of the drains in Compound A were concreted. Brush was trimmed along the roadside.

Dear Sir:

I have the honor to acknowledge the receipt of your letter of the 10th inst. in relation to the proposed monument. The same has been forwarded to the proper authorities for their consideration. It is the policy of the Department to establish monuments of this kind only when it is deemed to be in the public interest. In this case, the monument is proposed to be established on the land owned by the United States, and it is believed that it is in the public interest to establish it. I am, therefore, pleased to inform you that the monument is being established.

I am, therefore, pleased to inform you that the monument is being established.

The Warehouse inventory has been continued as time permits. We hope to finish this the coming month and complete the surplus list. A Ford radiator was shipped to Walnut Canyon.

Shop Activity: Mechanic Stonehocker contributes the following account of operations during the past month: "Two days spent on repairs to Saguaro stake truck I-13817 prior to moving Custodian Sowers from Tumacacori to Chaco Canyon. While at Chaco I went to Aztec, New Mexico and got a load of hay and oats for delivery to Canyon de Chelly. While at De Chelly I made minor repairs on the pick-up for Custodian Guillet.

"On return to Casa Grande the stake truck was returned to Saguaro and pick-up truck brought back for repairs, several days being spent on it, on completion it was taken back and exchanged for the panel truck for repairs also. On completion of repair it was returned to Saguaro and the Navajo pickup brought in for its turn, at this writing it is in the shop waiting for repairs. While at Saguaro I made a trip with Custodian Benubien over to the Chiminea pack base camp to go over some of his problems of material and supplies for continuation of the building project there, and to inspect the entrance road for future use of the semi-trailer, should the occasion arise.

"Two trips were made to Phoenix for material and supplies.

"The chlorinator at Casa Grande was completely overhauled, correcting a potential source of danger for monument personnel as well as our visitors, now instead of getting red tickets on the water the red has been transferred to Custodian Bicknell's ledger.

UNITED STATES

NATIONAL PARK SERVICE

Grand Canyon National Monument

3

"Pipe has been cut for a cattle guard on the entrance road to Chiminea pack base at Saguaro. Three sets of welded pipe clothesline poles made up, two for Saguaro and one for Organ Pipe. Does any one else want a set?

By

F.L. Stonehocker - Mech."

Other Activities outside routine: Ranger Shearwood searched through all old files to make a report for Dr. Colton concerning any early research or exploratory work performed by The Boss, as even the late additions to Southwestern Monuments have learned to call him.

Personnel Notes: Custodian Bicknell took annual leave from Dec. 26 to Jan. 1.

Oralie Stonehocker had her tonsils out the day after Christmas and was well recovered by the time school opened again.

Harry Reed and his mother arrived during the evening of Dec. 31 en route to Tumacacori and left the following day.

January 2 Custodian and Mrs. Sowers arrived and spent the night on the way to Chaco Canyon.

Ranger Shearwood took two days annual leave Jan. 23 and 24.

Hazards of the life of a Ranger.

Scene: Dimly lit center room of Casa Grande.

Cast: A handsome young Ranger

A Mother. Her pretty young daughter.

Mother speaks: "Are you really an authentic Ranger?"

Ranger: "Yes, quite. If you will look at this unusual design on the"

Mother: "All right, daughter, you can touch him."

Daughter suits action to words and ancient Hohokam go all out of focus.

~~Chaco Canyon~~ NATIONAL MONUMENT

Bloomfield, New Mexico.

January 25 1945

MEMORANDUM for the Regional Director,
Region Three.

There follows the report of activities in Chaco Canyon National Monument for January, 1945.

Visitors. A total of 31 visitors came to Chaco in 17 cars. They spent a total of 8580 minutes; two of these were bona fide visitors, combining business with pleasure. A total of 90 minutes were spent with them in museum and ruin.

N.P.S. Visitors. Mechanic Stonehocker and Custodian Joe Toulouse visited the area during this report period.

Weather. The weather has been on the cold side for us coming from southern Arizona. The minimum was 5 degrees on the 5; the maximum was 57 degrees on the 9. Light snows fell on the 16, 20, 23 and 24 of the month.

Roads. In general, the roads have been in poor shape. The best time to travel, is of course, when they are frozen.

General. Left Tumacacori National Monument on January 2 and arrived Chaco Canyon National Monument on January 4. Mechanic Stonehocker spent the night of the 4, and left the 5. Custodian Toulouse arrived the 9 with the Chaco Canyon pickup and returned to Santa Fe on the 12. After seeing Toulouse off on the bus, a visit was made to Aztec Ruin National Monument and made the acquaintance of Custodian Townsend and Guide Fish.

Activities. Roy Newton was employed up to January 6. While Mechanic Stonehocker was here, we thoroughly inspected the light plant and new water pump. These were found to be in fair condition, but much work will be required before they are in A-1 shape.

During Custodian Toulouse's stay, some official matters were straightened out, a new lock was installed on the office door, a futile attempt was made to correlate the huge collections of keys with the locks which were found, an inspection was made of the three gates to the east, where one was found open, inspected the CCC camp and noted all remaining material, and the oil heater in the office was brought down to the quarters where it replaced the coal stove.

DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

NATIONAL MONUMENT

Washington, D.C.

January 19, 1914

Memorandum for the National Director,
National Park Service.

There follows the report of activities in Grand Canyon National Monument
for January, 1914.

Visitors. A total of 21 visitors came to Grand Canyon in 1914. They spent a
total of 2300 minutes; two of these were from the visitors, consisting
business with the monument. A total of 30 minutes were spent with them in
museum and trails.

W.P.A. District. W.P.A. District and W.P.A. District for Tourism visited
the area during this report period.

Weather. The weather was clear on the cold side for an early frost southern
Arizona. The highest was 5 degrees on the 5; the lowest was 27 degrees on
the 5. Light snow fell on the 12, 13, 14, and 15 of the month.

Grades. In general, the roads have been in poor shape. The best time to
travel is of course, when they are frozen.

General. Left Grand Canyon National Monument on January 5 and arrived there
Grand Canyon National Monument on January 6. W.P.A. District and W.P.A. District
of the 5, and left the W.P.A. District on January 6 and arrived there
Grand Canyon National Monument on January 7. After arriving there
off on the 12, a staff was sent to take W.P.A. District and W.P.A. District
representatives of Grand Canyon National Monument and W.P.A. District.

Activities. The section was organized on January 6. W.P.A. District and W.P.A. District
border was built, as the road is located in the line and now water runs.
There was some snow on the 12, but much was still in the mountains.
Before this was in 1-1 stage.

During Grand Canyon National Monument's day, some official matters were arranged
out, a new look was installed on the office desk, a little change was made
to correlate the new collection of maps with the look which was found,
an inspection was made of the files under the desk, where new was found
open, indicated the 100 map and noted all necessary material, and the old
factor in the office was brought back to the Grand Canyon National Monument
and moved.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

-2-

During this report period, most of my time was spent working in quarters. The kitchen was washed, the clothes closet was kalsomined, the dining room cupboards and hall cupboard were both given two coats of paint, minor repair was made to walls in the bathroom and back service porch. The entire house was weather-stripped, and all windows were mailed securely after someone broke into quarters on January 12, while this Custodian was in Aztec.

A small coal-wood stove was installed in the office to replace the oil heater. Much time has been spent going over the filing system and locating the necessary back records and facts.

Contact was made by radio with El Morro National Monument on the 9, 16, 19 and 23, reception being very poor.

An inspection was made of Pueblo Bonito, Chetro Ketl and Casa Rinconada where some stabilization is needed. Bonito is of course, in the best condition of these three. A hurried inspection was made of the other ruins in the canyon and were found in fair condition.

The light plant was not operating from the 14 to 23, due to a broken fan belt. Rancher Crowley was able to locate two belts in Aztec and the plant is now running.

Necessary maintenance work has been accomplished in cleaning up the back yard and caring for the monument horse, plus the daily routine work which is kept current.

On January 18, two men from the Blackhawk Machinery and Wrecking Co., Denver, Colorado, arrived after battling MUD for 7 hours from the Blanco Trading Post. The Wheel Grader and Scarifier at the CCC camp were loaded on the two trucks on the 19. They were not impressed with Chaco until I conducted them through Pueblo Bonito. They promised to be Post-War visitors to this monument WHEN the roads are dry.

Projects for Ensuing Month. When weather permits and material is available, the roof on quarters will be re-zoned to eliminate the present leaks. This will allow further work being accomplished to the interior. It is planned to rearrange the kitchen stoves and place the ice box on the back service porch. The office and museum will be weather-stripped.

Ted C. Sowers

Ted C. Sowers,
Custodian.

UNITED STATES
DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE

CHIRICAHUA NATIONAL MONUMENT

Dos Cabezos, Arizona

January 27, 1945

MEMORANDUM for the Regional Director,
Region Three.

There follows a report of activities at Chiricahua National Monument for January, 1945.

General. An accident to Grader Operator Marble's hand put him on sick leave for a week. Laborer Dickie Stansberry missed five days work due to roads and trails being snowed under. The Custodian took three and one half days annual leave.

Weather Conditions. Weather remained clear and pleasant from December 28 to January 16. The night of January 16 the second snow of the season fell at Headquarters. 4 inches of snow were measured on the morning of January 17. Snow and rain continued intermittently until January 23. Weather records for five calendar years were completed December 31, 1944 was the wettest of the five with 22.73 inches of precipitation. 1941 was next with 21.36 inches. 1942 was the lowest with 17.30 inches. Five year average was 19.72 inches.

Special Activities. Forest Ranger Dean Earl of the Apache National Forest visited the Custodian a few days during the Christmas season. A trip was made with him to Rodeo and Portal to get road sign data and meet Forest Ranger Hunt. Unfortunately we did not catch Mr. Hunt at Portal.

Maintenance. Snow has prevented visiting cars and road truck from going more than two miles above Headquarters since January 16. This in addition to Mr. Marble's accident has delayed the special road and trail maintenance some. Marble and Stansberry are both back on road and trail work now. We anticipate the necessity of removing a good many rocks when the truck is able to get to the end of the road.

The Custodian sanded and varnished the museum floor two coats.

Approaches to Monument. Approach roads have remained in fair shape as most of the snows have been confined to the hills and have not lasted long on the flats two miles west of Headquarters.

Travel. There were 256 visitors this month as compared with 174 for December and 132 for January of 1944. 203 of this month's visitors were contacted at the museum.

[illegible]

1. The first step is to identify the problem. This involves understanding the situation and the needs of the people involved. It is important to listen to all sides and to be open to new ideas.

2. The second step is to develop a plan. This involves setting goals and determining the steps that need to be taken to achieve them. It is important to be realistic and to consider the resources available.

3. The third step is to implement the plan. This involves putting the plan into action and monitoring progress. It is important to be flexible and to be willing to make adjustments as needed.

4. The fourth step is to evaluate the results. This involves assessing the outcomes of the plan and determining whether the goals have been achieved. It is important to be honest and to be willing to learn from mistakes.

Summary. There were 520 prisoners who were captured and held for treatment and the for treatment of 1944. All of the prisoners who were captured at the same time.

UNITED STATES
DEPARTMENT OF THE INTERIOR

Forest Fire Protection. The Custodian has spent some time studying and scratching his head in regard to the new Jefferson Travis Radio. Not much has been done beyond this but we have hopes of talking to Saguaro and Organ Pipe Cactus before spring.

Accidents. On January 16 while Grader Operator Marble and Laborer Stensberry were removing rocks from the road Mr. Stensberry let a rock fall which crushed Mr. Marble's hand rather badly. Two stitches were taken in the wound by Dr. Wilson in Willcox. Xray pictures showed no broken bones. Mr Marble was off until January 24, when he started doing some of the lighter road and trail work. It will be some time before his hand is OK for pick and shovel work.

Clair V. Cooke

Clair V. Cooke,
Custodian.

Forest fire investigation. The investigation has been made this morning and afternoon in order to find out the cause of the fire. It is believed that such has been caused by a man who was playing with matches in the forest before night.

Investigation. On January 10 while the fire department was working on the fire, the investigation was made. It was found that a man had been playing with matches in the forest before night. The investigation was made by the fire department and the police. It was found that a man had been playing with matches in the forest before night. The investigation was made by the fire department and the police. It was found that a man had been playing with matches in the forest before night.

Ramah, New Mexico

January 31, 1945

MEMORANDUM for the Regional Director,
Region Three.

There follows the report of activities in El Morro National Monument
for January, 1945.

VISITORS. One visitor was counted at El Morro for this report period.

N.P.S. VISITORS. Custodian Joe Toulouse inspected this area on January
8 and 9.

ACTIVITIES. Mr. Worthen spent the entire month working on the Ranger Cabin.
He covered three walls in the kitchen with sheetrock; quarter round finished;
threaded all pipe that could be found on the area, and piped water into the
bathroom.

A trip was made into Grants for supplies.

A request was made for more supplies to finish the plumbing in the
bathroom and also for a stove or water heater.

Contact by radio was made with Chaco Canyon National Monument on
January 9, 16, 19 and 23.

GRAN QUIVIRA NATIONAL MONUMENT
GRAN QUIVIRA, NEW MEXICO

January 25, 1945

MEMORANDUM for the Regional Director, Region Three

There follows below the narrative report report for Gran Quivira National Monument during the month of January, 1945:

Travel: January, 1945: 6
Travel year todate: 58

General: The writer returned to duty at Gran Quivira National Monument, January 16, after having turned Chaco Canyon and El Morro National Monuments over to the new custodian, Ted Sowers of Chaco, and after having finished my tour of special assignments at the Region Three Office in Santa Fe. The early part of this report period, was devoted to bringing order out of chaos at the Regional office preparatory to termination of special assignment December 31, 1944. Much of this work was the picking up of loose-ends so that when the new clerk enters on duty he or she will have not too much difficulty in discovering what had gone on before. Five days annual leave was taken from December 30, 1944 to January 5, 1945, inclusive. Then I traveled to Gran Quivira, El Morro and Chaco Canyon. Several days, January 9 to 11 were spent in going over items of routine nature at Chaco with Ted Sowers--good time was had by all, I hope. Ted appears to be digging in with quite a lot of energy in his new job, and we all should be hearing of a lot of developments there, through the monthly reports. I returned to Gran Quivira, January 16 with Assistant Regional Director Richey, and we went over quite a number of problems--land status, interpretive, etc. Chuck! Did you find things agreeable enough, and in a satisfactory state? A good deal of my time has been devoted, since Chuck's departure, topicking up loose ends at Gran Quivira and a certain amount of maintenance work on the residence and pickup truck.

Great Sand Dunes National Monument

February 3, 1945

MEMORANDUM for the Regional Director

There follows the report of the activities at the Great Sand Dunes National Monument for January, 1945:

Weather.

The snow was about ten inches deep at the station on the 27th when the monthly check up was made by the writer. There has been no wind so the drifts were not bad.

Travel.

There were only three cars registered at the station but from evidences of travel and the use of the Dunes as a ski area since the recent snow, it is evident that there has been a substantial number of visitors to the area.

Maintenance.

The snow was shoveled away from the walls and other danger spots, all stored equipment was checked and found to be in good condition.

Memorandum for the Regional Director

Re: Report of the activities of the
Great Sand Dunes National Monument, Colorado, 1933.

Summary.

The work was about the same as last year, with the exception
of the fire which caused a loss of about 100 acres of the
monument. There was also a small fire in the dunes near the
road.

Details.

There was only one fire in the monument in 1933,
which was caused by a lightning strike on the dunes. The fire
burned for about 24 hours and destroyed about 100 acres of
the monument. It was estimated that the loss was about \$10,000.
The fire was caused by a lightning strike on the dunes near the
road.

Recommendations.

The work was about the same as last year, with the exception
of the fire which caused a loss of about 100 acres of the
monument. There was also a small fire in the dunes near the
road.

NATIONAL PARK SERVICE
SOUTHWESTERN NATIONAL MONUMENTS

~~XXXXXXXXXXXXXXXXXXXX~~
COOLIDGE, ARIZONA
Montezuma Castle National Monument
Camp Verde, Arizona

January 23, 1945.

MEMORANDUM for the Regional Director, Region Three,
National Park Service.

There follows the report of activities in Montezuma Castle
National Monument for January, 1945.

Visitors this month, 120; travel year to date, 677.

General Travel is down twenty-six per cent over the same month last
year and most of the month has been spent in maintenance work. At odd
times we have been adding new information to our Fast File and have been
interested in reading "Deserts on The March", the book which started a
circuit through the monuments in 1940.

Weather After a few stormy days near the end of December, local weather
conditions were agreeable until the recent storm beginning January 20
which brought rain or snow ranging up to deep drifts to most of Arizona.
Highway 66 has been blocked near Williams and deep snow is reported in
Flagstaff and Prescott. Minimum temperature for the month was 20° and
the maximum was 73°. The mean minimum was 29° and the mean maximum 58°. Total
precipitation was 1.35 inches with snow one morning to a depth of
three-fourths of an inch, an unusual amount for this part of the Verde
Valley.

Administration Ranger Leding was on annual leave December 27 - 29 for a
trip to Grand Canyon with his and Mrs. Leding's parents.

Custodian Bright was relieved at Tuzigoot on December 26 and January
2, 9, and 16.

A new school bus ordered by the Camp Verde District last May was put
in service January 8. This relieves pressure on the improvised bus that
was being used and allows children in this end of the district an easier
schedule.

Maintenance and Improvements A new floor mat, oil filter, muffler and
tail pipe were installed in the pick-up and the front wheels were repacked.

Storage space in the garage was re-arranged to give better use of
the work bench.

Most of the exterior vigas and woodwork at the residences have re-
ceived a coat of linseed oil.

A project has been instituted to refinish all thirty-three of the numbered stakes on our nature trail.

We were putting up a new flagpole rope when we lost the rope out of the pulley and had to take down the pole. It needed to be repainted anyway.

The drainboard and cabinet top in Residence No. 2 received two coats of varnish.

All soda and acid fire extinguishers were discharged and refilled.

Use of Monument Facilities By The Public Visitors totaled 120. There were 33 cars with 23 from Arizona. Seventeen states were represented. Tickets sold, 31; tax but no ticket, 2; children admitted free, 6; members of the armed forces, 7. A total of \$9.40 was collected in fees and taxes.

Guide Service Total contact hours, 28.75; Leding, 11.50; Hastings, 17.25. Forty-six people were guided through the Castle in 18 parties and 93 people visited the museum in 27 parties. There were 3 picnic parties totaling 11 people.

Protection The newly fenced area across Beaver Creek has had several patrols.

The sound of shots often gives notice of nearby hunters but we usually find they are just outside the monument. This month, however, two different parties were apprehended on the monument. Names and addresses were taken and warnings were issued.

Ranger Leding discovered a mule in the area north of our entrance gate. Despite our combined efforts for several hours we were unable to drive him out and have been trying to locate the owner.

Porcupines have resumed their attacks on our vegetation, principally hackberry trees along the visitor trail. Although we have a permit to shoot those found in a limited area, we have been unable to find any.

Accessions A bulletin, "The Giant Cactus of Arizona" by Frank A. Thackery and A. R. Leding was contributed by Mr. Leding. It contains interesting pictures and information about the Indians' use of the giant cactus fruit and the fruits of other cactus.

Another interesting bulletin, "Poisonous Animals of The Desert" by Charles T. Vorhies was loaned by Mr. Leding.

Fauna Quail are using the bird feeding table near the house. Two males and six females have been seen there.

Flocks of wild geese numbering up to two dozen are often seen and sometimes land on the creek in the monument.

A project has been initiated to collect and analyze data on the use of the word "love" in the Bible. The project is being conducted by a team of scholars from the University of Toronto and the University of Cambridge. The data collected will be used to develop a new translation of the Bible that more accurately reflects the original meaning of the word "love".

the police and had to take from the safe. It seemed to me peculiar enough.

The following are defined by the following table:

[[1] 2000 was also the millennium year celebrated and reflected.

Use of language (written or oral) to convey information is a social process. Language is used to convey information in a way that is understood by the listener or reader. The use of language is a social process because it involves the use of shared conventions and rules to convey information. The use of language is a social process because it involves the use of shared conventions and rules to convey information.

and the female was seen with it.

THE UNIVERSITY OF CHICAGO PRESS

UNITED STATES
DEPARTMENT OF THE INTERIOR

Visitor Reaction To The Interpretive Program Visitors frequently ask about general weather conditions, average annual rainfall, temperatures, etc. We find the State Weather Bureau office has summaries for all the years any station has been maintained and also supplies a bulletin, "Climate of The States" that can be had for this state and presumably for others. This gives a climatic summary for stations throughout the state.

Projects For Ensuing Month 1. Give wood surfaces exposed to the most weathering at the quarters a second coat of linseed oil. 2. Complete project to refinish stakes on the nature trail. 3. Patrol the boundary fence. 4. Redecorate the museum and office.

H. H.

Homer F. Hastings,
Custodian.

TRAVEL

Travel this month included some highway, including the travel just to date to 1933. Highway travel on the mountain increased due to the coming of the new season. Highway travel is up. There were some very good views of the mountain from the highway. The road is very good.

GENERAL

Work on the road was again completed satisfactorily and partially to the road. The road is very good and the work was very good.

The road is very good and the work was very good. The road is very good and the work was very good.

Four new signs were placed along the road. The signs were placed along the road. The signs were placed along the road.

The signs were placed along the road. The signs were placed along the road. The signs were placed along the road.

The signs were placed along the road. The signs were placed along the road. The signs were placed along the road.

For example, this gives a slightly skewed, but otherwise good, picture of the situation. But one can take this and considerably improve it by taking into account the fact that the number of people who are not in the labor force is not the same as the number of people who are not in the labor force and are not in the labor force. This is a very important point to remember when interpreting the data.

Project to develop a new type of aircraft engine. The project is being carried out by the Department of Defense, Office of Naval Research, and the Naval Air Station, Patuxent River, Maryland. Ajo, Arizona

January 25,

45.

19

MEMORANDUM for the Regional Director,
Region Three.

There follows a report of activities in Organ Pipe Cactus National Monument for the month of January, 1945.

WEATHER:

A cool, cloudy period for the past few days has broken up our perfect winter weather. A minimum of 25 degrees was reported on the 23rd and maximum for the period was 78 on the 14th. Three small showers this month, for a total of .31 inches of rainfall, has put the desert in fine shape.

TRAVEL:

Travel this month totalled 5322 visitors, bringing the travel year to date to 19473. Military travel on the monument increased due to the search going on for escaped prisoners of war. Though none were caught on the monument several were picked up in the near vicinity.

GENERAL:

Most of the month was spent on general maintenance and painting on the headquarters area, and office work was kept current.

On December 29 a deer was killed on the highway, this previously was reported to you by memorandum.

Four new 35-mile speed limit signs were acquired through the State Highway Department and placed on the main highway. It is hoped that these signs will help in reducing the high speed travel through the monument.

We are at last getting our herbarium set up in shape and arrangements were made with Mr. Clark of the Science department of the Ajo School to take over the project of mounting herbarium specimens and getting them in shape, using this as an educational device for his students and doing a very much appreciated job for the monument. About 400 specimens were turned over to him for mounting. We are very fortunate to get this cooperation from the school not only to get the project completed but Mr. Clark's work of mounting is superior to anything I have seen in the Service's herbariums.

Grazing permits for the coming year were signed and submitted for approval to your office.

OPC

On January 18 I had an opportunity to meet with the scoutmasters and administrative committee for the Boy Scouts of the Ajo district. The scouts are quite regular campers and hikers through the area so I believe much good was accomplished at the meeting as I explained all the rules and regulations and so forth to them. I found they did not realize the many features of the monument nor the Park Service rules and regulations but full cooperation was promised for the future. I think I let myself in for considerable work in the future in lectures and outdoor educational work with them but I feel that this is time well spent if these boys can be brought up to be future conservationists.

ROADS:

Work on the cut-off walls and dip repairs is progressing although it is expected, due to lack of maintenance funds, this project will be cut off in the near future before all the dips are entirely completed.

PROJECTS FOR THE COMING MONTH:

It is hoped this month that our new radio may be installed which is the only project we have other than our general routine work.

William R. Supernauth,
Custodian.

Saguaro

NATIONAL MONUMENT

Tucson, Arizona.

January 26

1944

MEMORANDUM for the Regional Director, Region Three.

Weather. We have had good days for working most of this report period, but it has been stormy the last few days.

New Construction. Most of our efforts were expended on the telephone line. There remains about three fourths of a mile of posts to set and three miles of insulators and wire to install. This unfinished section is difficult of access, involving about one and a half hours of travel time one way.

The septic tank has been excavated and the sides constructed. It still needs a roof.

A pipe line has been laid above ground from water tanks to a water supply. The tanks were painted inside with asphalt.

A coat of ~~hard~~ asphalt with sand was placed on the roofs of the barn and cabin at Pack Base.

Personnel. There are no per diem laborers on the pay roll as this is being written. Two or three men are available but to hire one without the others would mean that the others wouldn't work here next summer during fire season. Funds are too low to hire more than one man for any length of time.

Maintenance. Mechanic Stonehocker overhauled the panel truck at the shop at Casa Grande, and it now runs like a new car. The miscellaneous construction supplies around headquarters have been hauled to Pack Base. The headquarters area was improved, but we didn't get everything hidden in the brush at Pack Base.

Accidents?? Three ranchers reported hearing a low-flying plane crash into the Rincons, January 22. A B-25 disappeared in this vicinity at that time, but the crash scene has not been reported as located.

Paul L. Beaubien
Acting Custodian

January 25, 1945.

Memorandum for the Regional Director,
Region Three.

There follows the report of activities in Tonto National Monument for
January, 1945.

Visitor statistics: Cars, 75. Visitors, 291.
Instate, 22. Ruins trips, 45: people, 168. Upper, 2: people 8.
Outstate, 51. Museum groups, 62: people, 253.
Not contacted, 2. Information, 24. Armed Forces, 17.
Personnel time, Custodian, 70 hrs.

Interesting and interested visitors, were, Wallace C. Siple, President of Siple Air Transport Company, Montreal, P.Q. and a group of Canadian Fliers who were forced to land on the lake and remain for three days during the last storm. They had a very narrow escape from crashing into the dam, due to the low-hanging clouds. Our visitor count rose rapidly this last month, but there seemed to be no new ideas as to reasons for traveling.

Weather: Rain fell on ten different days, the last storm of rain, hail and snow, covered a period of three days and three nights.

There have been several heavy freezes and some frozen water pipes.

All the mountains around are covered with snow, down to a much lower level than for the past three years.

The "Easterners" think we have slipped a little in regard to our much advertised winter climate.

General: This has been a very busy month in many ways. The heavy rains have had a big share in that, along with water pipe trouble due to several hard freezes. Have had to make three trips to Globe, the first for gasoline, the second for Lu-gs only to find the Metlock Company completely out of gas, a two of their tank cars were overdue and apparently lost. Had to leave the cylinder and make a trip the following week to get it. At that time I picked up two rods at the Alabam freight office, for repair work at the upper ruins.

The repair work on the tool shed is well under way. Had the roofing nearly on, when the last storm began, will now have to wait until things dry out before continuing. Due to the almost continuous cold weather, keeping the fires in the fireplace, water heater and trash burner going, has been almost a full time job.

Flora and Fauna: In spite of the cold weather, flowers have been found blooming in sheltered places, all winter.

Swallows were seen around the upper ruins, January 9, much earlier than for the past three years.

Many tracks of Javalinas seen around the stock tank in Cholla Canyon, and a large Bobcat near upper ruins.

Work next month: A continuation of the tool shed job until finished.

W. C. Siple
W. C. Siple,
Custodian.

These studies are part of a project of the National Science Foundation, Grant No. 44-1084, and are being published in the Journal of the American Chemical Society, Vol. 66, No. 1, 1944.

YIN-YANG

Investigation was conducted at the site of the accident on 11/11/1964. The investigation was conducted by the following personnel: [illegible] and [illegible]. The investigation was conducted at the site of the accident on 11/11/1964. The investigation was conducted by the following personnel: [illegible] and [illegible].

1. The first of these is the fact that the Commission has not yet received any information from the Government of the United States regarding the results of its investigation of the activities of the American Friends Service Committee in the Philippines.

1. The first part of the report is a general statement of the purpose and scope of the study. It states that the purpose is to determine the effect of the new tax law on the income of individuals and that the scope is limited to the year 1964.

[illegible]

The results were on the whole in good agreement with the results of the other studies.

John J. Smith.

Tumacacori National Monument
Nogales, Arizona
Jan. 26, 1945.

MEMORANDUM for the Regional Director,
Region III.

Follows a report of activities at Tumacacori National Monument for January 1945.

VISITORS A total of 589 persons visited Tumacacori during this report period. Of this number 501 were guided through the mission and museum. Total number of guide trips to mission, 120. Museum guide trips, 123. Guide time for mission: 3315 minutes. Guide time for museum 2650 minutes. Total guide time: 5965 minutes.

WEATHER; Cloudy weather with considerable rain has been in evidence several days during the month. Snow has fallen on the mountains both east and west of the monument. Wind blowing off the snow has brought some "unusual" weather to Tumacacori. Heavier coats and an extra blanket were in order.

VISITORS (special) Jim Kewanwytawa (Pueblo Indian), Custodian of the Museum of Northern Arizona visited Tumacacori on Jan. 2nd. Four Military Police who were searching for escaped prisoners of war was stopped at the monument on Jan. 2nd. Fathers Rupert and Rudolph of San Xavier Mission were monument visitors on Jan. 3rd. Other noteworthy visitors included Mrs. Barbara McKee wife of Eddie McKee Assistant Director of the Museum of Northern Arizona and former Naturalist at Grand Canyon National Park; Mr. and Mrs. George Babbitt of Flagstaff (Mr. Babbitt recently bought the site of old Fort Lowell near Tucson and turned it over to the Chamber of Commerce of that city). Jan. 18th. Mr. and Mrs. Bill Wilson of Navajo National Monument and Paul Beaubien of Saguaro National Monument visited Tumacacori. On Jan. 16th. Major and Mrs. Walter Fain of San Marino, Calif. arrived at the monument in their house trailer. They remained until Jan. 18th. Major Fain who is an artist made a fine water color of the old mission.

RESEARCH and OBSERVATION One large pheasant, one raccoon and a number of skunks were seen on or near the monument this month. Skunks have been digging in the main altar of the old mission and have brought to light a small piece of newspaper printed in Oct. 1917. Just how to handle these "visitors" is somewhat of a problem.

CO-OPERATING GOVT. AGENCIES A representative of the Arizona Highway Commission who is stationed at Nogales called at the monument to discuss the possibilities of a flood control project at Tumacacori. He borrowed our file copy of the report compiled by Custodian Sowers on the flood of last August. This will be studied by he and other members of his organization. It is hoped that a solution will be found to this problem before the rainy season arrives.

MISCELLANEOUS A small photo lab has been set up for processing films and prints. A number of negatives made during the summer and fall will be printed and mailed to headquarters. Printing of negatives loaned to headquarters by various parks and monuments is getting under way. Painting of interior of office and museum is a project for the coming month.

Harry Reed
Harry Reed - Acting Custodian.

of Director of Office and Bureau is a subject in this matter.

[Faint handwritten notes at the bottom of the page]

UNITED STATES
DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE

There follows the report of activities in TUZIGOOT
NATIONAL MONUMENT for January 1945, by Everett W.
Bright, Custodian.

Visitors this month 189; travel year to date 843.

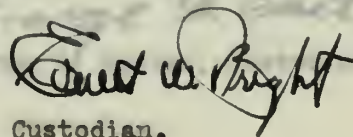

Weather. There were 6 clear days - 12 partly cloudy - 13 cloudy - 7 days of rain and snow, which fell on December 26, 27 and 28 and January 16, 20, 22 and 23. Strong winds on December 30 and January 16, 18 and 20.

Travel. A slight increase in travel was noted for this month which is surprising considering that no visitors visited the monument from January 17 to 25, due to rain, snow and cold weather. Instate visitors numbered 134, and outstate visitors 55. There were a total of 62 cars with instate numbering 45 and outstate 17. There were 13 members of the Armed Forces who visited the monument. An increase of 2 over the previous month. A total of 12 visitors walked out to the monument.

Guide and Contact Service. Museum: 16 hrs, 45 mins; Field: 14 hrs, 50 mins. Total contact time of 31 hrs, 35 mins.

Personnel Time. Custodian Bright 27 hrs, 55 mins; Custodian Hastings 2 hrs, 20 mins; Ranger Leding 1 hr, 20 mins. Hastings relieved on December 26 and January 9. Leding relieved on January 2, 16 and 23.

Maintenance and Administration. Since no new leaks have developed in the water line from Clarkdale to the monument since January 11, it appears as though pipe line troubles has been eliminated at least for the time being. Had water pressure reduced to approximately 18 pounds. Reduced pressure still provides ample water supply to the monument and apparently has eased the strain on the thin pitted pipe to such an extent that no new breaks have occurred. It may last for the duration. Most of time prior to January 11, was spent locating and clamping leaks on pipe. Leaks appeared in roof over museum due to heavy snow fall. This was repaired. Made some minor repairs to walls in ruins. All drains in ruins have been checked and cleaned. Patrolled monument boundary fence. Usual cleaning and maintenance work in museum and quarters and attended to routine office work.

Custodian.

----- NATIONAL MONUMENT
Walnut Canyon

Flagstaff, Arizona

January 28 1945

MEMORANDUM for the Regional Director
Region Three

There follows the report of activities in Walnut Canyon National Monument for January, 1945.

Visitors this month, 51; travel year to date, 828.

GENERAL: Not much to report from this area except that the snow is knee deep and the temperature many degrees below zero.

Roads have been kept open most of the time but we were unable to get our boys to school two days last week and were without mail service one day.

We continue to have a few visitors. One car from Pennsylvania came out here just after the road had been plowed out once last week. I had to assist him in leaving as he didn't even own a pair of mud chains and couldn't make the circle of the parking area.

This Custodian took two days sick leave during the month.

VISITOR STATISTICS: 51 visitors registered during the month from 9 states and Rangoon, Burma. Few have made the Ruin trip because of snow on the trail.

MAINTENANCE, IMPROVEMENTS AND NEW CONSTRUCTION: Considerable time has been spent shoveling snow, cutting wood and hauling fuel oil to the office.

Received radiator for our dump truck from Casa Grande where it had been repaired. Put radiator on truck and hauled a load of coal from Flagstaff and put coal in basement.

Caught up on paper filing in office.

Have been working on inventory of books and pamphlets.

PROJECTS FOR ENSUING MONTH: Physical Inventory of Property.

Finish book inventory.

Shovel out driveway to storage garage so I can get the pickup out.

Drive pickup to Casa Grande for over haul job, and return with relief pickup.

MEMORANDUM for the Regional Director, Region Three.

TRAVEL MONTH, JANUARY 1945		TRAVEL YEAR TO DATE
Visitors	1682	Visitors 7317
Cars	454	Cars 1932
<hr/>		
	ARMED FORCES USE	
Visitors	893	Visitors 3321
<hr/>		

The increase of visitors is of course quite encouraging and we are proud of our increase being on both repeats and Armed Forces Use. The weather has been clear on the whole but quite cold. Minor misfortunes have delayed much of our anticipated accomplishments, but several long delayed projects have been completed. One of these is a complete survey of our boundary. This was in itself quite a task and Paris, Steel and Shepperd spent several hard days over some rough going. Later mention is made of several incidents in connection with this work.

One official trip was made by Joe Shepperd to El Paso for vital repairs on our electric generator.

Inspections were made by numerous authorized individuals of the wreckage caused by the air crash of January 13. I made two visits to the crash. The first being at the time of the actual crash and again to authorize action regarding the removal of debris. One more final inspection of the wreckage will be made.

Two visits in connection with our boundary survey were made of the area of sands north of our present boundary. I reported by letter that this section was not as impressive as the view might suggest. A second trip and further into the area has left me in some doubt. A special letter is being written in this connection.

Of course some publicity has been received through the radio and press reports of the White Sands Tanker. Greater interest seems to be observed by returning members of the Armed Forces. A Colonel stopping by the other day stated that in London England he was repeatedly asked about the White Sands when they learned he had been stationed in El Paso.

...and the

[illegible]

The Bureau of Education is at present in receipt of the report of the Commissioner of the General Land Office, which contains a list of the lands owned by the United States in the State of California, and a description of the same. The report also contains a list of the lands owned by the State of California, and a description of the same. The report is of great value to the Bureau of Education, and it is hoped that it will be of great value to the public.

THE OFFICIALS OF THE U.S. DEPT. OF AGRICULTURE
WILL BE GLAD TO FURNISH INFORMATION ON THE
CULTURE OF THE CUCUMBER.

[illegible]

Two things are conspicuous in the history of the
of the world to which we are now coming.
The first is the fact that the world is
a world of nations, and the second is the fact
that the world is a world of nations.

1. The first of these is the fact that the Commission has not yet received any information from the Government of the United Kingdom regarding the proposed changes to the law of the United Kingdom in relation to the treatment of the British Commonwealth countries. This is a matter of great importance to the Commission and it is therefore requested that the Government of the United Kingdom should provide the Commission with the necessary information as soon as possible.

WHITE SANDS NATIONAL MONUMENT

He had never visited the area and said he promised himself then that if he ever returned to El Paso he would see the White Sands, and now having seen them he was not surprised at the English being so interested. Several returned Army Pilots now on B-29 training, stated that in their virtually world travels they had never seen anything like our area. Do we eat this up. I only wish Tom Charles might hear much of it.

We are finding it hard to keep up with our regular maintenance. Paul was off a few days with an infected tooth and with the boundary work taking the time we gave it, other matters have suffered. We are working over our garbage disposal units for the picnic area and are highly pleased with the results. It is intended to continue this work as rapidly as possible. By Dressing up our garbage disposal we are exposing our tables and shades, so now some work will have to be done on them.

Mrs. Charles states the White Sands Service Company is doing top business. December was above December of any previous years in the history of the Company.

Ranger Steel has had approved some leave without pay to enable him to ^{take} Virginia to a lower climate. He plans to go to Oklahoma City for the next five months and see if the change will help. Paul has been one of our main stays and I hate very much to loose him even for a short time. We all hope Mrs. Steel will show such improvement that he will find it possible to return even before the time requested. Our best wishes accompany them both.

Ranger Drabenshue had a minor operation in El Paso but did not find it necessary to take any annual or sick leave. He seems much better than he has for a long time and we hope he is all through with doctors now.

Of course our accident of the month was the plane crash of the 18th. The Park Service was first on the scene by about 30 minutes. Little could be done except make the survivors as comfortable as possible. Considerable difficulty was experienced by all concerned in getting to the crash. Some of our area is certainly not as smooth as might be desired. Chuck Richey can vouch for that.

Next month will find us handicapped by the loss of Paul and with our windy season approaching, no doubt our roads will take all the time we can possibly give them.

We are looking forward to Ben Thompson and his study of our boundary. It is hoped too that some of the fellows out of the office might get by our way.

John Will Fair
Custodian.

UNITED STATES
DEPARTMENT OF THE INTERIOR
BUREAU OF LAND MANAGEMENT
WUPATKI NATIONAL MONUMENT
Flagstaff, Arizona

January 25, 1945

MEMORANDUM for the Regional Director, Region Three.

There follows the report of activities in Wupatki National Monument for the month of January, 1945:

Visitors this month: 7; travel year to date: 87.

Weather conditions: The first three weeks of this month were fairly mild and clear with a minimum temperature reading of twenty degrees. However, the snowy part of the winter is just now arriving and the area may be snow bound at the present time. The last trip to the highway undertaken yesterday to obtain the visitor registrations from the Citadel was accomplished with difficulty.

Though the amount of snow-fall has been considerable, each day has seen a considerable amount of melting. Restoration roofs at the Ruin as well as roofs at the residence have been kept as clear as possible in an attempt to prevent undue leakage damage.

Grazing permit: Several head of cattle were seen on the last trip to the highway and it is assumed that these came in on the permit issued to CO Bar Livestock. As yet, no confirmation has been possible and no brands have been seen.

Observations: Deer and antelope have been more numerous within the monument this year (winter); at least track of both have been seen quite often in the past month.

A road-runner was caught floundering around in the deep snow near highway 89 on the 24th, and brought into Wupatki Basin for release in this less snowy area.

Extra-routine activities: A trip was made to Spider Web Ranch to confer with permit use of monument lands for stock grazing; another trip was made to the J Diamond Ranch to establish location of well for comparative purposes.

A trip down to the Chavez Pass region near Winslow was made to observe State Game Department methods in antelope trapping.

Several extra trips to highway 89 have been made in an attempt to keep the entrance road open.

Identification of photos, preparation of special report materials and routine administrative work have filled the rest of the month quite adequately.

Philip F. Van Cleave

Custodian.

DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
REGION THREE
SANTA FE, NEW MEXICO

February 6, 1945.

MEMORANDUM for the Acting Regional Director, Region Three.

The Interpretive Staff report for Region Three and Southwestern National Monuments Headquarters covering activities during January 1945 follows:

STAFF ACTIVITIES - GENERAL. Naturalist Dodge spent the entire month in the office devoting much of his time to headquarters interpretive office, administration and routine matters. More than the normal number of requests for informational leaflets and for the loan of visual aid materials were handled. Requests for photographs required considerable time in making selections, having prints processed and in other handling details. Several long-pending projects were completed, others were started, but lack of time prevented the starting of others.

Naturalist Caywood was in the Headquarters office throughout the month. Although he devoted some time to planning and setting up priorities for post-war ruins stabilization projects, depletion of ruins stabilization funds and the low manpower ceilings preventing actual work on emergency stabilization projects. Caywood was able to devote some time to the Headquarters Loan Library requesting publications to fill the most obvious gaps in much-used series. He started preparation of the dummy for the proposed Spanish language guide leaflet for the Tumacacori museum, revised the form "Statistical Report of Interpretive Contacts", revised the Interpretive Section of the Custodians' Annual manuscript, revised manuscript of three two-fold leaflets, answered a number of requests for information sent in by field men, prepared a chart showing in graphic form the status of various interpretive projects and devices in all monuments of the Southwestern group, started collecting data requested by the Director's Office relative to the Three-Year Postwar Public Works Advance Survey and Planning Program, aided in the work of the Southwestern Monuments Association, and handled a number of routine jobs.

Park Naturalist Schellbach of Grand Canyon National Park was in the Headquarters Office from January 10 through January 31 working up plans and estimates for the proposed Region Three Workshop for the Maintenance and Repair of Interpretive Devices. The assignment culminated with the completed report submitted on January 31. Much appreciated assistance was provided, in checking for local word use the Spanish language manuscript for the Tumacacori guide leaflet, by Frank Delgado, Louise Lancaster and Louise Sandoval. Typing assistance was furnished by Louise Lancaster, Janie Smith and Helen Bressert. Without this voluntary assistance, the month's accomplishments would have been impossible.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
REGION THREE
SANTA FE NEW MEXICO

January 4, 1934

Enclosed for the National Park Service, Santa Fe, New Mexico, are two copies of the report of the Santa Fe National Monument, New Mexico, for the year 1933.

The report was prepared by the Santa Fe National Monument, New Mexico, and is a summary of the work done during the year 1933. It is a report of the progress of the work done during the year 1933, and is a summary of the work done during the year 1933.

REPORT OF THE SANTA FE NATIONAL MONUMENT, NEW MEXICO, FOR THE YEAR 1933.
The report was prepared by the Santa Fe National Monument, New Mexico, and is a summary of the work done during the year 1933. It is a report of the progress of the work done during the year 1933, and is a summary of the work done during the year 1933.

The report was prepared by the Santa Fe National Monument, New Mexico, and is a summary of the work done during the year 1933. It is a report of the progress of the work done during the year 1933, and is a summary of the work done during the year 1933.

The report was prepared by the Santa Fe National Monument, New Mexico, and is a summary of the work done during the year 1933. It is a report of the progress of the work done during the year 1933, and is a summary of the work done during the year 1933.

INTERPRETIVE ADMINISTRATION. Schellbach's presence was greatly appreciated, not only for the work accomplished, but because of the opportunity provided to compare regional office viewpoint with that of a field man on "front line" duty. Similar inspiration was gained during the acting regional naturalist's visit to Carlsbad Caverns and Big Bend National Parks in December. A regional naturalist's ability to render practical assistance to the field would be greatly increased by the rotation assignment of monument custodians and park naturalists to the regional office and by annual interpretive regional conferences or "schools" attended by park naturalists and key custodians.

The financial statement, voluntarily rendered by Mrs. Cass, showing the status as of December 31, 1944, of the 40-103 account was very helpful and was greatly appreciated.

With the breakdown of emergency ruins stabilization plans through exhaustion of funds and manpower, naturalist Caywood was at liberty for assignment to general interpretive problems of Southwestern National Monuments. Thus it was possible to turn from previous procedure of scrambling from one pressure matter to another and attempt to organize the month's work. An effort was made (1) to maintain current routine projects along all lines, (2) to attack the most important assigned projects, many of which are of long standing, and (3) to start work on the most important interpretive projects which have been pending since reduction of Headquarters interpretive personnel placed such projects in abeyance. Most important of such projects have to do with planning interpretive developments.

INTERPRETIVE ROUTING AND CIRCULATION. Seventy-four letters were written during the report period. More than the usual number of requests for information were answered. Field reports were read and the Condensed Report compiled. Assistance was rendered Mails & Files in routing and storing a large stock of "National Park Location Map #6" received from the Director's Office. The two-fold leaflet manuscript on Capulin Mountain National Monument was revised, photographs provided, and sent to the Director's Office. A number of photographs were taken from the files or obtained from the field men and sent to the Director's Office to fill a request from the Society for Visual Education. Work continued on developing a print file of Region Three Negatives for the use of the Director's Office. Alterations for the Tonto and Walnut Canyon two-fold informational leaflets were suggested. Assistance was rendered the field in accumulating and recording data for fact files, Caywood securing the desired information from the Headquarters Library, from the Museum of New Mexico Library and from the Laboratory of Anthropology. A stencil was cut and 1,000 informational leaflets mimeographed for Capitol Reef National Monument. The new Spanish language two-fold leaflets on El Morro and Bandelier were checked. The Headquarters in-service training project was continued, the following programs being presented:

Jan. 5.....	Desert Flowers.....	Lodge
Jan. 12.....	Problems of Range Management in the Parks.....	Ratcliff
Jan. 19.....	Various Moods of the Grand Canyon.....	Schellbach
Jan. 26.....	Death Valley National Monument.....	Sumner

1. The first step in the process of identifying a potential security threat is to determine the source of the threat. This can be done by reviewing the threat's history, including any previous incidents or warnings. Once the source is identified, the next step is to assess the threat's potential impact on the organization. This involves evaluating the threat's capabilities, intentions, and the likelihood of it being carried out. Finally, the organization must develop a response plan that addresses the threat's specific needs and objectives. This plan should include measures to prevent the threat from occurring, as well as contingency plans in case the threat does occur. By following these steps, organizations can effectively identify and respond to potential security threats.

[illegible]

1. The purpose of the study is to determine the effect of the use of the computer on the learning of the English language. 2. The study is a quantitative study. 3. The study is a descriptive study. 4. The study is a comparative study. 5. The study is a correlational study. 6. The study is a causal study. 7. The study is a longitudinal study. 8. The study is a cross-sectional study. 9. The study is a case study. 10. The study is an experimental study.

.....
.....
.....
.....

INTERPRETIVE PLANNING. Plans and estimates for the proposed Region Three Workshop for the Maintenance and Repair of Interpretive Devices were completed and a report submitted. The Interpretive Section of the Development Outline for the Master Plans of Carlsbad Caverns National Park was received and a review commenced. Preliminary layout plans for the Carlsbad Caverns National Park Master Plan Revision were studied. A chart showing graphically the status of all interpretive projects and developments at national monuments of the Southwestern group was completed and work started tying in the present status of these projects with the statement requested by the Director's Office of needed interpretive developments to be included in the Three Year Postwar Public Works Advance Survey and Planning Program. A hasty review was made of interpretive planning reports submitted by Grand Canyon National Park so that the value of such work may be included in future Master Plan revisions.

PUBLIC RELATIONS AND EXHIBIT SERVICES. Schellbach presented illustrated programs on Grand Canyon National Park at a meeting of the Santa Fe Kiwanis Club on January 16 to 38 persons, and on January 26 to 35 members of the Presbyterian Church Forum. Visual aids on Big Bend National Park were furnished the Jefferson National Memorial. The Pima Indian movie was loaned to the Boys Club of Phoenix, and Southwestern National Monuments reels to Boy Scout officials of Coolidge, Arizona. It was not possible to fill two requests for loan of visual aids because the series requested were already out on loan. Thirteen slides were transferred to Sequoia National Park and 81 to Grand Canyon National Park to fill vacancies in the slide libraries of those areas.

PROGRESS OF EXHIBIT PLANS AND PROJECTS. The status of all final exhibit plans for the various monuments of the Southwestern group were scrutinized in an effort to determine what might be done to complete some of these. When the Western Museum Laboratories went out of business, all progress on final museum planning terminated. A start was made on preparation of a dunny for the proposed Spanish language guide leaflet for the Tumacacori Museum.

RESEARCH AND OBSERVATIONS. Channels were opened to provide authoritative identifications and determinations of scientific specimens by the U. S. National Museum. If postwar allotments provide research personnel, there will be considerable of this type of work required and it was deemed wise to open the channels in advance.

OCCUPATIVE ACTIVITIES. At the request of the Museum of Northern Arizona, custodians of Tumacacori, Pipe Spring, Casa Grande and Montezuma Castle were asked to search their files for original research data recorded by the late Frank Pinkley in his many years of work at these areas. Some material was found and it was made available to the museum.

After considerable correspondence, 11 latex molds of inscriptions on The Rock at El Morro National Monument were found, and were loaned to the Museum of New Mexico. Plaster casts of the inscriptions will be made, the Museum offering to make duplicate casts for the National Park Service if desired.

HEADQUARTERS LOAN LIBRARY. The current project of accessioning and cataloging publications continued. Sixty-two publications were received during the

1. The first step in the process of the investigation is the selection of the subject. This is done by the investigator who is assigned to the case. The subject is selected on the basis of the information received from the source. The investigator then proceeds to the second step, which is the collection of information. This is done by the investigator who is assigned to the case. The information is collected from the source and is then analyzed. The third step is the analysis of the information. This is done by the investigator who is assigned to the case. The information is analyzed and the results are then reported to the superior officer. The fourth step is the reporting of the results. This is done by the investigator who is assigned to the case. The results are reported to the superior officer and the case is then closed.

2. The second step in the process of the investigation is the collection of information. This is done by the investigator who is assigned to the case. The information is collected from the source and is then analyzed. The third step is the analysis of the information. This is done by the investigator who is assigned to the case. The information is analyzed and the results are then reported to the superior officer. The fourth step is the reporting of the results. This is done by the investigator who is assigned to the case. The results are reported to the superior officer and the case is then closed.

3. The third step in the process of the investigation is the analysis of the information. This is done by the investigator who is assigned to the case. The information is analyzed and the results are then reported to the superior officer. The fourth step is the reporting of the results. This is done by the investigator who is assigned to the case. The results are reported to the superior officer and the case is then closed.

4. The fourth step in the process of the investigation is the reporting of the results. This is done by the investigator who is assigned to the case. The results are reported to the superior officer and the case is then closed.

5. The fifth step in the process of the investigation is the closure of the case. This is done by the investigator who is assigned to the case. The case is then closed.

6. The sixth step in the process of the investigation is the evaluation of the results. This is done by the investigator who is assigned to the case. The results are evaluated and the case is then closed.

7. The seventh step in the process of the investigation is the final report. This is done by the investigator who is assigned to the case. The final report is then submitted to the superior officer.

month including 46 periodicals, two books, 12 reports and two pamphlets. Harold Ratcliff donated volumes of American Forests and Journal of Forestry. Six annual reports of the Smithsonian Institution were secured to complete the file of that publication, and 16 issues of the Mesa Verde Notes were generously provided by Superintendent Musbaum. Lowell Sumner and Ben Thompson made considerable use of the library.

SOUTHWESTERN MONUMENTS ASSOCIATION. Several out-of-print publications were secured from book dealers and donated to monument libraries. Forty-seven negatives from the Peabody collection, taken during the early 1900's in Southwestern areas now administered by the Service, were purchased and donated to the Headquarters photo files. Affairs of the Association were kept current. No progress was made with the Arizona's National Monuments book.

PHOTOGRAPHY AND VISUAL AIDS. Three scripts were checked and a number of photographs provided at the request of the Society of Visual Education. Seventy-five Kodachrome frames were captioned and bound by Louise Lancaster and placed in the slide library. Big Bend and Carlsbad Caverns photographs taken in December were added to the photo files, several sets being sent out on request to editors of publications. Other sets have been requested by the Director's Office.

MONTHLY-WORTHLY VISITORS. Gilbert S. Maxwell of Farmington, New Mexico, visited the office seeking technical information relative to archeological research. Ranger Hendron, Custodian Thomas, and Park Naturalist Schellbach had business with the interpreters. Naturalist Caywood accompanied Ben Thompson and Louis Schellbach on a tour of the Laboratory of Anthropology, and accompanied Schellbach to Bandelier National Monument.

REGIONAL ACTIVITIES. The field was requested to submit lists of jobs covering maintenance and repair of interpretive devices by accomplishing which the proposed Region Three Workshop might be of effective assistance. Replies were used in working up plans and estimates for the proposed workshop.

RUINS STABILIZATION. No field work was possible because of restrictions imposed by lack of funds and by manpower ceilings. Work priorities for twelve national monuments were prepared and submitted. Stabilization photographs taken at Wupatki National Monument were prepared for filing and sent to the Custodian of Wupatki National Monument for detailed captions.

TECHNICAL AID TO ADMINISTRATORS. Land and deed status reports for Tumacacori and Aztec Ruins were prepared and submitted. Final revision of the interpretive section for the Custodians' Manual was completed and submitted. A revision of the form for submitting monthly statistical reports of interpretive services, combining features of the forms for scenic-scientific areas and historical-archeological areas was made and submitted.

REGIONAL NATURALIST ACTIVITIES. In staff meeting reports emanating from Regions One, Two and Four, discussion of any matters dealing with interpretation are noticeable by their absence.

PROJECTS PLANNED FOR NEXT MONTH. First in priority is the preparation of the Wildlife Conservation Section of the Development Outline for the Big Bend National Park Master Plan, a project which has been pending since August 1944. If film is provided by the Director's Office, the project of making a motion picture on Big Bend National Park will be undertaken. If possible, the Interpretive Data Report on Grand Canyon National Park, submitted September 28, 1943, will be condensed to a form suitable for inclusion in the Park Master Plan as the Interpretive Section of the Development Outline. Preparation of a print file of Region Three publicity negatives will be brought up to date and forwarded to the Director's Office. Emergency Ruins stabilization work will be accomplished if funds become available and manpower ceilings permit. Work will be continued on the preparation of the dummy for the Spanish Language guide book for the Tumacacori museum and on accumulating data for the Three Year Post-war Public Works Advance Survey and Planning Program. Perhaps time will be available for reviving the long dormant project of compiling the Interpreters' Handbook.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
REGION THREE
SANTA FE, NEW MEXICO

March 2, 1945.

MEMORANDUM for the Regional Director, Region Three.

There follows the monthly narrative Interpretive Staff report for Southwestern National Monuments and Region Three Headquarters for the month of February 1945.

STAFF ACTIVITIES - GENERAL. Naturalist Podre spent the entire month in the office carrying on routine duties of interpretive administration. He completed the Wildlife Conservation Section of the Big Bend Master Plan, reviewed the Interpretive Section of the Development Outline for the proposed revision of the Carlsbad Caverns Master Plan, and forwarded the Southwestern Monuments Association's project of publishing the book "Arizona's National Monuments".

Naturalist Caywood was in the office throughout the month except February 19 to 23, inclusive, when he went to Colorado Springs, Denver and Boulder, Colorado, at his own expense to study museum techniques, methods of presentation, modern exhibit construction materials, modern lighting methods, etc., as the basis for exhibit planning. While in the Headquarters office, in addition to routine activities, he started preparation of preliminary estimates of ruins stabilization needs and SWNM interpretive requirements, checked items of the Mercer University artifact collection stored at Headquarters, forwarded the projects of obtaining data for "Postindex Cards" for the Director's Office and of checking the translations for the Spanish Language guidebook to the Tumacacori exhibits. He also checked Ray Mattison's manuscript "Early Spanish and Mexican Settlements in Arizona", and worked up fact-file card material on request from the field.

INTERPRETIVE ADMINISTRATION. The project of preparing interpretive preliminary estimates for fiscal year 1947 was started. An attempt was made to secure engineering participation in resuming the Ruins Stabilization Studies started several years ago by Edmund F. Treese of the Branch of Engineering of the Director's Office. Some time was devoted to laying basic plans relative to needed interpretive developments in the postwar period.

INTERPRETIVE OVERHEAD. Distribution of recently received stocks of informational leaflets and location maps was outlined. Forty-six letters were written. More than the normal number of informational leaflets and photographs were sent out on request. One thousand rattlesnake informational leaflets were mimeographed to replenish exhausted stocks. "Personnel Notes" was compiled, processed and distributed to personnel in the armed forces. Repairs were made to the Leitz slide projector and to the microfilm reader and both pieces of equipment placed in serviceable condition. Arrangements were made for presentation of the following in-service training programs:

0516 AM W-11-37 AT 12

REGION THREE

NATIONAL PARK SERVICE

DEPARTMENT OF THE INTERIOR

UNITED STATES

February 2 - "Olympic National Park". Lowell Sumner
February 16 - "Cedar Breaks, Bryce Canyon, Grand Canyon and
Zion National Parks", Union Pacific Railway sound
film.

PLANNING (Other than Museum). Preparation of the Wildlife Conservation Section of the Big Bend National Park Master Plan was completed and submitted. The Interpretive Section of the Development Outline for the revised Master Plan for Carlsbad Caverns National Park was reviewed and approved for submission. The project of checking lost index cards on the status of interpretive developments in Southwestern National Monuments was continued at the request of the Director's Office.

PUBLIC RELATIONS AND EXTENSION - VIEWS. Programs were presented on the evenings of February 2 and 16 for patients at Burns General Military Hospital to audiences of 45 and 30, respectively. Headquarters' movie films covering the national monuments of Arizona and New Mexico were received following showings to approximately 100 persons in Coolidge, Arizona. They were immediately forwarded, on request, for showings in Mount Rainier National Park. Films on the national monuments of the Four Corners Country were sent, on request, for showings to public school audiences in Hooper, Colorado. Slides on the flowers of the Sonoran Desert were returned from showings to members of Service Clubs in the vicinity of Stone Harbor, New Jersey, and replaced by slides on the national monuments of Arizona and New Mexico.

PROJECTS ON EXHIBIT PLANS AND OBJECTS. Items of the Mercer University Collection, now in storage at Headquarters, were checked and some pottery repairs made preliminary to distributing these items to field stations nearest their original source. Checking of the Spanish translations of Tumacacori museum exhibit labels continued, forwarding the project of preparing a guide book for use of Spanish-speaking museum visitors. Region Three Anthropological Note #28 was prepared, mimeographed, and distributed to the field. The manuscript by Ray Mattison, "Early Spanish and Mexican Settlements in Arizona" was carefully checked and a copy made and forwarded to the Tumacacori National Monument Library. One motion picture camera and one still picture camera were loaned to Mandelker National Monument for securing wildlife photographs and in an attempt to obtain suitable pictures for the Interior Department's weekly news-picture service.

RESEARCH AND OBSERVATIONS. A start was made toward securing basic data for the preparation of an informational leaflet on Great Sand Dunes National Monument.

COOPERATIVE ACTIVITIES. Publications were requested from Dr. Forest Shreve for Organ Pipe Cactus National Monument. A start was made in copying Stevenson's paper on Big Bend National Park Wildlife at the request of Dr. Walter A. Taylor of the Fish and Wildlife Service. Supplies and equipment were requested from the Director's Office for the proposed photographing project in Big Bend National Park.

HEAD MASTER LOAN LIBRARY. The current project of accessioning and cataloging publications was greatly facilitated through the assistance of Mrs. Cecelia Sowers and Mrs. Helen Bressert both of whom types a large number of file cards. Forty-one publications consisting of two books, ten reports, five pamphlets and 24 periodicals were received. A start was made in the checking up on unreturned loans; a job that has been neglected for nearly three years.

ARIZONA NATIONAL MONUMENTS ASSOCIATION. Administration of the Association's numerous affairs was kept current. Definite specifications accompanied the order placed for printing 5,000 copies of eight color plates for use as inserts in the forthcoming book, "Arizona's National Monuments". Only one reprint for the book remains to be made. Progress was made in locating a bindery that could handle the binding of the book under wartime restrictions.

PHOTOGRAPHY AND VISUAL AID. Louise Lancaster captioned and bound 25 Kodachrome frames as projection slides. Larry Reed submitted 24 Kodachrome frames, with captions, taken last autumn in Arches National Monument. The project of developing a file of prints, from suitable Region Three Headquarters publicity negatives, for the Director's Office was continued. A number of pictures was furnished the Director's Office for use by the Society for Visual Education.

REGION-THREE VISITORS. C. A. Thomas, Jesse Musbaum, Charlie J. Smith, Freeman Tilden, Milton McCollm and Stanley Stubbs of the Laboratory of Anthropology had business with the Interpreters.

WILDLIFE MANAGEMENT. Plans for spring reduction of surplus deer in Zion National Park were reviewed and approved.

NATURAL ACTIVITIES - CONTINUING. After some discussion, it was decided to postpone the project of making a motion picture in Big Bend National Park, but to attempt to secure a good assortment of still pictures during the period of Giant Dagger Bloom this spring. The naturalist sat in on a discussion of legislation before Congress relative to modifying or repealing the Antiquities Act of 1906. Some thought was given to the need for specimen storage in the Region Three Headquarters building. More and more valuable material belonging to field areas without adequate storage facilities is accumulating at Headquarters, and suitable storage for such items as latex moulds, plaster casts, prehistoric pottery and other valuable and fragile collections will have to be provided.

RUINS STABILIZATION. Lack of funds and manpower ceilings prevented accomplishment of needed ruins stabilization work.

HOJOS PLANNED FOR NEXT MONTH. It is anticipated that Dodge will be called to Big Bend National Park to secure photographs at the request of Collaborator Tilden. It is possible that he may be able to visit some of the national monuments en route as there are numerous details relative to interpretive problems to be discussed with field men, several of whom are

1. The first of these is the fact that the majority of the population of the United States is now living in urban areas. This is a result of the process of urbanization, which has been going on since the beginning of the 20th century. The process of urbanization is the movement of people from rural areas to urban areas. This is done for a variety of reasons, including the search for better living conditions, the desire for education, and the need for employment. The process of urbanization has led to the growth of large cities and the decline of small towns. This has had a significant impact on the way we live and work. For example, it has led to the development of new technologies and industries, and it has changed the way we think about the world. The process of urbanization is still going on, and it is likely to continue for many years to come. This is because there are still many people who are looking for better living conditions and opportunities. The process of urbanization is a complex one, and it is not always easy to understand. However, it is a process that has shaped the world as we know it, and it is one that will continue to shape the world in the future.

1. The first step in the process of the investigation is the identification of the problem. This is done by the investigator who is assigned to the case. He or she will then conduct a thorough search of the records and other sources of information to determine the nature and extent of the problem. This may involve interviewing witnesses, reviewing documents, and conducting field research. Once the problem has been identified, the next step is to develop a plan of action. This plan should outline the steps that will be taken to solve the problem, including the assignment of tasks to specific individuals and the establishment of a timeline for completion. The plan should also include a method for monitoring progress and a system for reporting back to the supervisor. Once the plan has been developed, the investigator will begin to implement it. This may involve conducting interviews, reviewing documents, and conducting field research. The investigator will continue to monitor progress and report back to the supervisor as needed. Once the problem has been solved, the investigator will prepare a final report detailing the findings of the investigation and the steps that were taken to solve the problem. This report will be submitted to the supervisor for review and approval.

The above information was obtained from a review of the files of the [redacted] and [redacted] and is being furnished to you for your information.

UNITED STATES
DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE

inexperienced in interpretive work. Return of Acting Librarian Florence Dodge to her home in Colorado will terminate the book accessioning and cataloging project for this year. It is anticipated that all accumulated accessions of the past three years will be catalogued and shelved, although it will not be possible to complete the carding. If all goes well, the project of setting up a print file from Region Three publicity negatives, for the Director's Office, will be completed. Estimates covering the needs of the Headquarters Interpretive Office for fiscal year 1947 will be prepared and submitted. Work on the Naturalist's Handbook will be continued if time permits. There appears to be some prospect that the printing of the Southwestern Monuments Association's book "Arizona's National Monuments" will be finished during the month and that a contract for binding may be placed.

NATHAN DODGE

Supervisor for the Regional Director, Region Three:

The following is a list of Nath F. Dodge, the former National
Scientist for the month of Feb. Associate Naturalist.

Approved for distribution M. R. JILLOTSON, March 5, 1945.

cc: Director's wife, Mrs. C. and Wyoming. Several reports for before-
Mr. Richey, in dupl. Act. Reg. Naturalist.

NATIONAL PARK SERVICE

Arches NATIONAL MONUMENT

Moab, Utah

February 25, 1945

MEMORANDUM for the Regional Director, Region Three:

The following is a narrative report for Arches National Monument for the month of February, 1945:

TRAVEL: Out travel jumped slightly over last month with a total of 12 cars and 35 people visiting the Windows and Delicate Arch sections of the area. The travel was practically all local, with only two out of state cars, from Georgia and Wyoming. Several requests for information about Arches have been received so it looks like we may get some travel during the coming season.

INTERPRETIVE SERVICES: Two trips were made into the Windows section with parties of visitors. There were two people in each party and the trips were of 4 hours duration, with all points of interest being visited. The Delicate Arch was visited on two occasions during the month. I spent approximately 16 hours giving the 3 visitors a view of this magnificent arch and the surrounding country.

WEATHER: The weather has been considerably warmer during the month, bringing us to the realization that spring is just around the corner. We had about 5 inches of snow during the month which melted about as fast as it fell. The spring winds have started and there have been several days on which it was extra strong.

INSPECTIONS: Assistant Regional Director Richey and Chief Clerk Cox arrived on February 8th for an inspection of the area. We made a trip to the Windows section and went over various administrative and maintenance problems. They made a thorough inspection of the headquarters area and left on the afternoon of February 10th for Aztec Ruins and Chaco Canyon.

MAINTENANCE: Our power line burned out on the night of February 7th and upon investigation, with plenty of excavation, found that the lines near the house had been buried without the use of conduit. For a distance of about 8 feet both wires were badly corroded and broke upon touching them. Replaced this portion of the line and used old air hose as conduit for a temporary job.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

NATIONAL MONUMENT

Archives

February 25, 1928

Memorandum for the Regional Director, Region Three:

The following is a narrative report for Arches National Monument for the month of February, 1928:

TRAVEL: Out travel during the month with a total of 15 cars and 25 people visiting the windows and Delicate Arch sections of the area. The travel was principally all local, with only two cars of state cars, from Georgia and Kentucky. Several requests for information about the area have been received so it looks like we may get some travel during the coming season.

INTERPRETIVE SERVICE: Two trips were made into the window section with parties of visitors. There were two people in each party and the trips were of 4 hours duration, with all points of interest being visited. The Delicate Arch was visited on two occasions during the month. I spent approximately 16 hours giving the 3 visitors a view of this magnificent arch and the surrounding country.

WEATHER: The weather has been considerably warmer during the month, bringing us to the realization that spring is just around the corner. We had about 5 inches of snow during the month which melted about 15 days as it fell. The spring winds have started and there have been several days on which it was extra strong.

INSPECTION: Assistant Regional Director Nichols and Chief of Rangers arrived on February 25th for an inspection of the area. We made a trip to the window section and went over various administrative and maintenance problems. They made a thorough inspection of the headquarters area and left on the afternoon of February 26th for Arches Window and Glass Canyon.

MAINTENANCE: Our power line burned out on the night of February 25th and upon investigation, with plenty of excavations, found that the line over the house had been pulled without the use of saws. For a distance of about 2 feet both wires were badly corroded and broken upon contact with the ground. This portion of the line was used old wire as a conduit for a temporary job.

UNITED STATES

DEPARTMENT OF THE INTERIOR

Spent several days on the files, during the month, lining them out according to W. P. S. Procedure.

Continued work on cleanup of utility area as time permitted. Placed siding ~~siding~~ on sections of the warehouse, which were open, with the hope that this will keep the wind from getting under the roof and tearing the building paper.

The road to the Windows section is in good shape and no extensive maintenance was performed this month. On a trip into the Salt Valley on February 23rd it was found that either the State or Grazing Service had graded the road from Valley City to the lower end of the valley and it certainly has improved it. I am going to find out who accomplished this work and give them a vote of thanks.

NEW CONSTRUCTION: Worked at odd times on the construction of the picket fence around quarters. Have this about completed across the front of the yard and with an additional 40 feet of posts and stringers in place north of quarters. Have planted various perennials along the fence and have the excavations ready for about 25 Lombardy Poplars, to be planted along the roadway and on both sides of quarters for a windbreak, if and when I am able to find the trees.

FORESTRY: It has been noted that the porcupines have been very active in both the Devil's Garden and Windows sections. In the vicinity of the Pine Tree Arch, in the Devil's Garden, all the pinyons have been badly barked and it looks like they will all die. In the Windows section a good portion of the young pinyon growth, one or two foot high, has been stripped. I have not caught up with any of the culprits yet but when I do they will be severely reprimanded.

GRAZING: Permits were received during the month for all sheep men who cross monument lands with their flocks. These permits are being completed as rapidly as possible. Two trips were made in the Salt Valley and Salt Wash sections and several into the Windows section and no evidence of intentional trespass was found.

UNITED STATES

DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE

Aztec Ruins National Monument
Aztec, New Mexico

Feb. 23, 1945.

MEMORANDUM for the Regional Director,
Region Three, National Park Service.

There follows the report of activities for Aztec Ruins National Monument for February 1945.

GENERAL

The weather has been quite enjoyable with temperatures ranging from 17 to 59 degrees above zero. Precipitation has been less than $\frac{1}{2}$ inch and snow fell on 5 different days scattered thruout the month. The local apple and peach orchards are beginning to bud and signs of Spring are abundant.

SPECIAL ACTIVITIES

Feb. 20, to Flora Vista to contact Farmers Ditch Co. representative, but was unsuccessful this second time.

INSPECTIONS

Assistant Regional Director Richey and Chief Clerk Cox visited Feb 11, appraising the serious need for ruins stabilization, going over the proposed site for the drainage ditch project and checking other details in general.

Custodian Sowers from Chaco and Mechanic Stonehaucker from Casa Grande were also in on the 11th.

MAINTENANCE

All drains in the ruins were checked, those needing attention were cleaned.

A portion of the museum roof over the rest rooms was checked for leaks resulting from recent settling and cold of January. Repairs were made to the roof and to several screen doors of the museum.

The pump in the covered kiva was dismantled, cleaned and reassembled.

The manhole covers for the drainage ditch were hauled from the freight depot on the 6th.

High wind on the 5th removed a portion of the roofing material from the roof over the walk along the north side of the museum. This was repaired.

The water softener in the basement of the museum was completely dismantled and removed to the residence area. A number of pipe connections were found occluded by rust and other accumulations, several were rusted to such an extent

Crutcher, George, from Graco and Phillips 2 female white. Yrs 1908-1910, age

0-1796

A portion of the above report was the first report was issued for Justice resulting from these activities and dated January, 1961. It was sent to the pool and to several members of the group.

The group in the cover of *Wine* was directed, dressed and photographed.

The number of cases for the challenge filed was called from the trial of 1902.

The water collected in the basement of the building was discharged into the sewer and removed to the treatment plant. A number of large quantities were found in the basement of the building, which were found to be in the basement of the building.

that they twisted apart under the force of a wrench. The perforated plate in the interior bottom of the softener tank was entirely covered with a concrete mixture of gravel, rust, oil and selenite chemical which prevented all circulation at this point. It was necessary to remove this layer with a cold chisel and hammer.

There was somewhat more than a pint of cylinder oil in the chamber between this plate and the bottom of the tank which entered presumably from the old pumping plant.

The drain leading from the garage laundry and waste supply was found broken entirely in two, the proximal end having dropped 2 inches below the pipe line, allowing all waste water to escape into the area north of the garage and south and east of the residence. It is hoped that correcting this break much of the moisture appearing in this area will be alleviated.

A 30 gallon hot water tank was installed in the residence.

INTERPRETIVE SERVICES

There were 75 visitors conducted on 28 trips thru the ruins and 79 visitors in 31 parties shown thru the museum. A small display case was installed for the sale of publications.

RESEARCH AND OBSERVATION

Several groups of Bald Pate Ducks, *Mareca americana*, have visited the Monument and were identified by Mrs. Townsend as they swam about feeding on the small pond that is contiguous with the boundary at the north side. Other observations have disclosed a porcupine, pheasants, white crowned sparrows, *Zonothichia leucophrys*, song sparrows, *Melospiza melodia*, numerous Wuncos including the pink sided Junco *mearnsi* and Junco *oreganus*, and the great horned owl, *Bubo virginianus* pallescens.

INCREASE OR DECREASE IN TRAVEL

There were 110 visitors in 36 cars from 7 states, including 6 from the armed forces. This is approximately 63% of the travel for February 1944.

Of the 110 visitors, 43 purchased tickets to the ruins amounting to \$12.90, and with tax on 10 children and 4 complimentary tickets, the total collections amounted to \$13.60.

The greater part of travel was made up from local and neighboring residents with visiting friends and relatives, the remainder from armed forces personnel and travelers enroute.

VISITORS

Jack Sheridan, Asso. Mining Engr. and Ray B. Holmquist, Mining Engr. Bureau of Mines, Albuquerque, visited the Monument.

RANGER SERVICE

James A. Lancaster entered on duty as ranger February 1, by promotion from Fireguard, Mesa Verde National Park.

PERSONNEL

The Custodian was on annual leave Feb 1 to 10 inclusive.

that they twisted apart under the force of a wrench. The perforated plate in the interior bottom of the softener tank was entirely covered with a concrete mixture of gravel, rust, oil and selenite chemical which prevented all circulation at this point. It was necessary to remove this layer with a cold chisel and hammer.

There was somewhat more than a pint of cylinder oil in the chamber between this plate and the bottom of the tank which entered presumably from the old pumping plant.

The main leading from the garage laundry and waste supply was found broken entirely in two, the proximal end having dropped 2 inches below the pipe line, allowing all waste water to escape into the area north of the garage and south and east of the residence. It is hoped that connecting this break with the main water supply in this area will be alleviated.

A 30 gallon hot water tank was installed in the residence.

INTERPRETIVE SERVICES

There were 75 visitors contacted on 13 trips thru the ruins and 73 visitors in 31 parties shown thru the museum. A small display case was installed for the sale of publications.

RESEARCH AND OBSERVATION

Several groups on Lake Pate Docks, Maraca streets, have visited the monument and were identified by Mrs. Townsend as they swim about feeding on the small pond that is contiguous with the boundary at the north side. Other observations have disclosed a cornucopia, herons, white crowned sparrows, Zonotrichia leucophrys, song sparrows, peloponnesia - larks, numerous juncos including the pink sided juncos, scarlet and lance oropendras, and the great horned owl, also virginianus pallascens.

INCREASE IN DECREASE IN TRAVEL

There were 110 visitors in 26 cars from 7 states, including 6 from the armed forces. This is approximately 65% of the travel for January 1944. Of the 110 visitors, 65 purchased tickets to the ruins amounting to \$12.00, and with tax on 10 children and 4 complimentary tickets, the total collection amounted to \$12.00.

The greater part of travel was made by foot local and neighboring residents with visiting friends and relatives, the remainder from armed forces personnel and travelers en route.

VISITORS

Jack Sheridan, Asst. Mining Eng., and Ray E. Hildner, Mining Engr., Bureau of Mines, Albuquerque, visited the monument.

WAGON TRIP

James A. Lawrence, engineer on duty at Canyon February 1, by permission from Fireman, made a trip to the ruins.

REMARKS

The condition was on arrival leave for 1 to 13 inclusive.

SAPlannedProjectsfor March

February 12, 1948

Maintenance to include setting up and placing in service the water softener, repairs to residence and possible start of drainage ditch project.

Enclosure for the National Director, Belling View.

There follows a report of activities at Belling View for the month of February, 1948.

/s/ IRVING D. TOWNSEND

Irving D. Townsend,
Custodian.

General. The weather for February has been generally clear and mild with light winds. The most striking has been the steady snow of January to melt and make the country wet and muddy. The ground is generally dry at the present time. The snow has been the most of the month for the winter season. The weather has been generally clear and mild and there is the possibility of a snow storm. The day today is clear and sunny and the weather is good. The day today is clear and sunny and the weather is good. The day today is clear and sunny and the weather is good.

People. A number of people have been seen at Belling View for the month of February.

Investigations. Only a few birds were seen with 20 people. A number of people were seen at Belling View. The investigation was a talk at the Belling View. The investigation was a talk at the Belling View. The investigation was a talk at the Belling View.

Travels. Mr. and Mrs. Townsend have been guests of the Belling View February 11th.

Maintenance and Repairs. The project of building a new house at Belling View is being continued. Other minor and storage for the building were provided. Most of the building work was done in the day. The building work was done in the day. The building work was done in the day.

BANDELIER NATIONAL MONUMENT

SANTA FE, NEW MEXICO

February 25, 1945

MEMORANDUM for the Regional Director, Region Three.

There follows a report of activities at Bandelier National Monument for the month of February, 1945.

General. The weather for February has been generally clear and warm with light winds. The warm weather has caused the heavy snows of January to melt and make the country wet and muddy. The ground is getting dry as the month ends. The thaw has made the road from Otowi to Frijoles Canyon utterly impassable except late at night and early in the morning when the mud was frozen. What few visitors ventured in usually had to be pulled out of the mud with a truck and towed back to a surfaced highway.

Travel. 44 visitors came in 15 cars and 3 people hiked in. Total travel for the month was 47 people.

Interpretation. Only 4 ruins trips were made with 22 people. 8 people were given museum talks. The Custodian gave a talk to the Santa Cruz High School at Santa Cruz to 150 students on the subject The Monuments and the Work of a Park Ranger on February 10 th.

Visitors. Mr. and Mrs. Caywood from Santa Fe were guests of the Custodian February 11 th.

Maintenance and Improvements. The project of providing Dutch doors between the Museum Lobby and the office was completed. Better display and storage for sales publications were provided. Most of the month by all personnel were spent in the shop performing routine maintenance, painting and repair on a thousand small jobs.

NATIONAL PARK SERVICE

Canyon de Chelly

Chinle, Arizona

February 25

1944

MEMORANDUM for the Regional Director, Region three.

There follows a report of activities at Canyon de Chelly National Monument during the month of February, 1945.

Weather

The weather during the month has been milder than usual but quite windy. Maximum temperatures ranged mostly above 50, the highest being 67 degrees. Minimum temperatures have ranged between 20 and 40 degrees and dropped to 15 on only one day. As usual surrounding areas have received more moisture than Canyon de Chelly and although the roads have been better than usual there has still been a lot of mud. We have had .32 inches to date. Warm weather and snow and rain in the upper areas have caused a considerable flow of water in the canyons.

Administration

Horseback patrols have been maintained and inspection trips made at intervals over the area as weather permitted. The custodian took one day of annual leave in order to bring his wife back from Colorado.

Maintenance

Considerable time was spent on improving the grounds around the headquarters building and dragging the roads. Most of my road work was unnecessary as The Navajo Service graded it with the patrol a few days later. More of the directional signs were painted and the big sign from Garcias store was brought in for refinishing. The office has been completely cleaned and rearranged to make more room. The silt and dirt was cleaned from the water tank.

Travel

We had ten visitors in three cars but only two were conducted to White house. The others had enough when they got to the first overlook. A total of three hours and twenty minutes was spent in guide time.

Public Health

There is an epidemic of flu and at present the Custodian's wife is quite ill.

NATIONAL PARK SERVICE
CAPULIN MOUNTAIN NATIONAL MONUMENT
CAPULIN, NEW MEXICO

CE OF THE CUSTODIAN

February 24. 1945.

There follows a report of the activities of Capulin Mountain National Monument for the month of February,

I estimate three hundred visitors to this Monument this month, making the same as this month last year, Most visitors were able to reach the top of the volcano over the road and not until the 21st was the road impassable account of snow and this only for a couple of days,

Weather has been great during most of the month, bright clear crisp days and cold nights until the 21st when we had a very severe snow storm but only about three to four inches of snow but plenty of wind, This blocked the road on the Volcano as well as along the highway for a few hours, However all is nice and bright again at this writing,

Roads have been overhauled in the Park several times during the month are now in first class condition, Roads leading to the Monument from Capulin and Highway 87 are in fair condition Roads over Highway 64 from Folsom are very rough, The entrance road (which by the way is only about three fourths of one mile in length) has been kept in fair condition but is in need of graveling as this stretch of road gets pretty muddy during wet weather, It is however well drained and needs only gravel,

This Monument is located about half way from Colo Springs to Dalhart Texas, where there are two air bases Evidently the Pilots get quite a kick out of this monument as most of the planes that come near this Volcano give the old crater the once over and make a circle over the crater occasionally diving straight down on the opposite side of the Volcano from the village of Capulin thereby giving the appearance of diving into the crater and never coming out again

One get the impression that the Crater would soon get full of Bombers but they only create a hoax.

Temp for the month High 60
Low 18

Precipitation $\frac{1}{2}$ "
four cloudy days
four partly cloudy.

Very Respectfully,
Homer J. Farr,
Custodian,

February 25, 1945

MONTHLY REPORT

FEBRUARY, 1945

A.T. Bicknell, Custodian

Visitors: Once more there is a decided increase in the number of visitors.

A total of 765 visited the Ruins, 298 were unattended and about 60 held small picnics, usually Ruin visitors who had brought their lunch. This is an increase of 63 visitors over January and of 40 over February of last year. A fair number - about 30 - walked in, either from the bus stop or from Coolidge, but the majority came in 342 cars, an increase of 32 over January and of 16 over February, 1944. Two sailors flew from the San Diego hospital to the Coolidge Air Port, took the bus to Coolidge and walked the rest of the way to Casa Grande arriving about six p.m. After a thorough look at the Ruin they returned to the Air Base to await a plane back to San Diego. There were 102 members of the Armed Forces who visited the Ruins.

Interpretive Services: There were 140 conducted tours of the Ruin for 765 people, a total of 5830 minutes which averaged 41.6 minutes per group. In the Museum there were 115 talks for 618 visitors; a total of 2576 minutes or an average of 22.4 minutes per group. About six leisured groups used the Desert Trail booklet to follow the trail. The biggest single day was Feb. 11 with 87 Ruins visitors and 39 Unattended. There were 20 picknickers that day.

Weather: Spring is in the air and the weather is appreciably warmer than in January. The high was reached on Valentine's day with 81 degrees and 80 on

February 20, 1915

REPORT OF THE SUPERVISOR REPORT OF THE SUPERVISOR REPORT OF THE SUPERVISOR

Visitors: One new place is a typical Indian in the house of visitors. A total of 200 visited the place, the way was unobstructed and about 50 were well dressed, mostly men, women and children. This is an increase of 20 visitors over January and 40 over January of last year. A fair number - about 20 - stayed in, others from the way stop at their cottages, but the majority come in and out, an increase of 20 over January and of 15 over February, 1914. The entire time from the new design completed in the building was over, over the new to building and within the year of the new house building about 100 p.m. after a building look at the new building in the new house to build a house back to the place. There were 100 visitors of the house during the winter. Interpretive Service: There were 100 visitors of the house for 750 people, a total of 1000 visitors with 1000 visitors in 1914. In the house there were 1000 visitors for the year; a total of 2000 visitors on an average of 1000 visitors per year. There are 1000 people who are the house and 1000 people in the house. The house is 1000 people who are the house. There are 1000 people who are the house. There are 1000 people who are the house.

Weather: There is a lot of rain and the weather is very hot and dry. The house is 1000 people who are the house. There are 1000 people who are the house.

the eighth and fifteenth. The low maximum was 59 on Feb. 20. The minimum low was 25 the nights of Feb. 22 and 23 and the warmest nights were 44 on the third, tenth and sixteenth. There were six cloudy or partly cloudy days and a total of .45 inches of rain divided amongst three days.

Maintenance: In addition to the regular maintenance (and might we mention we receive many compliments on the general appearance of the Monument) the inventory of the warehouse has been taken. Thirty-two masonite signs were cut out for ^{Chiricahua} ~~Saguaro~~. The walks have been repaired. Surveyed material has been delivered to the Scrap Drive. Some repair work was done on the Bicknell ramada and a number of odd jobs done at the Jackson house.

Shop Activity: Mechanic Stonehocker submits the following report: Motor overhauled and ready for installation on Relief Ranger Reed's panel truck. Wupatki pickup truck repairs completed. A trip was made to Chaco Canyon, the following was delivered for respective areas: Canyon De Chelly, fuel oil storage tank; Zuni yard Gallup; El Moro, kitchen range and kerosene heater as well as various small items; Chaco Canyon, Duo-Therm oil heater, kerosene heater, light plant, plaster for building repairs and various small items. While at Chaco I plastered the walls of the living room and one wall of the dining room, also assisted the Custodian in moving the gas electrolux from the dining room to the service porch, rearranged the kitchen range and trash burner and made repairs to the water piping for water heater. A survey was made of equipment and several items were brought in either for repair or surplus listing. Metal lathe and celotex from Wupatki and fifty 2 x 8 lumber from Walnut Canyon were brought in for Saguaro National Monument. A cattle guard and clothes line posts were loaded and taken to Saguaro.

The above information was obtained from the files of the FBI, New York Office, dated 10/10/68.

...and a number of his other books.

[illegible]

One 18-foot culvert, 200 feet of one-inch pipe, a set of clothes-line posts and one light pole were delivered to Saguaro to be taken to Organ Pipe in the near future."

Other Activities: On Feb. 3 the Custodian went to Phoenix to get material to fix the stake truck for its trip.

N.P.S. Visitors: Custodian and Mrs. Wilson came from Saguaro for material. Bill picked out equipment for Navajo.

Acquisitions: Bancroft's "Arizona and New Mexico" was given to the Casa Grande library by the Southwestern Monuments Association. A Check List of "Native and Naturalized Trees of the U.S. including Alaska" and Recreational Resources of the Denison Dam and Reservoir Project have been received.

Nature Notes contributed by Betty Jackson. The following earliest-on-record observations were made this month: Doves, Mourning, mating Feb. 12, nesting Feb. 14, egg in another nest, Feb. 20. Flicker, Mearn's Gilded, has not left the Monument all winter, though previously not reported between October and March. Lizard, probably Uta Stansburiana, seen Feb. 8, Baby Horned Toad, about one and three-quarters inches long was seen Feb. 18. These were seen in the residence area. On Feb. 24 Teddy Baehr found a snake in a sunken valve box which Earl identifies as an adult Spotted Night Snake, Hypsiglena ochrorhyncha.

Other interesting notes are: Hawk seen on west boundary, flushed from site where several bird remains showed they had been eaten before, probably Cooper's Hawk, maybe Sharp-shinned. Phainopeplas courting. Cactus Woodpecker, not seen for about three months until Feb. 14. Orange mallow, mustard, creosote and primrose have bloomed more or less sporadically this month.

Other Nature Notes: The bats are returning from their winter resort. One was

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

found dead on the floor Feb. 10 and there are plentiful indications of others.

A most unusual number of coyotes are heard howling every night and sometimes in the morning but no one has reported seeing them. Swallows, finches, say phoebes, sparrows and others are getting settled in the Ruin and shelter in numbers. A mastiff bat was found on the floor of the center room Feb. 24. The rabbits, both jack and cotton-tail are here in increasing numbers.

Personnel Notes: Colds and influenza have been rampant around the Monument.

All the Jacksons, both Bicknells, Rangers Shearwood and Duffield have been afflicted in greater or lesser degree. Ranger Shearwood took five days sick leave for flu. Ranger Duffield had his tonsils removed in the Florence hospital Feb. 12 and returned to duty Feb. 22, celebrating both Presidents' birthdays.

"Teddy" Baehr startled the neighborhood by announcing he had bought two V-8's. Challenged to produce them, he did. One in each hand, a nice can of nourishing vegetable juices.

Add Other Activities: Trips taken: Jan. 29, Mechanic Stonehocker accompanied Ranger Duffield on the latter's lieu day to Tucson, en route to Tumacacori for Relief Ranger's truck. Feb. 2, Gene went to Saguaro for the stake truck with which to make the Chaco and Walnut Canyon trip. On the 7th he left for Chaco and came back by way of Walnut, Wupatki and Saguaro and returned to Casa Grande Feb. 20.

1. The first of these is the fact that the majority of the population of the United States is now living in urban areas. This is a result of the process of urbanization, which has been going on since the beginning of the 20th century. The process of urbanization is the movement of people from rural areas to urban areas. This is a result of the fact that urban areas offer more opportunities for employment and education than rural areas do. The process of urbanization has led to the growth of large cities and the decline of small towns and villages. This has had a number of effects on the economy and society. One of the most important effects has been the increase in the size of the labor force. This has led to the growth of the manufacturing industry and the service industry. Another effect has been the increase in the demand for housing and infrastructure. This has led to the construction of new cities and the expansion of existing ones. The process of urbanization has also led to the concentration of wealth and power in urban areas. This has led to the development of a class system in which the wealthy live in the city and the poor live in the suburbs. This has led to a number of social problems, including poverty, crime, and drug use. The process of urbanization is still going on today, and it is likely to continue for many years to come. This is because there are still many people who are looking for better opportunities in urban areas. The process of urbanization is a complex one, and it has many different effects on the economy and society. It is important to understand the process of urbanization in order to be able to deal with the problems that it creates.

CHACO CANYON NATIONAL MONUMENT

BLOOMFIELD, NEW MEXICO.

FEBRUARY 25 1945

MEMORANDUM for the Regional Director,
Region Three.

There follows the report of activities in Chaco Canyon National Monument for February, 1945.

VISITORS. A total of 58 visitors were contacted at Chaco Canyon during this report period. Three were bona fide visitors who went thru Pueblo Bonito; the others desired information. A total of 925 minutes were spent in contact time. Seven written requests were received.

WEATHER. This report period has been cold and windy. The maximum of 64 degrees was reached on February 14. The minimum of 18 degrees occurred on February 8, 11 and 23. Hail and snow fell on February 16 and 23. Precipitation amounted to .38 inches.

N.P.S. VISITORS. Mechanic Stonehocker arrived on February 7 and left on the 15. Assistant Regional Director Richey and Chief Clerk Cox arrived on February 12 and left on the 13.

ACTIVITIES. The light plant failed again after installing a new fan belt. The fan assembly "froze" and this caused the fan to cut into the radiator. Took radiator and fan assembly into the Aztec Motor for repair. Cleaned and straightened out materials in light plant room and garage; also cleaned the light plant motor.

Left for inspection trip to El Morro National Monument on February 6. Met Assistant Regional Director Richey and Chief Clerk Cox in Gallup. Inspected El Morro on the 7 and was very glad to meet Labor-Caretaker Worthen. Various problems were discussed and returned to Gallup that night. Roads were very muddy and travel was slow.

Returned to Chaco on the 8, and found Mechanic Stonehocker there with a load of plaster, replacement light plant and other requested supplies for Chaco.

The old water pump was removed and the new light plant was installed. Two trips were made for sand to be used in replastering the quarter's living room. During Stonehocker's stay, the living room was replastered and also

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

NATIONAL MONUMENT

REPORT, 1942

1942

Report for the National Monument,
Region Three.

There follows the report of activities in Grand Canyon National Monument
for February, 1942.

REPORT. A total of 25 visitors were recorded at Grand Canyon during this
report period. These were from the following states: Arizona, New Mexico,
the other listed information. A total of 250 minutes were spent in contact
with. Other visitors were recorded.

REPORT. This report period was from 1942 and 1943. The number of 24 visitors
was recorded on February 14. The number of 19 visitors occurred on February 17,
11 and 22. Half and one half on February 18 and 20. Prescription mounted
to 35 visitors.

R.P. 1. 1942. Assistant National Director Richey and Chief Clerk Cox arrived on February 12
and left on the 13.

ACTIVITIES. The light plant failed again after installing a new set of lights. The
for assembly "room" and this caused the fire to cut into the building. The
register and the assembly into the main room for repair. The main room
established out materials in light plant room and garage; also cleaned the
light plant motor.

Left for inspection trip to El Monto National Monument on February 8.
Met Assistant National Director Richey and Chief Clerk Cox in Gallup. Located
El Monto on the 7 and was very glad to meet Labor-Unionist Richey. Visitors
problems were discussed and returned to Gallup that night. Rooms were very
muddy and travel was slow.

Returned to Grand on the 8, and found various improvements made with a
load of plaster, replacement of light plant and other requested supplies for Grand.
The old water pump was removed and the new light plant was installed.
Two trips were made for work in registration the quarter's living
room. During Richey's stay, the living room was repainted and also

Chaco Canyon (cont)

one bad wall in the dining room. The stoves in the kitchen were re-arranged. It was also necessary to completely dismantle the water tank and water heater so that the tank could be cleaned. Smaller pipes and a shut-off valve were also installed. The ice box was removed from the dining room and placed on the back porch.

A trip to Aztec was necessary in order to pick up the radiator and fan assembly for the old light plant as Stonehocker is to overhaul the entire plant. Also picked up additional material at Aztec Ruins National Monument.

Assistant Regional Director Richey and Chief Clerk Cox arrived Chaco on February 12, in the midst of replastering the living room. Headquarters area, Pueblo Bonito, Chettro Kettle, University of New Mexico's Summer School buildings, Trading Post and remains of CCC camp were thoroughly inspected. Various problems were discussed and valuable suggestions were received. Richey and Cox left on the 13, and their visit was enjoyed very much. It is hoped that Chaco will be more comfortable for their next inspection.

On February 13, while Stonehocker and this custodian were walking across the bridge over Chaco Wash, we noticed a large hole under the north approach. Upon closer inspection, it was evident that drainage water had left the two channels on each side of the road, and instead had cut into and under the road, undermining it for a distance of about 75 feet. Taking a crow-bar, we dislodged some rocks, and an avalanch of dirt and smaller rock rolled into the Wash leaving a gap between road and bridge of about 4 feet. A heavily loaded truck could have broken thru the thin crust of the road and gone down into the Wash. Signs, red flags and flares were set out to give warning. Heavy bridge timbers were laid across the gap and travel can still continue across the bridge.

Stonehocker left Chaco on February 15, and appreciation is expressed for his help during his stay here.

A trip to Aztec was made on February 16, to contact the State and County Road Commissioners. It is understood that the road from Blanco Trading Post to Chaco has been abandoned by both State and County.

On February 19, Mr. John Bergin of the State Roads came into Chaco to inspect the roads and bridge. Because of the very rough roads and also because of getting stuck in the sand, Mr. Bergin said the road would be bladed and the damaged road over Chaco Wash would be filled as soon as possible. A snowstorm and unsettled weather have prevented this necessary work from being completed. Todate this custodian has placed old timbers, a large slab of concrete, and fencing wire holding a dump truck load of rock into the gap between road and bridge. It is hoped the weather clears so that the road crew may soon finish the job.

Usual maintenance work was done in horse corral. The water tap was dug up and unit was repaired so that its no longer necessary to haul water to "Boss by the bucketfull.

UNITED STATES

NATIONAL MONUMENT

Chaco Canyon (cont)

Headquarter area was given a general clean up. The hot water tank was covered with asbestos paper and it is hoped that time can be found in which to plaster the back porch.

Contact with El Morro was made on January 27 and 29; February 1,3,5,6, 7,10 and 25. From February 12 to the 24, El Morro could not be reached by radio. The Chaco set was overhauled, new batteries installed and the aerial on the office roof replaced. A new receiving and sending switch will be ordered and installed in order to complete this overhaul job.

The local Navajos have had a spurt of letter writing, and considerable time has been spent reading and writing letters for them. Three good workers have left the canyon to work on the railroad.

At present writing another good snow storm just hit Chaco.

Ted C. Sowers,
Acting Custodian.

Eneco Company (cont)

Lead water given was given a general check up. The hot water tank was covered with asbestos paper and it is noted that this can be found in which to place the back hatch.

Contact with Elmore was made on January 17 and 18; February 1, 2, 3, 4, 5, 6, 7, 8, 9, 10 and 11. From February 12 to the 14, Elmore could not be reached by radio. The Eneco set was overhauled, and batteries installed and the aerial on the office roof replaced. A new receiving and sending set will be ordered and installed in order to complete this overhaul job.

The local Navajo have had a report of better weather, and consequently there has been some roofing and wiring done for them. These good weather reports left the canyon to work on the railroad.

At present writing weather good from above and below.

W.D. C. Jones,
Mining Engineer.

----- NATIONAL MONUMENT
CHIRICAHUA

Doa Cabezos, Arizona

----- 19
February 25, 45

MEMORANDUM for the Regional Director,
Region Three.

There follows a report of the activities on Chiricahua National Monument for February.

Weather Conditions. 1.79 inches of moisture was recorded during January. Most of this fell in the form of snow over a period of about a week. Snow kept the road closed from the narrow section of Sonita Canyon, about two miles above Headquarters, to Vassai Point from January 17 to February 4 inclusive. Garble succeeded in getting to Vassai Point about February 2 but passenger cars did not make it until February 5. 4 inches of snow was the most recorded at Headquarters but it got much deeper as the elevation increased reaching a depth of probably 2 feet at Vassai Point. Another snow of 3 inches fell February 20 but this got very little deeper as the elevation increased and traffic continued to go to the end of the road.

Maintenance. The special road and trail maintenance has been delayed some by snow and by the sickness of laborer Stansberry.

Approaches to the Monument. The approach roads have all remained in fair shape with the exception of the Cave Creek - Minner Canyon road. This road was closed across Onion Saddle by the snows in January and Forest Ranger Hunt at Portal estimated that it would not be open until sometime in April.

Research and Observations. As a result of the recent snows Escalante Canyon started to flood on Jan. 28 and has continued to flow down the canyon and reach further down the canyon below the office. Sonita Canyon also has a serious flood from where the road leaves the canyon to close to the Faraway Ranch. This stream flow must be attributed to springs as the snow is now practically all gone from these drainages.

Interpretation. 228 of the 707 visitors were contacted at the museum. Two hours were spent on a field trip with an additional 24 visitors from Faraway Ranch.

Increase or Decrease in Travel. 207 visitors visited the monument this February as compared with 56 for January and 120 for February, 1944.

Visitors. Mr. Lafabure, botanist, and Mrs. Lafabure stayed a week on the camp ground in their home trailer. Mr. Lafabure's chief interest was ferns of this area. Previous correspondence with the University of Arizona indicates that he is an acknowledged authority on plants. Collectors permit was given him. While here he went over some of the Chiricahua herbarium with the Custodian, making some pencil corrections. 19 45

Forest Fire Protection. A 10 foot pole and a 20 foot pole were cut and placed by the Custodian for the radio antenna. It is planned to erect the 10 foot pole in the back of the office and the 20 foot one in the rocks north of the office.

There follows the report of activities in El Morro National Monument

Accidents. Grader operator Ferlie's hand is still a little sore for he was sick and shaver work but he has been carrying on the road work since January 24. There were no accidents at El Morro during this report period.

E. V. C. COOKE, Assistant Regional Director, El Morro National Monument, Arizona

Clair V. Cooke

Clair V. Cooke,
Custodian.

ACTIVITIES. Mr. Ferlie accomplished more work on the Canyon Drive. Completed the base-camp and continued work in bathroom. Also did some trail work.

An inspection of El Morro was made on February 7, by Assistant Regional Director Hickey, Chief Clerk and Custodian Cooke. Mr. Hickey outlined work to be done on the Canyon Drive. Plans and looked for completing the planning in the afternoon was obtained in delay and brought in during this trip.

Contact by radio, during this period, was made with Grand Canyon National Monument on January 23 and 24; January 1, 2, 3, 4, 5, 10 and 11. No contact with the two monuments between February 12 and 24.

Ed G. Powers,
Acting Custodian.

Great Sand Dunes National Monument
Hooper, Colorado

February 26, 1945

February 25, 1945

MEMORANDUM for the Regional Director
Region Three

There follows the report of activities at the Great Sand Dunes National Monument for February, 1945:

Travel. The snow has melted off the roads to the Dunes and there is very little lying in the lower flats. This condition has stimulated travel to the area and while the registration is small there is sufficient evidence to indicate more than normal travel for February. On Sunday, the 25th, there were three carloads of visitors into the area. One party picnicked at the spring.

Maintenance. The oil stove was installed and seems to operate properly but was not in very good condition as to the frame and appearance.

The snow was shovelled away from the buildings where it had drifted against the walls. The rear patio wall continues to disintegrate due to the weather and faulty construction.

Special Activities. A portion of February 24 was spent by the writer in checking land status in county assessor's office and getting tire certificates.

Bert G. Clarke
In Charge

Great Sand Dunes National Monument

A new supply of informational literature was received. He shall be glad to send same to any person requesting same.

There have been about 20 new cars filed in the past week.

Visitors with new vehicles at the monument on January 27 and 28 and February 2, 12, and 23.

All necessary work has been completed and done to the best of my ability.

NATIONAL PARK SERVICE
SOUTHWESTERN NATIONAL MONUMENTS

~~XXXXXXXXXXXXXXXXXXXX~~
COOLIDGE, ARIZONA
Montezuma Castle National Monument
Camp Verde, Arizona

February 23, 1945.

MEMORANDUM for the Regional Director, Region Three.
National Park Service.

There follows the monthly report of activities in Montezuma Castle National Monument for February, 1945.

Visitors this month, 125; travel year to date, 792.

General A Verde District Chamber of Commerce has been organized in Cottonwood, Arizona with its primary purpose the promotion of an improved highway between the Verde Valley and Phoenix. It is believed that ultimately this highway would become a link in one of the Country's super highways. It is reported that Governor Osborn and the State Legislature favor the proposal and a preliminary survey has been approved.

A tunnel is also being considered which will carry water from the Colorado River to the Verde River and Salt River Valley. Preliminary plans indicate the tunnel would emerge near the mouth of Oak Creek only about fifteen air-line miles from this monument.

Weather February has brought some stormy days with snow on nearby mountains and .85 of an inch of rainfall. The maximum temperature was 73° and the minimum 18°. The mean maximum was 61.09° and the mean minimum, 30.54°.

High water ran in Beaver Creek from February 3 to 10 but the stream has returned to normal winter flow. We have no accurate way for recording stream flow but it appears the high water mark was at least eighteen inches lower than last year.

Administration All map-folders on hand were stamped to show our Headquarters as Santa Fe and the stamp was forwarded to Tuzigoot National Monument.

A new supply of informational leaflets was received. We shall be glad to send some to any monument requesting them.

Notes have been added to the Fact File as time permitted.

Custodian Bright was relieved at Tuzigoot on January 23 and 30 and February 6, 13, and 20.

All monument fence was patrolled and found to be in good order.

[illegible]

Photographs of various monument activities were taken in response to the request for pictures to be considered by Popular Mechanics Magazine.

Maintenance and Improvements An additional brace was installed and one hundred and thirty twisted wire stays were used to complete the Soil and Moisture fence built in December. The fence appears to be successful but the severe test will come in mid-summer when dry weather makes forage scarce.

Surplus flagstones at Tuzigoot were brought to this monument for making walks at the residences.

All exposed wood surfaces at the residences have received a coat of linseed oil and surfaces exposed to the most weathering are being given a second coat.

The project to refinish our nature trail stakes is nearly complete. New plywood tops had to be made for most of the stakes and all are being repainted and numbered.

Painting in the office and museum was delayed when we found our casein paint had spoiled. This was replaced by the vendor and repainting the museum is now complete.

The pick-up was washed and a rear wheel brake repaired.

We have started a project to refinish all our wooden signs and markers.

Use of Monument Facilities by the Public There were 125 visitors from 16 states. They came in 38 cars with 29 cars from Arizona. Forty-seven tickets were sold; tax collected but no ticket sold, 1; children who climbed free, 4; members of the armed forces admitted free, 5. Total revenue collected, \$14.15 in fees and taxes.

Guide Service Total contact hours, 39.50; Hastings, 23.50; Leding, 16.00. There were 19 trips through the ruins for 57 people and 28 groups in the museum with 98 people. There were 5 picnic parties including 34 people.

Accessions We have received the following:

"Check List of Native and Naturalized Trees of the United States Including Alaska".

"Range Management Handbook"

A supply of National Park Location Map No. 6.

Newsworthy Visitors Our visitors included Tad Nichols, photographer and writer, who spent two summers at Wupatki making movies of Navajo rug weaving and Navajo life. An article on Sunset Crater and vicinity by Mr. Nichols appeared in Natural History Magazine for December, 1944.

Visitor Reaction To The Interpretive Program Ranger Leding reports a visitor at Tuzigoot was intently studying a large restored olla. Presently she asked,

UNITED STATES

DEPARTMENT OF THE INTERIOR

"How do the Indians get all these odd-shaped pieces to fit together so well?"
NATIONAL PARK SERVICE

Projects for Ensuing Month 1. Repair the walls in the office and repaint them. 2. Finish oiling all our wooden signs and repaint them where needed. 3. Repair the doors to our rest-rooms and give all wood a coat of linseed oil. 4. Varnish the floors in the residences. 5. Screen and haul gravel for repairing our entrance road.

Memorandum for the Regional Director,
Denise Moore.

Homer F. Hastings,
Custodian.

Here follows a report of activities
performed for the month of February, 1937.

Weather:

All month the weather has been quite disagreeable. Days alternately
sunny and rainy. For the past few days it has been raining and the
signs of the sun have been scarce. The cold weather has slowed our flowers
in fact a while but they are now coming along nicely and it still looks as
if the spring would be a beautiful one.

Travel:

Local visitors who are still visiting the Forest year in and out.
The first of spring has brought out a lot of picnic parties and some
business.

General:

On the afternoon of March 1st a group of men on the road and
others arrived at the Forest. The men were engaged in some work
and the afternoon was spent in the road in preparation.

On February 11 thirteen men from the Forest were taken to the
meeting at the monument and having a good time. The building at
the monument was all doors and windows were broken out and covered
thru up in the process making considerable damage. All information
I could obtain was turned over to the Convention Office of the Forest
and the group is traveling the road. They had also stopped out on the
road and I believe that perhaps they will be some more
than any we could get in the regular month.

Most time is required at our own gas station at this time. Last
month there was no order to keep our station open all the time.
It is being up-keeping people and getting it to work.

All spare time was spent in general effort and maintenance.

Incidents:

This month has been very busy on incidents. On February 11 a
group of men came out of a car on the highway breaking the glass
February 11 a car was hit by a log and had to be repaired.
On the night of the 12th two men had a fight on the road. The fight
of one man was by the side of the road. The other man was
also considerably damaged and had to be taken to the hospital. A fight

ORGAN PIPE CACTUS NATIONAL MONUMENT

Ajo, Arizona

February 25 1945

MEMORANDUM for the Regional Director,
Region Three.

There follows a report of activities in Organ Pipe Cactus National Monument for the month of February, 1945.

WEATHER:

This month the weather has been quit changeable with days alternately warm and cold. High for the period was 82 on the 7th. and low was 34 on the nights of the 5th. and 17th. The cold weather has slowed our flowers up for a while but they are now coming along nicely and it still looks as tho this would be a beautiful flower year.

Travel:

Total visitors this was 4139 bringing the travel year to 23612. The feel of spring has brought out a lot of picknic parties and some campers.

General:

With the allotment of funds and manpower work on the Soil and Moisture program was started on the 19th. Four Papago indians have been employed and reforestation on old roads is progressing.

On February 11 thirteen men from the air base were found to be hunting on the monument and having a grand time wrecking buildings at the Growler mine. All doors and windows were broken out and powder blown up in the yard causing considerable damage. All information I could obtain was turned over the the Commandian Officer of the Base and the Army is handeling the case. They had also slipped out an army truck and firearms so I believe that punishment will be more severe than any we could get in the regular courts.

Much time is required on our water pump motor as this is just about worn out so in order to keep our water tank full a lot of time is taken up making parts and getting it to run.

All spare time was spent on general patrol and maintenance.

Accidents:

This month has keep me busy on accidents. On janurary 27 a drunk Indian fell out of a car on the highway breaking his arm. February 6 a cow was hit by a car and had to be disposed of. On the night of the 16th two cars had a head on wreck when the lights of one went out as the driver put on the dimmers. No one was hurt altho considerable damage was done to the cars. Another car missed a bridge

but little damage was done.

After making several night trips over the road this month I am convinced that our highway is probably one of the most dangerous in the country to drive at night. A great many cattle are on the road sometimes laying in the dips or jumping in front of cars then drunken drivers returning from Mexico are also quite a hazard added to the ten miles of unsealed surface which almost deadens the best of lights.

Wildlife:

February 23 and 24 was spent with Mr. Kempton of the Fish and Wildlife Service making a game survey in the western part of the monument and adjoining wildlife refuge. Game is abundant in the area. A total of 12 antelope were sighted in three bunches. A lot of sheep, peccary, deer and antelope sign was noted thruout the area. The range is good especially along the border and a great number of wild horses and burros are now migrating from Mexico to the American side.

We were particularly interested in finding out the effect of the army use of the area in the gunnery range on the wildlife. Apparently the game does not seem to be much concerned with airplanes so it is believed little damage from this use will be found.

Projects for the Coming month:

Work will continue on the Soil and Moisture program which will require most of my time. Another cooperative trip with the Wildlife Service is planned if time can be found.

William R. Supernauth,
Custodian

not little things are done
After making every effort to get the best of things
we sometimes find our things in positions on the ground
it is better to have it right at hand than to have it
somewhere in the air or in the ground. It is better to have it
right at hand than to have it somewhere in the air or in the ground.
It is better to have it right at hand than to have it somewhere in the air or in the ground.

Conclusion

There is no doubt that the things we do are the things we do
because we are the things we do. It is better to have it right at hand
than to have it somewhere in the air or in the ground. It is better to have it
right at hand than to have it somewhere in the air or in the ground.
It is better to have it right at hand than to have it somewhere in the air or in the ground.

It is better to have it right at hand than to have it somewhere in the air or in the ground.
It is better to have it right at hand than to have it somewhere in the air or in the ground.
It is better to have it right at hand than to have it somewhere in the air or in the ground.

It is better to have it right at hand than to have it somewhere in the air or in the ground.
It is better to have it right at hand than to have it somewhere in the air or in the ground.
It is better to have it right at hand than to have it somewhere in the air or in the ground.

~~Saguaro~~ NATIONAL MONUMENT

~~Tucson, Arizona~~

February 27, 1945 19

MEMORANDUM for the Regional Director.

There follows a report of activities in Saguaro National Monument for the month of February, 1945:

Weather. There was slightly more than two inches of snow at headquarters on the 20th but, all in all, we have had good weather this month for working on the projects.

Inspections. One day was spent by the Acting Custodian with Ben Thompson.

New Construction. Most of Custodian Wilson's time and that of the Acting Custodian was spent at Pack Base in the construction of a corral and further work on the barn and cabin.

Mechanic Stonehocker brought 50 2x8's from Almut Canyon. Some that were not too bad were ripped into 2x4's providing studding for the walls and partitions of barn.

Two per diem laborers went to work about the 15th, on the telephone line. Because of an error in identifying a quarter corner as a section corner, there was one and a fourth miles of poles to set instead of three fourths mile. These have been set and some of the wire stretched.

Radios. Three radios have been received in the last two months. They have not been unpacked yet but it is hoped that some time will be found next month to try to get them to work.

Accidents. The B-25, with five aboard, which was supposed to be down on Rincon Peak last month was reported found early this month. Then it was reported that the wreck was a B-24, with nine aboard, which was lost last September. Ranchers have told me that two attempts by the Army to reach the plane have been balked by snow. I haven't heard anything further.

NATIONAL PARK SERVICE
SOUTHWESTERN NATIONAL MONUMENTS

Roosevelt ~~Zion National Monument~~ COOLIDGE, ARIZONA

February 26, 1945.

Memorandum for the Regional Director,
Region Three.

There follows the report of activities in Tonto National Monument, for
February 1945.

<u>Visitor Statistics:</u> Cars, 91 Instate, 34. Outstate, 57. Information, 57 people. Armed Forces, 41. States represented, 27, also Canada and England.	Visitors, 332. Ruins trips, 64; people, 228. Upper Ruins, 4 ; people, 10. Museum groups, 80; people, 287. Personnel time, Custodian, 81 hrs.
--	--

Weather:

Weather: It has been cold the entire month, a hard freeze occurring on January 25, 30 and February 23, 24.
Rain fell on January 26, February 1, 3, 16, 20, 21 and 22. There were 8 other completely cloudy days. Had a few snow flurries on the monument and much more snow in mountain areas.

Interesting Visitors. Mr. and Mrs. H. Dale Thomas from Reno, Nevada. Mr. Thomas was one of the people influential in getting the SP to bring their tourists here. He drove one of their first stages between Globe and Phoenix. They started with two Pierce Arrows in 1912 and by 1916 were using eight. He could have told much of the colorful history of those times but could make only a brief stay. However he promised to return as soon as possible.

A very small girl came with her mother one afternoon and proved to us that they are never too small to listen to the radio and remember what they hear. Her favorite program was the "The Lone Ranger" and she had been anxious to see a Ranger. Her mother told her that I was one so she wanted to walk up the trail beside me. I noticed that she looked puzzled and soon she took me by the hand and whispered, "Ranger where is your horse?" Not wishing to spoil her faith, I didn't know quite what to say but finally answered, "He is out to pasture". "Well", she said, "He does have to eat doesn't he", and skipped happily along still "believing".

General: This month has been equally as busy as January. The water line has given more trouble, due to the hard freezes, and hauling wood and stoking fires goes on unceasingly but the fireplace gives so much pleasure it is worth all the trouble. Saw that the center of one of the mesquite trees, by the museum, was gradually dying and found wire tightly wrapped around the limbs to raise them off the ground.

Have removed all the wire and find there is the same situation in Cholla Canyon where the fence has been wired to the trees, will remedy that also as soon as possible. Two trips were made to Globe, one in my personal car and one in the pickup. Have worked, as weather permitted, on the tool shed but will have to wait until it warms up before laying the last roll of roofing. Considerable time has been spent on excavating and building the retaining wall back of the house but much more work will have to be done before the water pipe can be lowered. Have been busy also changing the minds of the people who think they are going to hunt on the monument, since the javalina season opened. Some one keeps telling them they can hunt here, or so they say. Javalinas are more than plentiful this year. Saw a Ring tail Cat sitting on a box in the back yard a few evenings ago.

Flora: More flowers are found each week now. We do not have the time to make the trips we should to observe the flora and fauna but there is much close at hand that we watch as closely as possible.

We have purchased a copy of Margaret Armstrong's Field Book Of Western Wild Flowers and hope to get the local names of many more plants this spring.

Projects for March: Completion of the tool shed repairs, continuation of work on retaining wall back of house, removal of wire from trees in Cholla Canyon and small tasks too numerous to mention.

-----Tumacacori----- NATIONAL MONUMENT

----- Nogales, Arizona -----

----- Feb. 26 -----, 19-45

MEMORANDUM for the Regional Director,
Region III.

There follows the report of activities in Tumacacori National Monument for February 1945.

WEATHER: Spring is coming to Tumacacori. Although the nights are cool, the days are warm and bright. Despite the fact that we had two freak snow flurries during the month, green leaves and early blossoms are much in evidence. Pomegranate and cottonwood leaves are as much as an inch in length and jasmine, creosote, poppies and evening promrose are in bloom.

VISITORS: General Mechanic, Gene Stonehooker and Ranger Duffield of Casa Grande visited Tumacacori on Jan. 29. Gene took the International panel truck I-14710 to Casa Grande for repairs.

Four priests visited the mission during the month. One was from Canada, two from the Apache Reservation and one, Father Joseph Gregová who is of Spanish birth and is particularly interested in the missions of the southwest.

TRAVEL INCREASE: A total of 851 persons visited the monument during the month, an increase of 50% over February 1944. Fiscal year to date shows an increase of 18%. Number of tickets sold, 593, total deposits for the period, \$178.40.

INTERPRETIVE SERVICE: A total of 114 hours and 50 minutes were spent in contacting visitors and conducting them through the mission and museum. Of this total Brewer spent 2200 minutes on 74 mission trips for 344 visitors and 1210 minutes on 70 museum trips. Reed spent 1850 minutes on 73 mission trips for 367 visitors and 1630 minutes on 70 museum trips. Because of a failure in electric current, seven parties were unable to see the museum on the afternoon of Sunday Jan. 28. Members of the armed forces who visited the monument during February totaled 26.

MAINTENANCE: The patio was the center of much activity this month. Leaves were raked, hauled and burned, shrubs were pruned, flower beds were spaded, prepared and seeded, sumac were transplanted along the east wall and one maguey and one palo verde were added to our collection of native plants. The parking area was raked and leaves and trash hauled and burned. The barrow-pit in front of the monument entrance was cleaned. Weeds were pulled and burned, tin cans and other debris were used to fill gullies caused by the flood of last August. Rocks which had been washed out of place were gathered and used to repair the shoulder along the highway. Rest rooms were thoroughly cleaned and minor repairs were made.

PHOTOGRAPHY: 24 Kodachrome slides were mailed to Headquarters. Of these, 22 were of Arches National Monument, Utah, one each of El Morro and Tumacacori. Printing of negatives loaned to Headquarters from various areas got under way. This job will be completed early in March.

NATIONAL MONUMENT

These findings are being published in *Journal of Clinical Investigation*, Vol. 100, No. 1, February 1997.

1. The first step in the process of identifying a problem is to define the problem. This involves identifying the symptoms of the problem and determining the scope of the problem. Once the problem has been defined, the next step is to identify the causes of the problem. This involves identifying the factors that are contributing to the problem and determining the underlying causes. Once the causes have been identified, the next step is to develop a plan of action. This involves identifying the steps that need to be taken to solve the problem and determining the resources that will be needed to implement the plan. Finally, the last step in the process is to implement the plan and monitor the results. This involves putting the plan into action and tracking the progress of the solution. Once the problem has been solved, the final step is to evaluate the results and determine if the solution was effective. This involves comparing the results of the solution to the original problem and determining if the problem has been resolved.

From 1-14-70 to 2-14-70 for repairs.

1947.

REPORT OF THE
COMMISSIONER OF THE
BUREAU OF THE CENSUS
FOR THE YEAR 1900

INTERVIEW: JERRY L. ... of 111 North ... 50 minutes ... in ...
... and ... from ... to ...
... of ... and ... in ...
... and ... in ...
... of ... and ... in ...
... of ... and ... in ...
... of ... and ... in ...

COMMUNITY ACTIVITIES: Capt. R. N. Hardie (retired) has purchased the land which joins Tumacacori on the north and is having it cleared preparatory to farming this season. A modern home will be constructed on the property in the near future. An entrance road has been made opposite the Mission Store just a few feet from the monument boundary. A strip of mesquite about fifty feet in width will be left along the highway and the north boundary wall. Capt. Hardie called at the monument and ask that I go over the land with him and offer suggestions as to a suitable building site. Apparently he is very much interested in the monument and is anxious to co-operate with us in every way. He and other neighbors are much concerned over the flood damage of last August and it is my opinion that we can get co-operation from all of them with regards to some kind of flood control project.

Kodachrome sildes were shown to two groups during the month. On Feb. 16 a number of slides of National Monuments in Utah, New Mexico and Ariz, ona were shown to approximately 150 Boy Scouts, Girl Scouts and parents at the Elks Lodge Hall in Nogales. On Feb. 24 the same slides were shown at the ranch home of Mr. and Mrs. Tom Fast. A total of eleven guests were present.

Harry Reed
Acting Custodian.

Personal File. Publication Rights 27 yrs, 22 days. Publication Rights in First Novel Ending 27 yrs, 22 days. Bookings collected on January 26, 1944 collected on February 2, 1945 and 23.

Subsequent and identification. Subject was a look in the
 mirror from the back of the head. It is almost two
 months, then a fall of, brown and covered 50 gallons
 of stone oil. Tulliver showed red patches and signs
 and down his entire frame of purple, living quarters
 and subject was given a coating of linseed oil, and
 conversation, by way of both sleep, on all furnishings
 subject showed his interest in accordance with regional
 office (subject was, Tulliver showed red patches, then
 when some evidence to calls of subject, showed all
 display made in subject, subject then, showed of
 washing-up to show into who would subject work, subject
 gave that was both subject gets to subject and subject,
 performed usual routine office work.

COMMUNITY ACTIVITIES: Capt. E. M. (Lester) has purchased the land which John (Lester) in the north end is having it cleared preparatory to having this section. A school house will be constructed on the property in the near future. An entrance road has been made opposite the Mission store just a few feet from the railroad crossing. A strip of meadow about fifty feet in width will be left along the railroad and the north boundary will, Capt. Lester called to the attention and ask me I go over the land with him and offer suggestions as to a suitable building site. Apparently he is very much interested in the moment and is anxious to see the plans as in every way. He and other neighbors are much concerned over the flood damage of last August and it is not until that we can get co-operation from all of them with regard to some kind of flood control project.

Associates called were shown to the house behind the store. On Feb. 18 a number of slides of natural formations in the area were shown to approximately 150 persons, the school and parents at the first lodge hall in Kootenai, on Feb. 22 the same slides were shown at the home of Mr. and Mrs. J. W. (Lester) a total of eleven guests were present.

acting Custodian.

UNITED STATES
DEPARTMENT OF THE INTERIOR

There follows the report of activities in Tuzigoot National Monument for February 1945, by Everett W. Bright, Custodian.

Visitors this month 234; travel year to date 1077.

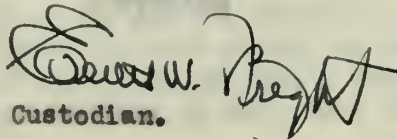

Weather. There were 9 clear days - 17 partly cloudy - 5 cloudy - 4 days of rain and snow, which fell on January 26 and February 1, 20 and 25. Strong winds on January 27 and February 4, 10, 16, 17, 18, 19, 20, 21 and 24. February was much colder with stronger winds than the preceeding month.

Travel. Although the weather for February was more disagreeable than January there has been a marked increase in travel to the monument. Instate visitors numbered 184, and outstate visitors 50. There were a total of 72 cars with instate numbering 53 and outstate 19. There were 12 members of the Armed Forces who visited the monument. A decrease of one under the previous month. A total of 18 visitors walked out to the monument.

Guide and Contact Service. Museum; 25 hrs, 25 mins; Field: 24 hrs, 00 mins. Total contact time of 49 hrs, 25 mins.

Personnel Time. Custodian Bright 47 hrs, 25 mins; Custodian Hastings no time; Ranger Leding 2 hrs, no mins. Hastings relieved on January 30. Leding relieved on February 6, 13 and 20.

Maintenance and Administration. Havent had a leak in the water line from Clarkdale to Tuzigoot in almost two months. What a relief. Ordered and received 350 gallons of stove oil. Tuzigoot Monument road markers and signs and doors and window frames of garage, living quarters and museum were given a coating of linseed oil. Made corrections, by use of hand stamp, on all Southwestern National Monument map folders in accordance with Regional Office instructions. Patrolled monument boundary fence. Made some minor repairs to walls of ruins. Polished all display cases in museum numerous times. Disposed of tumbling-weeds blown into and around monument area. Repaired garage doors and both entrance gates to museum and quarters. Performed usual routine office work.

Custodian.

There follows the report of evidence in English.

THE STATE OF NEW YORK: JAMES C. CLARK, CLERK.

was made after the following manner: 10, 15, 20, 25, 30, 35, 40, 45, 50, 55, 60, 65, 70, 75, 80, 85, 90, 95, 100, 105, 110, 115, 120, 125, 130, 135, 140, 145, 150, 155, 160, 165, 170, 175, 180, 185, 190, 195, 200, 205, 210, 215, 220, 225, 230, 235, 240, 245, 250, 255, 260, 265, 270, 275, 280, 285, 290, 295, 300, 305, 310, 315, 320, 325, 330, 335, 340, 345, 350, 355, 360, 365, 370, 375, 380, 385, 390, 395, 400, 405, 410, 415, 420, 425, 430, 435, 440, 445, 450, 455, 460, 465, 470, 475, 480, 485, 490, 495, 500, 505, 510, 515, 520, 525, 530, 535, 540, 545, 550, 555, 560, 565, 570, 575, 580, 585, 590, 595, 600, 605, 610, 615, 620, 625, 630, 635, 640, 645, 650, 655, 660, 665, 670, 675, 680, 685, 690, 695, 700, 705, 710, 715, 720, 725, 730, 735, 740, 745, 750, 755, 760, 765, 770, 775, 780, 785, 790, 795, 800, 805, 810, 815, 820, 825, 830, 835, 840, 845, 850, 855, 860, 865, 870, 875, 880, 885, 890, 895, 900, 905, 910, 915, 920, 925, 930, 935, 940, 945, 950, 955, 960, 965, 970, 975, 980, 985, 990, 995, 1000, 1005, 1010, 1015, 1020, 1025, 1030, 1035, 1040, 1045, 1050, 1055, 1060, 1065, 1070, 1075, 1080, 1085, 1090, 1095, 1100, 1105, 1110, 1115, 1120, 1125, 1130, 1135, 1140, 1145, 1150, 1155, 1160, 1165, 1170, 1175, 1180, 1185, 1190, 1195, 1200, 1205, 1210, 1215, 1220, 1225, 1230, 1235, 1240, 1245, 1250, 1255, 1260, 1265, 1270, 1275, 1280, 1285, 1290, 1295, 1300, 1305, 1310, 1315, 1320, 1325, 1330, 1335, 1340, 1345, 1350, 1355, 1360, 1365, 1370, 1375, 1380, 1385, 1390, 1395, 1400, 1405, 1410, 1415, 1420, 1425, 1430, 1435, 1440, 1445, 1450, 1455, 1460, 1465, 1470, 1475, 1480, 1485, 1490, 1495, 1500, 1505, 1510, 1515, 1520, 1525, 1530, 1535, 1540, 1545, 1550, 1555, 1560, 1565, 1570, 1575, 1580, 1585, 1590, 1595, 1600, 1605, 1610, 1615, 1620, 1625, 1630, 1635, 1640, 1645, 1650, 1655, 1660, 1665, 1670, 1675, 1680, 1685, 1690, 1695, 1700, 1705, 1710, 1715, 1720, 1725, 1730, 1735, 1740, 1745, 1750, 1755, 1760, 1765, 1770, 1775, 1780, 1785, 1790, 1795, 1800, 1805, 1810, 1815, 1820, 1825, 1830, 1835, 1840, 1845, 1850, 1855, 1860, 1865, 1870, 1875, 1880, 1885, 1890, 1895, 1900, 1905, 1910, 1915, 1920, 1925, 1930, 1935, 1940, 1945, 1950, 1955, 1960, 1965, 1970, 1975, 1980, 1985, 1990, 1995, 2000, 2005, 2010, 2015, 2020, 2025, 2030, 2035, 2040, 2045, 2050, 2055, 2060, 2065, 2070, 2075, 2080, 2085, 2090, 2095, 2100, 2105, 2110, 2115, 2120, 2125, 2130, 2135, 2140, 2145, 2150, 2155, 2160, 2165, 2170, 2175, 2180, 2185, 2190, 2195, 2200, 2205, 2210, 2215, 2220, 2225, 2230, 2235, 2240, 2245, 2250, 2255, 2260, 2265, 2270, 2275, 2280, 2285, 2290, 2295, 2300, 2305, 2310, 2315, 2320, 2325, 2330, 2335, 2340, 2345, 2350, 2355, 2360, 2365, 2370, 2375, 2380, 2385, 2390, 2395, 2400, 2405, 2410, 2415, 2420, 2425, 2430, 2435, 2440, 2445, 2450, 2455, 2460, 2465, 2470, 2475, 2480, 2485, 2490, 2495, 2500, 2505, 2510, 2515, 2520, 2525, 2530, 2535, 2540, 2545, 2550, 2555, 2560, 2565, 2570, 2575, 2580, 2585, 2590, 2595, 2600, 2605, 2610, 2615, 2620, 2625, 2630, 2635, 2640, 2645, 2650, 2655, 2660, 2665, 2670, 2675, 2680, 2685, 2690, 2695, 2700, 2705, 2710, 2715, 2720, 2725, 2730, 2735, 2740, 2745, 2750, 2755, 2760, 2765, 2770, 2775, 2780, 2785, 2790, 2795, 2800, 2805, 2810, 2815, 2820, 2825, 2830, 2835, 2840, 2845, 2850, 2855, 2860, 2865, 2870, 2875, 2880, 2885, 2890, 2895, 2900, 2905, 2910, 2915, 2920, 2925, 2930, 2935, 2940, 2945, 2950, 2955, 2960, 2965, 2970, 2975, 2980, 2985, 2990, 2995, 3000, 3005, 3010, 3015, 3020, 3025, 3030, 3035, 3040, 3045, 3050, 3055, 3060, 3065, 3070, 3075, 3080, 3085, 3090, 3095, 3100, 3105, 3110, 3115, 3120, 3125, 3130, 3135, 3140, 3145, 3150, 3155, 3160, 3165, 3170, 3175, 3180, 3185, 3190, 3195, 3200, 3205, 3210, 3215, 3220, 3225, 3230, 3235, 3240, 3245, 3250, 3255, 3260, 3265, 3270, 3275, 3280, 3285, 3290, 3295, 3300, 3305, 3310, 3315, 3320, 3325, 3330, 3335, 3340, 3345, 3350, 3355, 3360, 3365, 3370, 3375, 3380, 3385, 3390, 3395, 3400, 3405, 3410, 3415, 3420, 3425, 3430, 3435, 3440, 3445, 3450, 3455, 3460, 3465, 3470, 3475, 3480, 3485, 3490, 3495, 3500, 3505, 3510, 3515, 3520, 3525, 3530, 3535, 3540, 3545, 3550, 3555, 3560, 3565, 3570, 3575, 3580, 3585, 3590,

Travel. Although the weather for January was very
pleasant, it was somewhat rainy and the
island is very beautiful. The weather was
very good and the island was very beautiful.
The weather was very good and the island was
very beautiful. The weather was very good and
the island was very beautiful. The weather was
very good and the island was very beautiful.

MEMORANDUM for the Regional Director
Region Three

There follows the report of activities in Walnut Canyon National Monument for February, 1945.

Visitors this month; 98; travel year to date, 926.

GENERAL: This month has given us a variety of weather ranging from deep snow and cold winds to spring sunshine and fair weather. The highway department graded the roads recently and they are in good shape at present.

A few days ago a party of visitors from Mississippi arrived here by way of Phoenix. They said this was the first time they had ever handled snow and they spent more time throwing snow balls, eating snow and playing in it than they did in seeing the Monument. They wished they might get to the other side of the canyon where the snow was deeper.

Gene Stonehocker visited the Monument on February 16 and 17 loading up lumber and other surplus property for Saguaro.

Received the new Radio set for this Monument on February 17.

VISITOR STATISTICS: 98 visitors registered during the month including 21 service men. Eighteen states were represented.

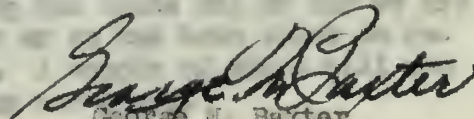

MAINTENANCE, IMPROVEMENTS AND NEW CONSTRUCTION: Finished Inventory of books.

Took physical inventory of property.

Started construction of a file cabinet so as to have a place to keep blank forms, stationery, etc.

PROJECTS FOR ENSUING MONTH: Plan to take the pickup to Casa Grande the last of the week to be overhauled.

Finish file cabinet.

February 22, 1945

MEMORANDUM for the Regional Director, Region Three:

TRAVEL MONTH, February 1945

Visitors 2304

Cars 522 552

TRAVEL YEAR TO DATE

Visitors 10121

Cars 2484

ARMED FORCES USE

Visitors 1244

Visitors 3065

fty — We are encouraged greatly by our visitor totals for the month. Twenty three hundred and four visitors in five hundred and twenty two cars is our best February since 1941. Our Armed Forces is considerably higher also. No doubt a portion of this can be checked up to a month of almost unbelievable weather. Warm sunny days and especially a couple of Sundays certainly show up on our attendance figures which makes one wonder if gasoline and tires seem to worry the average motorist much after all. These warm days exact their toll in another way, the sands of course dry out on the surface and our seasonal winds certainly pile sand up on the roads. Joe is and will be plenty busy for awhile with his Cat and Carryall. It has been necessary to make minor relocations of our sands area road and even more may be necessary. We certainly appreciate the liberal view of our administration as well as technical heads on the matter.

No outside trips other than routine Alamogordo trips were made. An official inspection was made of the cleanup of the air crash last month and conditions were found to be satisfactory. Paris & Sheppard guided the Air Base operations Officer on a short get acquainted trip through some of the remote sections of our sands. A half track isn't near as good as our $\frac{1}{2}$ ton pickup with a good Park Ranger at the wheel.

Activity has been concentrated on the garbage disposal units. Paul & Joe salvaged some old lumber from some old army picnic areas and Paul & Joe built eight stands for these units. ON Paul leaving, Joe & myself finished up the units and so far we are very pleased with the results. A day or so has been spent on re-ciling and finishing our sands signs. A couple of signs will now have to be moved since we are changing our roads.

A study of our new land maps prior to Ben Thompson's appearance, and who never appeared, showed several roads and ranches we never knew existed. No one knew of these and Joe and I made a quick survey and could not verify any. We plan to take more time

UNITED STATES

and chain out some of these distances and see if Ranches in 1882 are now in evidence at all.

The plane crash clean up crews passed under our telephone wires with their equipment and our lines were down several days. We repaired these minor breaks and the Army made permanent repairs later.

Our standing with the Chicago office has lowered considerably, judging from a recent letter from our Chief of Information addressed to the local Chamber of Commerce. Both Mrs. Charles and myself are gunning for Isabelle Story, to think when she wishes some photographs of our Ox Cart she would write not to the White Sands or even to Mrs. Charles but to the Chamber of Commerce. Fortunately they know of data on White Sands and could get it from Mrs. Charles. She in turn called us. So in the long run Miss Story got her data from the official Park Service files. Shame on Miss Story. Perhaps she was testing the Chamber of Commerce reliance on the Park Service.

We represented the Service at the funeral of Mr. Richards. Ruby Chase's father. Our Service extended our sympathy to the entire family. Few men were more widely known and admired than Ruby's Dad.

Our Roads signs and maintenance will take most of the time of Joe and myself. Roy has kept the office building and toilets up in exceptionally good shape. This along with most of the checking will take most of his time.

We miss Paul of course and while we are anxious for him to return and hit his stride, we are doing all we can to carry on.

John W. Davis

----- WUPATKI ----- NATIONAL MONUMENT

----- Flagstaff, Arizona -----

----- February 25 -----, 19 45

MEMORANDUM for the Regional Director, Region Three.

There follows the report of activities in Wupatki National Monument for the month of February, 1945:

Visitors this month: 0; travel year to date: 87.

Weather conditions: The last week of last month was mainly stormy, though with mostly mild temperatures. This month thus far has been about half clear with no snows.

Melting snows have been extremely hard on road conditions and I got most thoroughly bogged down on the evening of the 3rd. Broke the jack before I could do any good with it, so walked on out to the highway and caught a ride into Flagstaff. Returned early the following morning with a borrowed car and jack to get truck out. Spent that day at Wupatki then went into Flag on business with ration board and to get the dump truck from Walnut Canyon. Got Dump truck Wednesday morning but had to leave it in the garage for repairs to carburetor and radiator hoses. Returned to Wupatki Thursday morning with Gas and stopped en route for a load of cinders at the Highway Dept. cinder pit.

Road work: Worked on the entrance road for six days during which time I had one Navajo laborer for five days. Most of the soft spots have been filled in and several of the roughest rocky parts have been worked over.

Gene Stonehooker came in on the afternoon of the 16th and I helped him the remainder of the day in loading materials for use at Saguaro and getting Duchy's trailer ready to roll.

Had a bad attack of bronchial congestion from working in the dust of cinders and the rat dander at Heiser and went on sick leave at noon on the 17th. Returned to Wupatki the afternoon of the 21st and have spent the rest of the month to date on reports and reorganization of the files.

Projects for the coming month(s): Roads and files.

Philip F. Van Cleave

REGION THREE
SANTA FE, NEW MEXICO

April 6, 1947.

Here follows the interpretive staff's narrative report for Southwestern National Monuments and Historic Sites' accomplishments for March 1947:

March 1947 - Summary. March for a one day trip to the latter National Monument on March 11, Naturalist and I spent the entire month in the office working on the duties of the interpretive administration. These consisted of reviewing the published interpretive prospectus, preparing informational leaflets for registration, adding prints to the photo files, working up the cards to complete the current library cataloging project, making visual aids for the various exhibits, handling the Southwestern Monuments Association affairs, and gathering data for preparation of 1947 N.P.S. preliminary estimates, and preparing correspondence.

Naturalist and I spent the entire month in the office occupied with routine stabilization details and other routine matters. In preparation of the stabilization estimates in preparation for the release of funds tied up in the narrative, completed early day ride notes with recent pictures taken from the road to determine deterioration, arranged for materials for forthcoming emergency stabilization at Forté, re-evaluated the site identification record book, and entered data for 1947 N.P.S. preliminary estimates. We took over several details of Southwestern Monuments Association administration, organized and collected outstanding cards on interpretive priorities, reviewed the field of the possible use of chemical wood preservatives, continued the preparation of the Spanish language pamphlet about the monument, and investigated the use of library of congress catalogue cards for the headquarters loan library.

March 1947 - Summary. In an adjustment of funds, an additional \$10.00 was provided for interpretation (\$3.00), and \$17.00 to ruins stabilization (\$3.00). This will enable the staff to accomplish many needed activities that would otherwise have been impossible this fiscal year.

With the accumulation of the work of the department outlined above the Bureau of the Interior permits release of additional funds to preliminary estimates for F.Y. 1947. This year's plans were completed and submitted.

March 1947 - Summary. A Spanish letter was written. On March 30, Special Agent was presented an illustrated talk on the lower prehistoric period in the series of lectures upon on-service training courses. This was the only talk given to date, the series having been previously discontinued. During the past year (Nov. 11, 1946 through Feb. 11, 1947), 48 persons were presented. Several loaned library loan cards were micrographed. The field

500 N. 5TH ST. NEW YORK, N. Y.

THIS BOOK IS LOANED TO YOU BY THE NEW YORK PUBLIC LIBRARY, ASTOR LENOX TILDEN FOUNDATION, 500 N. 5TH ST. NEW YORK, N. Y.

It is the policy of the New York Public Library, Astor Lenox Tilden Foundation, to make its books available to the public in the most efficient manner possible. To this end, the Library has adopted a policy of free loan of its books to individuals and organizations for use in their homes, libraries, schools, and other institutions. This policy is based on the belief that the free use of books is essential to the advancement of knowledge and the improvement of the human race.

The New York Public Library, Astor Lenox Tilden Foundation, is a non-profit organization. Its funds are derived from the interest on the sale of books and from the contributions of individuals and organizations. The Library is not a government institution and it is not subject to the control of the government. It is an independent organization which is free to make its own decisions regarding the purchase and loan of books. The Library's policy of free loan of books is a result of its belief that the free use of books is essential to the advancement of knowledge and the improvement of the human race.

bringing the total accessioned publications in the library to 5,300, four hundred and fifty-three publications were processed during the current project which started in November 1944. All books, pamphlets, and reports accumulated in past years have now been incorporated in the library. Although no more accessioning and cataloging will be possible during the next eight months, it is hoped that accumulated publications can be handled next winter and time be left for a start on processing the great number of periodicals that have accumulated during the last three years. The project just completed was greatly facilitated through the assistance of Mrs. Cecelia O'Leary, Mrs. Mable Terry, and Mrs. Helen Prescott who typed index and catalogue cards. Investigation was started during the month to determine the feasibility of securing Library of Congress cards for future cataloging. During March a total of 46 publications were received by the library, consisting of six reports, 17 pamphlets, and 23 periodicals.

PHOTOGRAPHIC REPRODUCTION. As photographic film and paper went on the volume list, an increase in demand for photographic material could not be met. Project Director is running off reprints of the life "springs" article, solicited the aid of publishing reprints for the proposed book, "Arizona National Landmarks." Delivery of all reprints and of all color plates was reported. Efforts to place a contract for binding the proposed book have been unsuccessful due to wartime restrictions on materials. All administrative affairs of the Association were kept current.

REPRODUCTION AND FINAL FILE. Dudley Lancaster captured and bound all photographic plates. The project of several months duration of providing the Director's office with a master file of plates Three, plates was completed and 226 print-film cards sent to the Chicago office. Additional prints will be added from time to time. Thirty-four glass plates and prints of historical value were sent to Ranger Mary Reed to be copied. Mary Reed sent in ten new scenic negatives taken in Arches National Monument last December. The project of building up the Arches Three headquarters negative and print file was continued. This work took all of the time of the clerk assigned for one hour each day to the Ranger office.

WORKING WITH THE NATIVITAS. Mrs. Helen Prescott cut stencils for the interpretive material in the Nativitas' Manual. Photos were photographed and distributed to the field.

CONTACT WITH FIELD. Captain C. J. Tolcosch of the U. S. Army National Division, Tucson, Arizona; Miss Della Murphy, Librarian, Tucson of New Mexico; Albert L. Howell, author and biologist of Farmington, New Mexico; Stanley Smith of the Laboratory of Anthropology, Santa Fe; Superintendents Ben Libbey and Robert Cook; Captain C. J. Tolcosch and Captain J. W. Anderson of New Mexico National Monument had business with the interpreters.

REPORT ON THE STABILIZATION OF THE RUINS NATIONAL MONUMENT

The ruins of the ancient Hohokavi culture were compared with recent pictures of the same in an effort to determine what and how much change these structures have suffered in the years that they have been under Service care. Materials were obtained for use in developing emergency stabilization work proposed by the National Park Service. A list of emergency stabilization needs at various points in the ruins was prepared and submitted, and estimates of costs prepared for consideration with justification leading up a request for return of the ruins to the National Park Service. The National Park Service was requested to take the ruins into its custody and to take the necessary steps to stabilize the ruins and to take the necessary steps to stabilize the ruins and to take the necessary steps to stabilize the ruins.

SECTION 11 TEAM

UNITED STATES
DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE
AZTEC RUINS NATIONAL MONUMENT

AZTEC, NEW MEXICO

March 25, 1945.

MEMORANDUM for the Regional Director,
Region Three, National Park Service.

There follows the report of activities for Aztec Ruins National Monument for March 1945.

GENERAL

Despite the trend toward Spring that we enjoyed at the close of February, March entered with snow, hail and showers that have returned us to winter and the entire month has been stormy with only an occasional good day. Temperatures have ranged from 15 to 68 degrees above, with a total precipitation of 1.61 inches.

SPECIAL ACTIVITIES

Lassiter arrived the 3rd and left the 9th.

Nusbaum visited the 7th.

March 14th the Custodian went to Farmington and made arrangements with the Mt. States Tel and Tel for use of their pole trailer to haul a boom from Wingate, when needed.

Bradley and Sowers in from Chaco the 22nd to obtain the Chaco stake truck which had been used at Aztec to move the concrete pipe for the drainage ditch project.

INSPECTIONS

Regional Engr. Lassiter and Supt. Nusbaum inspected the proposed site for the drainage ditch project.

MAINTENANCE

The water softener was taken to Aztec for repair, the internal pipes had to be cut out and replaced by acetylene torch. The tank was set up for use upon receipt of mineral from Wupatki.

The area that cracked and sank on the roof of kiva E was repaired. The roof on ruins room #62 was repaired.

The pump in kiva E was dismantled twice and repaired.

An exploratory ditch was completed along the line of the proposed drainage ditch at the north border of the unexcavated ruin. Nothing of archeological interest was found.

The 30 and 48 inch concrete pipe for manholes was received and placed at sites of the holes.

Clearing of the ditch right-of-way was completed.

Lumber in the upper portions of the old wells along the north side of the ruins was salvaged, preparatory to drainage ditch construction.

Interpretive Services

There were 92 visitors conducted on 25 trips thru the ruins and 100 visitors in 29 parties shown thru the museum.

Research and Observation

Amongst the several species of ducks observed flying over and feeding in the pond at the north boundary of the monument were the buffle head and mallard. The observance of a muskrat in the pond was also made by Mrs. Townsend.

Increase or Decrease in Travel

There were 100 visitors in 31 cars from 8 states, including 9 from the armed forces. This is approximately 60% of travel for March 1944.

Of the 100 visitors, 67 purchased tickets amounting to \$20.10, and with the tax of 40¢ on 8 children the total collections amounted to \$20.50.

The greater part of the travel was composed of local and neighboring residents with visiting friends and relatives, the remainder came from the armed forces and travelers enroute.

Planned Projects

Maintenance, including construction of the drainage ditch, placing in use of the water softener, and repair to ruins.

Irving D. Townsend

Inventory of the Ruins

These ruins are situated on a hillside in the center of the town of Aztec, New Mexico, and are the remains of a large building which was destroyed by fire in 1891.

General Description

The ruins consist of a large rectangular building which was destroyed by fire in 1891. The building was built of adobe and was about 100 feet long and 50 feet wide. The ruins are situated on a hillside in the center of the town of Aztec, New Mexico.

Excavations and Discoveries

Excavations were made in 1907 and 1908. In 1907, the ruins were excavated to a depth of 10 feet. In 1908, the ruins were excavated to a depth of 20 feet. The excavations revealed the following: a large rectangular building, a smaller rectangular building, and a circular building. The ruins are situated on a hillside in the center of the town of Aztec, New Mexico.

The ruins are situated on a hillside in the center of the town of Aztec, New Mexico. The ruins are the remains of a large building which was destroyed by fire in 1891. The building was built of adobe and was about 100 feet long and 50 feet wide.

Arches NATIONAL MONUMENT

Moab, Utah

March 23, 1945

MEMORANDUM for the Regional Director, Region Three:

The following is a narrative report for Arches National Monument for the month of March, 1945:

GENERAL: A trip was made to Grand Junction, Colorado on March 23rd and 24th for water pump repairs and recapping of tires.

The custodian was on sick leave from March 14th to 16th with a touch of flu and 6 hours at various times to visit the doctor at Moab for treatment of an infected ear. One day annual leave was taken on March 11th.

WEATHER: The weather has been considerably warmer but we now have the wind, which, on the 17th blew so hard that you could see the new arches forming on the ledge above quarters. (Harry.- I still have the roof with only about a week to go until Easter.) Rain fell on several days during the month, with snow on March 4th and 5th.

TRAVEL: Our travel just about doubled that of last month, probably due to warmer weather. We had a total of 15 cars and 66 people, all of them from Colorado and Utah. Most of the travel was to the Windows Section, with one party visiting Delicate Arch and the Devil's Garden.

INTERPRETIVE SERVICE: Two trips were made to the Windows with parties, one being a group of high school basket players and their coaches, from nearby counties. The group was made up of 30 people and we visited all the points of interest in the Windows Section, despite a strong, cold wind, which did not seem to cool the spirit of the party. The other party was composed of two geologists of the USGS, who were interested in the geological exposures in the monument. A total of 8½ hours was spent with these parties. One party was contacted at headquarters and the balance of the travel visited the Windows unattended.

INSPECTIONS: On March 13th a horseback trip was made in to the upper Salt Wash and Freshwater sections with Grazier Handy and Henry Revoir, who has a permit to water his sheep at Freshwater during the dry season. Boundaries were checked and the drive used by Revoir was investigated. There are one or

1945

MEMORANDUM for the Regional Director, Region Three:

The following is a narrative report for Arches National Monument for the month of March, 1945:

GENERAL: A trip was made to Grand Junction, Colorado on March 23rd and 24th for water supply and mapping of area.

The condition was on side leave from March 14th to 15th with a leave of 15 and 6 hours at various times to visit the doctor at Wood for treatment of an infected ear. One day leave was taken on March 11th.

WEATHER: The weather has been considerably better but we now have the wind, which, on the 17th blew so hard that you could see the new arches forming on the ledge above (Larrea). I still have the rock with only about a rock to go until Easter. Rain fell on several days during the month, with snow on March 21st and 22nd.

TRAVEL: Our travel just about doubled that of last month, probably due to better weather. We had a total of 12 cars and 30 people, all of them from Colorado and Utah. Most of the travel was to the visitor's center, with one party visiting Delicate Arch and the Devil's Garden.

INTERPRETIVE SECTION: Two trips were made to the Windows with parties, one being a group of high school boys and their teacher, from nearby community. The group was made up of 30 people and we visited all the points of interest in the Windows section, despite a strong, cold wind, which did not seem to add the spirit of the party. The other party was composed of two geologists of the USGS, who were interested in the geological exposures in the monument. A total of 15 hours was spent with these parties. One party was contacted at headquarters and the balance of the travel was to the Windows section.

INSPECTION: On March 15th a notebook trip was made in to the upper part of the first section with Charles Smith and Betty Lovett, who has a permit to enter his study at headquarters during the day season. Some areas were checked and the drive used by Smith was investigated. There are one or

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

600 acres of very rough country in this section.

Regular inspections were made in the Windows Section but did not get down through Salt Valley to Delicate Arch during the month.

MAINTENANCE AND NEW CONSTRUCTION: Continued work on construction of fence at quarters as time permitted. A heavy wind on the 15th just about uprooted all of the fence I had completed north and south of the quarters, even though the posts were set from 30" to 36" deep.

The connecting rod bearing on the F & M engine on the water system broke on the 17th and I made a trip to Grand Junction to have a new one poured and the crankshaft ground. Poured additional concrete for engine foundation and have hopes that it will improve the operation of this unit.

Have continued planting of native shrubs and flowers during the month. Purchased land seed and will plant this as soon as I have the water pump back in operation. I hope that the wind will cease for a couple of weeks so that I can get this lawn started. otherwise, the seed will all be down in the Moab valley.

GRAZING: All crossing and watering permits have been completed and sent in for approval. On a recent trip into the Devil's Garden section, evidence was noted of grazing within the boundaries in that portion immediately north of the Fiery Furnace. This matter will be taken up with those responsible at the first opportunity.

BANDELIER NATIONAL MONUMENT

SANTA FE, NEW MEXICO March 26, 1945

MEMORANDUM for the Regional Director, Region Three.

There follows a report of activities at Bandelier National Monument for the month of March, 1945.

Weather Conditions. Weather for March was somewhat warmer than that for February. Most days were windy. One snow storm this month caused the entrance road to be almost impassable and personnel were forced to use chains to get in and out. The buds are coming out on the trees and spring is again in the air.

Maintenance and Improvements. Various small projects were worked on during the month including the painting and making ready for use the employees' dormitory at the utility area. Bunk beds were finished and stained, work was done on boundary signs and a considerable amount of time was spent trying to locate breaks in our telephone line which was out of working order for several weeks. The Custodian spent considerable time on miscellaneous and sundry jobs getting ready for the Regional Fire School.

Cooperating Governmental Agencies. Several conferences with army personnel indicate that they may again be interested in Frijoles Canyon Lodge as relief of their housing situation, however, there is nothing definite at this time. As mentioned before, our telephone is now in working order. Apparently the break was inside the army restricted area. After many telephone calls and communications with army officials the line was finally repaired.

Interpretive Services. Seventeen trips were made through the ruins with one hundred twenty-five visitors. Eight parties, making a total of nine people, were given orientation talks and five parties, totaling thirty-two people were given museum lectures.

Increase or Decrease in Travel. The Monument was visited by 285 people in sixty-seven automobiles. This is a considerable increase over last month's travel. Since winter is breaking, a car comes in

DEPARTMENT OF THE INTERIOR

now and then during the week. Two hikers and two soldiers on horseback visited us. We understand that one of the "three men in a boat" who sailed down the Rio Grande and embarked at the mouth of Frijoles several weeks ago is now contemplating the outfitting of a burro so he can pack all over the back country. Travel at this time of year is usually dependent on road and weather conditions. There was a general decrease in over-all travel figures as compared with the same month last year. At that time Robert E. McKee, General Contractor, was occupying the lodge and that, undoubtedly, boosted the figures. Our totals of individuals receiving interpretive services for March during 1944 and 1945 were on an approximate even level. It can be readily seen that the local army project at Los Alamos is responsible for most of our travel, however, a better view of the travel situation will be given when this unpredictable weather ceases.

Weather has been about as usual for this season of the year. There has been no snow in all of the month, with a possibility of some one inch. The weather has been in such a manner as to be a benefit rather than a hindrance to the stock men, there has not been any extremely severe weather during the period and no extreme cold weather.

The weather has been about as usual for this season of the year. There has been no snow in all of the month, with a possibility of some one inch. CAPULIN MOUNTAIN NATIONAL MONUMENT
CAPULIN, NEW MEXICO

OF THE CUSTODIAN

March 26, 1945,

There follows a report of the activities of Capulin Mountain National Monument for the Month of March 1945,

Estimated Visitors four hundred, bringing the total visitors Travel year to date to two thousand five hundred,

Several light snows during the month have kept the road blocked for a day or two and some of the visitors were unable to drive all the way to the crater rim,

Weather has been about as usual for this season of the year about ten inches of snow in all during the month making a precipitation of about one inch, The moisture has come in such a manner as to be a benefit rather than a detriment to the stock man, there has not been any extremely severe storms during the period and no extreme cold weather,

The Custodian has been able to keep the road in fair condition most all the month and has been pretty busy on the road most of the month,

Wild life in the Monument are doing nicely, Squirrels have been out on nice warm days most of the inter which is a little unusual.

The Custodian enjoyed a visit yesterday from his nephew from the Bomber base at Dalhart Texas, together with his wife and Baby, Of course they were shown the Volcano and received the usual lecture of facts and estimates,

Temp for the month,	High 60
	low 12

~~Canyon de Chelly~~ NATIONAL MONUMENT

~~Chinle, Arizona~~

March 25, 1945

MEMORANDUM for the Regional Director, Region three.

There follows a report on the activities at Canyon de Chelly National Monument during the month of March, 1945.

Weather

The weather has been on par with that of Marchs in the past. With the exception of a few nice days, it has, as a whole, been disagreeable with high winds, sand, snow, sleet and mud. On March 22 the maximum temperature reached 72 degrees, which led us to believe spring was just around the corner, but a minimum of 8 degrees and a snowstorm which is still raging reminds us that winter is still with us. The rain guage gathered in .88 inches of moisture when the wind died down long enough to let some of it fall in. Anyway there has been enough to make mud of the stickiest consistancy, and to raise the water in the canyons enough to take out some of our Fall planting.

Administration

Outside maintenance work was carried on as weather permitted and administrative work in the office on the worst days. All envelopes were stamped with the required P.M.G.C. and 200 informational leaflets were mailed according to directions. Inspection patrols by horseback have been made in both canyons. A trip to Gallup was made on March 12, returning March 14. One day of annual leave was taken to get my wife to Albuquerque for medical treatment.

Maintenance

Roads have been drug after each storm and some of the worse holes filled. considerable time has been spent in working on the grounds and planting trees and grass. The inside of the pumphouse was cleaned and painted and a protective hood and waste oil catcher installed around the engine to prevent the throwing of oil on the paint. All directional signs brought in last fall are finished, and as soon as weather and roads are passable they will be installed in the more distant locations, and those signs brought in for repair.

Maintenance (Cont.) Oil in both trucks was changed and both have had grease jobs. U.S.I. -13841, the dump truck, underwent minor repairs in Gallup.

Soil and Moisture

Through the courtesy of Mr Sheets, Agronomist for the Navajo service, I have obtained around two thousand trees of different varieties for planting in the canyons. These are mostly "sand cherries", *Prunus Besseyi*, which the Navajo soil and moisture is using in place of willow for bank protection. The others are peach seedling and plumb which I am issuing to the Navajos to plant for windbreaks and their orchards. These trees will not be used near the ruins.

DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

CASA GRANDE NATIONAL MONUMENT

COOLIDGE, ARIZONA

March 25, 1945

MEMORANDUM for the Regional Director,
Region Three.

The following is the narrative report of Casa Grande National Monument for March, 1945:

Visitors: A short month and bad weather called forth a small decrease in visitors as compared with February, but the increase over the 1944 figures continues. A total of 712 visited the Ruins, compared with 637 for March, 1944; and 765 for February of this year. There were 378 unattended (February, 298; March, 1944, 317). There were 645 Museum visitors, also an increase over both last year (404) and February (618). About 75 visitors used the picnic grounds in small groups and 20 took the Desert Trail.

Interpretive Services: There were 119 Ruins trips for 712 people, a total of 4815 minutes which averaged 40.46 per group. In the Museum there were 102 talks for 645 visitors, an average of 21.6 minutes per group. The biggest single day was March 11 with 79 Ruins visitors and 50 unattended. On March 18 there were 88 Ruins visitors and 35 unattended.

On March 3, a cold rainy day, 34 Army officers, radio men and other returned soldiers came by bus from the P/W camp at Florence, almost all wearing a variety of ribbons and decorations. They made a very intent audience and a satisfactory one to the Ranger. On returning to the Museum there were 18 Sunday school children with three teachers waiting to go to the Ruin. The net business of the day consisted of 66 Ruins visitors; \$1.75 in fees and 70¢ in taxes.

COLLEGE AVISOR

• **Small** 2A 40%

Weather: The less said about the weather this past month the better. It has been MOST UNUSUAL. Cold, raw, rainy and a disgrace to all concerned. There have been 11 cloudy and rainy days out of 28. It has been windy much of the time. The total rainfall was .87 inches. The high temperature was 87 degrees on March 12 and the low was 27 on Feb. 26.

Maintenance: The Custodian and Ranger Duffield cleaned the sewers; all copings were sealed by Ranger Duffield and many other small items received attention. He also calsomined the sleeping porch of Quarters No. 4. The sewer pump had to have new floats and until they arrived the pump had to be operated daily by hand.

The regular maintenance has gone forward. Mr. Teddy Baehr maintains he wears the same size hat he did when he came; a rather remarkable accomplishment considering the great number of compliments he receives from the visitors who admire his handiwork throughout the area.

Approximately 27,000 envelopes were sent from storage to Santa Fe. A large carton containing travel certificates for the Clergy which had been sent here by mistake were returned to the sender.

Surplus material, stores items and equipment from the Headquarters Pool Warehouse were declared and an inventory of all Pool Warehouse stores was completed and sent through.

Shop Activity: Mechanic Stonehocker submits the following report: The Walnut Canyon pickup was given a complete overhaul, with straightening, braceing and welding of the fenders. On the Saguaro pickup the transmission was removed, repaired and replaced.

An inspection was made of the tires and four were sent in for recapping

13830
for USDI- I-~~13831~~, the door was straightened and parts ordered for brake repairs. An inspection of tires was made of the Casa Grande pickup and an application made for a new tire. Work was started on the repair of the light plant for Chaco Canyon. It is about 50 % complete. Work was started on the repair of the battery charger for El Morro. Two surplus washing machine engines were ordered to make battery chargers for radio batteries.

One trip was made to Phoenix for parts and supplies. A trip was made to Tucson with tires for repair and to return the Navajo pickup to Saguaro at which time I took the acetylene torch to cut a tank in two for stock-watering at the park base.

Personnel: Ranger Henry C. Duffield Jr. finished his tour of duty at Casa Grande National Monument on March 1, to the regret of all. On March 3, the Bicknells received an urgent summons to California. It was possible to contact Ranger Duffield who returned March 5 for a further two weeks of duty while the Custodian took two weeks of annual leave. He returned to duty on March 19 and Ranger Duffield left the National Park Service the same day. March 23 Al went to Phoenix to get parts for several pieces of equipment.

N.P.S. Visitors: On March 3, Custodian and Mrs. Baxter and the two boys arrived from Walnut Canyon to leave that pickup for an overhaul and took back the Wupatki pickup for their use.

March 10, Howard Young, Lowell Sumner and George Olcott of the N.P.S. at Santa Fe stopped briefly on their way to Tucson.

Louis Castellum stopped off March 15 en route to see his family.

The next day Ben Thompson brought the car he had been using and exchanged it for another, leaving the first to be overhauled for use going to the Fire School at Big Bend.

The first thing I noticed when I stepped out of the train was the cold. It was a sharp contrast to the warm, humid air of the South. I had heard that the weather in the North was harsh, but I didn't realize just how cold it would be. The wind was biting, and the sun was a pale, distant glow in the sky. I wrapped my coat around myself, feeling the rough texture of the fabric. The train conductor, a man with a stern expression, looked at me as I stepped out. He didn't say anything, but his eyes told me that I was a stranger in a strange land. I took a deep breath, trying to steady myself. The air tasted different here, crisper and cleaner than the air I was used to. I looked around, taking in the sights and sounds of the new world. The streets were wide and paved, with buildings that looked like giant castles. I saw people walking in coats and hats, their faces pale from the cold. I felt a sense of awe and wonder, but also a touch of loneliness. I was alone in a vast, new world, and I didn't know where to go or what to do. I took a few steps forward, feeling the cold ground beneath my feet. The wind was still blowing, but I was starting to feel a little more at ease. I was in the North, and I was here to stay.

Earl Jackson seems much improved in health and the doctor in Phoenix expressed himself as well pleased when Earl had an examination recently.

Nature Notes: Lizards are running all over the Monument, a phenomenon, according to Betty Jackson, which did not occur until May last year. Many birds have nested all around and the shelter of the Ruin looks like a tenement house. One big barn owl reappeared March 18, but the mate has not shown up. Both varieties of rabbit are very plentiful.

Wanted: A good, strong cage in which to park small children. One similar to the monkey cages at the zoo would look very neat in front of the Administration building and would simplify life for both the parents and the rangers.

More Hazards in the Life of a Ranger:

Scene: The east room of Ruin.

Cast: Young Ranger

Two Young Women

Elderly man carrying infant.

Man speaks: Would you mind, Ranger, helping Lucy through that little door?"

Ranger looks from one young woman to the other, prepared to help both in a pinch.

Into his reluctant and unaccustomed arms, small Lucy, aged six months, howling like a coyote and very damp, was dumped, and there remained, for two doorways, while the Ranger, breathlessly trying to fulfill his duties, was left holding the baby!

UNITED STATES
DEPARTMENT OF THE INTERIOR
National Park Service
CHACO CANYON NATIONAL MONUMENT
Bloomfield, New Mexico

March 25, 1945

MEMORANDUM for the Regional Director,
Region Three.

There follows the report of activities in Chaco Canyon National Monument for March, 1945.

VISITORS. A total of 75 visitors were contacted at Chaco Canyon during this report period, who desired information. A total of 730 minutes were spent in contact time. One written request was received for informational leaflets on Chaco Canyon and its ruins.

WEATHER. This report period has been cold, warm; quiet and windy - typical March weather. The maximum of 75 degrees was reached on March 21, giving false hopes for an early spring. The minimum of 11 degrees occurred on March 7 and 9. Snow fell on February 26; rain and snow fell on March 14, 15, 16, 18, 19, 23 and 24. Precipitation amounted to .94 inches.

N.P.S. VISITOR. Engineer Bradley arrived on March 19 and left on March 23.

ACTIVITIES. Usual routine was carried out for Chaco Canyon and regular office correspondence for both Chaco Canyon and El Morro National Monuments.

Contacted El Morro National Monument on 16 days and was able to establish contact on 8 days. Mr. Worthen made some repairs on the El Morro set and this has enabled a better contact. New batteries have been requested for the Chaco Canyon set, and when they are received and installed should make perfect contact between the two monuments.

Quarters for the monument horse were cleaned and surplus equipment removed in order that he might have more room. A new feeder was also built.

The north approach to the bridge over Chaco Wash was filled with three loads of rock and was ready for the State Highway men when they arrived at Chaco with two bladers. They finished filling the gap and widened the approach on both sides of the bridge. They bladed the north road into Chaco Canyon and then bladed the road out to I.K. Westbrook's ranch. Four days were spent

on the sand drifts by the highway men and the road should give us no trouble for a long, long time. In all, they worked on the north Chaco approach road for two weeks. This custodian had the extreme pleasure of going to the Blanco Trading Post for mail on March 13, when the roads were in perfect shape. Then following a week of rain and snow, they have again become typical Chaco roads being rough and rutted.

Indian Service also bladed the south approach road into Chaco from Crownpoint. This was a gala month for Chaco Canyon with both north and south roads being for a time in perfect condition.

Much time was spent working on the automotive equipment. The road maintainer received a checkup on the gasoline and electrical system and also a grease job. The grease was also cleaned from the rear wheel and tire. An unfortunate accident occurred when the maintainer was drained and rust clogged one petcock causing a small break in the block. It is hoped this can be repaired by electrical welding.

A trip was made to Aztec bringing up the Chaco dump truck for needed repairs and returning to Chaco in the S & M pickup. To put the S & M pickup into better running condition it was necessary to solder the gasoline line where it had rubbed against the frame. Filled the master brake cylinder as it was low and the brakes were poor. The emergency brake does not function, and cannot be repaired unless the rear wheels are removed, as the cables are too tightly packed with mud and grease. The rear spring shackles were tightened; the windshield wipers were repaired; the bumper refastened with new bolts; and license plate replaced on back end. Then gave pickup a grease job and changed oil.

The S & M stake truck received a grease job and oil change when it was brought in from Aztec.

The Chaco pickup was given some minor repairs also; filled master brake cylinder; replaced bumper with new bolts; grease job and changed oil.

Oil was also changed in the light plant and water pump.

Three patrols were made with "Boss". Thirty-five head of horses were driven out of the monument.

Considerable time was spent working on custodian's quarters. Repaired the lock on the front door. Discovered the bedroom fireplaces were favorite hanging out places for the local mice, so plastered in the fireplaces keeping mice restricted to ceiling and roof. While plastering, was startled to find three pairs of white woolen socks hidden in the flu. How they got there is an unsolved mystery, but the mice were having a field day converting them into suitable pieces for their nests.

The two bedrooms and hall received a thorough cleaning in preparation for painting the walls and ceiling. Elbow grease and Dica Dood it. The two ceilings were given a coat of ivory kalsomine, and the walls of the back bedroom were kalsomined pale yellow. The hall was kalsomined white. All woodwork was given a coating of linseed oil.

One beautifully warm day was devoted to patching the roof with the material that was on hand. One serious leak has been eliminated todate.

Found the shut off valve on the water tanks had split and was draining off Chaco's water supply, so a new valve was installed.

A check was made on the number of light weight rails on hand at Chaco, to be possibly used in future repairs on the lower ruin at Tonto National Monument. A tentative check-up was made on stabilization needs on Pueblo Bonito.

Discovering that spring had not yet arrived, it was necessary to go to the CCC camp and salvage some coal for the two small coal stoves.

Engineer Bradley arrived at Chaco on March 19. A program was outlined for Soil and Moisture work in the canyon. This work will be started March 26, with three Navajo on the crew. Willows in the wash will be thinned and transplanted; revetments begun last year will be completed; several arroyos will be refenced in the hopes it will keep out the livestock; and cattle-guards enlarged, cleaned out, or replaced if time permits.

During Bradley's stay, the west boundary fence was inspected; a check made on revetments and willow planting in the Chaco Wash; discussed fences in the gap east of headquarter area and the fence north of the CCC camp was checked.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

-4-

A trip was made to Aztec with Engineer Bradley to bring back the S & M stake truck to Chaco. Was also able to bring back Roy Newton and Joe Cly to work on this project at Chaco. Fred Yazzie will also be employed and if a five man crew should be needed, will locate two extras, it is hoped. Bradley left Chaco in a snow storm on the 23.

WILDLIFE. A bob-cat was observed walking calmly up the canyon beyond Pueblo Bonito. On March 11, the first robin was seen and on March 18, the first meadow lark was heard and seen.

NAVAJO LIFE. Some time has been spent reading and answering letters from those unable to write English. Letters from their boys in the Service are very interesting. Navajos working on the railroad in Texas, can't seem to grasp why the grass is always green and are fascinated by the ocean. Trouble seems to be encountered everytime someone leaves the canyon for work on the railroad, as there is a steady flow of correspondence to try and locate ration books. Those in the canyon want sugar stamps and those on the railroad want shoe stamps.

Roy Newton and Joe Cly just came down to find out what time to report to work - they have been up all night at a "sing" for the boys in the Service. This was the fourth big sing held since the war began.

Ted C. Sowers,

CHIRICAHUA NATIONAL MONUMENT

Dos Cabezas, Arizona

March 27,

1945

MEMORANDUM for the Regional Director,
Region Three.

There follows a report of the activities at Chiricahua National Monument for the period ending March 24.

General. The custodian took 4 days annual leave during the month. Grader Operator Marble took 3½ days leave during freeze-up of the roads. Laborer Stansberry was off several days on account of the road freeze-up and sickness.

Weather. Weather has been generally fair and the travel has increased accordingly. Only three small snow storms hit us during the report period.

Maintenance. One of the coldest nights of the winter, March 11 & 14, delayed the road and trail maintenance a few days. The sheltered snowy spots had been left for warmer weather and this freeze refroze them.

32 masonite sign boards were received from Casa Grande National Monument. Some extra lumber was purchased for latching. The road man and custodian now spend their spare time building, carving and painting road signs for placing at numerous outlying points so tourists can find their ways from the main highways to Chiricahua.

Approaches to Monument. Approach roads have all remained in fair shape except the road from Rodeo through Portal and Cave Creek. The Union Saddle Divide on this road has been closed by snow since January 1 or 2.

Interpretive Services. 73 parties, a total of 362 visitors, were contacted in the museum. The largest group contacted was a party of 48 Senior High School students from Safford. This party was contacted for a period of two hours in and out of the museum, bringing up the average contact time.

Research and Observation. Heads of the canyons nearly all have running springs in them. Bonita Canyon is running in spots as far down as the camp ground. Rhyolite Canyon dried up by headquarters about a week ago, after running since January 28. Loat Canyon is running a good stream for 150 or 200 yards below the swimming hole, but the swimming hole filled up with gravel during the winter.

Travel. 438 visitors came to Chiricahua this month making this the largest travel month of the travel year. This compares favorably with 173 for March of last year.

RECOMMENDATION FOR THE NATIONAL MONUMENT

For the purpose of the National Monument, the following is recommended:

General. The National Monument is a large area of land, and it is recommended that it be set aside as a National Monument.

Location. The National Monument is located in the State of California, and it is recommended that it be set aside as a National Monument.

Size. The National Monument is a large area of land, and it is recommended that it be set aside as a National Monument.

History. The National Monument is a large area of land, and it is recommended that it be set aside as a National Monument.

Geography. The National Monument is a large area of land, and it is recommended that it be set aside as a National Monument.

Vegetation. The National Monument is a large area of land, and it is recommended that it be set aside as a National Monument.

Wildlife. The National Monument is a large area of land, and it is recommended that it be set aside as a National Monument.

Conclusion. The National Monument is a large area of land, and it is recommended that it be set aside as a National Monument.

EL MORRO NATIONAL MONUMENT
Ramah, New Mexico

March 25, 1945

MEMORANDUM for the Regional Director,
Region Three.

There follows the report of activities in El Morro National Monument for March, 1945.

VISITORS. Five visitors were contacted at El Morro during this report period.

ACTIVITIES. Radio contact was made with Chaco Canyon on February 26, March 1, 12, 13, 16, 17, 19 and 20. The chief operator at the air base came out and checked the El Morro set. New batteries were installed and the vibrator in the amplifier was sticking, so the points were filed. Trouble is still encountered while trying to reach Chaco, but when new batteries are installed in that set, it is hoped we have better reception.

Caretaker Worthen has cleaned away trash and rubbish in the yard; moved some of the scrap lumber; helped unload 153 of the poles for the telephone line; built racks in the wareroom and stacked the fire tools in their rack. In the cabin, he has put in some of the base board and quarter inch round and did some work in the bathroom.

Ted C. Sowers,
Acting Custodian.

Director, Federal Bureau of Investigation
Washington, D. C.

March 22, 1945

MEMORANDUM for the Regional Director
Region Three

There follows a report of activities at the Great Sand Dunes National Monument for March, 1945:

Travel. The travel at the Monument was greatly increased this past month due to the large number of Army personnel that visited the area in connection with a driver training program.

There were 166 service men registered that bivouaced one night in the area. There were some convoys in that did not register.

Special Activities. When the area was visited on March 17 I found that the wood pile had been stolen. About 20 to 30 tons of excellent pine that was sawed and corded for use in the station fireplace. Some time has been spent in trying to locate the guilty party.

Continued light was followed at Fairport National Monument on February 22, March 11, 17, and 22.

Inspection and Improvements. Bert G. Clarke, In Charge of the Great Sand Dunes National Monument

Great Sand Dunes National Monument

While out walking on the dunes and back were several very good views.

Good day. All was quiet at the monument. The weather was good.

The following table shows the number of visitors and the amount of money received at the monument for the month of March.

Re: Investigation of activities of the G. I. at 10
Bureau National Monument, Utah, 1947

Enclosed for the National Director are three
copies of a report which was prepared by the
personnel that visited the area in connection with a driver
training program.

There were two visits made to the area during the
month of April. These visits were made by the National
Director.

Special Activities. When the area was visited on
April 17, 1948, the National Director was accompanied by
50 to 75 persons of various ages and both sexes and
for one in the afternoon. These persons were
in trying to locate the G. I. camp.

Very truly yours,

XXXXXXXXXXXXXXXXXXXXX
Montezuma Castle National Monument
Camp Verde, Arizona

March 23, 1945

MEMORANDUM for the Regional Director, Region Three.
National Park Service.

There follows the monthly report of activities at Montezuma Castle National Monument for March, 1945.

Visitors this month, 169; travel year to date, 971.

Weather We find approximately one third of March has been cloudy and windy bringing 1.15 inches of precipitation. The maximum temperature was 79° and the minimum temperature 21°. The mean maximum was 63.32° and the mean minimum was 31.16°.

Beaver creek reached its high mark for the year to date on the 16th when some water came through the flood wall.

Administration All penalty mail envelopes, tags, and labels were stamped with the NMCC rubber stamp forwarded from Tuzigoot.

Notes were added to our Fact File as time allowed.

Custodian Bright was relieved at Tuzigoot National Monument on February 27, March 16, 13, and 20.

Maintenance and Improvements The steps in the trail leading to the residences were removed and a ramp constructed in their place.

Walls and ceiling of the office and hall were patched and painted with cold water paint.

Used car oil was applied to timbers in railing around the parking area to prevent weathering.

The Sycamore Trail sign rejuvenating project was completed and the trail cleaned of the grass and brush that had blocked it.

The Museum, Cat & Dog, and Castle Trail signs were oiled with linseed oil.

The monument pickup was washed and polished and flexible oil lines to the oil filter replaced.

A load of flagstones was hauled from Sedona for the walk at the residences. DEPARTMENT OF THE INTERIOR

Floors of the livingrooms, halls, and bathrooms in both residences received a coat of varnish and a coat of wax.

Doors to the restrooms were repaired so they would close.

Refrigerators in both residences were cleaned of the accumulated dust in the mechanism.

Use of Monument Facilities by the Public Visitors this month totaled 169 coming from 20 states and Puerto Rico. Total visitor cars to enter the monument was 43 with 32 coming from Arizona. Guide tickets sold numbered 68; tax collected but no tickets sold, 1; children who climbed without charge, 4; members of the armed forces admitted without charge, 10. Revenue collected in fees and taxes totaled \$20.45.

Guide Service Contact time totaled 37.75 hours; Hastings, 11.75; Leding, 26.00. Eighty-one people were guided through the ruins in twenty-three trips. One hundred and fifty-one people visited the museum in thirty-four groups. There were thirty-one people in three parties who made use of the picnic ground.

Accessions During the month this monument received the following:

"Recreational Resources of the Dennison Dam Reservoir Project"

"Annual Report of the Secretary of the Interior" for 1944.

National Park Service Visitors Assistant Regional Director Richey visited the monument from March 10 to 12. By boat we crossed the creek to inspect the new fence constructed last December. The rest of the time was spent in discussing and checking numerous monument affairs.

Custodian Bright was with us on the afternoon and evening of the sixth.

Visitor Reaction to the Interpretive Program Do Hopi Indians remove the fangs from rattlesnakes used in their snake dance? This question sometimes comes from visitors and according to an article by C. M. Bogert, Ass't. Curator of Herpetology, American Museum of Natural History, in the May, 1941 issue of Natural History, "The fangs are removed - not only the functional fangs but also the embryo fangs which renders the snake defenseless and speeds its death". Opinions pro and con are solicited.

Projects for Ensuing Month The following is planned: 1. Continue project to paint wooden signs. 2. Weatherproof canals at Residence No. 1. 3. Clean ceiling and walls of comfort station. 4. Apply linseed oil to Castle ladders. 5. Continue project to make flagstone walk at residences.

NATIONAL PARK SERVICE

Organ Pipe Cactus

NATIONAL MONUMENT

Ajo, Arizona

March 25,

45
19

MEMORANDUM for the Regional Director,
Region Three.

There follows a report of activities in Organ Pipe Cactus National Monument for the month of March, 1945.

Weather:

March has lived up to all traditions by being a very windy month as a whole, as very high winds for this area occurred. High temperature was 81 degrees on March 11, and low was reached on March 6 at 30 degrees. 1.18 inches of rain fell in the headquarters area during this period.

Travel:

Travel for March was 5364 persons, bringing the travel year to 28976. More out of state cars with monument visitors were noted this month but little time was had for contact.

General:

The Soil and Moisture program is accomplishing quite a lot with our small crew. A few days have been lost to allow the Indians to return to the reservation to work their stock. We plan on closing this project on March 31 at which time a complete report will be sent in.

Ben Thompson arrived on March 12 and stayed five days on general inspection of the monument.

Two days were spent with Mr. Arthur Halloran, refuge manager, and Mr. Kempton, warden, of the Fish and Wild Life Service, assisting them in their check list of plants and animals and working out problems of mutual interest.

The main excitement of the month was an outbreak of car thefts during the night of March 10. A car was stolen at Sonoyta, Mexico and wrecked in running the Port of Entry after closing hours where it was abandoned. Apparently the same culprits then walked as far as headquarters and stole the custodians personal car. My car was found the following day parked beside the road near Ajo but no clues as to the identity of the guilty parties were found. He was apparently a very honest thief as he did not even take the two packages of cigarettes out of the car, evidently being interested only in a ride to town.

Memorandum for the National Museum
Washington, D.C.

THESE THINGS ARE NOT TO BE TAKEN TOO SERIOUSLY
BUT ARE ONLY TO BE TAKEN AS A GUIDE TO THE
GENERAL PRINCIPLES OF THE MATTER.

1. The first of these is the fact that the Commission has not yet received any information from the Government of the United Kingdom regarding the proposed changes to the law of the United Kingdom in relation to the treatment of the British Commonwealth countries.

There are two copies.
There are 12 copies with 1/2 amount of money and 1/2 of the amount of money.
There are two copies, including the money and 1/2 of the amount of money.

11 If the two sides of a triangle are unequal, the angle opposite the longer side is greater than the angle opposite the shorter side. (Theorem 16.1)

Addressed Envelope or Card with Recipient Name to Street or Street Number and
City and State

Two days were spent with Dr. Robert Bellman, former manager, who was
informed, working, at one time and with his partner, Harry Harkness, in their
workshop of ideas and theories and methods of control (control).

The above information was obtained from a review of the files of the Department of the Interior, Bureau of Land Management, and the Bureau of Reclamation, and is being furnished to you for your information.

Organ Pipe Cactus National Monument STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

WILDLIFE:

A sight record of a yearling wolf was noted on March 7th. Almost daily new birds are returning to the monument wither for their summer stay or for a stopover during migration. All records are being kept so we hope soon to build a decent check list.

What apparently was going to be an exceptionally good flower year has turned out to be only normal as things started too early and were caught by cold weather and drying winds.

PUBLICITY:

The custodian was elected to be the speaker at the newly organized Rotary Club in Ajo on March 8th. New informational pamphlets were requested and distributed to the Ajo Chamber of Commerce and the Tucson Chamber of Commerce.

MONUMENT VISITORS:

Other visitors to the monument this month included Bill and Kathryn Wilson who brought the Saguaro truck over for an exchange of supplies, and Mr. and Mrs. Roscoe Wilson, Mr. Wilson formerly being with the Forest and Grazing Services.

PROJECTS FOR THE COMING MONTH:

The S & M program will be completed as will most of the cut-off wall work on the highway.

April 9 to 14 will be spent in attending Regional Fire School at Big Bend. Any spare time will be spent in maintenance and patrol.

William R. Supernauth,
Custodian.

1. A light source of a wavelength well within the visible range, about 650 nm, is directed to the specimen. The light is focused on the specimen by the objective lens. The light is reflected back by the specimen and is collected by the objective lens. The light is then focused by the eyepiece lens to form a virtual image of the specimen. The image is seen through the eyepiece lens.

There is a very large number of people who are interested in the study of the history of the United States and who are also interested in the study of the history of the world. This is a very large number of people and it is very interesting to see how many of them are interested in the study of the history of the United States and how many of them are interested in the study of the history of the world.

1. *Trachylepis*

The committee was divided in its opinion as to how to proceed. It was decided to refer the matter to the Joint Committee on Education and Labor, and the Joint Committee on the Judiciary.

Other matters in the document will come before the Board and the Board will be asked to consider the request for a full and complete review of the Board's decision on the matter.

How the data will be used will be determined by the company's board of directors.

Saguaro NATIONAL MONUMENT

Tucson, Arizona

March 26 1945

MEMORANDUM for the Regional Director, Region Three.

There follows a report of activities in Saguaro National Monument for the month of March, 1945:

Weather. This was a good month for working on the projects, with only about 5 days of storm when we had to work inside. The mountains are still deep with snow above 7,500 feet.

Inspections. About two days were spent with Ben H. Thompson.

Important Visitors. Supt. and Mrs. Frank Kittredge visited the area one evening. They were accompanied by Mr. Wm. H. Carr, Director of the Bear Mt. Trailside Museums and Asso. Curator of the Dept of Education, Amer. Museum Of Natural History.

New Construction. Most of Custodian Wilson's and my time was spent on building construction at Pack Base. One carral will hold the mules now. The partitions of barn are in but the doors havent been built, nor the shelving and tool racks. The stock tank has been installed, and the water lines to tank and house have been tested. We are installing the plumbing now, and will commence painting next week.

The telephone line from Pack Base to headquarters has been completed but the phones are not installed yet. We intend to string another wire about a mile from Pack base in order to convert the ground line to a metallic line that far.

Mr. Wilson made a trip to Organ Pipe with a stove, radio supplies, culvert, pipe and clothesline poles, returning with 2x8's for Saguaro and saguaro ribs for Casa Grande.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
SOUTHWESTERN NATIONAL MONUMENTS

Roosevelt ~~County~~ ARIZONA

March 26, 1945.

Memorandum for the Regional Director,
Region Three.

There follows the report of activities in Tonto National Monument, for
March 1945.

<u>Visitor Statistics:</u>	Cars, 100.	Visitors, 374.
	Instate, 41.	Ruins trips, lower, 72; people, 257.
	Outstate, 59.	Ruins trips, upper, 4; people, 11.
	Information, 16.	Museum groups, 96; people, 355.
	Armed Forces, 34.	Personnel time, Custodian, 89.2 hrs.
	States represented, 23.	Requests for information, 1.

The visitor count is steadily rising and everyone has seemed happy except one elderly woman who, against her better judgement, had been persuaded to come here on Sunday. She told me that Sunday was not meant for such "goings on" but perhaps as it was "God's Work" she was looking at, he might not be too critical of her.

Newsworthy visitors: Mr. Thompson, from the Region Three Office, came in the afternoon of March 19, and left the morning of March 20. It was his first visit here for a long time and his visit was far too short. He probably can tell you folks quite a bit about the "Nature Trail" walk he took while here.

Mr N.T. Getty, from the University Of Arizona, Mrs. Getty and two of his students spent a short time here early in the month and were most enthusiastic about the Monument.

Weather: March was a very cold month for this section of the country. There was a hard freeze the night of February 25, 26, 27 and March 7.

Rain fell (and I mean rain) on March 1, 2, 3, 4, 5, 14, 15, 16, 17, 18, 22, 23, and 24. Much snow on the mountains the whole month, and a fresh fall with each storm. The lake is gaining water steadily. The Monument is very green and beautiful to look at, with many flowers blooming, although they are backward, due to the cold weather.

General: March has really been a busy month here as the prolonged cold weather and unusual amount of rain have made much wood hauling necessary and several slides on the trail have taken considerable time. Soft ground and increased traffic have kept the road ditches flattened as fast as I dug them out, but the road has remained passable and is not too bad at the present time.

Excavating for lowering the water line is coming along fairly fast and hope to have it completed this coming month.

Have dug a wide ditch back of the house to take care of the water coming down the hill. Two trips were made to Globe as I can seldom get the gas tank filled the day I take it in and have to return for it. Mr. Matlock can not get help and has to do most of the driving himself.

Projects for April, include finishing the storage shed, if the weather permits and the rest of the work on the water line.

Elmer C. Gipe
Elmer C. Gipe
Custodian.

2245

These figures are subject to revision as more information is received.

[illegible]

The first thing I noticed when I stepped out of the car was the cold. It was a sharp contrast to the warm blanket I had been sitting under. I looked up at the sky, which was a deep, dark blue, and I felt a sense of peace. The air was crisp and clean, and I could hear the distant sounds of the city. I took a deep breath and felt a sense of renewal. I had been so stressed and overwhelmed, but now I felt like I was starting over. I looked down at my hands, which were shaking slightly, and I realized that I was finally taking control of my life. I had been so lost and confused, but now I was finding my way. I took another deep breath and felt a sense of hope. I was going to make it. I was going to be happy. I was going to live.

1890

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

Tumacacori NATIONAL MONUMENT

Nogales, Ariz.

Mar. 26, 1945

MEMORANDUM for the Regional Director,
Region III.

There follows the report of activities at Tumacacori National Monument for March, 1945.

March came in like a lion. Roaring winds and snow flurries were in order during the first days of the month. This was followed by mild days of bright sunshine and cool nights. Despite the cool nights (the coldest was Mar. 23 when thin ice was noted) we are having an early spring. Many trees in the vicinity are green, flowers planted in the patio are coming up and weeds are doing exceptionally well.

TRAVEL INCREASE: A total of 947 visitors came to Tumacacori during the March report period. 222 of these did not go through the mission; 725 were guided through the mission and museum. The travel year to date shows an increase of 38.7%. Money turned in for guide fees and taxes for the last thirty days totaled \$190.95.

INTERPRETIVE SERVICE: A total of 115 hours were spent in contacting and conducting visitors during the month. Ranger Brewer spent 2070 minutes on 72 ruins trips for 355 visitors and 1630 minutes on 73 museum trips for 358 visitors. Acting Custodian Reed spent 1895 minutes on 74 ruins trips and 1307 minutes on 74 museum trips for 367 visitors. 222 persons in 54 cars received information service.

MAINTENANCE: On Mar. 15th., a representative of the Tucson Roofing Co. arrived at the monument. We went over the mission roof and repairs were made to a minor leak where the main roof joins the dome. The area in back of the rangers residence and around the adobe pit was cleaned. Trash and weeds were hauled and burned. The mass diorama was completely checked and minor repairs were made. A new button type switch was installed. The furnace was checked and minor adjustments were made at the time a new supply of oil was received. One of the door catches on the monument pickup was repaired and oiled. And last but not least, a bumper crop of weeds has given us no dull moments.

WILDLIFE: On March 12th. a pheasant rooster and two hens were observed. They were hiding in a bunch of tall grass beside the path leading from the patio to the residences. They made no move until we were within five feet of them. They got up slowly, stretched themselves and walked leisurely away.

PHOTOGRAPHY: Approximately one half of the prints from negatives loaned to Headquarters by various monuments and parks have been mailed in. The remainder are being printed as time permits and will be mailed upon completion. Ten negatives made at Arches in Dec. 1944 and three prints of each were also mailed. A number of glass plates, prints and film negatives from which copies are to be made have just been received. These will be copied as soon as material for the job is received.

Memorandum for the Regional Director,
Region III.

Transmits the report of activities at Governmental National Monument for
March, 1948.

Work done in this area during March and April 1948 was in accord
with the plan of work for the year. This was followed by a visit to
the monument in April 1948. The visit was made by the Regional Director
and the National Monument Director. The visit was made to the monument
in the vicinity of the monument. The visit was made to the monument
in the vicinity of the monument.

TRAVEL EXPENSES: A total of \$1,000.00 was expended for travel
during the month of March. This was for the Regional Director and
the National Monument Director. The travel was for the Regional Director
and the National Monument Director. The travel was for the Regional Director
and the National Monument Director.

RESEARCH: A total of \$1,000.00 was expended for research
during the month of March. This was for the Regional Director and
the National Monument Director. The research was for the Regional Director
and the National Monument Director. The research was for the Regional Director
and the National Monument Director.

MAINTENANCE: A total of \$1,000.00 was expended for maintenance
during the month of March. This was for the Regional Director and
the National Monument Director. The maintenance was for the Regional Director
and the National Monument Director. The maintenance was for the Regional Director
and the National Monument Director.

ADMINISTRATIVE: A total of \$1,000.00 was expended for administrative
during the month of March. This was for the Regional Director and
the National Monument Director. The administrative was for the Regional Director
and the National Monument Director. The administrative was for the Regional Director
and the National Monument Director.

CONSTRUCTION: A total of \$1,000.00 was expended for construction
during the month of March. This was for the Regional Director and
the National Monument Director. The construction was for the Regional Director
and the National Monument Director. The construction was for the Regional Director
and the National Monument Director.

Other: A total of \$1,000.00 was expended for other during the month of March.
This was for the Regional Director and the National Monument Director. The other was for the Regional Director
and the National Monument Director. The other was for the Regional Director

TUZIGOOT NATIONAL MONUMENT

CLARKDALE, ARIZONA • P. O. BOX NO. 36

MARCH 26, 1945.

There follows the report of activities in Tuzigoot National Monument for March 1945, by Everett W. Bright, Custodian.

Visitors this month 324; travel year to date 1401.

Weather. There were 5 clear days - 8 partly cloudy - 15 cloudy - 8 days of rain, which fell on February 26 and March 1, 4, 6, 13, 15, 16 and 23. Strong winds on February 26, 27 and 28 and March 2, 4, 5, 8, 14, 15, 16, 18, 19, 21, 22, 23 and 24.

Travel. Travel this month was much higher than for February. A 90 increase. Which is good considering the strong winds and general bad weather for most of the month. Instate visitors numbered 269 and outstate visitors 55. There were a total of 93 cars with instate numbering 75 and outstate 18. There were 18 members of the Armed Force who visited the monument. An increase of 8 over the previous month. A total of 5 visitors walked out to the monument.

N.P.S. Visitors. Tuzigoot was glad to welcome Assistant Regional Director Charles A. Richey on March 9 and to profit from his consolation and advice. The many helpful suggestions given by Chuck were much appreciated and well received.

Guide and Contact Service. Museum: 26 hrs, 35 mins; Field: 23 hrs, 15 mins. Total contact time of 49 hrs, 50 mins.

Personnel Time. Custodian Bright 47 hrs, 10 mins; Custodian Hastings 2 hrs, 20 mins; Ranger Leding 20 mins. Hastings relieved on February 27 and March 13. Leding relieved on March 6 and 20.

Maintenance and Administration. Applied linseed oil to doors and window frames of museum, garage, office and living quarters. Patrolled

and made minor repairs on monument boundary fence. Walked and checked water pipe line from Clarkdale to Tuzigoot several times for leaks but fortunately no breaks were found. As a matter of fact no leaks have occurred for almost three months. Hauled garbage to garbage dump. Received 'PMGC' hand stamp and stamped all penalty envelopes in accordance with Regional Office instructions. Several minor repairs on the walls in ruins have been made. Cleaned museum and polished display cases numerous times. Painted Tuzigoot Monument signs with linseed oil. Attended to usual routing office work.

----- March 27 ----- 1945

MEMORANDUM for the Regional Director
Region Three

There follows the report of activities in Walnut Canyon National Monument for March, 1945.

Visitors this month, 61; travel year to date 987.

GENERAL: Weather has been very disagreeable this month with one snow storm after another. Roads have been bad and our visitor travel has shown a decrease.

Left here March 1 in a snow storm taking our pickup to Coolidge for overhaul job. Returned on March 4, encountering more snow through the mountains. Traveling was very difficult. Around Flagstaff there was approximately three feet of snow and the road to the Monument had not been plowed out so we were forced to stay in town for two nights.

Chas. A Richey arrived in Flagstaff March 5 and was scheduled to visit Walnut Canyon on the following day. Since we were snowed out, our visiting and discussing had to take place in a Hotel room.

VISITOR STATISTICS: 61 visitors arrived during the month. For March of 1944, there were 32 visitors. One man walked 7 miles through the mud without overshoes. Said he was cut for his health. Looked to me as if he was trying to lose his health.

N.P.S. VISITORS: Chas. A. Richey, Assistant Regional Director, Custodian Bright of Tuzigoot National Monument and Custodian Van Cleave of Wupatki National Monument spent a short time with us on the morning of March 9.

MAINTENANCE, IMPROVEMENTS AND NEW CONSTRUCTION: Received two batteries for the radio. So far have not been able to locate strain insulators to complete the job of installation of radio hook up with Wupatki and Navajo National Monuments.

Work on filing cabinet in office as time permits.

Spent 2½ days shoveling snow out of trail around the "Island" so visitors could make the trip.

Hauled coal in a wheelbarrow from storage shed to house, 120 yds.

Hauled a load of 2 x 8s, 16 ft. long to Flagstaff and had them ripped into 2 x 4s to use in building towers for the new radio antenna.

PROJECTS FOR ENSUING MONTH: Attend Fire Training Meeting.

Make Antenna masts and fix radio room in shop for installation of new radio.

TRAVEL MONTH, MARCH 1945

Visitors 2746

Cars 623

TRAVEL YEAR TO DATE

Visitors 12867

Cars 3107

ARMED FORCES USE

Visitors 1448

Visitors 6513

Another month and we are well ahead of the same month last year. In fact we show increases on all figures this month. A couple of pretty Sundays helped materially. We have had much heavy wind which of course cuts into our travel and adds much to the labors of our road man.

High for the month was 81 degrees on the 10th and the low was 11 degrees on the 9th. We missed Paul a lot this month and I could have used a half dozen extra men had they been available. Joe and I have spent portions of 24 days on the road. Joe runs the Cat, and I the Wehr and even between us we are doing well to keep even with the winds. We are proud however that some of the heaviest winds have not blocked our road and travel has been able to get through at all times. Poor old Roy has had the front end all to himself. He is as busy as a hen with one chick.

I made an inspection trip to the Soda Lake and then Joe and myself walked about four miles over some of our area neither of us had ever seen. We found some of the best Selénite Crystals I have yet seen. Some of them are marvelous. Rumors regarding considerable activity in the vicinity of the Soda Lake were not confirmed by actual investigation.

We were very much pleased one Sunday P.M. when in drove Chaco's Bear Hide McNeil. We convinced him quick of the marvels of the White Sands and he left, I am sure, feeling that Chaco was a close second to White Sands.

LOOK carried a White Sands picture in their photo quiz section a couple of weeks ago. It gave a very nice description in the answer.

The Concession did a very good month and seem well pleased with their month's business.

White Sands Narrative Report

#2.

No serious accidents occurred. On Sunday afternoon a lady came into the office and felt weak. She fainted dead away and we had quite a time bringing her out of it. She fainted in the museum. Frank Sinaita does not have a thing on Matts museum when it comes to women fainting.

An closing with the winds blowing a gale. We may yet loose out on this fight with the elements but Joe and I promise to do our level best. Will inform you in next month's report how we come out. No doubt roads will occupy the majority of our time and Roy will keep up the office and museum end.

Trapper Road Work: The work has been discontinued on this road since the trapper light was on upper ridge. The road is now being maintained by the lower ridge. It is not possible to go up the road now because of the weather.

Good work: Considerable road work has been done on the road which the sign at the top of the road at White Sands National Monument. Part of this work has been done by the trapper and the other part by the museum. The work has been done by the trapper and the other part by the museum. The work has been done by the trapper and the other part by the museum.

Work on road: Work has been done on the grading and filling of the road which the sign at the top of the road at White Sands National Monument. The work has been done by the trapper and the other part by the museum.

Work on road: Work has been done on the grading and filling of the road which the sign at the top of the road at White Sands National Monument. The work has been done by the trapper and the other part by the museum.

Visitors: Assistant National Director (N.D.) who is the new one in charge of the N.D. and P.D. of the road. He has also been in charge of the N.D. and P.D. of the road. He has also been in charge of the N.D. and P.D. of the road.

Cooperation of other institutions: The National Park Service has been in charge of the N.D. and P.D. of the road. The National Park Service has been in charge of the N.D. and P.D. of the road. The National Park Service has been in charge of the N.D. and P.D. of the road.

-----WUPATKI----- NATIONAL MONUMENT

-----Flagstaff, Arizona-----

-----March 25th-----, 1945--

MEMORANDUM for the Regional Director, Region Three.

There follows the summary of activities at Wupatki National Monument for the month of March, 1945:

Visitors this month: 20; travel year to date: 107.

Weather conditions: The month has been characterized by variable weather with frequent light snows on upper elevations and various forms of precipitation here in the lower basin. At total precipitation of over .3 inch has been recorded thus far in the month.

Road work: Considerable road repair work has been accomplished during the month, with the use of the per diem services of Navajo Clyde Peshlakai. Most of this month's road work has been in rock removal and hole filling. Road conditions in general are considered to be approaching the pre-war normal and have been continuously improved in the past two months. Roads have been dry almost the entire month. "Patrol" roads throughout the basin area will need some little spot repairs as soon as time permits.

Work on Ruin: Work continues on the grading and filling of the trench-scarred north west slope of the Ruin. Thus far this month one bead and one artifact of unknown use have been recovered from the CCC excavation refuse.

Radio: Joint plans with Custodian Baxter are being pursued for the installation of new radio sets in the local Park Service areas.

Visitors: Assistant Regional Director Richey was in the area on inspection on the 7th and 8th of this month. Mr. Richey chauffeured the original Wupatki pickup from Walnut Canyon to Wupatki on its return from a repair stay in the shop at Casa Grande. Relief pickup was turned over to Baxter at Walnut.

Cooperation with other institutions: The custodian has, at the request of the local Navajo, become an unofficial representative of the American Red Cross. So far, contributions (unsolicited) totaling twelve dollars have been received and turned over to official channels in Flagstaff.

*Mr. Bert G. Clarke,
Hooper, Colorado*

Arches

Moab, Utah

April 26,

45

MEMORANDUM for the Regional Director, Region Three:

The following is a narrative report for Arches National Monument for the month of April, 1945:

GENERAL: A trip was made to Castledale, Utah on April 24th for the purpose of attending a training school for the Utah F & R FHS. I have been placed on the committee for Grand County and this school was for the purpose of outlining the organization, etc for the coming season.

The custodian was on sick leave from April 3rd to April 9th inclusive, spending from the 3rd to the 5th in the hospital at Moab trying to overcome the effects of infection which developed from a case of sunburn.

WEATHER: According to the oldtimer's of Moab this has been the coldest April for a number of years. The apricots and early peaches were frozen. Rain and snow fell intermittently and heavy winds were in evidence most of the month.

TRAVEL: The winds and stormy weather were evidently the cause of the decrease in travel this month. We had only 9 cars and 38 people, with out of state visitors from New Jersey, New York, Connecticut, California, Oregon and Colorado. One party visited the Courthouse Towers, Fiery Furnace and Delicate Arch, with the balance of the travel to the Windows Section.

INTERPRETIVE SERVICE: One party of 12 local people were accompanied to the Windows Section on Easter. The monument slides, all 12 of them, were shown to a party of 5 people at headquarters. The new additions to the slide collection, sent to us by Naturalist Dodge, were certainly appreciated and I believe we can put them to good use in the near future.

INSPECTIONS: Regular trips were made to the Windows Section but none of the other sections were visited. I am slated to take a party to Delicate Arch on the 26th and into the Devil's Garden on the 28th, at which time I will check these areas for grazing, etc.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
FIVE MOUNTAIN AVENUE

MAINTENANCE AND NEW CONSTRUCTION: The power unit for the water system was back in operation on April 2nd but was unable to start pumping until the 11th due to sickness. The pump was operated intermittently until the 18th, at which time ~~our~~ storage tanks were again full.

Continued work on construction of fence at quarters as time permitted. The job is about three quarters complete with some pickets yet to place and gates for the driveway and walk to be built.

Work on grounds at quarters continued during the month with the planting of lawn in front of the house and transplanting of native shrubs and flowers. The master plan calls for extensive planting of Lombardy poplars but will postpone this job until fall as I have been unable to locate enough of this specie of tree.

Russell L. Mahan

Russell L. Mahan
Custodian

MAINTAINED AND THE CONSTRUCTION. The power was for the same reason was
back in operation on April 1st and was able to start pumping until the
11th of the month. The pump was operated continuously until the 11th,
at which time the pump was again shut.

Continued work on construction of the at present at this
period. The job is about three quarters complete with some details yet
to place and get the delivery and will be built.

With an amount of material available during the month with
the planning of land in front of the house and foundation of water
pipes and floors. The water pipe calls for extensive planning of land
work which will be completed this fall as I have been unable
to locate enough of this grade at time.

NATIONAL PARK SERVICE
AZTEC RUINS NATIONAL MONUMENT

AZTEC, NEW MEXICO

April 24, 1945.

MEMORANDUM for the Regional Director,
Region Three, National Park Service.

There follows the report of activities for Aztec Ruins National Monument for April 1945.

GENERAL: The month has been rather pleasant, marred a bit by six falls of snow which melted promptly and with slight rainfall a total precipitation of 0.28 inches was recorded. Temperatures have ranged from 13 to 80 degrees.

SPECIAL ACTIVITIES: 4/7, the Custodian to Farmington to have chin stitched and examined, as a result of injury. 4/11, Custodian to Farmington to locate power shovel operator and to interview OPA. 4/13, Custodian lectured to Aztec grammar school students. Engineer Bradley arrived. 4/14, Bradley to Mesa Verde re; power shovel. 4/23, Naturalist Gaywood arrived.

MAINTENANCE: Considerable stabilization work begun, including repairs to roofs, walls and capping of ruins. Museum cases in west wing cleaned, specimens checked and recorded, cases reassembled. Power shovel arrived from Mesa Verde and placed in operation at site of gravel pit. Gravel for the drainage ditch project is being hauled. Four men have been placed on ruins stabilization work. Naturalist Gaywood removed a multiple burial from the roof of a room in the west wing of the ruins.

NEW CONSTRUCTION: With the arrival of the power shovel the area at the gravel pit is being stripped of the top soil layer and gravel is being hauled.

Cooperating GOVERNMENTAL AGENCIES: Thru the SCS a clam shell has been obtained for use in digging the drainage ditch.

COOPERATING NON-GOVERNMENTAL AGENCIES: The State Highway Department has loaned us two warning signs which will be placed along the highway near the entrance to the gravel pit.

Interpretive Services: There were 329 visitors conducted on 62 trips thru the ruins and 365 visitors in 67 parties shown thru the museum.

RESEARCH AND OBSERVATION: Mrs. Townsend reports the presence of the Yellow headed black bird, the common gold finch, grayheaded junco, canvassback duck(female), cinnamon teal, gadwall duck and the lesser scaup, on the monument.

INCREASE OR DECREASE IN TRAVEL: There were 365 visitors in 77 cars from 24 states, including 11 from the armed forces. This is approximately 52% more travel than during April 1944.

Of the 365 visitors, 172 purchased tickets amounting to \$51.60, and with tax on 39 children the total collection amounted to \$53.70, which includes tax on 3 waivers.

BANDELIER NATIONAL MONUMENT

SANTA FE, NEW MEXICO

April 30, 1945

MEMORANDUM for the Regional Director, Region Three.

There follows a report of activities at Bandelier National Monument for the month of April, 1945.

Weather Conditions.

Temperatures varied considerably this month with a low of 9° and a high of 72°. Total precipitation for the month was 1.80 inches most of which fell on the 15th. We had 1.04" of melted snow during the twenty fours and over five inches of snow accumulated on the ground. So heavy and furious was the snow that one and a half miles of our telephone line was torn down and mangled beyond the point of ordinary maintenance. Snow weighted down many of the trees in the campground until they broke and crashed to the ground. The area in the canyon looks like a cyclone had hit it.

General.

The Custodian was at Big Bend National Park most of the month. General Mechanic Valencia attended the Regional Fire School April 8th to 15th. Both returned to the monument April 19th. The Army has decided not to utilize the Lodge at present. Travel is a bit frightening - if present trends continue, we're in for some trouble! The heavy storm of the 15th demolished telephone lines on the area, blocked trails and did great damage to the timber. Deciduous trees along the canyon bottoms suffered most heavily. It looks as though we're off to a very busy season!

Inspections.

Superintendent Rose of Boulder Dam National Recreational Area and Regional Naturalist Dodge were in for a few hours on March 31. Mr. Rose was one of the original planners of the Bandelier Museum and was interested in studying the effectiveness of our displays, the museum lobby and office arrangements insofar as they are related to handling of visitors. Assistant Regional Director Richey visited the monument April 22. Lyle Bennett was in on the 25th.

1950, 1951, 1952

...and might, without having any other...

There follows a series of smaller and smaller numbers.

1997-1998

The following series was obtained by this method with a loss of 10% and a gain of 10%. Total precipitation for the month was 1.11 inches, most of which fell on the 1st, 2nd, 3rd, 4th, 5th, 6th, 7th, 8th, 9th, 10th, 11th, 12th, 13th, 14th, 15th, 16th, 17th, 18th, 19th, 20th, 21st, 22nd, 23rd, 24th, 25th, 26th, 27th, 28th, 29th, 30th, 31st. The average for the month was 1.11 inches.

• **FORWARD**

The following are the names of the persons who were present at the meeting held on the 1st day of May, 1944, at the residence of the subject, Mrs. J. H. Smith, 1234 Main Street, New York, New York.

Isabel Jones.

Mr. Tolson was one of the original sponsors of the National Lawyers Guild and was instrumental in securing the admission of the Guild to the American Bar Association and other professional bodies. He was also a member of the American Bar Association and the American Association of Lawyers and Judges.

MAINTENANCE. The two room apartment in the utility was finished this month. Beds were installed, curtains made and hung, wood work was painted and finishing touches to the plumbing were completed. After the heavy snow on the 15th a thorough check was made of leaks in the roofs of all buildings in the area. Leaks occurred almost impartially in the roofs we have treated and in those not treated. In all, sixty-one bad leaks were noted. Damage resulted in several museum cases soaked with water. The leaks in the museum were treated again; the others will leak and do more damage the next time it rains. Work was done on bridges that were about to fall into the river. Emergency cable was strung on the ground where the telephone line is down. Many man-days of work will be required to rebuild the overhead line. The trails in the vicinity of Headquarters have been cleared of down timber and the mess in the campground has been partially cleaned up.

Approach Road. Couldn't be very much worse and still be passable.

Visitors of Note. Mr. W. E. Reynolds, Chief of the Public Buildings Administration, Washington. Mr. Walter Myers, Fourth Assistant Post Master General. Dr. C. C. Young, Head of the Department of Anthropology, National Sun Yat Sen University, Canton, China. Countess Jullien de la Tour, Casa Blanca.

National Park Service Visitors. Mr. and Mrs. Willard Bradley, Santa Fe. The Picheys and Miss Alvina Zimmerman, Santa Fe. Mr. and Mrs. Louis Caywood, Santa Fe. Mrs. Margaret Cass, Santa Fe.

Interpretive Services. Thirty trips were made through the ruins with 298 people. Ten parties, or a total of twenty visitors were given orientation talks and six parties making a total of twenty persons were given museum lectures. The Los Alamos Ranch School boys spent two nights in the monument and were shown three reels of motion pictures accompanied by brief talks. Six hundred ten visitors were given some kind of service this month. Naturalist Caywood assisted with the handling of visitors two Sunday's while the Custodian and General Mechanic were at Big Bend.

Travel. Our total travel for the month was 718 people in 181 automobiles. Twenty-seven of the cars had been in the monument before. This figure is more than double that of last month and also of the same month a year ago. One visitor arrived on a motor cycle and six hiked in. The trend seems to be on the upgrade. Interest in the archeological story of the area seems to be running high.

THE HISTORY OF THE
REPUBLIC OF THE UNITED STATES
OF AMERICA

CHAPTER I. The two thousandth anniversary of the birth of the United States was celebrated in the month of July, 1976. The celebration was marked by a series of events and activities across the country. The most notable event was the bicentennial celebration in Washington, D.C., which included a large parade, fireworks, and a series of ceremonies. The celebration was also marked by the issuance of a special postage stamp and a commemorative coin. The bicentennial celebration was a time of national pride and unity, as Americans came together to celebrate the founding of their country.

NATIONAL PARK SERVICE

Forest Fire Protection.

Your office has been advised by memorandum of the complete failure of our communication system. We have been advised of ceilings for four Fire Guard Positions and four Per Diem Trail Workers. Edd Wendland will enter on duty May 1 to head the guard organization. Miss Ollie Wendland will again fill the Lookout position. Lewis McKinney, Jr. is to report May 15th as Junior Guard. We have promises of men to fill all positions during May and June. The heavy snows this spring have badly broken the telephone lines and blocked trails so we will have a big job getting squared off to handle a possible fire. So far, forest conditions are good, but seasonal high winds can quickly dry out the cover and cause a critical situation to develop.

MISCELLANEOUS.

We were very much surprised to learn from the letter quoted below that a tanker had been named for our area more than a year ago.

SSBANDELIER
20 April 1945

Bandelier National Monument
U. S. Government Reservation
New Mexico

Dear Sirs:

Our vessel, the SS BANDELIER, a tanker, has now been in commission nearly a year and we have hauled some five cargoes of gasoline and airplanes to the Southwest Pacific. She has seen some action, but so far has been very lucky.

There has been a great deal of curiosity on my part and among members of the crew as to the derivation of the name of our vessel and we wonder if you can give us some information as to who Bandelier was and what part he played in the history of New Mexico.

As soon as we can get one, it might be interesting to you to have a picture of the ship named after your monument and from time to time we will keep you advised of our activities.

Sincerely,

/s/ R. B. Grotemat,
R. B. Grotemat, Master.

Chester A. Thomas

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

----- NATIONAL MONUMENT
Canyon de Chelly

----- Chinle, Arizona

----- April 25, 1945

MEMORANDUM for the Regional Director, Region three.

There follows a report on the activities at Canyon de Chelly National Monument during the month of April, 1945.

General

The Custodian was away fourteen days of this period while attending the fire training meeting and Superintendents conference held at Big Bend National Park and in travel time. It was a fine meeting and well worth while. Much useful information was gained and the opportunity was presented to get better acquainted with the personnel of Region three. Appreciation is extended to all those who contributed so greatly to its success and to Superintendent Ross Maxwell for his cordial hospitality.

Weather

The early part of the period was very disagreeable with many high winds, and dust storms interspersed with snow flurries and showers. Maximum temperatures have ranged above those of last year and minimum temperatures have been lower. A minimum of 14 degrees was registered on April 4, and a Maximum of 81 degrees was recorded on April 21. There was a total of .62 inches of moisture. The water in both canyons has been higher than usual at this time of year.

Administration

Much time has been spent in taking care of the office work that has piled up during my absence, and in bringing the files up to date. Trips have been made in both canyons for inspection purposes.

Maintenance

Outside maintenance work has been carried on the latter part of the month. Nice weather has afforded an opportunity to make plaster repairs to the buildings, and generally straightening things up. A laborer has been hired, and were starting work on road and trail repair.

Visitors

With the return of fair weather we're beginning to see a few bona fide visitors. Twenty were registered this month. However, none of them wanted to swim over to White house, and were content to view it from the rim.

Meredith M. Guillet
Custodian

THE NATIONAL MONUMENT

91

There follows a report on the activities of Japan in South America
November 1941 to March of 1942.

The Commission was duly informed of this period while attending the five hundred and twenty-fifth conference held at the National Park and is under the impression that it was a time of great activity. Most of the information was given and the Commission was given a very good impression of the government of the United States. It is believed that the Commission was given a very good impression of the government of the United States and that the Commission was given a very good impression of the government of the United States.

The early part of the period was very disappointing with very little work done. The weather was very bad and the ground was very hard. The work was very slow and the results were very poor. The weather was very bad and the ground was very hard. The work was very slow and the results were very poor.

These three have spent in various ways of the million years that has passed up during the lifetime, and in bringing the lives up to date. They have been able to find answers to the questions of the past.

On the 15th of the month, the following was received from the
 Hon. Secy. of the Navy, Washington, D. C.:
 "The following is a list of the names of the
 officers and crew of the U. S. S. Albatross, who
 were on duty at the time of the capture of the
 ship, and who were taken prisoner by the
 Japanese." (Enclosure)

1000 The Bureau of the Census is planning to use a new survey
method. Twenty new personnel will be hired. Twenty more will be
in charge of the survey. The survey is now in the planning
stage. The Bureau is planning to use a new survey method.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
CAPULIN MOUNTAIN NATIONAL MONUMENT
CAPULIN, NEW MEXICO

CE OF THE CUSTODIAN

April 26, 1945,

There follows a report of the activities of Capulin Mountain National Monument for the Month of April 1945,

Estimated Visitors four hundred, bringing the total Visitors travel year to date, to two thousand nine hundred,

Road in the Monument have been kept in only fair condition during the month but have been passable at all times,

Weather has not been behaving as we would like and has been bad most of the month bringing down one and one half inches in precipitation in five rather small snow squalls. The fore part of the month was real cold for April striking a low of 2 below and a high of 60 above,

A small amount of road maintenance and boundry patrol is about all that has been done this month. Possibly some 10% of the visitors have been contacted by the Custodian with a few minutes to each visitor handing out descriptive pamphlets and short lectures,

Flora and Fauna,

A large crop of Pinon nuts is in the making provided they do not get cold and fall off, Anemones are a 1 out in full bloom, some of them as usual have to bloom right up thru the snow (But they do it).

One sly old Porcupine has out witted the Custodian this spring and has been doing considerable damage but I don't believe he can get by with this much longer, The law of averages will catch up with him if I don't,

Two beautiful large buck deer have been hiding in the monument during the winter together with about fifteen to twenty others, The lack of water is about the only reason why they do not stay in the inclosure all the time,

Temp for the month, High 60
Low 2 below
Precipitation $1\frac{1}{2}$ "
Twenty partly cloudy days
four total cloudy days

Very Respectfully,

Homer J. Farr,
Custodian,

UNITED STATES
DEPARTMENT OF THE INTERIOR

CASA GRANDE NATIONAL MONUMENT
COOLIDGE, ARIZONA

April 25, 1945

MEMORANDUM for the Regional Director,
Region Three.

The following is the narrative report of Casa Grande National Monument for April, 1945:

Visitors: This month has broken all records for visitors since gas rationing started and equals any since the war began. There were 982 Ruins visitors, compared with 712 in March of this year and 580 in April, 1944. The total number of visitors to the area was 1453, an increase over March's total of 1090 and April, 1944 which had 1047. This is an average of 48 people per day.

Included in these figures are 248 members of the Armed Forces. Paid admissions brought the April turn-in figures to \$203.45, the largest amount since March, 1942.

There were 639 Museum visitors. The picnic grounds were used by 166 persons including 44 who took that opportunity to visit the Ruins. A total of 179 followed the Desert Trail, of whom 145 were soldiers brought to Casa Grande in four trucks from the Prisoner of War Camp at Florence. These were taken through the Ruins in groups while the remainder were guided through the Museum and their officers led them over the Trail.

Interpretive Services: There were 982 Ruins Visitors taken through in 137 groups; a total of 5835 minutes or an average of 42.59 minutes per group. In the museum there were 639 people in 98 groups for a total of 2380 minutes, or 24.28 minutes per group. The biggest single day was April 4 when the 145 soldiers came and an additional 21 visitors, making 166 for the day's score.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
CASA GRANDE NATIONAL MONUMENT
COCHISE, ARIZONA

March 12, 1915

Memorandum for the National Monument,
Cochise, Arizona.

The following is the report of the survey of the monument made by the National Monument Survey Party, March 12, 1915.

General. This monument is situated on the eastern base of the San Rafael Mountains, about 10 miles north of the town of Casa Grande, Cochise County, Arizona. The monument is bounded on the north by the San Rafael Mountains, on the south by the San Rafael Mountains, on the east by the San Rafael Mountains, and on the west by the San Rafael Mountains. The monument is situated on the eastern base of the San Rafael Mountains, about 10 miles north of the town of Casa Grande, Cochise County, Arizona. The monument is bounded on the north by the San Rafael Mountains, on the south by the San Rafael Mountains, on the east by the San Rafael Mountains, and on the west by the San Rafael Mountains.

There are two main features of the monument. The first feature is the Casa Grande, a large, rectangular, adobe building, which is the only one of its kind in the United States. The second feature is the San Rafael Mountains, which are a range of mountains, about 10 miles long, and about 1,000 feet high. The Casa Grande is situated on the eastern base of the San Rafael Mountains, about 10 miles north of the town of Casa Grande, Cochise County, Arizona. The San Rafael Mountains are situated on the eastern base of the San Rafael Mountains, about 10 miles north of the town of Casa Grande, Cochise County, Arizona.

Historical. The Casa Grande was built by the Hohokam Indians, who lived in the area from about 1,000 to 1,500 years ago. The Casa Grande is a large, rectangular, adobe building, which is the only one of its kind in the United States. The Casa Grande is situated on the eastern base of the San Rafael Mountains, about 10 miles north of the town of Casa Grande, Cochise County, Arizona. The San Rafael Mountains are situated on the eastern base of the San Rafael Mountains, about 10 miles north of the town of Casa Grande, Cochise County, Arizona.

The next biggest day was March 25 with 134 visitors to the Ruin and 32 unattended. The relationship with the soldiers stationed at Florence is very satisfactory. Beside the large group, 47 of them spent their own free time at Casa Grande this month and we have been asked for photographs, slides or movies in connection with this and other monuments.

Weather: The weather this month has been very pleasant, although some of it has been surprisingly cold and other days were a forerunner of the summer to come. The high maximum was 99 on the 20th and 21st of April, the low maximum was 63 on April third. The high minimum was 58 Apr. 23 and the low was 25 Apr. 4. There were several days of wind and six days were cloudy or partly cloudy, producing .01 rainfall.

Maintenance: The regular maintenance has gone forward as well as possible when the Custodian was gone for 11 days. New signs have been put in place. The Shearwoods bought paint and put it on the floor of the sleeping porch in their quarters and weather stripping was bought and put around door and window frames in a vain endeavor to keep ~~down~~^{out} the bugs. Teddy Beehr has kept the grounds in their usual well-brushed state. Domestic house-cleaning has been conducted and the Administration building has had finger prints removed from doorways and walls.

Special Visitors: Aside from the 145 soldiers, the most interesting visitors were Senor B. Manderas of Lima, Peru and Senor Jose Ignacio Ruiz of Bogota, Columbia, members of the Instituto Geografico, accompanied by Mr. and Mrs. O.S. Risvold of the Department of Commerce on a good will tour. They were extremely interested in both the Ruins and the cactus

Another visitor was a woman who announced she did not need to go through the Ruin because she had been through Tumacacori and knew the same people had built both.

The next morning we went to the station to see the
arrangements. The arrangements with the railroad officials at
Washington. During the whole time, it was very busy and the
at the same time we had to wait for the train, which was
ready to start at 10:00 AM.

The morning was very pleasant, although it was
not very hot. The train was very comfortable and the
passengers were very friendly. The train was very
fast and the journey was very pleasant. The train was
very comfortable and the passengers were very friendly.
The train was very fast and the journey was very pleasant.

The morning was very pleasant, although it was
not very hot. The train was very comfortable and the
passengers were very friendly. The train was very
fast and the journey was very pleasant. The train was
very comfortable and the passengers were very friendly.

N.P.S. Visitors: On March 26 the William Wilsons came from Saguaro, bringing material with them and drove the Saguaro Chevrolet pickup back.

On April 16, after the Fire School at Big Bend National ~~Nature~~ Park, Superintendent Rose of Boulder Dam, Perry Converse, Don Jolly, George Baxter and Harold Ratcliffe all stopped off at Casa Grande.

Acquisitions: A copy of Flowering Plants and Ferns of Arizona by Kearney and Peebles, published by the Dep't of Agriculture was sent in for the Casa Grande library. A very welcome addition to our supplies though not an acquisition in the former sense, was 100 copies of "The Desert Trail," very much needed because of an increased public interest in the Trail.

Two complete years of the "Audubon Magazine" were received from Betty Jackson and forwarded to ^{Santa} ~~xxxxxx~~ Fe for the library there.

Nature Notes: It can be expected there will be very few birds since the Jacksons have gone away. Visitors walking or riding on the outlying parts of the Monument have reported at least a dozen snakes, mostly gopher snakes, with ground owls standing guard. No snakes have been seen in the immediate vicinity of the museum, ruin or residential areas. The Jacksons caught a three-foot rattler while on a picnic the other side of the river and brought it here with them. After observation, they took him back where he came from and released him. The lone barn owl still perches in the shelter, endangering the dispositions and costumes of visitors, if not their lives and limbs. On April 21, Teddy saw the first baby Say-phoebe of the season, taking a flying lesson in the south room of the Ruin. The hedgehog cacti are in bloom and other species are in full bud. The ocatillo is beginning to come out.

6.3.3. History - as shown in the title, history is the study of the past.

History is the study of the past, and it is a science.

It is a science because it is based on facts and evidence.

Personnel: On April 6 the Custodian left for Big Bend National Park to attend the Fire School there. He picked up Custodians Supernough, Leaubien and Cooke en route. He returned the evening of the 16th bringing Messers. Ratcliffe and Baxter with him.

During his absence the remaining personnel joined the world in grief for the death of President Roosevelt. The flag has been flown at half mast since then and the Monument was closed the Saturday afternoon of the funeral out of respect for his memory.

The Custodian was sent to Phoenix April 23rd to attend a meeting there.

George W. Shearwood went on duty April 8 and 15 to assist with the Sunday crowds in the absence of the Custodian.

The Earl Jacksons left April 21 for Las Vegas, Nevada where they plan to spend the summer.

Repair Shop Notes by F.E. Stonehocker:

Finish repair and ship battery charger to Chaco Canyon for use at El Morro or

Chaco Canyon for radio battery charging.

Clean, repair and paint 500 gal. oil storage tank for transfer to Chaco Canyon.

Construct from old 4-inch pipe, stand for oil tank.

Complete repairs started last month, light plant for Chaco Canyon.

Remove, inspect and have recapped four tires for USDI-I-13830 Region 3 car.

Complete repairs USDI-I-13859 for Walnut Canyon, also painted.

Made up three fireplace grilles, refinished Norge refrigerator for Montezuma Castle.

Overhauled master brake cylinders on USDI-I-13931 and I-13930 Casa Grande pick-up and Region 3 passenger car.

Overhaul Stewart Warner refrigerator in Teddy Baehr residence including a complete refinishing job.

One trip was made to Phoenix for welding gas and supplies.

One trip was made to Walnut Canyon to return USDI-I-13859 to Walnut, take grilles and refrigerator for Montezuma to Tuzigoot for Montezuma Castle, to be picked up by Mr. Hastings on his regular relief trip to Tuzigoot. USDI-I-13821 was returned from Walnut via Petrified Forest where two Superflex oil burning refrigerators were picked up for repair and transfer to Organ Pipe and Saguaro National Monuments. One has been cleaned and tested, the other has been cleaned, repaired and refinished and is now undergoing a test. These boxes will be ready for transfer this week.

USDI I-1232 which has been surveyed for junk has been cut up, for easy handling and is ready to be hauled to the salvage scrap pile in Coolidge.

UNITED STATES
DEPARTMENT OF THE INTERIOR
National Park Service
CHACO CANYON NATIONAL MONUMENT
Bloomfield, New Mexico

April 25, 1945

MEMORANDUM for the Regional Director,
Region Three.

There follows the report of activities in Chaco Canyon National Monument for April, 1945.

VISITORS. A total of 113 visitors were contacted at Chaco Canyon during this report period. Of this number, 22 formed 3 parties and were conducted thru Pueblo Bonito and were shown the museum exhibits. A total of 375 minutes were spent in field and museum contact time. One written request was received and 91 visitors desired information only. A total of 980 minutes were spent with them.

WEATHER. This report period has experienced some nasty wind storms. What few spring days came to Chaco Canyon were greatly appreciated. Severe dust storms, or rather, sand storms have been a constant plague to the men working here. The maximum of 75 degrees was reached on April 20. The minimum of 6 degrees occurred on April 5. Snow fell on March 27, April 3 and 24; rain fell on April 13 and 15. Precipitation amounted to 1.27 inches.

N.P.S. VISITORS. Engineer Bradley arrived on April 13 and left for Aztec on the 14. Assistant Naturalist Caywood arrived on April 19 and left for Aztec on the 23.

ACTIVITIES. This has certainly been a busy month at Chaco Canyon. Quarters were further improved by painting the front bedroom pale green and ivory. The floor was stained where new flooring had been laid two years ago. The bases of the fireplaces in both bedrooms were re-cemented. The dining room was thoroughly cleaned and received an ivory kalsomining job. The worst is yet to come--the living room! A cupboard was built for the service porch. Rock was laid in the back yard to hold down sand and also keep out mud. This extends from the back door to coal shed, light plant room and to clothes line. Completed fence on west side of quarters. Four trees were planted and it is hoped they will live.

NAME: _____

RECOMMENDATION FOR THE NATIONAL ACADEMY OF SCIENCES

There follows the report of activities in these various foreign branches.

[illegible]

100-443887-100

[illegible]

1. The first was a letter from the President of the United States, dated June 1, 1941, in which he announced that the United States had declared war on Germany.

(2)

Considerable time was spent in clearing out some of the store-rooms. A proposed sketch was submitted for the various functions of this store house. One room was cleaned and the encased shelves in the garage were moved there. Broken window panes were patched and replaced. All doors were nailed up and entrance may be had through two doors which have safety-hasps and locks installed. The windows in the open store-house were boarded up and an opening was made between two windows so that all equipment might be driven in and stored there. Lumber, empty bu-gas tanks, fuel oil and other material were also placed there for storage.

Headquarter area was given a clean up job. Rock paths and steps were laid to the visitor comfort stations. The museum was cleaned and office furniture was re-arranged. The coal stove was removed and all trash hauled away. Routine office work, reports and correspondence was done for both El Morro and Chaco Canyon National Monuments.

Three out-houses northwest of Pueblo Bonito were torn down and all evidence buried. Stock was driven from the canyon on several patrols. Rancher Crowley was hired to trim Boss's hoofs, and they look much better and he walks much easier.

A trip was made to Aztec to bring in the maintainer for welding repairs. Checked at Aztec Ruins for number of rails available for proposed cattle-guard above Wijiji Wash.

A trip was made to Pueblo Alto Trading Post to collect consessioner's fee. Checked boundary fence at Pueblo Pintado and found several bad breaks. No damage had apparently been done to the ruin.

Minor repairs were made on the S&M stake truck, S&M pickup and the Chaco pickup.

Radio contact was established with El Morro on March 26,28,30, April 3, 7,8,9,20 and 24. On April 9, the aerial was blown down by very strong winds and one pole snapped in half. They were repaired and all wires soldered. Radio tubes were checked in Gallup and found satisfactory.

With a month of steady wind, all the good work the state highway men expended upon the sand pile north of Escavada, has gone to pot. The drifting sands have completely covered the road they built up four feet higher than

(3)

befors. It now measures 150 feet wide and with 3 feet of loose sand, one and all take their chances of getting across. One man and small boy walked in the four miles for help. Todate five cars have been shoveled thru, and of course, these dark nights are the only proper time for this.

All signs between Thoreau and Chaco Canyon were checked for repainting and repairing. Many signs need to be replaced and directional arrows corrected.

EL MORRO INSPECTION. A trip was made to El Morro National Monument on April 10 and 11. Materials were brought in so that Labor-Caretaker Worthen might finish the cabin project. The area was inspected and was in fine shape. Photographs were taken of the new inscriptions and were submitted to headquarters. Was unable to deliver the wind charger as it had not yet reached Thoreau, New Mexico.

SOIL & MOISTURE CONSERVATION PROGRAM. Work was begun March 26 on the soil and moisture program. A five-man crew was desired, but only three men could be found: Roy Newton, Joe Cly and Dan Clyde. All S&M equipment and material was sorted and straightened out; this was stored in the open store-house.

In order to help keep out stock, several fences were built across the Chaco Wash: one above and one below Wijiji ruin; one above Hungo Pavi ruin; one below the old CCC Camp pump house and one on the west boundary, north of Penasco Blanco.

Willows were planted that had been cut last year and buried in Chaco Wash. It was necessary to send the crew to Farmington to obtain more for this year's planting. The crew returned with 5,000 willows and todote about 10,000 have been planted. Four living "spiders" have been constructed in the Wash.

Engineer Bradley arrived at Chaco Canyon on April 13 and various problems were discussed.

Due to the needs of a stabilization crew, Roy and Joe were transferred. Three more men were found and hired. The S&M crew now consists of Dan Clyde, John Wero and Davey Newton.

... It was ... with ... of ... and ... all ... of ... in the ... of ... the ...

... of ... and ...

... and ...

... of ...

... of ...

... with ...

... of ...

(4)

STABILIZATION PROGRAM. Assistant Naturalist Caywood arrived April 19 to begin work on stabilization needs of Pueblo Bonito. The walls of Bonito need many minor repairs and if possible, the great Sanctuary at Chetro Ketl will also receive much needed repair work.

Pueblo Pintado was inspected during Caywood's visit and photographs taken of the ruin. On the same trip, we went to Pueblo Alto Trading Post to inquire about hiring Navajos in that area. Word was sent around, but todate none have reported for work.

Wijiji, Chetro Ketl, Casa Rinconada, Pensaco Blanco and Pueblo del Arroyo were all inspected. The majority of time was spent at Pueblo Bonito in out-lining the necessary work to be done.

Work began on April 23 with the crew of three - Roy Newton, Joe Cly and Loue Newton. Roy and Joe were transferred to this work as they have had so much of this type of stone work when the mobile unit was operating here with Gordon Vivian at the helm.

Due to the severe sand storms and finally a snow, work has consisted of hauling gravel and sand; cleaning weeds and dirt from all drains. Once the weather has cleared, the work will progress much faster.

Louis found it much easier to get into Chaco than out of - that sand is something, isn't it Louis?

NAVAJO LIFE. Letter reading and writing continues to be very interesting to us.

Thought Roy's explanation of snow very satisfactory: "Wind blow hard all day from west, blow up ocean, it freeze and come down".

Ted C. Sowers.

Ted C. Sowers,
Acting Custodian.

It is a very common mistake to suppose that the only way to get the best results is to use the most powerful machinery. In fact, the most powerful machinery is often the least effective, because it is the most expensive and the most difficult to use. The best results are often obtained by using the simplest and the most economical machinery.

The first step in the process is to determine the nature of the problem. This is often the most difficult step, because it requires a thorough understanding of the problem and its causes. Once the nature of the problem is determined, the next step is to choose the most appropriate machinery for the job.

The third step is to set up the machinery. This is often the most time-consuming step, because it requires a lot of preparation and a lot of attention to detail. Once the machinery is set up, the next step is to run the process.

The fourth step is to check the results. This is often the most important step, because it allows you to see if the process is working as well as it should. If the results are not what you want, you may need to make some adjustments to the process.

The fifth step is to clean up the machinery. This is often the most overlooked step, but it is very important. If the machinery is not cleaned up properly, it can cause a lot of problems in the future.

The sixth step is to store the machinery. This is often the most difficult step, because it requires a lot of space and a lot of care. If the machinery is not stored properly, it can be damaged or lost.

The seventh step is to dispose of the machinery. This is often the most difficult step, because it requires a lot of money and a lot of effort. If the machinery is not disposed of properly, it can be a big problem.

The eighth step is to evaluate the process. This is often the most important step, because it allows you to see if the process is working as well as it should. If the results are not what you want, you may need to make some adjustments to the process.

EL MORRO NATIONAL MONUMENT
Ramah, New Mexico

April 25, 1945

MEMORANDUM for the Regional Director,
Region Three.

There follows the report of activities in El Morro National Monument for the month April, 1945.

VISITORS. Forty-two visitors forming fourteen parties were conducted around Inscription Rock during this report period, by Mr. Worthen.

ACTIVITIES. Radio contact was made with Chaco Canyon National Monument on March 26, 28, 30, April 3, 7, 8, 9, 20, and 24. No contact was possible between April 10 and 19 due to the aerial at Chaco Canyon being down, because of severe winds.

Care-taker Worthen has been busy helping Forest Service haul poles for the telephone line. He has also spent considerable time in painting the kitchen. Repaired and repainted one sign, "service road".

One trip was made to Grants in an attempt to have the brakes repaired on the El Morro pickup. Being one-half hour late due to muddy roads and having to use the emergency brake, the garage man denied him service.

An inspection trip was made by Acting Custodian Sowers on April 10 and 11. Material was brought down so that Mr. Worthen could continue on the cabin project. The necessary material consisted of: 1 coal stove, with water jacket, 1 kerosene stove, 71 feet of 1x10" lumber, 4 four inch tile, 1 Tee tile joint, 1 window pane, 6 gallons of paint, 2 gallons of paint thinner, $\frac{1}{2}$ gallon of penetrating floor oil, 12 sheets sand paper, 1 straw broom, and 1 package of map folders.

Mr. Worthen had the area in orderly shape, and I was pleased with what he had accomplished.

Ted C. Sowers.

Ted C. Sowers,
Acting Custodian.

Great Sand Dunes National Monument
Hooper, Colorado

April 23, 1945

MEMORANDUM for the Regional Director
Region III

There follows the report of activities at the Great Sand Dunes National Monument for April, 1945:

Travel. The Army units that are making periodic bivouacs have swollen the April total to 547 registered visitors, and as near as I can learn one convoy did not register. The average convoy has consisted of 30-40 men and 15-20 vehicles. I still find the same reluctance of civilian visitors to register unless they are stopped and asked to do so. There have been a number of parties into the Dunes that have not registered this month.

Maintenance. After experimenting with the oil stove on the ground floor it was moved to the basement by taking it apart and reassembling it in the basement. I believe it will give better service there.

The plumbing has been checked, tanks cleaned and drains replaced and the water brought back in the station.

Observation. There are more jack rabbits on the Monument this spring than there has been in the past two years. This may be due to the Government trapping of coyotes on adjacent territory.

Roads. The approach road to the Dunes is getting very rough due to the heavy Army trucks and the soft surface; as a result of the recent rains and the snow storms. The county has agreed to do some maintenance work.

Ranger Service. Several careful patrols have been made the past month and two things have been noted: The Army trucks have cut the shoulders of the road in many places as they drive on and off the road; and a large number of fishermen have been going in on the Medano. The fishermen report fair catches.

Great Sand Lake National Monument
Pacifica, Nevada

April 25, 1933

MEMORANDUM for the Regional Director
Region III

There follows the report of activities at the Great Sand Lake
National Monument for April, 1933:

Travel. The only visitor that was waiting for the electric line was
seen on April 25th to 347 registered visitors, and as far as
I can learn the canyon did not register. The average of the day was
estimated at 20-30 and 11-15 registered. I will give the same
estimate of visitors to the monument as registered visitors and the average
was about 20-30. There have been a number of visitors since the
time that have not registered this month.

Lighting. After experimenting with the oil stove on the
ground floor it was moved to the basement by taking it apart and
reassembling it in the basement. I believe it will give better
service there.

The lighting has been checked, and cleaned and the light replaced
and the water brought back in the station.

Observation. There are now 1000 visitors in the monument and
spring water has been in the past two weeks. This may be due
to the very recent dropping of clouds or adjacent mountains.

Floods. The approach road to the lake is better very much
due to the heavy rain and the soil surface; as a result of
the recent rain and the snow storm. The country has been so dry
some water is now.

Game Service. Several caribou have been seen in the past
month and two have been noted. The only tracks were in the
shoulders of the road in many places as they drive on and off the road;
and a large number of light brown have been seen in the woods. The
fishermen report fair catches.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
SOUTHWESTERN NATIONAL MONUMENTS

COOLIDGE, ARIZONA
XXXXXXXXXXXXXXXXXXXXXXXXXXXXX
Montezuma Castle National Monument
Camp Verde, Arizona

April 23, 1945.

MEMORANDUM for the Regional Director, Region Three.

There follows the monthly report of activities at Montezuma Castle National Monument for April, 1945.

Visitors this month, 437; travel year to date, 1408.

General We were shocked and saddened to learn of the death of Franklin D. Roosevelt. Our flag was lowered to half mast and will be flown there for a month. The monument was closed all afternoon April 14 according to telegraphic instructions.

Enthusiasm in the Verde Valley is high over the proposed new road to Phoenix. On March 28 Governor Osborn addressed a meeting of valley residents pointing out the possibilities of the proposed road. A crew is now at work on a preliminary survey.

Weather In general the month has been cold and dry. The spring crop of wild flowers is notably lacking with no primroses or sage lilies to be seen. Snow fell on nearby mountains on several occasions but only .60 of an inch of moisture was registered at the monument. The maximum temperature was 93° and the minimum was 16°. The mean maximum was 71.41° and the mean minimum was 33.51°.

Administration Custodian Bright was relieved at Tuzigoot on March 27 and April 3, 10, and 17.

Electric cable surplus to this monument was shipped to Arches National Monument.

Custodian Hastings was on annual leave from March 29 to 3:00 P.M. April 1 and again on April 19.

No. 1

Maintenance All the canals at Residence/were waterproofed.

The walls, ceilings, and windows in our rest-rooms were cleaned.

A coat of raw linseed oil was given to the Castle ladders.

Fox-tail and other weeds along our nature trail were hoed but we plan to widen the trail and cut others for fire barriers.

DEPARTMENT OF THE INTERIOR

The drinking fountain near the register stand was replaced and turned on for the summer. A hose bib was added to be used in case of fire.

Painting and repairing our signs is progressing. Repainting each letter proves to be a slow job.

Use of Monument Facilities by The Public There were 437 visitors this month which is an increase of 13 per cent over the same month last year. They came in 109 cars with 84 cars from Arizona. Visitors came from 21 states, Washington, D. C., England and France. Guide tickets sold, 129; tax but no tickets, 29; children admitted free, 27. Thirty members of the armed forces visited the area, 27 of whom went through the ruins. Total revenue collected, \$40.16.

Guide Service Total contact time, 81.00 hours; Hastings, 28.50; Leding, 52.50. Fifty-three parties were conducted through the Castle for 212 visitors; there were 84 museum groups for 408 visitors. Four people received information only. There were 12 picnic parties including 54 people.

Accessions Several pamphlets were donated to the library by Earl Jackson. A copy of "Flowering Plants and Ferns of Arizona" was received.

National Park Service Visitors Earl Jackson and family. Ranger Shellbach from Grand Canyon and Superintendent Thomas E. Boles from Carlsbad Caverns.

Newsworthy Visitors Dr. and Mrs. Harold S. Colton and Miss Katherine Bartlett.

Visitor Reaction To The Interpretive Program In 1940 Earl Jackson set up a card file for Montezuma Castle and used a separate card for each room. On the card he consolidated all published information about the room and added his own observations. As Earl's successor I have found these cards extremely useful in checking my own information about the Castle and in breaking in new men. Whenever any point of information is challenged, our first reference is to the Fact File.

Projects For Ensuing Month We plan the following: 1. Continue project to repair and repaint our signs. 2. Clean the mile of gutter paralleling our entrance road. 3. Hoe weeds from the Lower Ruin.

Homer F. Hastings

Homer F. Hastings,
Custodian.

Organ Pipe Cactus NATIONAL MONUMENT

Ajo, Arizona

April 25, 1945

MEMORANDUM for the Regional Director,
Region Three.

There follows a report of activities in Organ Pipe Cactus National Monument for the month of April, 1945.

WEATHER:

April has been an exceptionally dry month with only .02 inch of rainfall and with temperatures exceptionally high for this time of year. The maximum was 96 degrees on the 19th and 20th and the minimum fell to 31 on the 10th.

TRAVEL:

April travel reached 6902 persons, the travel year reaching a total of 35878 persons. Boy scout parties and other visitors brought our camper count to 40 this month.

Armed Forces use will pick up from now on as we have worked out a plan with the U. S. O. for conducted parties every two weeks. The first party was taken for a hiking trip up Alamo Canyon on Easter Sunday, 41 persons attending. The second party was an auto caravan through the best cactus areas with 55 persons. These trips are proving very popular with the soldiers here and the attendance seems to be limited only by the transportation available.

GENERAL:

April 6 to 17 was spent enroute and attending the Regional Fire Training Meeting at Big Bend National Park.

S & M work was completed and the men terminated on March 31. A very small amount is left in this fund but will be mostly used by the time gasoline is purchased to replace what was used from the monument for this work. Notice of allotment of four positions was received too late to make use of this small amount during April.

Our water pump motor finally accomplished its threatened fall-apart so a rush trip had to be made to Coolidge to borrow a motor until we can make some other arrangements. This motor was installed and we again have a tank full of water.

Regional Forester Ratcliff arrived on April 25 and grazing studies are now being carried on.

Saguaro NATIONAL MONUMENT

Tucson, Arizona

April 26 1945.

MEMORANDUM for the Regional Director, Region Three.

There follows a report of activities in Saguaro National Monument for the month of April, 1945:

WEATHER. Old timers about say this is an exceptionally cold and late spring.

INSPECTIONS. Regional Forester Ratcliff spent two days with me on ordinary forestry problems. Some time was also spent with Drs. Mielke, Cullinan, Hutchins and Wagener, all of the Pathology Division, U.S. Forest Service. They were concerned with control measures for the bacterial disease of the Saguaro cacti.

NEW CONSTRUCTION. Only 16 man-days were spent on the water system, barn and cabin at Pack Base. Telephone service between Pack Base and Headquarters was established.

MISCELLANEOUS ACTIVITIES. The mules and horses are up from pasture. Mr. Wilson has them shod and the mules roached. He is now busily engaged in overhauling the pack outfit.

Mr. Wilson was in charge while I was away. During that time most of the telephone line from Pack Base to Manning Camp was overhauled. Also, the ground line from the old Rincon Station to Pack Base was converted to a metallic line.

MAINTENANCE. About seven man-days were spent on the Mesquital Trail.

SPECIAL ACTIVITIES. Ten and one half days were spent in travelling to, attending and returning from the Fire Training Meeting at Big Bend National Park. One day was spent leafing about bombs from the army.

SUNSET CRATER NATIONAL MONUMENT

Flagstaff, Arizona

April 25, 1945

MEMORANDUM for the Regional Director, Region Three.

There follows a brief report of the activities at Sunset Crater National Monument for the month of April, 1945:

Visitors this month: 81; travel year to date: 359.

It is felt that, because of the greater proportion of truly interested visitors to this area, the formerly used method of arriving at an estimate of visitor use by doubling the actual registrations should be discontinued. In the visitor report for this month, only the total actual registrations were used. This is no doubt considerably lower than the actual visitor use; but it is probably a closer estimate than the other method would allow at this time.

The bad mud-hole stretch of the entrance road from highway 89 has been cinder-filled through the courtesy of the local farmers and the County, and is now in better shape than it has been in several years.

Those sections of the Sunset Crater-Wupatki road that traverse cinder areas have been fairly badly drifted over, so that travel by the uninitiated is rather more treacherous than common. Recent use by visitors has been largely without mishap, however. Some road filling was accomplished on the return trip from Flag to Wupatki on the 24th.

COOLIDGE, ARIZONA

April 25, 1945.

Memorandum for the Regional Director,
Region Three.

There follows the report of activities in Tonto National Monument, for
April, 1945.

Visitor statistics: Cars, 123.

Instate, 56.

Outstate, 67.

Information, 37.

Armed Forces, 40.

States represented, 25.

Visitors, 449.

Ruins trips, lower, 78: people, 281.

Ruins trips, upper, 2: people, 8.

Museum groups, 108: people, 409.

Personnel time, Custodian, 97.6 hrs.

Again this month our visitor count has gone up. One woman marveled that so many people got up here and said she didn't know how they got the gas. Park Service visitors were Dr. Bryant, Louis Gastelum and H.L. Bill of Grand Canyon, who paid a brief visit the morning of April 17, Thomas Bowles, of Carlsbad Caverns National Park and Louis Schellback of Grand Canyon called for a few minutes, the evening of April 23. Another interesting visitor was Mr. O. Roach, commercial photographer from Denver, who took a number of pictures. Mrs. Roach was with him and showed us a large number of beautiful pictures while Mr. Roach was up on the trail.

Weather: a very cold and windy month. Rain fell on March 24, 27 and on April 10 and 23.

There was a hard freeze the nights of March 25, 27, 28, 29 and April 3 and 4.

General: Routine work took up the greater part of the time and that includes an increasing amount of time spent with visitors.

Two trips were made to Globe for bu-gas, gasoline and fuel for the lanterns.

Two days were spent cleaning in the Museum. An attempt was made to scrape down the walls but found they would not stand that sort of treatment.

We were ill with the Flu for a while and some other planned work had to be postponed, however there is always next month and always more work to go with it.

Tumacacori NATIONAL MONUMENT

Nogales, Arizona

April 26, 19 45

MEMORANDUM for the Regional Director,
Region III.

There follows a report of activities at Tumacacori National Monument for April 1945.

WEATHER: On the night of April 3rd., the thermometer dropped to 13 degrees above zero. All fruit in the upper Santa Cruz Valley was killed as were young leaves on several kinds of trees and shrubs. At Tumacacori the fig trees lost all of their leaves and the pomegranate bushes were greatly damaged. Leaves of the oleander were frosted and some are now off color but the plants were not greatly damaged. Some crops on nearby ranches were damaged while others were ruined.

TRAVEL INCREASE: A total of 338 cars brought 1042 visitors to Tumacacori this report period. Of this number 842 visited the mission and museum. 200 visitors who did not visit the mission and museum drove into the parking area and made use of the monument facilities. The increase in visitors this month is slightly over 80% above the figures for the same period last year.

INTERPRETIVE SERVICE: A total of 8300 minutes (138 hours and 20 Min.) were spent in contacting and conducting visitors through the mission and museum. A total of 164 trips for 842 visitors were made through the mission and 163 trips for 842 visitors through the museum. Ranger Brewer spent 2,570 minutes on 84 ruins trips and 1970 minutes on 84 museum trips. Acting Custodian Reed spent 2,030 minutes on 80 ruins trips and 1,730 minutes on 79 museum trips.

VISITORS: Two school groups from the Tubac School visited the monument during the month. On April 11, sixteen students from the 6th., 7th. and eighth grades and their teachers spent several hours at the monument studying and making notes in the mission and museum. On April 18, twenty students and teachers of the 3rd., 4th. and 5th. grades visited the monument. The children made drawings of the cactus plants in the patio and other objects of interest. Many of the students expressed themselves as being very much pleased with their visit which was both entertaining and educational.

SPECIAL ACTIVITIES: Perhaps the most outstanding activity of this season was the filming on April 5th. of three scenes for the motion picture "Duel in the Sun" by Vanguard Films Inc. (Davis O Selznik). The company arrived at 8:30 a.m. and left the monument at 1:00 p.m. Despite the fact that it was necessary to bring several trucks into the monument and approximately 100 persons milled around over the

NATIONAL MONUMENT

These findings are a report of activities at the National Monument for April 1946.

On the night of April 10th, the telephone dropped to 11. The line was in the night house. The line was killed as were some houses on several miles of line and service. At the same time the line was lost all of their houses and the house-graduate houses were severely damaged. Lines of the telephone were treated and some are all right but the line was not properly damaged. Some of the houses were damaged and the line was not properly treated.

area for several hours, no damage whatever resulted from their activity. Of course several tiremarks and thousands of footprints showed in the loose soil but these are practically obliterated now and it is all but impossible to tell that the area has received any but normal usage. The director and his associates proved to be very co-operative in protecting Government property. The cleanup after their departure was a very small item and required only a few minutes.

MAINTENANCE: Again this month weed pulling and cutting has been the major item of maintenance. It has been a hard fight but the present "crop" has passed it's peak and control will be less difficult until the summer rains arrive. By that time it is hoped that we will be in possession of some of the weed killer which is reported to have worked satisfactory in other monuments. Old weeds were raked and burned thus making the yard on the north side of the building presentable. The patio has been seeded and watered and despite the freeze it is beautiful. The fish pond was thoroughly cleaned and the interior painted. Many minor maintenance jobs too numerous to mention were taken care of during the month.

PROJECTS FOR NEXT MONTH: Kemtone has been purchased for redecorating the office and lobby which is the first job on the list for May. Other projects will be discussed with Assistant Regional Director Richey when he visits Tumacacori on Mar. 30.

PHOTOGRAPHY: Printing of negatives sent down by Associate Naturalist Dodge has progressed slowly. It is hoped that I will find time to complete these in the next few days. Material for making copy negatives for the Regional files has not been received.

area for several hours, as they have never returned from their activity. Of course several thousands of footprints showed in the loose soil but these are practically obliterated now and it is all but impossible to tell that the area has received any but normal usage. The dirtiest and the dirtiest proved to be very co-operative in protecting Government property. The cleanup after their departure was a very small item and required only a few minutes.

MAINTENANCE: Again this month we had a hard fight but the major item of maintenance. It has been a hard fight but the present "crop" has passed its peak and control will be less difficult until the summer rains arrive. By that time it is hoped that we will be in possession of some of the wood which is reported to have worked satisfactory in our experiments. Old results were taken and during the year to the north side of the building. The patio has been sealed and watered and despite the freeze it is beautiful. The plan was thoroughly cleaned and the interior painted. Many minor maintenance jobs too numerous to mention were taken care of during the month.

PROJECTS FOR NEXT MONTH: Remington has been purchased for redecorating the office and lobby which is the first job on the list for May. Other projects will be discussed with Assistant Regional Director Mayhew when he visits Washington on May 30.

PHOTOGRAPHY: Printing of negatives sent down by Associate Naturalist Dodge has progressed slowly. It is hoped that I will find time to complete these in the next few days. Material for making copy negative for the Regional files has not been received.

MEMORANDUM for the Regional Director
Region Three

There follows the report of activities in Walnut Canyon National Monument for April, 1945.

Visitors this month 480; travel year to date 1,467.

GENERAL: At last we have had a few days of spring weather, and with it a great increase in visitor travel. Sundays seem to bring the greatest number of visitors, most of them being local people or newcomers working at the Ordnance Depot.

Attended Fire Training Meeting at Big Bend National Park during the month. Enjoyed the visit to this new Park, and also to Carlsbad Caverns National Park. Rode from Coolidge to Walnut Canyon on the return trip with Gene Stonehocker in the Walnut pickup which he recently overhauled.

Chas. A. Richey visited this Monument on April 24, enroute to Southern Arizona.

VISITOR STATISTICS: Approximately 480 visitors arrived during the month. Two of these came on horseback. 68 Service men in uniform were among those to visit the area.

N.P.S. VISITORS: Chas. A. Richey, Assistant Regional Director. Louis R. Caywood, Region Three Office. Gene Stonehocker, Casa Grande National Monument. Custodian Van Cleave, Wupatki National Monument.

NOTEWORTHY VISITORS: Mr. and Mrs. H. N. Geiger, Southwest Museum, Los Angeles, Calif.

MAINTENANCE, IMPROVEMENTS AND NEW CONSTRUCTION: Spent two days moving around and cleaning in shop so as to clear out a space to use for a radio room.

Turned on water to fountains and rest rooms at Headquarters Area.
Made general cleanup of grounds.
Set out shrubbery and plants.
Cleaned windows in office and lobby.
Repaired telephone line.

PROJECTS FOR ENSUING MONTH: Get fire equipment ready for use.
Hope to get new radio installed.

George W. Baxter

MEMORANDUM for the Regional Director, Region Three:

TRAVEL MONTH, APRIL 1945	TRAVEL YEAR TO DATE
Visitors 3525	Visitors 16392
Cars 753	Cars 3880
<hr/>	
ARMED FORCES USE	
Visitors 1346	Visitors 7850

April blew in and is blowing out like a lion but has shown increases in all our travel figures. A substantial increase was also noticed in the road maintenance required. Heavy winds prevailed virtually the entire month. We have been able however, with equipment loaned from the Army, to keep our road open at all times.

High for the month was 86 On the 20th and a low of 10 was recorded the 31st.

Rumors upon rumors have been afloat regarding Army Use of lands covering almost the southern portion of the Tularosa Basin. Attempts have been and are being made to check on all reports concerning our immediate vicinity and a conference was held with Associate Regional Director Scoyen and Assistant Regional Director Richey, on some points. I still hear a great deal and am able to learn very little. All attempts will be made to keep your office fully advised.

Ranger Steel has returned and the entire family seems glad to be back. We are equally pleased to have them back and Paul will have no trouble in finding something to do.

The concession has had a very good month with several days being exceptional.

Several days were spent in cleaning up our clear lists and getting out some land data that were delayed hoping to have Ben Thompson go over the ground with me.

Our big day of the month was Easter Sunday when we had 1137 visitors. It almost seemed like pre war days for awhile.

It happened: the morning of the 11th was the scheduled 15th anniversary of the late John Andrew Pearson's. Official duties were used in the emergency to be services of a native son-wife. The need for the wild was followed by Delge as the 11th, when he was here making a routine check on the local. He fell under his supervision as District Commissioner of the 11th (1911) of the State Government (District Town).

an inventory of 14,481 of about 50 birds have been recovered from the site of submerged forest during the past month.

and Boyle, Ward and Paul all got their heads from Wings. The other recovered and possibly released.

Further contact was made with Mr. Fisher at Flagstaff on the evening of 1. When investigation was the only topic of discussion. Plans relating to the fire were discussed with Mr. Fisher and assistant Mayor of Flag.

For the coming month, since conditions to be carried on at Kanihwa Lodge, which must still retain a payroll of about eight to enable daily use of a few. Recruitment has already started.

~~10/10/50~~ A Forest Fire at about 10:30 a.m. was reported by class members on the 10th. The size of the fire and the windy character of the day made it be so that the fire could not be made with the Forest Service in place.

26.

Everything seems in this shape and we hope to get out
and ready for the summer in October that we expect leaving
the summer months. I have several places are looking for my
which were at the winter months ago. The spring season for
this week one of about eight people and number of about four
to five hundred. That was very little.

Words of course will be our major problem as well as
we have the heavy rain. We have hope of this looking up
soon.

We have a large number of the regular season
seasoned people, several hundred people and several
thousand in that season. They are looking for the
which are sent out to look for the land.

-----WUPATKI----- NATIONAL MONUMENT

-----Flagstaff, Arizona-----

April 25, ----- 1945

MEMORANDUM for the Regional Director, Region Three.

There follows a summary of the activities at Wupatki National Monument for the month of April, 1945:

Visitors this month: 69; travel year to date: 176. More than half of the visitors to the area have come in to Wupatki Ruin. This is largely due to the greater proportion of cars using the Sunset Crater connecting road.

Weather Conditions: The month has seen summer come and go and come again. The first few days of the month were extremely windy. Light snow showers occurred on the 10th, 13th, and 14th. Maximum temperatures are now running into the upper seventies and lower eighties.

Inspections: A search for additional section corners was made on Easter Sunday in the Antelope Prairie section of the monument. An inspection on foot of the south section of the monument was made on the 13th to ascertain range conditions under use by trespassing cattle from Heiser.

Indian Aid Extended: The morning of the 7th saw the custodian in attendance at the birth of one John Jackson Peshlacai. Official pickup was used in the emergency to obtain the services of a native mid-wife. The name for the child was bestowed by Mr. Tom Dodge on the 12th, when he was here making a routine check on the local Navajo who fall under his supervision as District Supervisor of the Tuba City district of the Navajo Reservation (District Three).

Collection Accessions: A total of about 95 beads have been recovered from the site of an old pot-hunted burial during the past month.

Operational Routine: Supplies of fuel oil and gas were hauled from Flagstaff; the wind-charger received and partially assembled.

Official Visitors: Contact was made with Mr. Richey in Flagstaff on the evening of the 23rd. Ruins stabilization was the main topic of discussion. Plans relating to the coming fire season were discussed with Mr. Richey and custodian Baxter of Walnut.

Projects for the coming month: Ruins stabilization to be carried on at Wupatki Ruin. Use of Navajo labor will entail a payroll of about eight to enable daily use of a four man crew. Recruitment has already started.

Fire Suppression: A forest fire of about forty acres was reported by Clyde Peshlacai at noon on the 8th. The size of the fire and the windy character of the day made it impossible to attack the fire until contact was made with the Forest Service in Flag.

UNITED STATES

DEPARTMENT OF THE INTERIOR

The fire was on Coconino National Forest in an area currently being logged by the Saginaw. Actual specific cause of the fire was not determined, though it was definitely a "man-caused" fire. Two Indian laborers were furnished to the Forest Service payroll for fire fighting.

Indian Notes: The local Navajo are going to have a Squaw Dance at Black Falls sometime during the second week in May and the preparatory phase of activities has already involved considerable of the custodian's time.

Burros: Burros in trespass on the Citadel and Antelope Mesa portions of the monument were rounded up on the 11th, and put into the Arrowhead Tank section of the Forest.

Death of the President: The news of the death of President Roosevelt was taken in a sense of disbelief by the local Navajo. A total of eleven individuals came up here for confirmation of the news and any details, within a week following his death.

(Sgd.) Philip F. Van Cleave

Philip F. Van Cleave,
Custodian.

REGION THREE
SANTA FE, NEW MEXICO

May 7, 1945.

MEMORANDUM for the Regional Director, Region Three.

There follows the Interpretive Staff Monthly Narrative report for Southwestern National Monuments and Region Three Headquarters for April 1945.

STAFF ACTIVITIES - GENERAL. Naturalist Dodge spent from the first to the seventeenth of the month in the office carrying out the routine duties of interpretive administration. These consisted of keeping the photograph files up-to-date, shelving of catalogued publications, and preparation of ninety mimeographed copies of the leaflet, "Desert Trail" for use at Casa Grande. Southwestern Monuments Association affairs were kept current.

On April 18, Naturalist Dodge left on an extended field trip to be gone more than a month.

Naturalist Gaywood continued work on preparation of emergency ruins stabilization details and other routine matters. He spent April 8 and 15 at Bandelier helping handle visitors while Custodian Thomas was attending fire school at Big Bend.

From April 19 to 27, Naturalist Gaywood was in the field supervising the starting of ruins stabilization projects at Chaco Canyon, Aztec Ruins, and Napatki National Monuments. Walnut Canyon was also visited on this itinerary to inspect the administration and museum building.

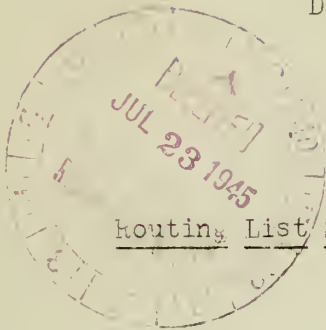

PLANNING. Several conferences were held with Superintendent Rose over the proposed regional workshop and on regional naturalist needs which Superintendent Rose planned to present to the Superintendents' Conference at Big Bend.

PUBLIC RELATIONS AND LITERARY SERVICES. One motion picture film and six kodachrome slides were sent to Captain Westfall of the Prisoner of War Camp near Florence, Arizona. The slides were of poisonous creatures of the desert and the film was on the National Monuments of Arizona. Naturalist Dodge gave talks on April 4 before the Altruza Club of Santa Fe and on April 13 before the Santa Fe Boy Scouts Court of Honor.

REGION THREE
SANTA FE, NEW MEXICO

June 9, 1945.

MEMORANDUM for the Acting Regional Director, Region Three.

There follows the Interpretive Staff Monthly Narrative Report for Southwestern National Monuments and Region Three Headquarters for May 1945:

Staff Activities - General

Naturalist Dodge was in the field through May 18 assisting in the solution of interpretive problems and determining postwar interpretive development needs. Since returning to the office on May 19 he has been fully occupied with office routine, sending out supplies and information requested by field men, and in preparation for his summer assignment to the Director's Office. Photographs taken in April on the Big Bend project have been coded for filing, and prints have been sent to the Director.

Naturalist Caywood spent the month in the office handling routine matters and completing final preparations for emergency ruins stabilization projects. With funds released from the budget reserve, these projects were started at areas having personnel trained in stabilization techniques. Mr. Caywood left May 31 to carry on emergency stabilization work in the field throughout the entire month of June. Mr. Caywood made one trip to Gran Quivira National Monument to familiarize Ranger John Weidman with the area and developments.

Interpretive Administration

Maintenance of office routine and arranging details of emergency ruins stabilization projects were the major activities. Interpretive difficulties in the field, in general, stem from the fact that reduced personnel is fully occupied with the details of maintenance and has inadequate time for even basic interpretive activities. This situation must not be permitted to carry over into the postwar period. It is gratifying to interpretive personnel to learn that proposals to establish a regional naturalist position and to set up a regional workshop for the maintenance and repair of interpretive devices were recommended by the Region Three superintendents at their meeting at Big Bend. Reallocation of one of the guide positions at Carlsbad Caverns to that of junior naturalist will, we believe, provide improved interpretive service to the visitors.

Interpretive Office Overhead

Only 35 letters were written during the report period. A number of items needed in the field were wrapped and shipped. Requests for information, photographs, and visual aids were filled. All office activities were kept current.

Planning

The revised Carlsbad Caverns Master Plan and the revised administration building-museum plan for Wupatki were approved as submitted by the Regional Chief of Plans.

SANTA FE, NEW MEXICO

These letters are being forwarded to the Bureau for information.

The following information was obtained from the files of the Department of the Interior, Bureau of Land Management, regarding the land owned by the United States in the State of Nevada:

There are approximately 10 million acres of public land in Nevada, which is about one-third of the total area of the State. The majority of this land is located in the western part of the State, particularly in the areas surrounding the Great Salt Lake and the Colorado Plateau.

The land is managed by several different agencies, including the Bureau of Land Management, the Bureau of Reclamation, and the National Park Service. Each agency has its own set of rules and regulations governing the use of the land.

In general, the land is used for a variety of purposes, including grazing, mining, and recreation. Some of the most popular recreational activities in Nevada include hunting, fishing, and off-road driving.

The land also plays an important role in the economy of the State. It provides a source of income for many people through grazing fees and mineral rights. It also serves as a major attraction for tourists, who come to Nevada to enjoy its unique landscape and outdoor activities.

The following information was obtained from the records of the Department of Social Services, State of New York, Division of Child Welfare, Office of the Commissioner, dated 10/1/68.

The following information was obtained from the records of the Department of Health, Education and Welfare, Washington, D.C., regarding the activities of the American Friends Service Committee (AFSC) in the United States during the period from 1960 to 1968.

Downloaded from <http://ajphaphysoc.org/> at University of Illinois on June 11, 2015

Public Relations and Extension Services

The demands for visual aids remained high, six sets of slides or motion pictures being out at one time. One set of slides was sent to Europe at the request of an Army Officer for showings before American troops in occupied areas. A talk on Big Bend National Park illustrated with colored movies was presented before the Santa Fe Kiwanis Club. Two requests for illustrated talks were turned down with regret because of lack of time. Motion picture reels were sent to the Florence, Arizona, Prisoner of War Camp at the request of the Commanding Officer.

Research and Observations

Correspondence was continued with technicians of the Hercules Powder Company relative to the use of their product "Stabinol" in ruins stabilization work. Some experimentation with this product has been carried out at Tumacacori, Chaco Canyon, and Aztec Ruins but insufficient time has elapsed to determine results.

Headquarters Loan Library

Sixteen Southwestern Monuments Monthly Reports were donated to the Library by Mrs. David J. Jones, and eight 1944 issues of Nature Magazine were presented by Mrs. Lillian Riggs of Faraway Ranch, Arizona. In addition, 34 publications were added to the Library, including three books, four reports, three pamphlets, and 24 periodicals. No accessioning, shelving, or other Library maintenance was accomplished.

Southwestern Monuments Association

All reprints and color plates for the proposed "Arizona's National Monuments" book were received and stored in the Region Three Headquarters building pending letting of a contract for binding the book. The acute shortage of cover materials blocks the final step in this major undertaking. Association affairs were kept current, and sales in the field areas remained high. Demand for photographic postcards increased.

Photography and Visual Aids

Negatives of pictures taken by Mr. Dodge on his field trip were processed, and catalogued, prints were coded for filing, and a set of 71 black-and-white prints and 29 Kodachrome transparencies forwarded to the Director's Office for transmittal to Collaborator Tilden. A total of 136 Kodachrome transparencies were mounted as projection slides by Louise Lancaster, and 58 of these sent to Big Bend for the park's slide library. On May 20, Louise Sandoval resumed work on the Headquarters photo files. All of the time available was spent in editing motion picture film preliminary to the proposed duplication of several reels.

Reports and Memoranda

A narrative report covering his ruins stabilization field trip was submitted on May 1 by Mr. Caywood, and on May 24 Mr. Dodge submitted a narrative report outlining interpretive problems encountered in his field trip which terminated May 19.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
NATIONAL MONUMENTS

Reportworthy Visitors

Gordon Vivian, formerly of Chaco Canyon; Miss Isabelle Story of the Director's Office staff; Stanley Stubbs of the Museum of Anthropology, Santa Fe; S/Sgt. David J. Jones on military furlough from Mupatki National Monument; Lt. Francis Elmore, former seasonal ranger; Custodian Thomas and Ranger J. W. Wendron of Bandelier National Monument had business with the interpreters. Mr. William Carr, freelance writer; Mr. Harold Colton and Edwin D. McKee of the Museum of Northern Arizona were consulted in the field.

Unusual Activities - Conferences

Interpretive problems of Carlsbad Caverns National Park were discussed with Superintendent Boles, Assistant Superintendent Diehl, and Chief Clerk Conley. Mr. Caywood checked boundary matters at Big Bend, Zion, Bryce, Cedar Breaks, and Timpanagos Cave with Headquarters personnel, in the capacity of Acting Regional Naturalist.

Ruins Stabilization

Release of 2,400 budget reserve for emergency stabilization revived this long-dormant project and Mr. Caywood devoted all possible time to completing details of field work to be carried out in June. Projects were started at areas having qualified supervisory personnel. Reports from the field indicate that satisfactory progress was made on these projects at Mupatki, Aztec Ruins, and Chaco Canyon National Monuments. Arrangements were completed for a start on the long-delayed emergency stabilization project at Tonto. Man power ceilings hampered the progress of this emergency work at Chaco Canyon and Mupatki National Monuments.

Projects for Next Month

Mr. Caywood will be in the field throughout the entire month supervising emergency ruins stabilization. Mr. Dodge will handle office routine and attempt to bring active projects to conclusion before going on annual leave June 11. He will leave on June 16 for Chicago for a 75 day assignment in the Director's Office.

1. The first of these is the fact that the Commission has not yet received any information from the Government of the United States regarding the activities of the Committee for the Liberation of the People of the East (CLPE) in the United States. The Commission is therefore unable to determine whether the CLPE is a legitimate organization or a subversive one.

1930

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

Arches NATIONAL MONUMENT

Moab, Utah

May 25, 1945

MEMORANDUM for the Regional Director, Region Three:

The following is a narrative report for Arches National Monument for the month of May, 1945:

GENERAL: Two official trips were made during the month, one to Grand Junction, Colorado on May 5th to try to locate a small water heater for installation in quarters and another to Blanding, Utah on May 16th regarding employee for Natural Bridges National Monument for the coming season.

The Custodian was on sick leave for 1-7/8 days, making two trips to Monticello, Utah for dental attention.

WEATHER: WIND, WIND, NOTHING BUT WIND. On a 30 day stay at Gran Quivira I thought that was the windiest place in the world but they were nothing but gentle breezes compared with the winds they have in this area. A portion of one tar paper roof has already been torn off and I am expecting the others to go any day. The residents of Moab claim that the wind is exceptional this year but Harry Reed warned me, and I did not believe him. We had two good showers during the month but could use a lot more. The temperature is climbing but as yet the days have not been too hot.

TRAVEL: The travel showed a decided increase over last month with a total of 18 cars and 78 people for the month. The bulk of the travel was from Utah and Colorado and they visited only the Windows section of the monument.

INTERPRETIVE SERVICE: One party of 16 school children were taken to the Windows on April 27th and were shown the points of interest in that section. The trip was of 5 hours duration. On April 26th I accompanied Forest Ranger Despain and Conservationist Zumwalt on a trip to Delicate Arch and the Fiery Furnace. They took color shots in both sections. This was my first trip into the Fiery Furnace and I found it to be a very interesting area, but the name seems erroneous, as it was the coolest place we found in our travels that day. On April 28th a trip was made into the Devil's Garden with Mr. L. L. Taylor, of the Moab Times-Independent, his son and Conservationist Zumwalt. It was Mr. Taylor's first trip into this section and he was very much impressed, especially with Landscape Arch.

RECOMMENDATION FOR THE NATIONAL MONUMENT, NATIONAL PARK SERVICE

The following is a summary of the report for the National Monument for the year 1900, 1901:

The National Monument was established in 1900, and since that time it has been under the management of the National Park Service. The monument is situated in the State of California, and covers an area of approximately 100,000 acres. The monument is named in honor of the National Park Service, and is one of the most important landmarks in the State.

The monument is situated in the State of California, and covers an area of approximately 100,000 acres. The monument is named in honor of the National Park Service, and is one of the most important landmarks in the State.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
JUN 10 1934

LANDS: A request was received from the Director's Office for appraisal sheets for State lands included within the boundaries of the monument. Upon contacting the Utah State Land Board it was found that they claimed more land than the General Land Office records showed. More correspondence with the State Land Board will be necessary before the matter is finally cleared up.

MAINTENANCE AND CONSTRUCTION: A small water heater was installed in the basement of the quarters so that hot water could be obtained without firing up the furnace.

Window screen hinges and locks were purchased and all screens at quarters were hung.

Continued on cleanup of utility area. Have started work on a galvanized pipe flagpole and signs for the headquarters junction and various points of interest. Hope to get these two jobs done during the coming month.

ROADS: The road to the Windows section is in fair condition. One day was spent on repairs to wing walls and fill on one culvert which was badly washed. The State has promised to blade the road but they have been kept busy with patching of the surface of the main highway. It is hoped that they will find time for our road very soon. The road through the Salt Valley and the Salt Gorge is in good condition and no trouble was experienced on a trip through there during the latter part of April.

MISCELLANEOUS: Shipped gasoline power unit, originally used on the water system, to Coolidge for repairs. This unit had been wrecked when it caught fire during operation.

GRAZING: A trip was made to Thompson's and Cisco, Utah, with Grazier Handy, to check on various herds of sheep leaving for the summer ranges. At this writing all sheep herds which graze on lands adjacent to the monument, have moved and our grazing problems are over for another year. Evidence of trespass has been found in some sections and it is hoped that next fall, each permittee on land adjoining the monument, can be accompanied on a trip over the boundary in his section and be persuaded to observe the imaginary line between the Grazing Service and the Park Service lands.

NATURAL BRIDGES NATIONAL MONUMENT: Advice was received from the Regional Director that employment ceilings allowed for the employment of a man for this area on May 16th. John Wiley Redd, who has held this position in previous years, was contacted by mail and then personally on May 16th at Blanding, Utah but stated that he could not enter on duty until June 20th. Efforts have been made to locate another man for the job but to no avail so it looks like June 20th will be the opening date for this area. At this writing the road over the Elk Mountains is still closed but both the State and Forest Service are working on it and I am expecting word from the Forest Service at any time advising me that the road is open.

Russell L. Mahan

AZTEC, NEW MEXICO

May 24, 1945.

MEMORANDUM for the Regional Director,
Region Three, National Park Service.

There follows the report of activities for Aztec Ruins National Monument for May 1945.

WEATHER CONDITIONS. The month has been quite pleasant generally, with 2 days of sub-freezing that damaged local crops of fruit and vegetables. Rainfall has been slight with less than 0.02 inch recorded. A few days of fresh winds blew considerable amounts of dust and sand.

SPECIAL ACTIVITIES. 4/25, Ranger Lancaster arrived with a dump truck from Mesa Verde. 4/27, the Custodian went to Ft. Defiance, Ariz. for equipment needed on the drainage ditch project. 4/28, the Custodian returned a borrowed pole trailer to the Mt. States Tel and Tel at Farmington, N.M. 5/9 the Custodian went to Farmington to arrange with the SCS for procurement of materials needed on the ditch project. 5/11 Lancaster returned the Mesa Verde dump truck. 5/17, the Custodian and Engr. Bradley went to Farmington to obtain parts for the power shovel. 5/20, the Custodian went to Mesa Verde for power shovel boom rollers which were fabricated there. 5/21, Engr. Lassiter arrived.

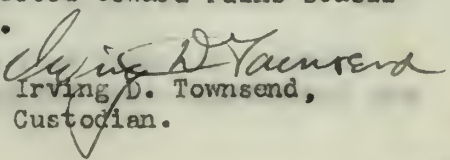

MAINTENANCE. A full compliment of men has been employed on ruins stabilization, with considerable satisfactory work being accomplished. Work with the power shovel on the drainage ditch is progressing nicely after some preliminary trouble in assembling parts and in changing from shovel to clam shell operation.

INTERPRETIVE SERVICE. There were 392 visitors conducted on 63 tours thru the ruins, and 415 visitors in 68 parties shown thru the museum.

INCREASE OR DECREASE IN TRAVEL. There were 415 visitors in 77 cars from 18 states and the District of Columbia, including 13 from the armed forces. This is 99.76 % of the travel for May 1944. Of the 415 visitors 173 purchased tickets amounting to \$43.25, which with tax on these plus tax on 14 children and 2 waivers the total collection amounted to \$52.70. Thirteen members of the armed forces were admitted without charge.

VISITORS. Thomas C. Havrell, Supervisor Branch of Adjudication and L. B. Kimble, Regional Field Examiner, General Land Office, Wash. D.C. visited the area May 19.

Work for the ensuing 30 days will be directed toward ruins stabilization and development of the drainage ditch.

Irving D. Townsend,
Custodian.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
BANDELIER NATIONAL MONUMENT
SANTA FE, NEW MEXICO

May 28, 1945

MEMORANDUM for the Regional Director, Region Three.

There follows a report of activities at Bandelier National Monument for the period ending May 27, 1945.

Weather Conditions.

No moisture has fallen since April, high winds have been prevalent and the humidity^{was} generally low. Maximum temperature was 85 and minimum 30. The winds have dried out the forest to such an extent that unless we get rain soon we'll go into the summer with extremely hazardous fire conditions.

Special Activities.

The custodian spent 5 days assisting in the Region Three office during Mr. Richey's absence in Chicago.

Inspections.

Assistant Regional Director Richey briefly inspected the area May 15th. Chief of Forestry John Coffman and Regional Forester Ratcliff spent May 25 and 26 in the monument. Accompanied by the Custodian they made a two day pack trip over the South Mesa, Alamo and Capulin country and the Red Canyon section. An inspection was made of general forest conditions, fire protection facilities, and insect conditions.

Maintenance.

Serious trouble was experienced with the main sewer line from the administration buildings. Cottonwood roots had grown thru the tile effecting complete stoppage. Several days digging and cleaning were necessary to get the line into service again. Some forty loads of branches were hauled away from the campground and Headquarters area. The cleanup was necessary because of the intensity of the snow storm damage experienced in April. The Fire guards and Roads and Trails crew have worked all month on opening the main trails and repairing telephone lines damaged by the same storm. At month's end all the trails are passable but further maintenance will take more time.

Approaches to Park Area.

The State Highway Department bladed the road from the pavement to our checking station but it is so dry that not much improvement was noted.

2001, 2002, 2003, 2004, 2005, 2006, 2007, 2008, 2009, 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017, 2018, 2019, 2020, 2021, 2022, 2023, 2024, 2025, 2026, 2027, 2028, 2029, 2030, 2031, 2032, 2033, 2034, 2035, 2036, 2037, 2038, 2039, 2040, 2041, 2042, 2043, 2044, 2045, 2046, 2047, 2048, 2049, 2050, 2051, 2052, 2053, 2054, 2055, 2056, 2057, 2058, 2059, 2060, 2061, 2062, 2063, 2064, 2065, 2066, 2067, 2068, 2069, 2070, 2071, 2072, 2073, 2074, 2075, 2076, 2077, 2078, 2079, 2080, 2081, 2082, 2083, 2084, 2085, 2086, 2087, 2088, 2089, 2090, 2091, 2092, 2093, 2094, 2095, 2096, 2097, 2098, 2099, 2100, 2101, 2102, 2103, 2104, 2105, 2106, 2107, 2108, 2109, 2110, 2111, 2112, 2113, 2114, 2115, 2116, 2117, 2118, 2119, 2120, 2121, 2122, 2123, 2124, 2125, 2126, 2127, 2128, 2129, 2130, 2131, 2132, 2133, 2134, 2135, 2136, 2137, 2138, 2139, 2140, 2141, 2142, 2143, 2144, 2145, 2146, 2147, 2148, 2149, 2150, 2151, 2152, 2153, 2154, 2155, 2156, 2157, 2158, 2159, 2160, 2161, 2162, 2163, 2164, 2165, 2166, 2167, 2168, 2169, 2170, 2171, 2172, 2173, 2174, 2175, 2176, 2177, 2178, 2179, 2180, 2181, 2182, 2183, 2184, 2185, 2186, 2187, 2188, 2189, 2190, 2191, 2192, 2193, 2194, 2195, 2196, 2197, 2198, 2199, 2200, 2201, 2202, 2203, 2204, 2205, 2206, 2207, 2208, 2209, 2210, 2211, 2212, 2213, 2214, 2215, 2216, 2217, 2218, 2219, 2220, 2221, 2222, 2223, 2224, 2225, 2226, 2227, 2228, 2229, 2230, 2231, 2232, 2233, 2234, 2235, 2236, 2237, 2238, 2239, 2240, 2241, 2242, 2243, 2244, 2245, 2246, 2247, 2248, 2249, 2250, 2251, 2252, 2253, 2254, 2255, 2256, 2257, 2258, 2259, 2260, 2261, 2262, 2263, 2264, 2265, 2266, 2267, 2268, 2269, 2270, 2271, 2272, 2273, 2274, 2275, 2276, 2277, 2278, 2279, 2280, 2281, 2282, 2283, 2284, 2285, 2286, 2287, 2288, 2289, 2290, 2291, 2292, 2293, 2294, 2295, 2296, 2297, 2298, 2299, 2300, 2301, 2302, 2303, 2304, 2305, 2306, 2307, 2308, 2309, 2310, 2311, 2312, 2313, 2314, 2315, 2316, 2317, 2318, 2319, 2320, 2321, 2322, 2323, 2324, 2325, 2326, 2327, 2328, 2329, 2330, 2331, 2332, 2333, 2334, 2335, 2336, 2337, 2338, 2339, 2340, 2341, 2342, 2343, 2344, 2345, 2346, 2347, 2348, 2349, 2350, 2351, 2352, 2353, 2354, 2355, 2356, 2357, 2358, 2359, 2360, 2361, 2362, 2363, 2364, 2365, 2366, 2367, 2368, 2369, 2370, 2371, 2372, 2373, 2374, 2375, 2376, 2377, 2378, 2379, 2380, 2381, 2382, 2383, 2384, 2385, 2386, 2387, 2388, 2389, 2390, 2391, 2392, 2393, 2394, 2395, 2396, 2397, 2398, 2399, 2400, 2401, 2402, 2403, 2404, 2405, 2406, 2407, 2408, 2409, 2410, 2411, 2412, 2413, 2414, 2415, 2416, 2417, 2418, 2419, 2420, 2421, 2422, 2423, 2424, 2425, 2426, 2427, 2428, 2429, 2430, 2431, 2432, 2433, 2434, 2435, 2436, 2437, 2438, 2439, 2440, 2441, 2442, 2443, 2444, 2445, 2446, 2447, 2448, 2449, 2450, 2451, 2452, 2453, 2454, 2455, 2456, 2457, 2458, 2459, 2460, 2461, 2462, 2463, 2464, 2465, 2466, 2467, 2468, 2469, 2470, 2471, 2472, 2473, 2474, 2475, 2476, 2477, 2478, 2479, 2480, 2481, 2482, 2483, 2484, 2485, 2486, 2487, 2488, 2489, 2490, 2491, 2492, 2493, 2494, 2495, 2496, 2497, 2498, 2499, 2500, 2501, 2502, 2503, 2504, 2505, 2506, 2507, 2508, 2509, 2510, 2511, 2512, 2513, 2514, 2515, 2516, 2517, 2518, 2519, 2520, 2521, 2522, 2523, 2524, 2525, 2526, 2527, 2528, 2529, 2530, 2531, 2532, 2533, 2534, 2535, 2536, 2537, 2538, 2539, 2540, 2541, 2542, 2543, 2544, 2545, 2546, 2547, 2548, 2549, 2550, 2551, 2552, 2553, 2554, 2555, 2556, 2557, 2558, 2559, 2560, 2561, 2562, 2563, 2564, 2565, 2566, 2567, 2568, 2569, 2570, 2571, 2572, 2573, 2574, 2575, 2576, 2577, 2578, 2579, 2580, 2581, 2582, 2583, 2584, 2585, 2586, 2587, 2588, 2589, 2590, 2591, 2592, 2593, 2594, 2595, 2596, 2597, 2598, 2599, 2600, 2601, 2602, 2603, 2604, 2605, 2606, 2607, 2608, 2609, 2610, 2611, 2612, 2613, 2614, 2615, 2616, 2617, 2618, 2619, 2620, 2621, 2622, 2623, 2624, 2625, 2626, 2627, 2628, 2629, 2630, 2631, 2632, 2633, 2634, 2635, 2636, 2637, 2638, 2639, 2640, 2641, 2642, 2643, 2644, 2645, 2646, 2647, 2648, 2649, 2650, 2651, 2652, 2653, 2654, 2655, 2656, 2657, 2658, 2659, 2660, 2661, 2662, 2663, 2664, 2665, 2666, 2667, 2668, 2669, 2670, 2671, 2672, 2673, 2674, 2675, 2676, 2677, 2678, 2679, 2680, 2681, 2682, 26

to our meeting station but it is no way less an important one.

Interpretive Services.

Due to lack of personnel and lack of diversity in our interpretive program we have been unable to give an adequate program to the many repeat visitors who have come in. Many have taken advantage of our study collections and have given close inspection to the museum. 481 people were conducted thru the Ruins in 44 trips.

Travel.

Altho travel figures show a decline as compared to last year probably twice as many genuine visitors are coming in as were counted last year. Army use of the Lodge last year swelled the travel figures but this year we have experienced some of our heaviest travel days since 1941. 298 visitors in 70 cars came in on the 13th of May. In all 1390 visitors came in 349 cars during May.

National Park Service Visitors.

Lyle Bennett and family. Mrs. Ben Thompson and children of Santa Fe.

Ranger Service.

Mrs. Jewell L. Eden entered on duty as seasonal ranger May 24th. We will have only one seasonal this summer.

Wildlife and Fish Cultural Activities.

The fishing season opened May 15th. Many limit catches have been checked out and fish generally have run above average in size and condition. Hosts of small fish around the immediate vicinity of Headquarters has made fishing difficult. Apparently the small fish planted at the Upper Crossing last September have drifted down in unusual numbers during the winter.

Forest Fire Protection.

We were fortunate in having 3 of our old fire guards report back for duty this season. Assistant Fire Guard Edd Wendland and Jr. Guard Ollie Wendland entered on duty May 1 and Chas. Mills reported the 5th. Lewis McKinney came on the 15th. We were able to hire two men on the Roads and Trails crew May 10th but couldn't obtain the other two men until the 28th. As the month closes we have 4 guards and 4 trail men.

Fire danger has been unusually high during May because of the dry weather and high winds. The danger meter registered 87 on May 19th which is the highest recorded here since June of 1939. No fires have occurred on the area as yet. The guards have put all fire tools and equipment in readiness and have the trails open. The telephone system has been put into working order but more maintenance is needed. Our

and have given him information for his
continued work on the subject.

MEMORANDUM for the Regional Director, Region three.

The following is a report of activities at Canyon de Chelly National Monument during the month of May, 1945.

Weather

Temperatures have been below normal for the month with a maximum of 84 degrees and a minimum of ten degrees. We have had only .06 inches of moisture, and as high winds and dust storms have been prevalent throughout the month, everything is exceptionally dry but the canyon streams which are still running a considerable flow of water.

Administration

Patrol trips have been made in both canyons. A trip was made to Gallup, New Mexico on May 9 for supplies. The Custodian was gone three days in taking USDI-13840 to the Headquarters shop at Casa Grande National Monument for repairs. He left at Noon of the 18th, and returned the evening of May 20 with USDI - 13820 for use until the other Pickup is repaired.

Maintenance

Much of the custodian's time has been spent in working with his one Navajo laborer on road and trail repair, and cleaning the sewer. The water system was checked for leaks, and the never ending cleanup of grounds was continued. A rack was built for the oil storage tanks and drums, the old plaster was removed from the visitors comfort station and it was replastered. Flagstone walk was set in cement, and more grass was planted around quarters. Due to Sickness and death in the family of my Navajo laborer, many valuable hours of his services were lost.

Visitors

Travel is coming back with a "Bang" and added to the maintenance work sufficed to keep the custodian jumping. There were 87 visitors in 18 cars representing 20 states and one foreign country. There were two groups of Cadet Nurses from the Hospital at Ft. Defiance. It is interesting to note that the number of cars for the month and travel year to date are exactly the same as last year, and visitor registration shows but a difference of three for the travel year.

Visitors this Month - 87, Travel year to date - 181, Last year - 184

Survey was made by the National Park Service, National Monument, National Park Service, on May 1, 1917.

Visitors (Cont.)

Among the visitors registered this month were Roy Wright of the Alvarado Hotel in Albuquerque, W.D. Owens, and Mott. Odell of the Hilton Hotels. Mr. Felton and wife, of the Weather Bureau were in and checked our weather station and were then taken on a tour of the Monument.

Dr. C.C. Young, head of the Anthropology department of National Sun Yat Sen University of Canton, China visited the area with Dr. Boyce, head of the Navajo educational department.

Interpretive Services

Eight groups totaling 65 persons were conducted to White house and Spider Rock and with which the Custodian spent a Total of 20 hours. One and a half hours was spent in headquarters talks to four groups comprised of 16 visitors.

Research and Observation

Since the construction of the Many Farms reservoir a few miles north of the Monument, we are beginning to see many new species of Water fowl. One old Blue Heron now frequents the mouth of the canyon.

The Bee Martin which builds it's nest yearly over my office door returned the first of April and started construction. After completing the nest they disappeared. The male would return to the nest periodically and I thought the female had been killed. On May 1, both reappeared but the female now has but one leg which makes it difficult for her to perch. The male seems to be doing the breadwinning for both of them.

Fire Protection

On May 1, the Custodian assisted Forrester Holt of The Navajo Service in conducting a fire training meeting for Government employees at Chinle. Indian crews were also given training in methods of fire line construction and use of tools.

Public Health

An epidemic of Intestinal Flu is prevalent with members of both the Custodian's and the Operators family sick. L.H. (Cozy) McSparren has been troubled again with Gastric Ulcers, and has been able to work only part time in the store.

CAPULIN MOUNTAIN NATIONAL MONUMENT
CAPULIN, NEW MEXICO

OFFICE OF THE CUSTODIAN

May 25, 1945,

Memorandum,

For the Regional Director, Region Three,

There follows a report of activities at Capulin Mountain National Monument for the Month of May 1945,

Weather Conditions,

Weather for the month has been decidedly dry and windy, only about one fourth inch rain and about half inch snow, some very cool days with high winds from the north, Oaks are leafing out very nicely and a large crop of Pinon nuts are forming, It is not sure as yet whether they will mature or not, some times even after they form in the burs they later blight,

Visitors,

Are estimated to be about three hundred for the month, Same as May 44, but slightly less than last month, Some few schools from Okla and Texas were visitors, Beaver City Okla with it high school class were a fine bunch, and seemed to enjoy the Monument,

Maintenance,

Considerable work has been necessary on the Road this month, dry weather always brings break Thrus or chuck holes thru the crust of the road into the loose cinders and the only remedy is to haul top soil and fill in, this will pack and road becomes solid again, many loads were hauled this month and at this writing the Road is again in fine condition,

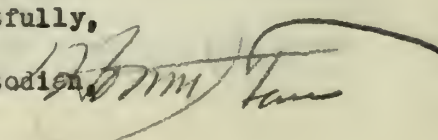

Interpretive Services,

Many contacts were made down town to visitors by the Custodian, giving brief explanations and handing out literature describing the Volcano,

Wild Life,

The Deer has practically abandoned the Monument for the spring as usual and took the lower surrounding country to raise their young, The grey squirrel is very plentiful and one can see them all over the Monument, They did fine last year as it was a season of plentiful food,

Very Respectfully,

Custodian,

CASA GRANDE NATIONAL MONUMENT

COOLIDGE, ARIZONA

May 25, 1945

MEMORANDUM for the Regional Director,
Region Three.

The following is the narrative report for Casa Grande National Monument for May, 1945:

Visitors: The summer weather of this month has started the seasonal decrease in visitor numbers, but the increase over last year continues. The total number for this month was 797, last year there were 761. There were 56 members of the Armed Forces.

Interpretive Services: There were 485 Ruins visitors in 104 groups; a total of 4380 minutes with an average of 42.1 minutes per group. Of these 287 were attended in the museum in 74 groups for a total of 1615 minutes, or 21.8 per group. There were 312 unattended visitors who used the various facilities, including 51 who picnicked and an additional 29 who used the picnic grounds and visited the Ruins. Eighteen people in six groups followed the Desert Trail.

Weather: Summer started the end of April and the thermometer reached 100 on April 29. The high maximum was 102 on May 17; the low maximum was 88 on the 20th. High minimum was 62 on the 18th and the low minimum was 42 on the 21st, marking a 60 degree variation for the month. Twenty days were 95 or over.

There has been no rain and only one cloudy day.

Maintenance: Regular routine maintenance has gone forward as usual. The stoves have been removed from the residences and cleaned out and the Administration Building stove has been cleaned. New Cooler pads were installed in the coolers, the coolers cleaned and put into operation. A good deal of work has been done

NATIONAL PARK SERVICE
CASA GRANDE NATIONAL MONUMENT
COCHISE, ARIZONA

May 10, 1948

Memorandum for the National Director,
National Park Service

The following is the summary report for Casa Grande National Monument
for May, 1948:

Visitors: The number of visitors to Casa Grande National Monument
in visitor numbers, but the increase over last year is significant. The total num-
ber for this month was 987, last year only 501. There were 28 visitors
of the Casa Grande.

Interpretive Program: There were 122 hours of visitors to Casa Grande; a total
of 1800 minutes with an average of 14.7 minutes per group. Of these 127 were
attended to the amount in 74 groups for a total of 1015 minutes, or 21.8 per
group. There were 21 unattended visitors who used the various facilities,
including 31 who remained and an additional 19 who used the picnic grounds and
visited the ruins. Fifteen people in six groups followed the guided trail.
Weather: Summer started the end of April and the thermometer reached 100 in
April 29. The high reached 100 on May 17; the low reached 65 on May 15.
With clouds on May 16 and 17 the low reached 45 on May 16.
During a 50 degree weather for the month. There was 50 of rain.

There has been no rain and only one cloudy day.

Maintenance: Regular routine maintenance has been continued as usual. The grounds
have been removed from the washrooms and cleaned out and the landscaping
will be done as soon as possible. The water has been tested in the washroom,
the results showed and was less satisfactory. A good deal of work has been done

on the Fact File and library accessions after June, 1944 have been catalogued. Lists have been made of all material on hand which is to be kept at the shop for use at this Monument, in the Headquarters Pool, and another list of articles which are available for the use of the other Southwestern monuments. Quarters 1 were cleaned up and the floor sanded and refinished preparatory to rental.

N.P.S. Visitors: Mr. Richey arrived April 27 and left the 28th. Custodian Supernaugh stopped in briefly April 28 and again on May 23 when he brought the concrete mixer for Saguaro and returned to Organ Pipe with surplus supplies.

On April 30 Regional Forester Ratcliff stopped for the night and left May 1. William Wilson stopped May 5 en route from Saguaro to Navajo. May 8 Harry Reed came from Tumacacori with Gene and returned the next morning with the International truck. May 13 Natt Dodge arrived with his family and Miss Isabelle Story, after a photographic trip. Meredith Guillet brought the Canyon de Chelly truck in May 19 for overhauling and he returned the following day with I-13820 to use in the meantime. Polly Tovrea spent the weekend of the 19th here.

Other visitors: These were of the usual type for the most part. Quite unlike most were the self-styled Princess Winona Red Bird of the Cherokees, sun-goddess of all North American Indians and the only woman to be an Indian Head Counciller and her husband one Frank Barth, chief of the Pottawatamies. They were looking for her underground temple where she will assume her job as sun-goddess, when they find it. Archaeologists should take note of her information. The Cretan maze is the symbol of the sun-goddess and indicates the temple is nearby, and the small line through it indicates the direction. A local sun temple is underground a few feet south of compound A (a stone marks the spot) and by digging there records on hide or stone could be found, if the ancients did not have time to remove them. The Sun holes are positively calender holes

and the north holes weather indicators. The north-west room of the compound was a waiting room for runners.

Accessions: A copy of "How We Found the Casa Grande Graveyards" from the Master Key of May, 1927, by Cosgrove and Felts was received from the Southwest Museum. A copy of Laws Relating to National Park Service, Supp. 1, 1944 was received. The Annual Report of the Secretary of the Interior for 1944 has been received.

Nature Notes: An enormous Texas horned toad was discovered May 4 by Teddy Baehr. The prickly pear bloomed May 4, other cacti and the ocatilla have bloomed and the night blooming cereus plants are in bud. Both red and black whip-snakes have been seen in the Ruin. The young bats are very visible and smellable in the Big House and mosquitoes and ants have taken possession of the Quarters. A Gila Monster was caught by visitors at Vah-Ki Inn and later released on the Monument but so far has not shown himself.

Other Events: On VE Day the Shearwood car, which had been jacked up for a week while the tires were being recapped, mysteriously caught fire and the seats and upholstery were completely ruined. The fire was discovered and put out before any further damage was done.

Universal News Reel took some pictures here on May 9 with the Custodian explaining the Hohokam to an interested group of visitors (the personnel of the Monument).

Captain and Mrs. George Thompson of the P/W Camp at Florence moved into Quarters 1 on May 14.

The Custodian went to Phoenix May 10 on official business; and to Saguro May 22 on fire plan coordination.

Personnel: Jessica Shearwood has resigned as Ranger, effective June 1. It is hoped that Polly Tovrea will be the new Ranger and her papers are en route to that result, but are not expected to clear before June 16. We hope we will not

and a variety of other insects.

1. The first step is to identify the problem or question that needs to be answered. This involves understanding the context and the specific requirements of the task.

be confronted with a Saguaro fire problem during the two weeks period.

Shop Activities of Mechanic Stonehocker: Trips: One to Phoenix for parts and supplies. One to Tumacacori for repairs to the water system; and repaired the garage doors, toilet installations and brought back the water cooler to work on it. En route, stopped off at Tucson for supplies. Harry Reed returned to Casa Grande with Gene and took back the International truck and the paint sprayer. A trip to Saguaro was made with Al to coordinate fire plans, taking the Saguaro refrigerator to Tucson for recharge and the pickup and trailer were brought back for repairs.

New cooler pads were put in the shop cooler.

New brake linings, battery and horn were installed in the Casa Grande had
Semi - I-13818 and five tires recapped and replaced.

A new tire and a new battery were installed in I-13831.

Four recaps were installed on I-13821 (Relief car) and body work was done, including two new door glasses.

Dismantled and checked the Waukesha engine and submitted a parts list for repairs to Region Three. The same was done for the Kohler light plant for Organ Pipe, which was brought in by Supermaugh.

Meredith Guillet brought in his pick-up for a complete overhaul and took I-13821 for temporary use.

Replaced flexible oil lines and installed an oil filter on Service Car I-13817.

Checked list of supplies to be held for use for use in the Headquarters Shop and another of material to be made available to the other monuments.

CHACO CANYON NATIONAL MONUMENT
Bloomfield, New Mexico

May 25, 1945

MEMORANDUM for the Regional Director,
Region Three.

There follows the report of activities in Chaco Canyon National Monument for May, 1945.

VISITORS. A total of fifty-seven visitors were contacted at Chaco Canyon during this report period. Of this number, 31 formed 10 parties and were conducted through Pueblo Bonito. There were 24 visitors in 7 parties who were shown the museum. A total of 1110 minutes were spent in contact time. Two written requests were received and answered; 23 visitors desired information only.

WEATHER. Spring is off and on again in this area. Severe winds and sand storms continued through this month. The maximum of 82 degrees was reached on May 18. The minimum of 24 degrees occurred on May 23. Showers fell on April 27; May 4, 7 and 14. Thirteen very windy days were noted. Precipitation amounted to .18 inch.

NEWSWORTHY VISITORS. Dr. Hill, Department of Anthropology, University of New Mexico; Tho. C. Howell, General Land Office, Washington, D.C.; L.B. Kimble, General Land Office, Albuquerque; George Grant; Gilbert Maxwell; Engineer Willard Bradley and Mrs. Theo. L. Sowers.

ACTIVITIES. Radio contact was established with El Morro National Monument on April 27, 29; May 1, 4, 8, 11, 15, 18, 22 and 25. On April 27, contact was excellent until El Morro blew a fuse. After repairing this, contact continued very satisfactorily to date.

Maintenance work on quarters is nearly completed. By patching the roof, work could be resumed on painting the rooms. Am hopeful this work will stop all major leaks. Also installed two new window panes in quarters.

Completed the job of covering the hot water tank with celotex and repairing the ceiling. Then plastered the back service porch and encased tank. This will keep out the cool Chaco winds. Kalsomined the walls and plan to lay linoleum in the near future.

Rewashed kitchen and painted ceiling and cupboards. Plastered the inside of the cupboards in the hope it will discourage and repel all wild life - namely mice.

Painted the interior of the two fireplaces black. Plastered around windows and doors of quarters. Constructed seven screens for windows and repaired the screen doors. Installed the large Duo-Therm oil heater in the living room and was dismayed to find, after filling it with oil, a leak in the mixing valve. The oil made quite an improvement on the floor in that spot. Soldered the hole and its holding todote.

Thoroughly cleaned living room woodwork and wiped excess soot from ceiling. Kalsomined ceiling and walls which greatly improved appearances. Next month hope to fix living room floor and plaster the bathroom.

Installed and cleaned the small oil heater in the office. Usual office work was done for El Morro and Chaco Canyon National Monuments. Installed hinges on one door of the map filing case. And, discovered a bull snake under the museum building.

Weeds were removed from the parking, picnic areas and on trail from quarters to office, and office to Pueblo Bonito. Further cleanup was done around quarters.

The Chaco pickup was taken to Aztec for repairs, and the maintainer was brought back. Then bladed both north and south entrance roads.

Further trouble was experienced with the sand pile. Due to excessive winds, the sand had piled to a depth of five feet on the 150 foot length of road. Mr. Stockton, Indian Service telephone man was stuck and when this custodian helped him out, it was discovered he had broken his radiator trying to buck the sand. Something had to be done, so a Fresno was borrowed and with the help of the maintainer and the five Navajos, the sand was removed completely down to the hard road bed. It is hoped that the wind will now whistle over the cut and deposit the sand on the other side of the road.

Completed the job by removing the bar across the road and
 pointing the engine. The engine was then started and the
 car. This will keep the car from starting. The engine will
 stop in the morning in the morning.

Completed the job by removing the bar across the road and

 car. This will keep the car from starting. The engine will
 stop in the morning in the morning.

Two days later, I learned from a local rancher, that he had met the state highway blader coming in to work on the sand. He met them at the sand pile, and they just looked, turned around and went back. Such is life at Chaco!

Patrolled the north-east boundaries on the monument horse. Helped the S&M crew clean the cattle guard at the south approach by the old CCC camp.

Painted three directional signs for the north approach road; brought in one sign for repairing and repainting.

More work was accomplished in cleaning up storage rooms; panes were installed in windows and one door was painted medium brown.

STABILIZATION PROGRAM. The stabilization project on Bonito is coming along in good shape. At present, all drains throughout the entire pueblo have been cleaned and free of dirt and weeds. Also all weeds inside and along the entire outside walls have been hoed and hauled away.

This custodian has spent considerable time in taking photographs of the "before" work, and also helping in some of the minor wall veneer work.

Considerable time was spent in hauling rock for replacement in the walls throughout the ruin, plus sand, gravel and bitumule.

A bitumul-adobe mortar is being used in all wall repair, and all exposed edges are being pointed where minor wall repair and replacement of rock is necessary with this native bit-adobe mortar.

Work has been started and some finished at present, on walls of Rooms 337, 338, 339 and 340. While cleaning the base of the north wall in Room 343, to lay a cement base, a small Chaco B/W pot and other artifacts was uncovered. It was located in what appeared to be an old fireplace and was encased in adobe. This was photographed and removed. Only a small section of the lip of the pot was broken, but the remaining pieces were recovered, so that it can be restored.

Also minor wall repair on Rooms 141, 142, 154, 224, 133, 134, 135 was completed. Much time was spent working on low south-east walls in the west plaza (North - Kiva 130).

Two days later, I learned from a local informant, that the two men were
different people looking for a way to the north. He said that the road was
very bad and that the men were very poor. He said that the men were very
poor and that the men were very poor.

WATER RESOURCES DIVISION

-4-

At present writing, the crew is replacing rock on the bottom of doors in the south-west section, Rooms 126 and 338, along with replacing veneer on inside walls of Room 126.

SOIL AND MOISTURE PROGRAM. The crew continued planting willows the entire month; from the bridge, east.

They also cleaned the cattle guard on the south approach road by the old CCC camp.

One trip to Aztec was necessary, to obtain more willows and cotton-wood poles for revetment work.

Work is progressing well, considering that only a two-man crew is on the project.

Ted C. Sowers,
Acting Custodian.

NATIONAL PARK SERVICE

NATIONAL MONUMENT

CHIRICAHUA

Dos Cabezas, Arizona

May 27, 1945

MEMORANDUM for the Regional Director,
Region Three.

There follows a report of activities at Chiricahua National Monument for the months of April and May.

General Due to the custodian's absence of over a month no report was submitted for April so this report covers two months.

The custodian left April 6 to attend the Big Bend fire meeting. From Big Bend National Park he went to Temple, Texas for an operation and returned to Chiricahua May 6. All is going well with him now and he is almost able to do manual labor again. However Grader Operator Marble's health has been bothering him considerably lately and he went to California for a medical checkup, May 17. Last word from him he was at the clinic and hospital. No word has arrived yet as to the seriousness of his ailments or the length of his stay.

Water supply seems a little lower than previously. A church group of 175 to 200 have just arrived at the CCC camp for a weeks stay. It looks like they might have to be cut short of water before their stay. Mr. Riggs and the group were advised of the situation so that they could conserve the water supply as much as possible. ends.

Weather Conditions. Weather has been very dry even for this time of the year. No moisture since April 8. Precipitation so far in 1945 is 3.73 inches compared with 8.30 for the same period last year.

Inspections. Assistant Regional Director Richey made an official inspection of the Monument May 6. Grader Operator Marble was acting for the Custodian at the time. However the custodian met Mr. Richey in Willcox and discussed the monument work.

Mr. Dodge of the Regional Director's office and Miss Story of the Director's office visited the monument May 7. The custodian didn't feel physical fit to show them around so he stayed in the office and let them go over the monument by themselves.

Approaches to Monument. Aside from being a little rough and dusty the approach roads are all in fair shape.

Concessions. No concessions connected with this area except

Interpretive Services. No special interpretive services are

EL MORRO NATIONAL MONUMENT
Ramah, New Mexico

May 25, 1945

MEMORANDUM for the Regional Director,
Region Three.

There follows the report of activities in El Morro National Monument for the month May, 1945.

VISITORS. Fifty-six visitors forming fourteen parties, were conducted around Inscription Rock during this report period. Five parties were also conducted to the pueblo site on top of the rock.

ACTIVITIES. Mrs. Susan Maude Worthen was employed on May 1, to care for the area in the absence of Obie J. Worthen.

Radio contact was made with Chaco Canyon National Monument on April 27, 29; May 1, 4, 8, 11, 15, 18, 22 and 25. On April 27, contact was good until this station blew a fuse. This was repaired and contact has been very satisfactory.

Labor-Caretaker Worthen reports the telephone line is nearly completed. It has reached the cabin at headquarters, and is only $\frac{1}{2}$ of a mile from the El Morro store.

The doors and windows in the cabin have received their last coat of paint, weeds were removed from the trails, all franked envelopes were stamped, all SWRM map folders were stamped, and the boundary fence was patrolled.

Ted C. Sowers,
Acting Custodian.

Gran Quivira National Monument
Gran Quivira, New Mexico

29 May 1945

MEMORANDUM for the Regional Director
Region Three

There follows the narrative report for Gran Quivira National Monument for the month of May, 1945:

Travel: 23 since May 20

Travel year to date. Incomplete (Last record, January 25, 1945, showed 58). Total incomplete, 286

Weather: Low, 31; High, 89; Much high wind, dust storms and temporary blocking of roads because of drifted silt.

Research and Observation: Since the area is a new one to me, much of my time since May 20th has been spent in familiarizing myself with the past research and interpretive material which has accumulated at Gran Quivira. Some preliminary work has been done on the problem of uncovering the exact location of the Tabira Mission, which I have learned has been a problem of note here.

Ranger Service: John M. Weidman, School of Mines, Socorro, New Mexico entered on duty here as a seasonal Park Ranger and acting custodian for the summer months. (May 20)

Great Sand Dunes National Monument
Hooper, Colorado

June 1, 1945

MEMORANDUM for the Regional Director
Region Three

There follows the report of activities at the Great Sand Dunes National Monument for May, 1945:

Weather Conditions. The spring has been unusually dry and the outlook for good vegetative cover is not too good. The domestic water supply will undoubtedly hold up, but some work on the springs is anticipated by the writer.

Roads. The road to the Dunes is very rough. The county has filled some of the worse holes and are to send their maintainer to the Dunes in the next few days. I plan to see the county road supervisor in Alamosa this afternoon and arrange to have them fill the worst holes with adobe or heavy soil as the sand does not hold.

Travel. The Army convoys constituted the largest part of the registered travel, but the civilian visitors list is very good. A Girl Scout Troop of twenty-two camped four days in the area; this boasted the visitor days.

Public Health. The ticks are very bad this year. A short walk up the Mosca Pass trail will garner from 10 to 40 ticks. Whenever possible visitors are warned to watch for ticks as there has been some incidence of Rocky Mountain spotted Fever in this region.

Maps and Surveys. The NPS L-3 were checked in Saguache and Alamosa counties during the past week.

Maintenance. A general painting of inside and outside of buildings is all under way.

MEMORANDUM for the Regional Director
Region Three

There follows the report of activities at the Great Sand Dunes National Monument for May, 1942:

Weather Conditions. The spring has been unusually dry and the outlook for good vegetative cover is not too good. The domestic water supply will undoubtedly hold up, but some work on the system is anticipated by the winter.

Roads. The road to the dunes is very rough. The country has filled some of the water holes and has to be kept maintained to the dunes in the next few days. I plan to see the country road again in June. The old road and bridge to have them fill the water holes with stone or heavy soil as the sand does not hold.

Travel. The trip across country to the dunes is very rough. A Girl Scout Troop of twenty-two camped four days in the area; this was the first day.

Public Health. The dunes are very hot this year. A short walk up the dunes will give a person a fever from 10 to 41 degrees. Whenever possible visitors are warned to watch for ticks as there has been some incidence of Rocky Mountain spotted fever in this region.

Ways and Drivers. The No. 1-2 were checked in January and March and found the same.

Navigation. A general painting of landmarks and outline of buildings is well under way.

COOLIDGE, ARIZONA
Montezuma Castle National Monument
Camp Verde, Arizona

May 24, 1945.

MEMORANDUM for the Regional Director, Region Three.

There follows the monthly report of activities at Montezuma Castle National Monument for the month of May, 1945.

Visitors this month, 409; travel year to date, 1817.

General The Verde Valley Chamber of Commerce sponsored an essay contest on points of interest in the Verde Valley. A prize winning essay on Montezuma Castle was submitted by Miss Emma May Vidrene, 9th grade, Cottonwood, Arizona

Weather Unseasonably cool weather has continued throughout this month. A minimum of 35° was recorded on May 20 and 21. The mean maximum was 86.29° and the mean minimum was 44.29°. There have been several windy days and .23 of an inch of moisture was recorded.

Administration Custodian Bright was relieved at Tuzigoot on April 24, and May 1, 8, 15, and 22.

A dead horse was reported in the creek above the monument. We contacted the owner who complied with our request for its removal.

An attack of sore throat forced Custodian Hastings to take sick leave on May⁴ and half of May 5.

Three fireplace grills for the picnic grounds were received from Casa Grande National Monument along with an electric refrigerator.

Maintenance Bats roost in the Castle irregularly and we frequently have to sweep up the droppings. We find that by spraying a favorite roost with half creosote and half fuel oil they will avoid the spot but they remain in the building.

Our project to oil or paint all of our wooden signs was completed.

One trip was made to Prescott to get our Westinghouse refrigerator adjusted and repaired.

We finished cleaning the trail and cutting weeds in the Lower Ruin.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
Rocks and weeds were removed from the gutter beside our entrance road and all culverts were checked.

Use Of Monument Facilities By The Public Travel shows an invrease of 138 visitors over the 271 recorded in May last year. Our 409 visitors included 29 children and their parents from Beaver Creek school and 27 Boy Scouts and the leader of Troup No. 4, Prescott. Visitors came in 97 cars from 22 states and Manila, P.I. Arizona cars, 22. Guide tickets sold, 114; tax but no tickets, 54; children admitted free, 21. Twenty-two members of the armed forces visited the monument twenty-one of whom went through the Castle. Total revenue collected, \$32.90.

Guide Service Total contact hours, 78.75; Hastings, 57.50; Leding, 41.25. Two hundred and nine visitors were guided through the Castle in 50 groups and 557 visitors saw the museum in 69 groups. Seven people received information only. There were 5 picnic parties including 62 people.

Protection Dry grass and leaves were removed from the area around our visitor register stand. Our back-pack fire pumps have been checked and filled and increased vigilance is being exercised for fire protection.

A new "Visitors Climb At Their Own Risk" sign was attached to our first Castle ladder. Another sign, "Visitors Must Be Accompanied By A Ranger" was attached to the second ladder so it can be seen only when our locking doors are open. We hope this will discourage the visitors who sometimes break into the middle of a trip.

National Park Service Visitors Custodian Baxter and family.

Personnel The stork visited Ranger and Mrs. Leding on May 19 and left a baby girl, Sandra Anne. Mother and baby are doing nicely and "Steve" is recovering.

Fauna Beaver sign was noted on the creek above the picnic ground. Their presence was suspected last year but this is the first time we have unmistakable evidence to enter in our Fact File.

An eighteen inch bull snake was discovered coiled on top of the highest wall in the fifth story of the Castle. He was transported to the creek bottom and liberated.

Projects For Insuing Month 1. Patrol our boundary fence. 2. Remove the shades from all windows in both residences, have them repaired, and install Venetian blinds in the living rooms. 3. Start painting our picnic tables.

Navajo NATIONAL MONUMENT

Tonalca, Arizona.

May 25, 1945.

MEMORANDUM for the Director,
Region Three.

Follows the monthly report for May, 1945.

Visitors: This month none; last year 7.

Weather: Cooler than usual for this time of year with excessively high winds. A low of 29 was recorded May 20th & 21st. High of 77 occurred on the 12th. The only moisture recorded was .15 of an inch on May 14th.

APPROACHES TO MONUMENT AT 4: Due to high winds and lack of moisture, roads are in bad shape. It is expected that the Indian Service will plow out the road between Cow Springs and Tonto soon. The alternate approach road is in fair shape. Where there is no sand, roads are rough due to all loose dirt having blown away.

ACQUISITION: To the library are Supervisor Fuller's report on Recreational Resources of the Benson Dam and Reservoir project, also Seltzer's Social Geography in the Southwest and the Navaho Zunis.

ROADS AND ROUTES: Soil fire patrols are being made.

CUSTODIAN: This custodian returned to Navajo Station May 9th following the winter's assignment at Navajo National Monument. Inspection trips have been made to Betatakin and also to Hualapai in connection with proposed repairs at the latter place. The picnic table has been given a coat of linseed oil. Custodian Ben Cleve brought a load of hay and lumber for antennae masts. It is hoped that radio communication will soon be established with Walnut Canyon and Hopatki National Monuments. A watch is being kept for the appearance of tent caterpillars in quaking aspen in Betatakin Canyon.

W. V. Wilson,
Custodian.

May 25,

45

-----, 19-----

MEMORANDUM for the Regional Director,
Region Three.

There follows a report of activities in Organ Pipe Cactus National Monument for the month of May, 1945.

WEATHER:

May has been very nice as a whole although we had a few days in the 90's, the high reaching 99 degrees on the 3rd. Low for the month was 45 on the 21st.

TRAVEL:

Travel this month was 7179 bringing the total for the travel year to 40357. The Cinco de Mayo celebration in Mexico partly accounted for the increase.

GENERAL:

Five days were spent with Regional Forester Ratcliff studying grazing problems and in conferences with the grazing permittees. Two days were spent with Assistant Regional Director Richey on administrative problems.

Three days were spent trying to find indian laborers for Saguaro Monument but due to living conditions and problems there this project was dropped.

Miss Isabelle Storey and Matt Dodge arrived May 10th, spending the 11th and 12th on the monument and in the vicinity.

Concrete was run for the foundation and floor in our temporary garage. The light plant was taken to Coolidge for general overhaul and the cement mixer also was delivered there for repair before being transferred to Saguaro.

All other time has been spent in making our year-end purchases and keeping the office work current.

Art Lusher, Forester for the Indian Service, also spent some time here in regard to grazing and cooperative work.

The vats and corrals at the International Boundary were used for the first time this month since their installation when over 900 head of cattle were crossed and trucked through the monument. Another large herd of about 1200 head will be crossed on the 28th.

INTERPRETIVE SERVICES:

One auto caravan trip of Service men was taken this month on June 6. 31 were taken through the monument and around the Dripping Spring area. These trips have proved very popular but due to the summer heat coming on and the necessity for them to ride in open trucks, it has been decided to discontinue these regular trips during the summer and again resume them in the fall.

PROJECTS FOR THE COMING MONTH:

Hay will be hauled from Casa Grande and supplies laid in for the coming year. Most other time will be taken up with shop construction and general maintenance.

William R. Supernauth,
Custodian.

REPORT OF THE COMMITTEE ON THE

The committee on the subject of the proposed amendment to the Constitution of the State of New York, which provides for the election of a single member to represent each county in the Senate, has the honor to report that it has held several public hearings and has received many suggestions from the public. It has also held several private hearings and has received many suggestions from the public. It has also held several private hearings and has received many suggestions from the public.

The committee has also held several private hearings and has received many suggestions from the public. It has also held several private hearings and has received many suggestions from the public. It has also held several private hearings and has received many suggestions from the public.

Respectfully,
 J. J. J.

Saguaro NATIONAL MONUMENT

Tucson, Arizona

May 27, 1945

MEMORANDUM for the Regional Director, Region Three.

There follows a report of activities in Saguaro National Monument for the month of May, 1945:

Weather. The fire danger meter indicated "moderate" the first few days in May. There has been no precipitation, but we arent in "high" yet.

Inspections. Mr. Richey inspected the area May 28, 29 and 30. Dr. Mielke, Bureau of Plant Pathology, made a two and a half day trip on Mica Mt. searching for troubles there. He has been here since early in April studying the Saguaro disease.

NPS Visitors. Miss Story and the Dodge family were here briefly. Ranger Brewer was here one PM with her mother and Nancy Pinkley. Mrs. Eggermayer visited the area one Sunday with some friends. Custodian Bicknell and Mechanic Stonehocker made a trip to Saguaro to help with some of my mechanical problems. Custodian Supernough was out to discuss advisability of bringing a trail crew of Indians.

Projects. Not much accomplished. Without a ranger, and having only one of the two fire guards and an average of two of the 10 laborers allotted, I am just trying to complete some of the pre-fireseason projects before the fire season is passed. With high school closing this week and most roundups ending next week, I have hopes of having more help next month.

Publicity. Word was received that some ship has been named "Saguaro".

Personnel. Custodian Wilson departed for Navajo early this month. Lennard C. Hill entered on duty as Assistant Fire Guard, May 1.

Flagstaff, Arizona

May 27, 1945

MEMORANDUM for the Regional Director
Region Three

There follows the report of activities in Sunset Crater National Monument for May, 1945.

Visitors this month, 95; travel year to date,

One trip was made to Sunset Crater National Monument for purpose of patrol and for clean up of grounds. Roads are in fair condition.

Ranger Dair was shown the Monument including Ice Caves and Lava Flow. Also became acquainted with fire roads and trails.

The signs at the Monument need refinishing, otherwise things seem to be in good condition.

RECEIVED FOR THE NATIONAL MONUMENT
October 1919

These follow the report of activities in many other National
Monuments for 1919.

Station this week, in many cases as well.

One of the most important features of the National Monument for 1919
of which the Department is proud. It is the fact that the
Department has been able to keep the National Monument for 1919
and also to keep the National Monument for 1919. The
The signs of the National Monument are well known, and the
sign is in good condition.

May 25, 1945.

Memorandum for the Regional Director,
Region Three.

There follows the report of activities in Tonto National Monument, for
May, 1945.

Visitor Statistics: Cars, 79.

Instate, 38.

Outstate, 41.

Information, 10.

Armed Forces, 23.

States represented, 16.

Visitors, 278.

Ruins trips, lower, 41: people, 152.

Ruins trips, upper, 4: people, 7.

Museum groups, 71: people, 254.

Personnel time, Custodian, 76.8 hrs.

A sharp drop in the visitor count this month. An increasing number are coming after hours, they can fish all day in the hot sun but can't climb to the ruins until it is cool.

CON OFF.

Park Service Visitors: Assistant Regional Director Richey came in on May 5, staying as long as possible and getting through an amazing amount of work in the short time he was here.

Regional Naturalist Dodge came on May 15, for a brief visit and as many different phases of interpretive work were talked over as there was time for. Mr. Charles, of the Forest Service, called briefly on May 6.

Weather: No moisture this month, but have had an almost continuous wind which has shriveled the flowers and dried the heavy growth of grasses into a serious fire hazard.

General: Three trips to Globe have been necessary this month. The gas tank on the pickup had to be cleaned out about two gallons of sand as well as other debris removed and was found to be about to disintegrate from rust, so new tank was ordered and another trip made for installation. One trip made for bu-gas. The exterior of the quarters has been painted, also the bridge, picnic table, windows and door frames of museum and rest rooms. Doors, inside of shutters and inside window frames have been oiled.

The water line plugged up and we were without water for several days. The spring was bailed out twice, thoroughly cleaned in the process, and considerable of Cholla Canyon dug up, searching for a union or unions in the line. None were found so line was cut and plug found with wire. Five days time was spent on the job.

The water line back of the house has been lowered and is ready to be covered in. Three days were spent on that.

The removal of dry grass and weeds from around the buildings is carried on as time permits. It is a difficult task this year as there is an endless amount of both.

Over.

REPORT OF THE SUPERVISOR
FOR THE YEAR 1914.

During the year 1914, the work of the monument has been carried on in accordance with the plan of work approved by the Department of the Interior. The work has been divided into three main branches, namely, the preservation of the monument, the improvement of the monument, and the education of the public.

The first branch of the work is the preservation of the monument. This branch includes the work of the ranger, the work of the caretaker, and the work of the janitor. The ranger is responsible for the general supervision of the monument, the caretaker is responsible for the maintenance of the buildings, and the janitor is responsible for the cleaning of the buildings.

The second branch of the work is the improvement of the monument. This branch includes the work of the architect, the work of the engineer, and the work of the carpenter. The architect is responsible for the design of the buildings, the engineer is responsible for the construction of the buildings, and the carpenter is responsible for the construction of the furniture.

The third branch of the work is the education of the public. This branch includes the work of the lecturer, the work of the guide, and the work of the interpreter. The lecturer is responsible for the giving of lectures, the guide is responsible for the leading of tours, and the interpreter is responsible for the interpretation of the monument.

Tumacacori

NATIONAL MONUMENT

Nogales, Arizona

May 26, 1945

MEMORANDUM for the Regional Director,
Region III.

There follows a report of activities at Tumacacori National Monument for May 1945.

WEATHER: (From the gremlin on the roof) clear and warmer! Even the weeds are suffering from lack of moisture. Fortunately, (thanks to Gene) we have plenty of water for irrigation. Just about all of the flowers and shrubs have recovered from the damaging freeze of Apr. 3rd. The patio is really beautiful.

TRAVEL: During this report period, 584 visitors came to Tumacacori in 176 cars. Although this is a decrease from last months figures, it is an increase of 195 visitors over May 1944. This fiscal year to date shows an increase of 616 over last fiscal year to date. Number of members of the Armed Forces visiting Tumacacori this report period, 18.

INTERPRETIVE SERVICE: A total of 102 trips were made through the mission and 103 through the museum; 474 visitors attended these trips; 110 informational contacts were made.

Total mission time: 2750 minutes (Reed 1100 minutes, Brewer 1650 minutes).
Total museum time: 2205 minutes (Reed 965 minutes, Brewer 1240 minutes).
Number of tickets sold 390; annual permits sold 1; number of taxes collected on persons not required to purchase tickets, 24.

PARK SERVICE VISITORS: Charles A. Richey, Assistant Regional Director, Apr. 30 - May 1st., Gene Stonehocker, Mechanic, SWNM, May 7 - 8, Natt N. Dodge, Associate Naturalist, Mrs. Dodge and Judy, May 10, Miss. Isabelle Story, Editor in Chief, Director's Office, Chicago, May 10.

MAINTENANCE: During Mechanic Stonehookers short visit much in the way of maintenance was accomplished. The water system was checked and put in order. Air pressure which had built up in the tank was reduced to normal and a valve installed and complete instructions given to the acting custodian so that it will be a comparatively simple matter to maintain proper water-air pressure in the tank for proper operation. The thermostat switch was adjusted to increase the pressure in the tank greatly improving the flow of water. The toilet bowl in the custodians house was removed, unstopped and re-installed. The garage doors were oiled and adjusted until super-human strength is no longer needed to operate them. The water cooler which cools the drinking water for visitor use was removed to Coolidge for repair. The furnace was thoroughly checked and shut off for the summer. Fuel oil has been ordered to fill the tank to capacity to prevent condensation of water in the tank. This should arrive in a few days after which the intake will be sealed with white lead. An attempt was made to get into the attic to adjust the counterbalance on the roll-up metal curtain of the view window. It was found that no opening was left and it is not possible

view thereof. It was found that the proposed new rate was not excessive and that it was reasonable and just and it is not necessary for the Commission to set aside the existing rate of 10 cents per gallon. The Commission hereby orders that the existing rate of 10 cents per gallon be maintained. It is further ordered that the Commission's decision be entered on the record of the proceedings and that the Commission's decision be published in the official gazette.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

to get to the weights to adjust them.

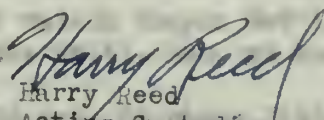

OTHER ACTIVITIES: Weed cutting, planting and transplanting and watering of trees, flowers and shrubs has taken a large portion of our time during the month.

A trip was made to Casa Grande National Monument to get the Relief Ranger panel truck which has been in the shop for repairs. A paint sprayer and miscellaneous tools were brought down from Casa Grande.

Some of the paint to be used in decorating the office, lobby and museum has been purchased. A suitable blue paint for the museum and the mission brick color for wainscoat has not been found at the time this is written. A trip will be made to Tucson next Monday and it is hoped that the proper paint can be purchased.

PROJECTS FOR NEXT MONTH: Re-decorating of the office, lobby and museum is still first on the list. This will be done just as soon as all necessary materials are obtained.

Trips will be made to Chiricahua, Saguaro, Tonto, Casa Grande and Organ Pipe to get much needed photographs. The trips will be scheduled as discussed with Mr. Richey and pictures will be made at Tombstone and San Xavier Mission when enroute to the various monuments. The schedule will be planned so that I will not be away from Tumacacori long at a time and will keep in close contact with Ranger Brewer while away.

Harry Reed
Acting Custodian.

to get to the weights to adjust them.

OTHER ACTIVITIES: Need section, planning and translating and referring of plans, drawings and studies has taken a large portion of our time during the month.

A trip was made to Green Grove National Monument to get the relief lantern and truck which was down in the shop for repairs. A pump sprayer and miscellaneous tools were brought down from Green Grove.

Some of the paint to be used in decorating the office, lobby and museum has been purchased. A suitable blue paint for the museum and the window color for window was not found at the time this is written. A trip will be made to Jackson next Monday and it is hoped that the proper paint can be purchased.

REMARKS FOR NEXT MONTH: Re-decorating of the office, lobby and museum is still first on the list. This will be done just as soon as all necessary materials are obtained.

Trips will be made to Garrettsville, Toledo, Lima, Green and Green Grove to get much needed photographs. The trip will be scheduled as arranged with Mr. Henry and pictures will be taken at Green Grove and the latter mission when enroute to the various monuments. The schedule will be planned so that I will not be away from home for a long time and will keep in close contact with Ranger Brown with ease.

Henry
Chief, Garrettsville

-----TUZIGOOT----- NATIONAL MONUMENT

-----CLARKDALE, ARIZONA. P.O. BOX NO. 36-----

-----May 26,-----, 1945-----

There follows the report of activities in Tuzigoot National Monument for May 1945, by Everett W. Bright, Custodian.

Visitors this month 286; travel year to date 2074.

Weather. There were 20 clear days - 8 partly cloudy - 2 cloudy - 1 day of rain, which fell on May 6. Strong winds on April 26 and 30 and May 2, 3, 6, 11, 16, 17, 18, 19, 20 and 23. Strong winds and heavy dust storms prevailed throughout the month.

Travel. Travel this month was slightly lower than for the previous month of April. Decrease in travel was due probably to the heavy dust storms in this area. Instate visitors numbered 238 and outstate visitors 48. There were a total of 87 cars with instate numbering 68 and outstate 19. There were 17 members of the Armed Forces who visited the monument. A total of 7 visitors walked out to the monument.

N.P.S. Visitors. Custodian Baxter of Walnut Canyon Nat'l. Mon. and Custodian Hastings of Montezuma Castle Nat'l. Mon. on April 28.

Guide and Contact Service. Museum: 26 hrs, 25 mins; Field: 20 hrs, 35 mins. Total contact time of 47 hrs, 00 mins.

Personnel Time. Custodian Bright 41 hrs, 50 mins; Custodian Hastings 2 hrs, 40 mins; Ranger Leding 2 hrs, 30 mins. Hastings relieved on May 8 and 15. Leding relieved on May 1 and 22.

Maintenance and Administration. Removed entire length of fence, fence posts and gate north of museum building, also removed and hauled away the three stone and concrete columns on entrance road to parking area. Relettered and repainted all "Tuzigoot Monument" signs on entrance road to monument area and on (Alternate Highway 89) leading to Jerome and Flagstaff. Removed all weeds from floors of rooms in ruins and made several minor repairs on walls in ruins. The ruins as a whole is in good shape and in a very presentable manner. Received and checked several shipments of Southwestern National Monuments publications. Walked the water line to Clarkdale twice but found no leaks. Also patrolled monument boundary fence and made several minor repairs. Removed weeds from parking area and area around museum. Incidentally the weed problem at this monument has been held to a minimum due to extremely dry weather for the last two months. Did maintenance work on U.S. 1-13858. Installed new light bulbs in museum. Many hours was spent cleaning museum of dust and dirt blown in by recent dust storms. Attended to routine office work.

Everett W. Bright
Custodian.

ARMED FORCES USE

Visitors 2415

Visitors 10274

Our April winds have carried on through the entire month of May with heavy winds on numerous days. No rain whatever has made our road problem difficult and the surrounding area from the range standpoint is serious. Many forest fires are being reported daily and several range fires have been reported according to both the Forest and Grazing Services in Alamogordo. Last Sunday winds reached as high as 70 miles per hour were recorded at a nearby recording station. Large pockets were beat out of our road bed in the sands proper and much additional time has been given to this phase of our activity.

Army use has increased materially now that the picnic season is beginning. Two Army picnics of groups of over 500 each visited us last week. Other picnics of equal size are being planned.

Two Army Engineers were in this month on a check of the area to be taken over for some special use. It seems now that we are in the very heart of the new area. I hope co-use is to be allowed, or I fear we will be a monument without any land.

No trips outside routine trips to Alamogordo were made this month. A survey of our Dog Canyon Water is being made soon. All other water sources are low and I want to check ours at a low ebb point.

We were very pleased to have our Chief of Information Isabell Story drop in for a few hours. She accompanied Matt Dodge Regional Naturalist and his family. It has been about six years since Miss Story's last visit and it was sure swell to have her in again.

Chuck Richoy was in for a short visit and considerable progress was made regarding shifts, schedules etc.

The first thing I saw when I stepped out of the car was a vast, white, desolate landscape. The sand dunes were rolling and smooth, like giant waves of white sand. The sky was a pale blue, and the air was still and warm. I felt a sense of peace and solitude that I had never experienced before. The dunes were so close to me, and I could feel the sand shifting under my feet. It was a surreal and beautiful sight.

As I walked further into the dunes, I noticed that the sand was not uniform in color. There were patches of darker sand, and some areas where the sand was more compact. I was curious to see what would happen if I walked on these different patches of sand. I decided to try it, and I found that the sand was indeed different in texture and color.

Monthly Narrative Report.

-Thousand, Island

Ranger Steel was called again for his pre-induction physical and passed with flying colors. However he is still with us waiting orders.

Joe and Irv have had a Son and Son-in-law home on leave from the Navy. Two other Sons are yet in active Pacific duty with yet another in Germany with the Army.

Arrangements have been made for a seasonal Ranger to report on June 1. We certainly hope to make some building repairs and other neglected items.

We in New Mexico were very pleased to hear President Truman had appointed Clinton P. Anderson our Representative in Congress to his cabinet as Secretary of Agriculture. Mr. Anderson has visited our area several times and has always been high in his praise of its beauty.

John M. Davis
Custodian.

~~Flagstaff, Arizona~~

May 27, 1945

MEMORANDUM for the Regional Director
Region Three

There follows the report of activities in Walnut Canyon National Monument for May, 1945.

Visitors this month, 547; travel year to date, 2,014.

GENERAL: Weather this month has been dry and windy. Roads are in good condition.

Natt Dodge, Associate Naturalist spent the morning of May 17 at this Monument, taking pictures and discussing interpretive problems with the Custodian.

Francis Dahm entered on duty as Seasonal Ranger on May 22.

VISITOR STATISTICS: 547 visitors arrived during the month. Three of these walked out from Flagstaff, 4 arrived on bicycles and 2 by motorcycle. 42 were in uniform of the Armed Services.

I returned from a forest fire one evening to find that a party of 20 girls had set up camp in the picnic area. They stayed for two days and nights. We do not have any over-night camping facilities here, but as there was no one here to tell them otherwise they had already set up their camp. I didn't think it necessary to make them move out after dark.

N.P.S. VISITORS: Natt Dodge, Associate Naturalist, Region Three. Custodian Van Cleave, Wupatki National Monument. Stanley S. Dinsmore, Petrified Forest National Monument.

COOPERATING GOVERNMENTAL AGENCIES: Spent two days during the month on Forest Service Fires. One fire was east of Sunset Crater and the other on Schultz pass. Both of these were large fires and hard to bring under control because of high winds.

MAINTENANCE, IMPROVEMENTS AND NEW CONSTRUCTION: Spent considerable time working on installation of radio hook-ups and wind charger.

Received telephone wire from New Hampshire for guy wires, and strain insulators were purchased from J. Korber & Co. Albuquerque for use in putting up antenna masts at Navajo, Wupatki and Walnut Canyon National Monuments. Material was sent to Navajo and Wupatki National Monuments for making new antenna masts.

Holes were dug for dead man braces to one antenna pole. Both poles are made and painted.

PROJECTS FOR ENSUING MONTH: Continuation of unfinished projects.

Arches

NATIONAL MONUMENT

Moab, Utah

June 28, 1945

MEMORANDUM for the Regional Director, Region Three:

The following is a narrative report for Arches National Monument for the month of June, 1945:

GENERAL: One official visit was made to Aztec Ruins National Monument from June 8th to June 11th, inc. On this trip met Davy and Corky Jones at the Strater Hotel in Durango, Colorado and had an interesting hour's visit with them. They both looked fine and were on their way to the Pine River for some fishing.

The custodian was on sick leave for four hours on June 26th, making a trip to Monticello, Utah for further dental attention.

WEATHER: The wind calmed down considerably this month and the days have been much warmer. The unusually cold spring has held back the crops in this section to a great extent. A heavy rain fell on June 9th and 10th.

N.P.S. VISITORS: Mr. Coffman and Mr. Ratcliff paid us a short but enjoyable visit on May 31st. They took a quick look at the Windows section.

TRAVEL: Travel dropped very much this month with only 40 people as compared with 120 people for the same month last year. No reason can be advanced for this great difference. States represented were California, Colorado, Florida, Idaho, Illinois, New Mexico, Oklahoma and Utah. One visitor registered from Havana, Cuba.

INTERPRETIVE SERVICES: Four trips were taken to the Windows section with parties totalling 10 people and one party of four people was accompanied to the Delicate Arch. Several contacts were made with parties at both headquarters and the Windows. The total contact time was 84½ hours.

ROADS: Through the cooperation of the State of Utah the Windows road was given a face lifting on May 31st and June 1st. The State motor patrol made the round trip from the highway to the parking area and with their dump truck we were able to haul several loads of shale to the worst spots on the road. Two additional days were spent removing loose rock and it was in good condition until the storm of June 9th and 10th, which caused small washouts in several places. Two more days were spent in filling in a part of these washed places. The road down Salt Valley is in good condition but

Recommendation for the National Monument, Section 17

The following is a narrative report for the National Monument for the month of June, 1944:

GENERAL: The National Monument was made to protect the National Monument from June 1st to June 1st, 1944. In this report we have given a summary of the National Monument in June, 1944, and we have given a summary of the National Monument in June, 1944. They both show that we have made a good way to the National Monument for June 1944.

The National Monument was made to protect the National Monument from June 1st to June 1st, 1944. In this report we have given a summary of the National Monument in June, 1944, and we have given a summary of the National Monument in June, 1944.

GENERAL: The National Monument was made to protect the National Monument from June 1st to June 1st, 1944. In this report we have given a summary of the National Monument in June, 1944, and we have given a summary of the National Monument in June, 1944.

GENERAL: The National Monument was made to protect the National Monument from June 1st to June 1st, 1944. In this report we have given a summary of the National Monument in June, 1944, and we have given a summary of the National Monument in June, 1944.

GENERAL: The National Monument was made to protect the National Monument from June 1st to June 1st, 1944. In this report we have given a summary of the National Monument in June, 1944, and we have given a summary of the National Monument in June, 1944.

GENERAL: The National Monument was made to protect the National Monument from June 1st to June 1st, 1944. In this report we have given a summary of the National Monument in June, 1944, and we have given a summary of the National Monument in June, 1944.

GENERAL: The National Monument was made to protect the National Monument from June 1st to June 1st, 1944. In this report we have given a summary of the National Monument in June, 1944, and we have given a summary of the National Monument in June, 1944.

June 24, 1945.

MEMORANDUM for the Regional Director,
Region Three, National Park Service.

There follows the report of activities for Aztec Ruins National Monument for June 1945.

WEATHER CONDITIONS: Summer has arrived with a high temperature recording of 90 degrees on the 22nd. No rainfall has been recorded.

SPECIAL ACTIVITIES: Custodian to Farmington re: ditch project and labor statistics on June 1 and 5. Lassiter and Allen in 6/12. Boyland from Mesa Verde in 6/19 to check power shovel, left 6/21.

MAINTENANCE: Ruins stabilization work has been continued with considerable progress evidenced, inasmuch as our ceiling has been limited to 2 employees. The ditch project has been held up considerably because of our inability to obtain a power shovel operator. Only a few feet of ditch line has been dug. A new operator is expected within the week, when it is hoped operations will be continued satisfactorily.

INTERPRETIVE SERVICES: There were 394 visitors conducted on 100 trips thru the museum and 346 visitors in 88 parties thru the ruins.

INCREASE OR DECREASE IN TRAVEL: There were 394 visitors in 110 cars from 20 states and China, including 16 members of the armed forces. This is approximately 72% of the travel for June 1944. Of the 394 visitors, 237 purchased tickets amounting to \$59.25, which with tax plus tax on 51 children and 2 waivers, the total collections amounted to \$73.75. Sixteen members of the armed forces were admitted without charge.

VISITORS: M. H. Soyster, Petroleum Technologist, and M. A. Shellhardt, Gas Engineer, both of the Department of the Interior, USGS, visited the area on the 19th.

Proposed activities for July: Continued activity on the drainage ditch project is expected to take up the major portion of work assignment.

BANDELIER NATIONAL MONUMENT

SANTA FE, NEW MEXICO

June 30, 1945.

MEMORANDUM for the Regional Director, Region Three.

There follows a report of activities at Bandelier National Monument for the period ending June 30, 1945.

Weather Conditions.

With the exception of a few showers which brought traces of moisture we have had no precipitation since April. The weather was unseasonably cold the first part of the month but hot during the last half. High of 96 was recorded June 24th, low of 36 on the 5th. High winds have prevailed and the humidity has been low.

Fire Danger has been high all month and many serious fires have occurred on the Forest and nearby Indian Reservations. Four fires occurred on the monument.

Special Activities.

Seventeen days of the month were spent in the Regional Office assisting with monument work during Mr. Richey's assignment in the Director's office.

Maintenance.

More trouble was caused by sewer stoppage. A great deal of the main line had to be dug out and repaired beneath the pavement of the parking area. New wire was purchased and 2½ miles of our telephone line was rebuilt. The line to the Checking Station still remains to be built after being totally destroyed by the storm in April. About a third of our roofs were coated with asphalt and all canals and weak places plastered with plastic asphalt cement. The remainder of the fire trails were maintained by the Roads and Trails crew and Fire Guards. One fourth mile of new telephone line was built and a new telephone installed in Residence #4. The new phone connects with our protection system net work and enables men in the field to call in at any time during the day or night. Previously phone calls could be received only while some one was on duty at the office. The A.C. power plant went down June 18th and is still out of the running awaiting repair parts. Some work had to be done on the D.C. plant.

[illegible]

Interpretive Service.

485 visitors were conducted on ruins trips in 46 parties. Ruins trips, museum contacts, orientation lectures and others accounted for a total of 1703 contacts. The power plant was out of operation part of the month so full use of the museum could not be had.

Visitors.

Forest Supervisor Lee Wang, Santa Fe, National Forest.

National Park Service Visitors: Alvina Zimmerman,

Mr. & Mrs. Willard Bradley

Mr. & Mrs. G. W. Allen

Mr. & Mrs. Wally Bressert.

All of Region Three.

Custodian & Mrs. Sowers, Chaco Canyon National Monument.

Travel.

Travel continues to increase particularly on Sundays when our facilities are used almost to capacity. 1265 people came in 276 cars. 28 hiked in. 320 men in uniform visited the area.

Forest Fire Protection.

Four fires during the month burned a total of five acres. One fire on the Otowi Section was man caused and the three on the main section were started by lightning. The three fires on the main section of the monument broke within 18 hours. The first was started by a dry lightning storm the night of June 24th. It was controlled before it could spread. The other two were started by lightning about 4:00 P.M. the 25th in some of the roughest and most inaccessible of the back country south of Capulina. Altho one threatened to be bad it was controlled before 4:00 A.M. of the 26th. Regional Forester Ratcliff was notified of conditions the evening of the 25th and immediately came out. He and the custodian started to the two fires at 9:30 P.M. but did not reach them until 4:15 A.M. the following morning after an all night hike. Hard work under the most trying conditions on the part of the fire guards and all personnel saved us from having a disastrous fire. Some of the men worked for 48 hours without sleep or rest getting these three fires controlled. As conditions are still critical, the next electric storm will cause more trouble unless we get rain.

Personnel.

Ranger Hendron was on sick leave a week due to a back injury. Mrs. Hendron was taken seriously ill the 24th and rushed to an Albuquerque hospital where she underwent an operation. At last report her condition was reported very critical.

Interpretive Services.

433 visitors were contacted on various trips in 1973. These trips were conducted on various trips in 1973. The purpose of these trips was to collect data on the distribution and abundance of the species. The data collected during these trips are presented in the following table.

4702418

1. The first of these is the fact that the
 2. Government has been unable to secure the
 3. necessary funds to carry out its policy.
 4. The second is the fact that the
 5. Government has been unable to secure the
 6. necessary funds to carry out its policy.
 7. The third is the fact that the
 8. Government has been unable to secure the
 9. necessary funds to carry out its policy.
 10. The fourth is the fact that the
 11. Government has been unable to secure the
 12. necessary funds to carry out its policy.

1999

Travel conditions in interior particularly on highways were
not favorable and should be considered. 1953 road to
SVE area - 25 miles in 1953 was in better condition than 1952.

REPORT OF THE

Four fires during the month burned a total of 144 acres. One fire on the same location was caused and the three on the same location were started by lightning. The three fires on the same location of the same month were started by lightning. The first was started by a lightning strike on the night of June 24th. It was extinguished before it could spread. The other two were started by lightning about 4:00 P.M. on June 25th on some of the highest and most inaccessible of the back country south of Capital Hill and threatened to be lost if not extinguished before 4:00 P.M. on the 26th. National Forest Service was notified at Washington and working on the 26th and immediately came out. We met the rangers at night on the 26th at 4:00 P.M. but did not leave then until 11:15 P.M. The following morning about 11:00 A.M. we left again and went to the fire location on the east of the river and all parties met again on the river at the same place and all parties met again on the river at the same place. One of the men worked for 48 hours without sleep or rest during these three consecutive days. The conditions are still critical, the same amount of rain will cause some trouble unless we are lucky.

Memorandum for the Regional Director, Tucson Area

The following is a report on activities at Camp de Shelby National Monument during the month of June, 1942.

Weather

The month has been extremely dry with only 4.4 inches of precipitation. High winds have been prevalent throughout the month and have helped to keep it free of the heavy periods of rainfall. Maximum temperatures have been mostly above 80 degrees, the highest being 94. Night time minimums have been mostly below 60 degrees, the lowest being 48. The day for the period was 70 degrees on June 14.

Administration

No trips were taken by the custodian this month. The 1000 acre and 1000 acre in the monument of making a new one. The Regional Director, Tucson Area, has been in the monument for the past several days. The Regional Director, Tucson Area, has been in the monument for the past several days. SOUTHWESTERN NATIONAL MONUMENTS
Canyon de Chelly

COOLIDGE, ARIZONA

Chinle, Arizona

June 26

46

MEMORANDUM for the Regional Director, Region three

The following is a report on activities at Canyon de Chelly National Monument during the month of June, 1945.

Weather

The month has been extremely dry with only .3 inches of moisture. High winds have been prevalent throughout the month and have helped to make it one of the driest periods on record. Maximum temperatures have been mostly above 85 degrees, the highest being 94. Nights have remained cool with minimum temperatures generally below 45. The low for the period was 20 degrees on June 1.

Administration

Two trips were taken by the custodian this period. One to Mancos, Colorado and vicinity in the interest of hiring a man for Saguaro National Monument, and one to Chaco Canyon National Monument relative to the wage survey. Inspection trips have been made in both canyons at regular intervals, and much time has been spent in office work connected with the end of the Fiscal year.

Maintenance

Road and trail repair was carried on as time permitted but with the high winds and dry material it is difficult to keep the holes in the road filled. Roads and trails are both in the best condition they have been for quite a long time.

The Storage Hogan was repaired and a new roof coating applied. The drainage ditches around headquarters were cleaned and some of the rooms in the custodian's quarters were repainted and touched up.

Visitors

George A. Grant in company with Navajo Service officials visited the area on June 4. He was taking photographs of Soil and Moisture work done in the Canyon by the Navajo Service.

Decrease in Travel

There were 68 visitors to the area in 17 cars. Last year we had 140 visitors but we also had a moving picture being filmed in the vicinity. This months travel showed visitors from nine states.

THE NEW YORK PUBLIC LIBRARY
ASTOR LENOX TILDEN FOUNDATION
455 FIFTH AVENUE
NEW YORK 17, N. Y.

Interpretive Service

Ten parties comprising 40 visitors were conducted to various points of interest by the Custodian. The Multiplex display was removed from the hogan and mounted on the headquarters porch so that visitors might get the full benefit of this interpretive device.

Inspections

Regional Forester Ratcliff made an inspection of the area on June 22.

Concessioners

L.H. (Cozy) McSparron the operator of Thunderbird Ranch is trying to sell out. He is asking \$55000.00 for his complete set-up and several prospective buyers have been out to look the place over.

Research and Observation

On June 19, at 9:20 P.M. a huge meteor was observed traveling in a northerly direction. Approximately 2 minutes after it passed overhead the country was rocked by an explosion that was felt for fifty miles. The meteor was seen to split in two and one fragment apparently hit the earth some where in the vicinity of Rough Rock or exploded in the air.

OF THE CUSTODIAN

Memorandum,

There follows a report of the activities at Capulin Mountain National Monument, for the month of June 1945.

Weather has been very very dry throughout the month and still at this writing no moisture in sight, Cool weather has prevailed with cold nights and much winds.

The Custodian has been kept at the Garage most of the time during the month but meets most of the visitors and has been able to give them literature and pictures of the Volcano with brief explanations about the Monument.

have been kept in only fair condition account of the extreme dry weather. We always have plenty of trouble keeping the chuck holes out of the road in dry weather much soil has been hauled from around the base up along the road filling the broken crust on the Volcano proper road.

The Pickup at this Monument was overhauled and four of the tires were Sectionized and recapped, this putting the pickup in good condition again.

Homer J. Farr,
Custodian.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
CASA GRANDE NATIONAL MONUMENT
COOLIDGE, ARIZONA

June 26, 1945.

MEMORANDUM for the Regional Director,
Region Three.

The following is the narrative report for Casa Grande National Monument for June, 1945:

Weather: The weather has been pleasant for this time of the year, with continued cool nights through out the report period, the low read- of 49 degrees was recorded the 1st. However, the days are definitely warmer with our high temperature occurring on the 20th reading 112 degrees. No precipitation. On the 19th a falling meteor was observed during dinner at approximately 8:40 PM. It seem to be a great ball of fire, tail trailing, greenish yellow color, traveling low in a northwesterly direction when it pasted over this area.

Visitors: The warmer weather should slow our travel down but this year we have had an increase of 86 persons over last month, as well as an increase over last year.

Interpretive Service: Our visitors for the month totalled 883, with 469 of this number taking the guided trip through the ruin, spending approximately 43 minutes in 100 different groups, also 284 were conducted through the museum in 75 parties, averaging 25.86 minutes per group. An additional 414 were checked in as unattended visitors; of this number 121 used our picnic grounds.

Ticket sales were 278 as compared with 214 for last year during June, an increase of approximately 29 per cent.

1998, 1999, 2000, 2001, 2002, 2003, 2004, 2005, 2006, 2007, 2008, 2009, 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017, 2018, 2019, 2020, 2021, 2022, 2023, 2024, 2025, 2026, 2027, 2028, 2029, 2030, 2031, 2032, 2033, 2034, 2035, 2036, 2037, 2038, 2039, 2040, 2041, 2042, 2043, 2044, 2045, 2046, 2047, 2048, 2049, 2050, 2051, 2052, 2053, 2054, 2055, 2056, 2057, 2058, 2059, 2060, 2061, 2062, 2063, 2064, 2065, 2066, 2067, 2068, 2069, 2070, 2071, 2072, 2073, 2074, 2075, 2076, 2077, 2078, 2079, 2080, 2081, 2082, 2083, 2084, 2085, 2086, 2087, 2088, 2089, 2090, 2091, 2092, 2093, 2094, 2095, 2096, 2097, 2098, 2099, 2100, 2101, 2102, 2103, 2104, 2105, 2106, 2107, 2108, 2109, 2110, 2111, 2112, 2113, 2114, 2115, 2116, 2117, 2118, 2119, 2120, 2121, 2122, 2123, 2124, 2125, 2126, 2127, 2128, 2129, 2130, 2131, 2132, 2133, 2134, 2135, 2136, 2137, 2138, 2139, 2140, 2141, 2142, 2143, 2144, 2145, 2146, 2147, 2148, 2149, 2150, 2151, 2152, 2153, 2154, 2155, 2156, 2157, 2158, 2159, 2160, 2161, 2162, 2163, 2164, 2165, 2166, 2167, 2168, 2169, 2170, 2171, 2172, 2173, 2174, 2175, 2176, 2177, 2178, 2179, 2180, 2181, 2182, 2183, 2184, 2185, 2186, 2187, 2188, 2189, 2190, 2191, 2192, 2193, 2194, 2195, 2196, 2197, 2198, 2199, 2200, 2201, 2202, 2203, 2204, 2205, 2206, 2207, 2208, 2209, 2210, 2211, 2212, 2213, 2214, 2215, 2216, 2217, 2218, 2219, 2220, 2221, 2222, 2223, 2224, 2225, 2226, 2227, 2228, 2229, 2230, 2231, 2232, 2233, 2234, 2235, 2236, 2237, 2238, 2239, 2240, 2241, 2242, 2243, 2244, 2245, 2246, 2247, 2248, 2249, 2250, 2251, 2252, 2253, 2254, 2255, 2256, 2257, 2258, 2259, 2260, 2261, 2262, 2263, 2264, 2265, 2266, 2267, 2268, 2269, 2270, 2271, 2272, 2273, 2274, 2275, 2276, 2277, 2278, 2279, 2280, 2281, 2282, 2283, 2284, 2285, 2286, 2287, 2288, 2289, 2290, 2291, 2292, 2293, 2294, 2295, 2296, 2297, 2298, 2299, 2300, 2301, 2302, 2303, 2304, 2305, 2306, 2307, 2308, 2309, 2310, 2311, 2312, 2313, 2314, 2315, 2316, 2317, 2318, 2319, 2320, 2321, 2322, 2323, 2324, 2325, 2326, 2327, 2328, 2329, 2330, 2331, 2332, 2333, 2334, 2335, 2336, 2337, 2338, 2339, 2340, 2341, 2342, 2343, 2344, 2345, 2346, 2347, 2348, 2349, 2350, 2351, 2352, 2353, 2354, 2355, 2356, 2357, 2358, 2359, 2360, 2361, 2362, 2363, 2364, 2365, 2366, 2367, 2368, 2369, 2370, 2371, 2372, 2373, 2374, 2375, 2376, 2377, 2378, 2379, 2380, 2381, 2382, 2383, 2384, 2385, 2386, 2387, 2388, 2389, 2390, 2391, 2392, 2393, 2394, 2395, 2396, 2397, 2398, 2399, 2400, 2401, 2402, 2403, 2404, 2405, 2406, 2407, 2408, 2409, 2410, 2411, 2412, 2413, 2414, 2415, 2416, 2417, 2418, 2419, 2420, 2421, 2422, 2423, 2424, 2425, 2426, 2427, 2428, 2429, 2430, 2431, 2432, 2433, 2434, 2435, 2436, 2437, 2438, 2439, 2440, 2441, 2442, 2443, 2444, 2445, 2446, 2447, 2448, 2449, 2450, 2451, 2452, 2453, 2454, 2455, 2456, 2457, 2458, 2459, 2460, 2461, 2462, 2463, 2464, 2465, 2466, 2467, 2468, 2469, 2470, 2471, 2472, 2473, 2474, 2475, 2476, 2477, 2478, 2479, 2480, 2481, 2482, 2483, 2484, 2485, 2486, 2487, 2488, 2489, 2490, 2491, 2492, 2493, 2494, 2495, 2496, 2497, 2498, 2499, 2500, 2501, 2502, 2503, 2504, 2505, 2506, 2507, 2508, 2509, 2510, 2511, 2512, 2513, 2514, 2515, 2516, 2517, 2518, 2519, 2520, 2521, 2522, 2523, 2524, 2525, 2526, 2527, 2528, 2529, 2530, 2531, 2532, 2533, 2534, 2535, 2536, 2537, 2538, 2539, 2540, 2541, 2542, 2543, 2544, 2545, 2546, 2547, 2548, 2549, 2550, 2551, 2552, 2553, 2554, 2555, 2556, 2557, 2558, 2559, 2560, 2561, 2562, 2563, 2564, 2565, 2566, 2567, 2568, 2569, 2570, 2571, 2572, 2573, 2574, 2575, 2576, 2577, 2578, 2579, 2580, 2581, 2582, 2583, 2584, 2585, 2586, 2587, 2588, 2589, 2590, 2591, 2592, 2593, 2594, 2595, 2596, 2597, 2598, 2599, 2600, 2601, 2602, 2603, 2604, 2605, 2606, 2607, 2608, 2609, 2610, 2611, 2612, 2613, 2614, 2615, 2616, 2617, 2618, 2619, 2620, 2621, 2622, 2623, 2624, 2625, 2626, 2627, 2628, 2629, 2630, 2631, 2632, 2633, 2634, 2635, 2636, 2637, 2638, 2639, 2640, 2641, 2642, 2643, 2644, 2645, 2646, 2647, 2648, 2649, 2650, 2651, 2652, 2653, 2654, 2655, 2656, 2657, 2658, 2659, 2660, 2661, 2662, 2663, 2664, 2665, 2666, 2667, 2668, 2669, 2670, 2671, 2672, 2673, 2674, 2675, 2676, 2677, 2678, 2679, 26

The weather has been pleasant for the last few days, with occasional cool nights. The temperature has been in the 60s and 70s, with a high of 75 and a low of 55. The wind has been light and variable. The humidity has been moderate. The overall weather has been very pleasant.

an income over last year.

[illegible][illegible]

Thus, in addition to approximately 50 per cent.

Office work is not up to date due to the lack of help.

Premium was paid on the Custodian's official bond June 5th.

Cooperation of Other Agencies: The Indian Irrigation Service of Coolidge, Arizona saved the Custodian considerable time in connection with the Wage Rate Survey, information called for in PD-153, by furnishing us a copy of the wage survey they made during March of this year covering the Gila and Salt River Valleys.

They also come to our aid when the water table dropped below the suction pipe in our well. I made arrangements with Mr. Murray to take their well driller off of a drilling job and their equipment to lower our suction pipe into the well another 21 feet. Water is certainly appreciated on the desert at this time of the year.

A trip was made to Florence to contact County Engineer Niscel and Mr. Moorehouse in connection with their request that our west boundary fence be set back 35 feet to provide a rightaway for a county road. Information needed for the Boundary Report.

Personnel: Ranger Shearwood's resignation became effective at the close of the work day May 31. Since that time the custodian has been working seven days a week guide and office work, as well as taking care of the necessary maintenance work.

The papers have been submitted for the transfer of Mrs. J. H. Tovrea from the Weather Bureau, Phoenix, Arizona to the position of park ranger vacated by Mrs. Shearwood.

Leave: Mechanic Stonehocker 8 hours.

James L. Baehr 16 hours.

Utility work is not up to date due to the lack of funds.

Attention was paid to the Government's official bond from 1911.

Cooperation of other agencies: The Indian Investigation Service is

cooperating, which covers the Canadian commission from its connection

with the same body, information called for in 1911-12, in 1912-13,

and as a copy of the same survey that was being made at this time cov-

ering the old and new river valleys.

They also came for our aid when the same body dropped below the

surface of the river, in some places, in some places, in some places.

Some wells drilled out of a drilling 100 feet down to lower

the bottom of the river into the well water 11 feet, water is very much ex-

posed on the surface of the river of the year.

A trip was made to the river to collect some water from the

river, to determine the position of the river, to determine the

position of the river, to determine the position of the river, to

determine the position of the river, to determine the position of

N.P.S. Visitors: Custodian Supernaugh was in on the 1st. for the
semi-trailer to hawl/^{day} to Organ Pipe Cactus. Mechanic Stonehocker had his
Kohler light plant ready for him when he returned the truck on the 11th.;
George and Ranger Shearwood left Coolidge on the 4th, after a few days of
rest visiting their many friends here. Their home address is 704 Central
Avenue, Dunkirk, New York.; Naturalist Caywood stopped in on the 6th. en-
route to Tonto.; the 19th. Custodian Reed brought in his refrigerator to
be overhauled; and the 20th. Custodian and Mrs. Gipe were in from Tonto.

The only excitement to occur this year on the anniversary of V Day
June 6, was a report from Superior, that a Jap balloon had just passed
over town and was headed for Coolidge. A later report corrected the error.

Attached is Mechanic Stonehocker report on the activities in the shop
for June.

A. T. Bicknell,
Custodian.

UNITED STATES
DEPARTMENT OF THE INTERIOR
National Park Service
CHACO CANYON NATIONAL MONUMENT
Bloomfield, New Mexico

June 30, 1945

MEMORANDUM for the Regional Director,
Region Three.

There follows the report of activities in Chaco Canyon National Monument for June, 1945.

VISITORS. A total of ninety-five visitors were contacted at Chaco Canyon during this report period. Of this number, 25 formed 9 parties and were conducted through Pueblo Bonito. There were 21 visitors in 8 parties who were shown the museum. A total of 1720 minutes were spent in contact time. Seventy visitors desired information only.

PERSONNEL TIME. Acting Custodian Sowers: 1535 minutes; seven trips. Ranger Clark: 185 minutes; two trips.

WEATHER. The weather has been very changeable in this vicinity with very cold nights and very hot days. Severe winds and sand storms were noted on eleven days. The maximum of 99 degrees was reached on June 24 and 26. The minimum of 31 degrees occurred on June 1 and 9. Traces of rain fell on June 2, 9, 11 and 21 with precipitation amounting to .05.

N.P.S. VISITORS. Seasonal Ranger Ora M. Clark arrived on June 10. Engineer Bradley spent the night of June 21 at the monument. Custodian Guellet arrived on June 24 and left the same day after missing this custodian who had left on a field trip.

NEWSWORTHY VISITORS. Lt. Cmdr. R.A. Marshall and M.W. Wyans of U.S.C. & G.S., Washington, D.C.

ACTIVITIES. Most of this report period was spent with the Soil and Moisture crew and the Stabilization crew.

The living room floor in the custodian's residence was thoroughly cleaned with Double X, stained with penetrating oil and waxed. Quarter round was obtained, stained and placed around the room.

A storage shed was placed around the gasoline pump. This was painted brown and improved the general appearance around this area.

A door was placed between the office and museum. Twelve windows in this building were weatherstripped and all windows were cleaned. With the help of Ranger Clark, the furniture was rearranged in the office to make room for the plant herbarium case. A screen door was built and installed. The parking area and camp grounds were weeded. The two soda and acid fire extinguishers were recharged.

UNITED STATES
DEPARTMENT OF THE INTERIOR
BUREAU OF LAND MANAGEMENT
WASHINGTON, D. C.

June 10, 1913

Mr. J. M. Smith,
Washington, D. C.

Dear Sir: Please see report of Surveyor General in Charge, District of Columbia, dated June 10, 1913.

Enclosed for you are two copies of a report of the Surveyor General, District of Columbia, dated June 10, 1913, and a copy of a letter from the Surveyor General, District of Columbia, dated June 10, 1913, to the Surveyor General, District of Columbia, dated June 10, 1913.

Very respectfully,
J. M. Smith

The enclosed report of the Surveyor General, District of Columbia, dated June 10, 1913, and the letter from the Surveyor General, District of Columbia, dated June 10, 1913, to the Surveyor General, District of Columbia, dated June 10, 1913, are for your information.

Very respectfully,
J. M. Smith

Very respectfully,
J. M. Smith

The enclosed report of the Surveyor General, District of Columbia, dated June 10, 1913, and the letter from the Surveyor General, District of Columbia, dated June 10, 1913, to the Surveyor General, District of Columbia, dated June 10, 1913, are for your information.

Ranger Clark has been busy collecting plant specimens for the monument plant herbarium case. This will be of great value and importance to both Park Service and interested visitors. He also corrected and filed all specimens on hand.

The dump truck was brought back from Aztec Ruins for use in hauling rock for revetments. New side boards were installed, the tail light and license holder repaired, oil changed and given a grease job. The S.&M. stake truck was greased, oil changed, air filter cleaned, clearance lights repaired, spark plugs cleaned, new fan belt installed and carburetor adjusted. New Battery cables were installed on the S.&M. maintainer.

A trip was made to Aztec to contact the State Highway Department regarding the famous sand pile. It is again in a deplorable condition and it is expected that the state will clear it again in the very near future. The postmasters in Aztec and Bloomfield were contacted in regards to a tube which was mailed in March but never received.

Usual office work was done for both Chaco Canyon and El Morro National Monuments. Contact was established with El Morro on May 28, 29, June 2, 5, 8, 12, and 19. Reception was very poor on June 15 and no contact was made on June 22, 23 and 24.

STABILIZATION WORK. This phase of the work was finished on June 30. Sixty days were spent on the project with a three man crew and totaled 1432 hours of work. Most attention was directed towards keeping out excessive moisture on tops of walls, repairing doorways damaged by visitor usage, and major repairs on several walls and especially to kivas A and D.

Replacing wall veneer, and resetting stones on tops of walls with stabilized mortar will keep out moisture and save many walls that are not yet seriously damaged. All weeds were removed from the three acres of Pueblo Bonito and all drains were opened. During the three month work period, the Custodian spent 95 hours working with the crew.

The three man crew accomplished a great deal during their working period and it is hoped that more stabilization can be done during the next fiscal year.

SOIL AND MOISTURE WORK. All work halted on June 30. Eighty-four days were spent on this project with a 3.25 crew of men and totaled 1552 hours of work. During this working period, 6,000 willows were planted, with the exception of 200 considered too dry. Seventeen spiders were constructed and three revetments were built. Eleven days were spent in hauling rocks for the revetments.

The revetment east of the headquarter area measures 45 feet in length, and 4 feet wide. Three spiders were built here. The revetment at the headquarter area is 50 feet long, and $3\frac{1}{2}$ feet wide. There are 10 spiders in this vicinity. At the west boundary of the monument, the revetment measures 135 feet in length, and $3\frac{1}{2}$ feet in width. Four spiders were built here. The custodian spent 140 hours with the crew during the working period.

The following is a list of the names of the persons who have been identified as having been in contact with the subject of this investigation, and who have been identified as having been in contact with the subject of this investigation, and who have been identified as having been in contact with the subject of this investigation.

1. The first of these is the fact that the Commission has not yet received any information from the Government of the United States regarding the results of its investigation of the activities of the Communist Party in the United States. This is a serious matter, and it is hoped that the Commission will be able to obtain the necessary information in the near future.

1. The first of these is the fact that the majority of the population of the United States is now living in urban areas. This is a result of the process of urbanization, which has been going on since the beginning of the 20th century. The process of urbanization is the movement of people from rural areas to urban areas. This is done for a variety of reasons, including the search for better living conditions, the desire for education, and the need for employment. The process of urbanization has led to the growth of large cities and the decline of small towns. This has had a significant impact on the economy and society as a whole. The majority of the population now lives in urban areas, which has led to the development of a new way of life. This way of life is based on the idea of the city as a center of economic and social activity. The city is now the place where most people live, work, and play. This has led to the development of a new culture, which is based on the values of the city. The city is now the center of the world, and it is the place where the future is being created.

FIELD TRIP. On June 24, a trip was made to Bandelier National Monument to obtain a water tank to be delivered to Gran Quivira National Monument. Spent the night at Bandelier helping to put out a fire. Experience is the best teacher they say - it was. Stopped at Region Three headquarters on the way to Gran Quivira. Arrived at Gran Quivira only to learn that water was becoming very scarce in that vicinity. Went to Corona with Custodian Weidman to load the water tank, and was disappointed to find none available. Was to load some of the Gran Quivira rails for cattle guards for Chaco but discovered the rails measured 24 feet and weighted 90 pounds to the yard. Left the water tank at Gran Quivira and also the rails, and proceeded to Albuquerque to contact the Firestone Company in regards to recapping tires. Picked up the El Morro wind charger at Thoreau and arrived at El Morro for inspection of the area. Returned to Gallup for Chaco supplies and returned to Chaco on June 29.

Ted C. Sowers

Ted C. Sowers,
Acting Custodian.

THESE ARE THE RESULTS OF THE INVESTIGATION OF THE
CASE OF THE DEATH OF THE LATE MR. JAMES
J. HARRIS, OF THE CITY OF NEW YORK, WHO

Region Three.

There follows a report of the activities at Chiricahua National monument for June, 1945.

General. Grader Operator Marble went to California, on sick and annual leave May 17 to June 5 for a checkup on a rather serious throat and stomach condition. He is somewhat improved now but returned today for a second checkup.

Weather Conditions. Weather continues absolutely dry. No moisture whatever has fallen since the night of April 8. There has been lots of wind but weather has been fairly cool for this time of year. 93 above has been the maximum so far.

Maintenance. About four days were spent by the custodian and two days by Grader Operator Marble in trouble chasing on the telephone line and in bringing it up to a better state of repair. Monument road is getting rather rough and dusty but it has been too dry to grade for some time.

Approaches to Monument. Approach roads are all rough and dusty but otherwise are in fair shape.

Cooperating Government Agencies. On June 8 a trip was made to the Portal Ranger Station to get acquainted with the local District Forest Ranger. Fire protection cooperation and telephone problems were discussed in detail. A trip was made with Ranger Nave over sections of the line that could be reached by car including the 5 miles of the combination Park Service - Forest Service line.

Interpretive Service. Requests for interpretive services have been above normal this month. Three church groups visited the Monument for a week or more each. Two of these groups sought Park Service guidance and 2 lantern slide talks, 1 talk and 3 nature trips were made by the Custodian. The Custodian has also accepted an invitation to talk at the Kiwanas Club luncheon in Douglas, July 5.

122 parties of 672 visitors were contacted at the museum.

Research and Observation. Bear tracks were observed on three of the Monument trails by the Custodian. Also close to the lookout by Lookout

June 25, 1915

Memorandum for the National Director,
National Park Service.

There follows a report of the visitation at Chiricahua National
Monument for June, 1915.

General. Greater interest in the monument was shown on this day
than on any other day of the month. The weather was very hot and
the ground was very dry. The monument was visited today by
a large number of people.

Weather conditions. Weather conditions were very hot and
the ground was very dry. The monument was visited today by
a large number of people.

Visitation. About 1000 people were seen at the monument and
the ground was very dry. The monument was visited today by
a large number of people.

Approximate number of people. Approximately 1000 people were seen at the monument
and the ground was very dry.

Comparative visitation. The visitation at the monument was
very high for this time of the year. The ground was very dry
and the weather was very hot.

Interpretive service. The interpretive service was very good
and the ground was very dry. The monument was visited today by
a large number of people.

The service of the monument was very good and the ground was very dry.

Ownership and conservation. The monument was owned by the National Park Service
and the ground was very dry.

Chiricahua N. M. 2

Windes. Mr. Windes, who is an old trapper in these mountains, is of the opinion that bruin will not stay as the Monument area has never been much of a bear country.

Increase in Travel. Travel made a decided increase principally due to the visiting church groups. Travel this month was 811 as compared with 367 last month and 468 for June, 1944. Visitor days showed a wonderful increase with a total of 2423 extra visitor days.

Forest Fire Protection. Forest fire tools have been checked and we hope we're all ready to go if necessary. It can't get any drier so we will be holding our breath when the first more or less dry lightning storms hit. Two backpack pumps and a 10 manness outfit were added to the fire equipment this month. The pumps however were replacements.

Building Fire Protection. An additional supply of fire extinguishers were received and installed. It is now thought that the building and motor fire protection is up to standard.

Clair V. Cooke
Clair V. Cooke,
Custodian.

UNITED STATES
DEPARTMENT OF THE INTERIOR

kindness. Mr. Winder, who is an old prospector in these mountains, is of the opinion that there will not only be the Mountain sheep but also some of a deer country.

Location of Travel. Travel was a decided success principally due to the visiting clubs groups. Travel was made on all the mountains with 307 feet north and 400 feet south. Visitor days showed a wonderful increase with a total of 1425 extra visitor days.

Forest fire protection. Forest fire tools have been checked and we hope we will not have any fire. It was not any fire as we will be holding our breath when the first fire or less big lightning storm hit. The lightning came and a 10 mi. area north was added to the list of places with fire. The same however were not in the list.

Lighted fire protection. An additional supply of fire extinguishers were received and installed. It is now thought that the building and motor fire protection is in the hands of the fire.

EL MORRO NATIONAL MONUMENT
Ramah, New Mexico

June 30, 1945

MEMORANDUM for the Regional Director,
Region Three.

There follows the report of activities in El Morro National Monument for June, 1945.

VISITORS. A total of fifty-four visitors in fifteen cars, were contacted at El Morro during this report period. Fifteen trips were made to the inscription rock.

ACTIVITIES. Radio contact was made with Chaco Canyon on May 28, 29, June 2, 5, 8, 12 and 19. Poor contact was made on June 15, and no contact was established on June 22, 23 and 24.

The living room and dining room floors in the custodian's residence were cleaned, stained with penetrating oil and waxed. The bedroom and hallway floors in the ranger's cabin were cleaned and painted chestnut brown.

The telephone line was completed with the exception of installing the phone in the office. One trip was necessary to Zuni, on the matter of the telephone line.

Two and one-half hours were spent by Laborer-Caretaker Worthen, on a fire just west of the monument. A serious fire on Grazing Service land, took fourteen and one-half hours of fire fighting to bring it under control.

The visitor trail was again weeded.

Acting Custodian Sowers inspected the area on June 28 and 29. Correspondence was placed in the files and administrative matters were discussed.

With the completion of the telephone line, it will now be possible to finish installing the plumbing in the bathroom of the cabin.

Ted C. Sowers

~~Gran Quivira~~----- NATIONAL MONUMENT

~~Gran Quivira, New Mexico~~-----

June 26, 1945

MEMORANDUM for the Regional Director
Region Three

There follows the narrative report of activities at Gran Quivira National Monument for the month of June, 1945:

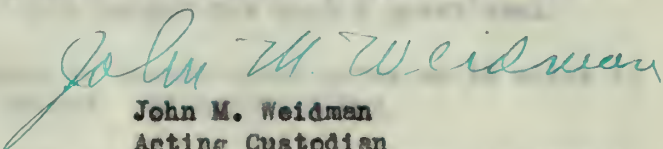

Weather conditions: Due to dry weather highways running east and west are in places covered with silt so that visitors have much trouble in coming into the Monument from the south. One silt bed is around four feet deep, and stretches for almost a mile. Other highways are rough because of dryness. A high of 93 was recorded, which is unusual for this station.

Approaches: State road work is continuous, in preparation for oiling from Mountainair, 24 miles north of Gran Quivira.

Interpretive service: Sixty-two visitors were contacted and guided through the ruins during the month. Many of the visitors had been here some years ago when a small museum occupied one of the rooms of the ruins, and the previous visitors seem to miss the exhibits very much. There seems to be a great deal of macabre interest in some skeletons which used to hang on the museum walls.

Increase in travel: This is the first month for some time during which a complete check could be made, and it is gratifying to report the increase of actual registrations over the estimates of the past few months.

Wildlife activities: There has appeared a large number of rabbits, likely killed by tularemia. Visitors are warned against touching such carcasses as are not immediately found by the personnel here.

Memorandum for the Regional Director
June 19, 1933

Transmit the following report of activities in the National Monument for the month of June, 1933:

General conditions: The weather was generally clear and warm with a few clouds in the afternoon. The temperature was in the 70's and 80's. The wind was light and variable. The water was calm. The fish were plentiful. The birds were also plentiful. The insects were also plentiful. The vegetation was in good condition. The animals were also in good condition. The overall conditions were very good.

Special Agent in Charge: The following report was received from the Special Agent in Charge of the National Monument for the month of June, 1933.

General conditions: The weather was generally clear and warm with a few clouds in the afternoon. The temperature was in the 70's and 80's. The wind was light and variable. The water was calm. The fish were plentiful. The birds were also plentiful. The insects were also plentiful. The vegetation was in good condition. The animals were also in good condition. The overall conditions were very good.

Special Agent in Charge

Great Sand Dunes National Monument
Mosca, Colorado

July 1, 1945

MEMORANDUM for the Regional Director
Region Three

There follows the report of activities at the Great Sand Dunes National Monument for July 1, 1945:

Weather. There was a nice rain the night of the 8th and again the afternoon of the 9th, but with the heavy winds this month and the low precipitation of the winter, the country is very dry.

Special Activities. Representatives of the Reclamation Service have been into the monument twice this month studying the proposed Gunnison-Arkansas water diversion project which would possibly result in a tunnel under Medano Pass. One trip was made up the pass to meet on the parties that walked over the pass from the east slope. There were two engineers and a geologist in the party headed by Mr. Temple, of Pueblo, and Mr. C. E. Homan, of Denver.

Maintenance. This has been the principal activity this month. The oil shed was moved back of the station and fixed so drums could be rolled in easily.

Painting outside woodwork and puttying windows accounted for several days.

All but the northwest part of our fences have been ridden and repaired. The northwest corner will be checked early in July. The temporary drift fence installed last year is holding the stock in good shape this spring.

Approaches to Monument. The approach road, 150, from Highway 17 is very rough. The county has filled in the worst holes the past month but they do not hold. I have a message from the county that they will blade the road and do some work in the near future.

Several days were spent in alternately working on the dump truck and working the motor truck on the road within the monument. That helped the road a great deal.

Highway 17 has just been oiled from Alamosa to Hooper which gives us 15 miles of approach from Alamosa, and 7 miles from Hooper. It surely helps.

Increase or Decrease in Travel. There has been only a slight increase in travel, from 730 to 735, from last month, but there were less military use and more civilian use. The army still has a convoy that camps overnight in the area every week.

Great Sand Dunes National Monument

July 1, 1945

Daily Narrative Report

Fish Cultural Activities. When it was necessary to go to Alamosa I drove on to Jara to the state fish hatchery to see about trout for the Medano. It is planned to help replenish the fish in this stream by stocking this summer. The state will furnish fish.

Public Health. The ticks are still abundant and the acting custodian tries to warn many people who get into the infected areas as possible about the danger of ticks.

Observations. There has been some patches of June grass or cheat grass noted on the monument this spring. This species is not native and is not very desirable.

There are a number of eagles feeding on the abundant rodents of the monument. More over to Mr. and Mrs. Eagle!

There are two families of blue birds at the station, one in the back porch and one in the front. While painting in the front of the house, I was able to observe the birds for long stretches at a time. The male and female would average 10 insects or worms each per hour from daylight until dark; a lot of pests were destroyed in a day's time.

July Narrative Report

East Point Station. When it was necessary to go to Atlantic I drove on the left in the Atlantic highway to see about front for the station. It is planned to help maintain the fish in this station by stocking this station. The state will furnish fish.

Public Health. The time was still necessary and the station created in order to work with people who get into the infected areas in connection with the station of fish.

Observations. There have been some patches of these fish or about areas noted on the ground. This station is not active and is not very desirable.

There are two patches of blue birds at the station. One in the back porch and one in the front. This station is the first of the station. I was able to observe the fish for long distances at a time. The birds and fish are in various positions or areas and the fish are very active and a lot of water was observed in a day's time.

DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
SOUTHWESTERN NATIONAL MONUMENTS

~~COOLIDGE, ARIZONA~~
Montezuma Castle National Monument
Camp Verde, Arizona

June 24, 1945.

MEMORANDUM for the Regional Director, Region Three.

There follows the monthly report of activities at Montezuma Castle National Monument for the month of June, 1945.

Visitors this month, 425; travel year to date, 2,242.

General Improvement of the Black Canyon Highway providing a short-cut from Phoenix to the Verde Valley and Flagstaff appears to be virtually assured. Appropriations have been made to complete the survey and the State Highway Commission has budgeted nearly \$500,000 for surveys, reconstruction, and surfacing the section between Phoenix and Rock Springs. The Phoenix Chamber of Commerce has designated development of the Black Canyon Highway the No. 1 project for post-war construction. This road will be a seventy mile an hour highway that is being planned to meet Federal specifications. Undoubtedly it will come within a few miles of this monument.

Weather Although the temperature on a few days has exceeded one hundred degrees the weather has generally been cool for this time of year. The maximum was 106° and the minimum 40°. The mean maximum was 91.8° and the mean minimum 48.3°. No moisture has fallen since May 6 and our fire hazard is extreme.

Administration Considerable time was spent in checking our records, placing purchase orders, etc. before the close of the fiscal year.

The Custodian's II-A Selective Service classification which expired May 6 was renewed until November 11.

Custodian Bright was relieved at Tuzigoot National Monument on May 29, and June 5, 13, and 19.

Maintenance The drain boards and cabinet tops in Residence No. 1 were sanded and varnished. Window shades for all windows in both residences were repaired and Venetian blinds were ordered for the living rooms.

At various places fire lanes have been cut through the dry fox-tail in the creek bottom.

Our nine picnic tables were repaired and painted brown.

A pick-up load of flagstones was hauled from Sedona to complete the walk between the residences.

A photograph taken at Washington was included from December 1940.

With reference to the photograph,

Use of Monument Facilities By The Public Travel for the month was 425, an increase of 173 over June of last year. Total cars were 115 with 93 cars from Arizona. Nineteen states and Canada were represented. There were 132 guide tickets sold; tax but no tickets, 10; children who climbed free, 19; members of the armed forces 23 of whom 19 went through the Castle. Total revenue collected, \$40.10.

Guide Service Total contact hours, 81.50; Hastings, 48.75; Leding, 32.75. Ruins trips totaled 53 for 180 visitors and 313 visitors saw the museum in 70 groups. There were 7 picnic parties including 35 people and one party of two camped over night.

Protection All the boundary fence was patrolled and found to be in good order.

"No Smoking Please" signs have been posted. One was placed near the parking area and another near the visitor register stand.

National Park Service Visitors Chief Landscape Architect Vint and Regional Landscape Architect Cornell arrived on Sunday, June 3. They took the regular guided trip through the Castle with a party of visitors and then inspected the area generally.

Regional Forester Ratcliff arrived June 10 and gave us some pointers on our fire prevention problems.

Interpretation Our study collection includes more than two dozen snakes and lizards caught by Earl Jackson and preserved in 70% ethyl alcohol. Wherever it was attaining an amber color it was replaced with new stock.

Visitor Reaction To The Interpretive Program After studying the life of an Indian cliff-dweller, visitors often remark that they can go home and be better satisfied with what they have.

Projects For Ensuing Month We plan the following: 1. Repaint the pit toilets on the picnic grounds and the paint shed. 2. Repaint the thermometer box. 3. Install fire-place grills on picnic grounds.

Homer F. Hastings,
Custodian.

1. The following information was obtained from the records of the Department of the Interior, Bureau of Land Management, regarding the land owned by the United States in the State of Alaska:

Early in the second year of life, 12 NO groups. There were 7 female patients including 35 people and one female judge totaled 45 for 244 patients and 118 visitors was the census. Coldest Period Total amount of time, 11.80; activities, 45.77; feeding, 85.78.

Preparation: All the necessary papers were prepared and found to be in good order.

"The Landing Place" - Along have been written. The one placed near the
 center of the book and the other near the end.

and then the subject was asked to read the text of the letter and to sign it. The subject was then asked to read the text of the letter and to sign it. The subject was then asked to read the text of the letter and to sign it.

RECEIVED
JAN 10 1964
U.S. DEPARTMENT OF AGRICULTURE
WASHINGTON, D.C.

Interpretation - On early collection inclusion were then two color values and a third change in color between and measured in 700 nm light.

to be taken into account in the future.

Productive for several months. We have the following: 1. Report of the
Committee on the Electric Division and the Joint Committee. 2. Report of the
Committee on the Electric Division. 3. Report of the Joint Committee.

Natural Bridges..... NATIONAL MONUMENT

Blanding, Utah

June 28, 1945

MEMORANDUM for the Regional Director:

The following is a narrative report for Natural Bridges National Monument for the month of June, 1945:

GENERAL: The area was opened on June 23rd with the employment of O. B. Stewart of Moab, Utah, a returned veteran.

INSPECTIONS: A trip was made to this area on June 6th to check on road conditions, etc. From June 23rd to 25th a thorough inspection was made of area in company with the new man in charge for the season.

ROADS: The State of Utah has graded the road from Blanding to within one quarter mile of headquarters and it is in good condition. Some work will be necessary on the hill above headquarters in order to put this section in good shape.

TRAILS: All trails were covered on June 23rd and it was found that the steeper sections were washed out in various places and will require considerable work.

SIGNS: Signs on the approach road from Blanding are all in place but will require painting. Several signs at the area will have to be changed as they use the old names of "Edwin", "Augusta", and "Caroline" for the bridges instead of "Owachomo", "Sipapau", and "Kachina". Will try to accomplish these jobs during this season.

TRAVEL: A check of the visitor register showed that a total of 44 people visited the area from October 28, 1944 to June 23, 1945.

Washington, D.C.
April 12, 1944

Memorandum for the National Director:

The following is a narrative report for National Monument
National Monument for the month of April, 1944:

General: The year was opened on April 12th with the opening of O.
H. Stewart of New York, D.C., a returned volunteer.

Inspection: A visit was made to this area on April 12th to check on road
conditions, etc. From there I went to the nearby inspection area and
of area in company with the new man in charge for the section.

Remarks: The house of which has graded the road from Washington to
one quarter mile to headquarters and is in good condition. From there
will be necessary on the hill above headquarters in order to get into
section in good shape.

Trail: All trails were covered on April 12th and it was found that the
steep sections were washed out in various places and will require con-
siderable work.

Notes: Signs on the approach road from Washington were all in place and will
require painting. Several signs on the area will have to be changed on May
and the old signs of "Road", "Highway", and "Caution" on the bridge between
of "Caution", "Highway", and "Road". Will try to rearrange these signs
during the season.

Travel: A check of the station register showed that a total of 44 people
visited the area from October 25, 1943 to April 12, 1944.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

Navajo NATIONAL MONUMENT

Tonalea, Arizona

June 27 1945.

MEMORANDUM for the Director,
Region Three.

Follows the monthly report for June, 1945.

WEATHER CONDITIONS: High winds still prevail and the country is very dry. Rain and snow on the 10th brought .17 inch precipitation at which time the ground and trees were covered with snow. Less than 24 hours later summer was here with a high of 80 degrees. The low was 32 on the 10th with a high of 90 on the 21st.

A meteor was observed on the night of the 19th travelling in a northwesterly direction. It is reported to have been seen as far south as Douglas.

MAINTENANCE: The contact station and all wood work on the exterior of the residence were given a coat of linseed oil. All road signs were painted. The antenna masts for the radio were made and painted and are ready to be installed. Inspection trips were made to Kiet Siel and Betatakin.

APPROACHES TO MONUMENT AREA: In spite of the fact that the Indian Service ran their blade over all approach roads they are still rough and sandy. No one should travel this country without a shovel. They won't be any better until we get some rain. Six man days were spent on the road to Segi Point and on the trail. It would be next to impossible for a touring car to go to Segi Point and back now as most of it is sand. Drains were opened up places filled in that had washed out during the winter.

ACCESSIONS: A copy of FLOWERING PLANTS AND FERNS OF ARIZONA, by Kearney and Peebles was received.

INTERPRETATIVE SERVICE: 7 visitors in 2 parties were conducted to Betatakin Ruins. 9 visitors saw the ruins from Betatakin Point via Sandal Trail.

Captain

VISITORS: Notable among the visitors were, Randall Henderson, editor of DESERT Magazine, now on inactive duty from the armed forces and Major Weldon Heald, a frequent contributor to NATURE, DESERT and others. They were on their way to Mexican Hat to take the river trip to Lee's Ferry.

FOREST FIRE PROTECTION: Daily fire patrols are being made.

W.W. Wilson,
Custodian.

Organ Pipe Cactus National Monument

Ajo, Arizona

June 25,

45.

19.

MEMORANDUM for the Regional Director,
Region Three.

There follows a report of activities in Organ Pipe Cactus National Monument for the month of June, 1945.

WEATHER:

Summer has come to Organ Pipe with several days over a hundred, high being reached on June 19 at 107 degrees. Minimum for the month was 49 on the 1st. It is getting very dry on the monument as we have had no rain during May and June and only .02 inches in April.

TRAVEL:

Travel was slightly below last months figure, a total of 6923 bringing the total for the travel year to 49980.

GENERAL:

Our short wave radio was hooked up this month and put into operation but so far have not been able to contact the other monuments as they evidently are not ready to operate. Ours seems to be in good working order as some outside stations can be heard.

Over four ton of hay was hauled from near Casa Grande and other supplies and equipment purchased at the end of the fiscal year.

Our light plants was overhauled by mechanic Stonehocker and put back in operation. It is now working perfectly.

Some time was spent with Archeologist Caywood securing laborers to help him on the Tonto stabilization work.

Relief Ranger Reed spent two days on Organ Pipe securing some much needed photographs for the files.

One day was spent with Mr. Lusher of the U. S. Indian Service, Sells, Arizona, figuring status of Jose Juan Orosco, our Quitobaquito resident. Through an interpreter much interesting history of Quitobaquito was secured for the files.

The remainder of the time was spent on maintenance and routine work and keeping office work current.

Saguaro NATIONAL MONUMENT

Tucson, Arizona

June 26, 1945

MEMORANDUM for the Regional Director, Region Three.

There follows a report of activities in Saguaro National Monument for the month of June, 1945:

Weather. With no precipitation since early in April, the class of fire danger day was either moderate or high all month, depending solely on velocity of wind.

Projects. Rather than rebuild the old trail from Manning Camp to the Micah Tower, a new trail was constructed. The new trail is believed to be more than thirty per cent shorter.

Some work was done on several trails, but the main efforts are now concentrated on the Tanque Verde trail.

The area between the barn and cabin at Manning Camp is now in the process of being roofed.

There is no water in Happy Valley Middle so no trail work is being done where most needed. A tent, stove, supplies, fire tools, etc. have been packed to the site.

There is still some water at the dam site in Padrono Canyon so no work has been done there. However, it is believed this project will start immediately.

Bunks have been constructed in the cabin at Pack Base. The cabin, both inside and out, and the barn there have received at least one coat of paint. The septic tank is completed except for covering with earth.

Forest Protection. Marana Air Base will soon be closed. Word from Sen. Hayden to the newspapers indicated that it will not be put to other use. With our only source of men for a big fire going, and with all chance of getting good adult trail workers fading, several young ranch boys were hired. They all brought their own horses so we have something like a troop of cavalry on the mountain now. After the first lightning storm or two, some of these horses are going home and it won't be necessary to pack so much hay.

Personnel. We ~~have~~ have all the laborers allowed under the ceiling ~~for the first time since I have been here.~~ for the first time since I have been here. We only need a ranger.

Paul L. Desaubien

June 28, 1945

MEMORANDUM for the Regional Director
Region Three

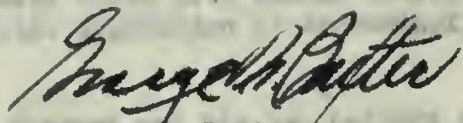

There follows the report of activities in Sunset Crater National Monument for June, 1945.

Visitors this month, 194; travel year to date, 648.

Two inspections trips were made to Sunset Crater during the month. Everything was in good shape except for indications that ice had been taken from the caves.

Visitor count was made on the actual number registered. Major Richard I. Bong and wife, Poplar, Wisconsin, one of America's outstanding war aces was registered at this Monument.

I attended the Seminar at the Museum of Northern Arizona when Dr. Harold S. Colton lectured on "Dating the Eruption of Sunset Crater". Dr. Colton's recent investigations show that the eruption probably took place between the years 1066 to 1076 A.D. This is later than previously estimated at 886 A.D.

SOUTHWESTERN NATIONAL MONUMENTS

Roosevelt Coolidge, ARIZONA

June 25.1945.

Memorandum for the Regional Director,
Region Three.

There follows the report of activities in Tonto National Monument, for
June, 1945.

Visitor Statistics: Cars, 94.

Instate, 43.

Outstate, 51.

Information, 10.

Armed Forces, 31.

Visitors, 327.

Ruins Trips, 52, people, 172.

Museum Groups, 88, people, 308.

Personnel time, Custodian, 92.5 hrs.

States represented, 22.

A small increase in visitor numbers over last month and all seemed pleased that they had stopped except one very young very bored engineer from the "East" WHO WAS bound for one of our oldest mines to "Straighten Them Out". After he had cast a jaundiced eye around the Museum, caustically remarked, "Looks Like This Stuff Came From An Old Incinerator". Hope the climate don't agree with him.

Park Service Personnel: Assistant Naturalist Caywood and two helpers arrived at 5.30 P.M., June 6 to start stabilization work on the upper and lower dwellings. Mechanic Stonehocker came in at 2 P.M., June 12, to do some welding in connection with the stabilization work and Ranger Reed arrived from Tumacacori, at 4 P.M, to spend some time getting photographs of the two dwellings &.

Weather: Almost continuous hot winds the entire month with summer temperatures prevailing during the day but unusually cool nights. Vegetation is exceedingly dry and the fire hazard very great.

General: Great activity here this month. Mr Caywood and his two helpers established their camp and gathered in the materials needed for stabilization work. I gave them as much help as my work would allow, also helped Reed get his equipment to and from locations suitable for his work.

Set two panes of glass in museum window and painted sash two coats.

Checked back-pumps to see that they were in working order and oiled and painted my supply of lady shovels. Built a cooler and table for the camp. The table will be painted and used temporarily under the trees by the museum.

Had trouble with the water line to Coopers tank, also had to repair the float.

Made a trip to Globe to take in a flat tire from the Naturalist's truck and to acquaint Mr. Caywood with the various places from which to obtain material. Brought back some of the supplies in my pickup. Made one other trip to Globe to get Bu-gas tank filled.

Took two and one half days of annual leave, the last of the month, to attend to some business in Coolidge.

Projects for July: Getting the Monument back in shape after the work here.

Edmund C. Gil

THE UNIVERSITY OF CHICAGO

UNITED STATES

NATIONAL PARK SERVICE

Tumacacori NATIONAL MONUMENT

Nogales, Arizona

June 26, 1945.

19

MEMORANDUM for the Regional Director,
Region Three.

There follows the report of activities in Tumacacori National Monument for June 1945.

WEATHER: The days are clear and hot but the nights are cool. Very few clouds have been seen in the sky over Tumacacori during this report period. Old time weather prophets of the Santa Cruz Valley swear by all that is good and holy that it is supposed to rain on San Juan's Day (June 24th.) but that date has passed without a drop. Now they set July 15th. as the deadline. I hope this last prediction is more accurate than the first.

VISITORS: The visitor figures at Tumacacori, if indicative of what is to come, might be alarming to anyone who thought it would be possible to efficiently handle post-war crowds with pre-war personnel and appropriations. Good travel is particularly noticable at this time of year, since visitation usually decreases sharply in June--but the increase has been steady for the past year. The visitor total for the fiscal year of 1945 is 7287, a 45.2% increase over the fiscal year of 1944.

The increase of June, 1945 over June, 1944 is 517 (total visitors for June this year, 784). Going back as far as June, 1939 we find that the largest June travel was 489 and that the average was 315.

We had two large parties of airmen from Davis-Monthan Field in Tucson this month; the military visitors totaled 131. But the total increase can't be accounted for by armed force travel--without that we still were considerably ahead of any June for the past six years.

USE OF MONUMENT FACILITIES: 631 visitors were guided through the mission and museum. Acting Custodian Reed took 42 trips through each, spending 1025 minutes in the mission and 980 minutes in the museum; Ranger Brewer took 66 trips, spending 2005 minutes in the mission and 1510 minutes in the museum.

The parties from Davis-Monthan Field totaled 58 on June 2, and 42 on June 24; the trips were sponsored by the Service Club of that field and army busses were used for transportation.

MAINTENANCE: The battle with weeds continues. Eventually the area between the administration building and the mission, the old enclosure east of the mission, a strip west of the mission and cemetery, the cemetery proper, and the area around the arastra and as far east as the warehouse will be completely cleared of weeds. At present about 50% of this work has been done. If I can get them all cut, raked and burned before the rains start, the new growth will be much easier controlled with Ammate.

The rose bushes in the patio were in bad condition from mildew. Ranger Brewer cut the plants back and sprayed them with a special preparation for this disease.

Subject: The 1954-55 season is the first year since 1947-48 that the total catch of salmon in the Columbia River has been less than 100,000 tons.

REPORT OF ACTIVITY

MONUMENT, ARIZONA. JULY 1934

On June 17th. the refrigerator in the custodians residence exploded. On June 19th. it was loaded into the monument pick-up and taken to Casa Grande for repairs. Mechanic Stonehocker disassembled the unit and discovered that the capacitor on the motor was of the old liquid filled type and due to excessive heating had built up enough pressure to cause the explosion. Custodian Bicknell communicated with headquarters with regards to funds for necessary repairs. Authorization has been given for the purchase of parts needed and this custodian is looking forward to having his butter served on a plate instead of in a bowl.

All paint necessary for redecorating the office, lobby and museum is now on hand. Painting has been delayed as it is felt that the weed control project is more urgent at this time. As soon as the weed program is finished, painting will get under way.

PHOTOGRAPHY: A trip was made to Organ Pipe Cactus the latter part of May for the purpose of making photographs in both black and white and color. A trip was also made to Tonto for the same purpose. As soon as the color shots are received from the processing laboratory, they and the black and white negatives and prints will be mailed to headquarters. At Organ Pipe Cactus, a trip was made into the back country west of the monument headquarters where some of the finest cactus grow. Naturalist Dodge was in Alamo Canyon on his recent trip and made photographs there. We did not go into Alamo as duplication of Mr. Dodges pictures might have resulted. At Tonto, a climb was made to both ruins as well as up the talus slope east of the upper ruin. Telephoto shots were made from this advantageous viewpoint. I returned via the Apache Trail where I obtained a number of color shots of the scenery.

NATURE NOTES: The bats at Tumacacori are on the increase! During the month as many as six very young ones have been observed on the mission floor. They soon died of starvation.

A Roadrunner has been very much in evidence in the area this month. He comes into the patio for water where he is becoming so accustomed to seeing people that he is now quite tame. On several occasions I have been in a very few feet of him.

-----TUZIGOOT----- NATIONAL MONUMENT

-----CLARKDALE, ARIZONA. P.O. BOX NO. 36-----

-----JUNE-----, 19.45

There follows the report of activities in Tuzigoot National Monument for June, 1945.

Visitors this month 423; travel year to date 2497.

Weather. There were 22 clear days - 8 partly cloudy - 1 cloudy. Strong winds on May 26, 27, 29 and 30 and June 3, 4, 5, 6, 8, 10, 16 and 25. The past month has been extremely dry with strong winds and dust prevailing.

Travel. Travel this month was higher than any previous month this year and an increase of 137 over May. Outstate visitors was largely accountable for the increase. Instate visitors numbered 304 and outstate visitors 119. There were a total of 129 cars with instate numbering 89 and outstate 40. There were 29 members of the Armed Forces who visited the monument. An increase of 12 over the previous month. A total of 10 visitors walked out to the monument.

N.P.S. Visitors. Chief Landscape Architect Vint and Regional Landscape Architect Architect Cornell on June 3. Problems of postwar planning and development were discussed.

Guide and Contact Service. Museum: 48 hrs, 10 mins; Field: 33 hrs, 40 mins. Total contact time of 81 hrs, 50 mins.

Personnel Time. Custodian Bright 74 hrs, 30 mins; Custodian Hastings 2 hrs, 30 mins; Ranger Leding 4 hrs, 50 mins. Hastings relieved on May 29 and June 19. Leding relieved on June 5 and 13.

Maintenance and Administration. Ordered and received 6 cylinders of Propane gas from Gallup Mercantile Company. Sent photographic identification board and letters to Chaco Canyon National Monument. Re-lettered and repainted more "Tuzigoot Monument" signs on entrance road to monument and on (Alternate Highway 89). Spent some time removing rocks and cement in Unit IV. Pulled weeds in parking area and from floors of rooms in ruins also made minor repairs to walls in ruins; minor road repairs were done on approach road, parking area and service area; gave doors and window frames of garage, quarters and museum a coating of linseed oil. Washed, cleaned, replaced rubber hose on fuel tank, cleaned air cleaner and tightened emergency brake cable on U.S. pickup 1-13858. Patrolled monument boundary fence and walked water pipe line to Clarkdale to check on leaks. Many hours were spent cleaning museum of dust. Also performed usual routine office work.

Edward W. Bright
Custodian.

----- 45

MEMORANDUM for the Regional Director
Region Three

There follows the report of activities in Walnut Canyon National Monument for June, 1945.

Visitors this month, 671; travel year to date, 2,625.

WEATHER: Weather continues to be dry and windy. Local residents say it is extremely cold for this time of year, since it has been freezing ice nearly every night recently.

GENERAL: Regional Forester Ratcliff visited the Monument on June 12 and talked over fire and forestry problems.

Gene Stonehocker came in June 17, leaving a sedan to be picked up later by someone from Santa Fe. I delivered this sedan to Ben Thompson in Flagstaff on the evening of June 25. Mr. Thompson was enroute to Grand Canyon.

Took Davy and Corky Jones to Wupatki National Monument on June 18. Went by way of Sunset Crater and Davy gave me information of boundaries, landmarks, etc. Enjoyed meeting Davy, and benefited by my visit with him.

VISITOR STATISTICS: 671 visitors arrived during the month. 59 of these were in uniform. In June 1944 there were 451 visitors, 65 in uniform, with a total for travel year of 2,079.

N.P.S. VISITORS: Harold Ratcliff, Regional Forester, Region Three. Mr. and Mrs. Gene Stonehocker and children, Casa Grande National Mon. Mr. and Mrs. Homer Hastings and girls, Montezuma Castle National Monument. Custodian Van Cleave, Wupatki National Monument. Mr. and Mrs. Bill Wilson, Navajo National Monument.

MAINTENANCE, IMPROVEMENTS AND NEW CONSTRUCTION: With a seasonal Ranger on the job, we have been able to accomplish quite a little the past month.

Set up two 45 foot antenna masts for radio. Installed wind charger and have radio hookups almost completed.

Cut weeds in parking area.

Fitted and installed two screen doors on residences.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

Gave a coat of hot linseed oil to screen doors and signs.
Have "Entrance to View Point" sign almost completed.
Started construction of stone building for coal storage and light plant, near residence No. 1.

Filed one hand saw.

Hauled a pickup load of coal on June 11. A snow in the nearby mountains made it impossible to keep the residences warm with only a fireplace for heat.

Painted stripes on fire tools.

Answer several requests for informational leaflets.

Made one inspection trip to east side of canyon. Several fence patrols were made on this side. Have had cattle on the Monument recently. One cattleman tore down a section of fence to drive his cattle out then made no attempt to repair it. More cattle came in through this hole before I discovered it.

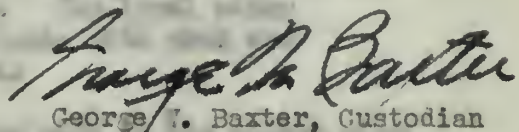

PROJECTS FOR ENJOING MONTH: Continue work on coal storage shed.

Haul coal.

Haul fireplace wood.

General maintenance, visitor contact and forest fire protection.

COOPERATIVE AGENCIES: We were called out to assist the Forest Service at noon yesterday on a fire about 4 miles west of the Monument. Ranger Dahm was initiated into the fine arts of forest fire fighting, having put in 19 hours on the fire.

George I. Baxter, Custodian

UNITED STATES
DEPARTMENT OF THE ARMY
HEADQUARTERS, WASHINGTON

Have a coat of red lined oil to screen house and alarm.
Have entrance to the house slightly elevated.
Planted observation of house building for coal storage and last
plant, coal resistance No. 1.
Filed one hand saw.
Installed a pickup load of coal in two 11. 1 foot in the early
morning and it is possible to have the resistance with only
fingered for work.
Placed yellow on the floor.
Added several measures for additional resistance.
Have one inspection trip to each side of house. Several fence
patrols were made on this side. Have had watch on the house and
ceiling. The resistance gave down a section of fence to have his outside
but then came to attack to house in. Have been seen in through
this side before I discovered it.

Planted for building: Resistance with an coal storage shed.
Small coal.

Small fireplace wood.
Several resistance, various contacts and found the protection.

COOPERATIVE MEASURES: We were called out to assist the police service
at some resistance on a fire about 4 miles west of the house. Another
unit was initiated into the area of house fire fighting. Level
but in 12 hours on the line.

MEMORANDUM for the Regional Director, Region Three:

TRAVEL MONTH, June 1945		TRAVEL YEAR TO DATE	
Visitors	6054	Visitors	26343
Cars	1137	Cars	5834
<hr/>			
ARMED FORCES USE			
Visitors	5986	Visitors	14206

Travel to our area shows a nice increase with Armed Forces Use increase leading. This is our largest June travel since 1942. Army use has been heavy due to several group picnics. A noticeable increase in travel is due to a leak, now corrected on suggestions of Assistant Regional Director Richey. Winds continue giving us road problems unusually late this year. The weather continues dry and hot. A seasonal Ranger was employed June 15 and delayed maintenance and repairs are being gradually completed. Ranger Knabenshue is planning on several months leave without pay enabling him to spend some time on the Coast.

No new word has been received regarding the Ordelt project as the dead line draws nearer. The local water situation is becoming more and more acute with ~~more~~ new restrictions being placed on all users.

A decided improvement has been made in the museum when Ranger Steel took it upon himself to rig up our heat motor thereby showing wind action on our sands. A small motor was rigged up on a turn table. It certainly adds to the museum and Paul has done a nice job.

It is hoped we will be able to fill Ranger Knabenshue's position shortly after the first in order to continue with our building repairs.

Regular checking and routine matters will probably occupy the entire time of our staff.

Our fiscal year ended with small balance in most accounts. Dry weather has increased fire hazards and several grass and brush fires have ~~occurred~~ occurred all around us. As yet none were within the monument. In one instance three of us assisted on a grass fire on public domain.

John W. Davis
Custodian.

as the first

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

~~WUPATKI~~ NATIONAL MONUMENT

~~Flagstaff, Arizona~~

~~June 26~~, 1945

MEMORANDUM for the Regional Director, Region Three.

There follows a summary of the activities within Wupatki National Monument for the month of June, 1945:

Visitors this month: 112; travel year to date: 357.

During the report period past, a total of 64 visitors were contacted at Wupatki Ruin, while only 48 additional registrations were made at the unattended Citadel register.

Weather: Maximum temperature for the month thus far has been 98 degrees (on the 21st), with a minimum record for the same period of 41 degrees on the 11th. Mostly clear, with no rainfall except on the evening of the 10th (0.14"). High winds most of the time with lots of dust and shifting cinders.

Note-worthy Visitors: Caywood left here the afternoon of the 1st after a brief inspection. Messrs. Vint and Cornell were here on the afternoon of the second looking over plans for new road and building construction. Mr. and Mrs. Aldous (Fish and Wildlife Service) were overnight guests on the 7th and 8th, during which time Mr. Aldous studied the problems of Antelope use of monument lands. S/Sgt. and Mrs. D. J. Jones (Custodian, Wupatki) visited "home" here on the afternoon and evening of the 18th; Custodian and Mrs. Baxter of Walnut provided transportation to the area. World War II ace of the South Pacific, Major Richard Bong and wife were visitors on the 17th. Louis Caywood returned here about noon on the 25th, and plans to stay here until the 29th on Ruins stabilization.

Ruins Stabilization: Work progresses, but slowly. Labor has become a big problem, but I have been afraid to relinquish any of the per diem positions in fear that if I should, more labor might immediately appear. This immediate short time program with a deadline to meet is a very unsatisfactory set-up for stabilization.

Truck Use: Several extra trips to town have been made this month, both with the pickup and the dump truck; hauling of supplies from Flagstaff and the gravel pits. Speedometers on both trucks are broken and will be repaired as soon as parts can be procured.

Projects for the coming month: If the stabilization program must cease with the start of the new fiscal year, I hope to find the time to make the long standing, much needed repairs to roofs and drains here in the residence.
